"The Federal Register—What It Is and How To Use It"

FOR: Any person who uses the Federal Register and the Code of Federal Regulations.

WHAT: Resumption of free Friday workshops presenting.

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHEN: October 13, 27; November 3, 17; or December 1, 15—from 9–11:30 a.m.

WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.

RESERVATIONS: Call Mike Smith, Workshop Coordinator, 202–523–5235.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays); by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

CORRECTION

Memorandum of September 26, 1978

Determination and Certification Under the International Security Assistance Act of 1978 Regarding Resumption of Full Military Cooperation With Turkey

In the heading of the Presidential memorandum of September 26, 1978, appearing at page 46821 in the FEDERAL REGISTER issue of October 11, 1978, a typographical error resulted in an incorrect reference to "[Presidential Determination No. 78-1818]." The correct reference is "[Presidential Determination No. 78-18]."

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Papaya Regulation 8, Amendment 3]

PART 928—PAPAYAS GROWN IN HAWAII

Regulation of Shipments

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment lowers the minimum weight requirement applicable to intrastate shipments of Hawaiian papayas from 14 ounces to 13 ounces for individual papayas. Such action recognizes the current and prospective marketing situation for Hawaiian papayas and is consistent with the composition of the crop.

EFFECTIVE DATE: October 9, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement and Order No. 928 (7 CFR Part 928) regulating the handling of papayas grown in Hawaii, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Papaya Administrative Committee, established under this marketing order, and upon other information, it is found that this amendment will tend to effectuate the declared policy of the act.

The amendment reflects the Department's appraisal of the current and prospective demand for fresh intrastate shipments of papayas grown in Hawaii. Less restrictive size requirements for such fruit are consistent with the character of much of the fruit available for fresh intrastate shipment. The amendment is designed to permit movement of available supplies of papayas consistent with the interest of producers and consumers.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and the amendment relieves restrictions on the handling of papayas grown in Hawaii.

In § 928.308 (Papaya Regulation 8; 42 FR 65133; 43 FR 19813; 43 FR 27775) the provisions of paragraph (a)(1) are amended to read as follows:

§ 928.308 Papaya Regulation 8.

(a) • • •

(1) During the period October 9 through December 31, 1978, to any destination within the production area unless said papayas grade at least Hawaii No. 1, except that the allowable tolerances for defects shall be 5 percent: Provided, That not more than 3 percent shall be permitted for serious damage, not more than 1 percent for immature fruit, and not more than 1 percent for decay: Provided further, That such papayas individually weigh not less than 13 ounces.

• • • • • •

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: October 6, 1978, to become effective October 9, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-28797 Filed 10-11-78; 8:45 am.]

[3410-04-M]

Title 9—Animals and Animal Products

CHAPTER II—AGRICULTURAL MARKETING SERVICE (PACKERS AND STOCKYARDS), DEPARTMENT OF AGRICULTURE

PART 203—STATEMENTS OF GENERAL POLICY UNDER THE PACKERS AND STOCKYARDS ACT

Posted Stockyards; Rate Orders

AGENCY: Packers and Stockyards—Agricultural Marketing Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This action revokes statement of general policy 203.11 (9 CFR 203.11) vacation of rate orders under the Packers and Stockyards Act. This action is necessary to remove provisions that are not in consonance with the Department's policy of allowing stockyard operators and market agencies to competitively determine the level of their rates and charges absent valid objections from affected rate payers and with recently enacted legislation permitting the filing of percentage tariffs. A statement of general policy which will replace the revoked statement will be issued that conforms to present departmental policy.

EFFECTIVE DATE: This policy shall be effective October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Jack W. Brinckmeyer, Chief, Rates, Services, and Facilities Branch, Livestock Marketing Division, Packers and Stockyards, AMS, USDA, Washington, D.C. 20250, 202-447-4366.

SUPPLEMENTARY INFORMATION: On October 6, 1978, Packers and Stockyards—AMS, issued a statement of general policy which provides that the agency's review and approval of the rates and charges at livestock markets is exercised only if valid complaints are received from users of the services furnished at the markets or there are other compelling circumstances warranting such review. At the present time there are seven basic rate orders applicable to the operations at seven posted stockyards, which were

V 43 / 198 0 C 12 78

issued less than ten years ago. The rate orders were prescribed after hearings in which there was minimal public objections to market originated rate proposals. Under the statement of general policy 203.11 petitions to dismiss or vacate a rate order are entertained only after the order has been in effect for 10 years. The provisions of § 203.11 are not in consonance with the current policy of promoting competition in rates in that the markets subject to the basic rate order are not free to determine the level of rates they wish to assess while other market operators are free to set their own rates. To place all stockyard operators on the same basis and release those under a basic rate order from more stringent procedures, statement of general policy 203.11 is revoked. A statement of general policy replacing the present provisions which conforms to present Departmental policy and recently enacted legislation will be issued.

The Department has fully explored its rate regulation program. It held public hearings at seven locations across the United States, requesting views and comments on a proposed policy statement and revisions of the regulations. Also, hearings were held before the Livestock and Grain Subcommittee of the House Agriculture Committee concerning rate regulation at posted stockyards and the rate provisions of the Act have been amended. Because of this current exhaustive review and because the action taken eliminates a restriction, Chas B. Jennings, Deputy Administrator, Packers and Stockyards-AMS, has determined that a further public comment period will not be necessary and would unnecessarily delay the implementing of this aspect of the new rate policies under the Act. Furthermore, if petitions to dismiss such rate orders are filed under the new policy, notice of such petitions will be published in the FEDERAL REGISTER pursuant to the applicable rules of practice (9 CFR 202.37 (b)).

Accordingly, § 203.11 is revoked.

Dated: October 6, 1978.

CHAS B. JENNINGS,
Deputy Administrator,
Packers and Stockyards-AMS.

§ 203.11 [Revoked and reserved].

Section 203.11 is revoked.

Section 203.11 is reserved.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Revision 6, Amendment 20; Revision 3, Amendment 12]

PART 120—BUSINESS LOAN POLICY

PART 122—BUSINESS LOANS

Improvements to SBA Blanket Guaranty, Correction

AGENCY: Small Business Administration.

ACTION: Correction.

SUMMARY: This corrects a final rule published in the FEDERAL REGISTER on September 28, 1978 (43 FR 44470).

DATES: Effective October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Timothy F. O'Leary, Chief, Programs and Systems Division, 1441 L Street NW., Washington, D.C. 20416. 202-653-6429.

In FR Doc. 78-27221 appearing at page 44470 in the issue for Thursday, September 28, 1978, in Item 1 of the amending instructions, in the first line "Section 120.3(b)" should read "Section 120.3(b)(1)." In item 2 of the amending instructions, in the first line, "Section 122.10(b)" should read "Section 122.10(b)(1)."

OLETA F. WAUGH,
Federal Register Liaison Officer.

OCTOBER 5, 1978.

[4910-13-M]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-NE-12; Amdt. 39-3315]

PART 39—AIRWORTHINESS DIRECTIVES

Pratt & Whitney JT8D-1, -1A, -1B, -7, -7A, -7B, -9, and -9A Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that requires a third-stage turbine blade displacement inspection and installation of improved blade retention rivets and washers on JT8D model engines. The AD is needed to prevent third-stage turbine blade retention failure which could result in failure of the low turbine shaft and/or penetration of engine casings by turbine blade and vane debris.

DATES: Effective date, December 20, 1978; compliance schedule, as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from Pratt & Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Hartford, Conn. 06108.

A copy of the service bulletin is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket, Office of the Regional Counsel, New England Region, 12 New England Executive Park, Burlington, Mass. 01803.

FOR FURTHER INFORMATION CONTACT:

Jay J. Pardee, Propulsion Section (ANE-214), Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803, telephone 617-273-7347.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal aviation regulations to include an airworthiness directive requiring a third-stage turbine blade displacement inspection and installation of improved blade retention rivets and washers was published in the FEDERAL REGISTER at 43 FR 22374. The proposal was prompted by reports of third-stage turbine blade retention device failures resulting in blade loss and penetration of the engine casings and fan ducts and, in some cases, separation of the low turbine shaft. The low turbine shaft failure occurs when it contacts the high turbine shaft inner wall and a machining action takes place. Contact between the shafts is caused by a high rotating unbalance load applied to the low turbine shaft following loss of third-stage turbine blades.

Since this condition is likely to exist or develop in other engines of the same type design, the AD requires repetitive blade displacement inspection and eventual installation of improved blade retention rivets and washers. The blade displacement inspection will be required by Pratt & Whitney Aircraft Service Bulletin No. 4592. Engines incorporating the older service repair rivet, P/N 618749, in accordance with Pratt & Whitney Aircraft Service Bulletin No. 1903, are not subject to the blade displacement inspection requirement.

The blade rivet failures have occurred randomly with respect to operating time, and no specific time interval can be identified for incorporation of improved blade retention rivets. The compliance date of June 30, 1980, is therefore based on availability of replacement parts and the earliest possible operator maintenance schedule. The blade displacement inspection is required until the improved retention rivets are installed and will be done initially at 3,000 hours since installation of third-stage turbine blades in the third-stage turbine disk and every 1,000 hours thereafter. This interval is based on known failure statistics.

Interested persons have been afforded an opportunity to participate in the making of the amendment.

One commentator stated the 0.032-inch blade displacement criteria, in the NPRM, was unnecessarily restrictive and should be revised to allow continued operation with blades displaced up to 0.117 inch. The commentator based the proposal on a more frequent inspection interval and a blade displacement rate of 0.0273 inch per 60 flight-hours for its fleet.

The FAA has given this comment careful consideration and does not agree with the commentator. The 0.032-inch blade displacement criteria was selected after review of the entire JT8D fleet blade displacement failure statistics, inspection method accuracy, and fleetwide displacement rates. The rate of blade displacement, upon which the commentator's proposal is based, has been found to vary from engine to engine depending on the unknown amount of blade shroud notch wear, retention rivet tightness, and other effects related to amount of operating time on the assembled rotor. Therefore, the FAA still considers the 0.032-inch blade displacement criteria, as proposed in the NPRM, the most appropriate displacement criteria for this AD in terms of safety.

Subsequent to the issuance of the NPRM, the manufacturer, Pratt & Whitney Aircraft, has developed and included in the JT8D maintenance manual an alternate borescope displacement inspection procedure. This procedure utilizes a rigid, rather than flexible, borescope which provides third-stage turbine blade root platform position information relative to adjacent blade root platforms. The FAA concurs with this alternate procedure, and the final rule includes provisions for this inspection method. In addition, minor editorial changes have been made for clarity.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of part 39 of the Federal aviation regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

PRATT & WHITNEY AIRCRAFT: Applies to Pratt & Whitney Aircraft JT8D-1, -1A, -1B, -7, -7A, -7B, -9, and -9A turbofan engine models not incorporating third-stage turbine blade retention rivets, P/N 759351 or P/N 618749.

Compliance required as indicated unless already accomplished.

To prevent third-stage turbine blade rivet failure which could result in failure of the low turbine shaft and/or noncontainment of turbine blade and vane debris, accomplish the following:

1. Inspect engines for proper position of the third-stage turbine blade in the disk blade slot in accordance with the procedures in the Pratt & Whitney Aircraft JT8D Maintenance Manual, P/N 481671, Section 72-00, Borescope or Radioisotope Inspection of Third-Stage Turbine Blade, or equivalent means approved by the Chief, Engineering and Manufacturing Branch, New England Region, prior to the accumulation of 3,000 hour's time in service since installed in disk or within the next 600 hours' time in service after the effective date of this AD, whichever is later. Engines with no measurable third-stage turbine blade mismatch or displacement must be reinspected every 1,000 hours' time in service thereafter. Engines with third-stage turbine blade roots displaced axially more than 0.032 inch relative to the disk rear surface or engines with third-stage turbine blade root platform rear surface displaced axially more than 0.032 inch relative to an adjacent third-stage turbine blade root platform rear surface must be removed prior to further flight. Engines with third-stage turbine blade mismatch or axial displacement 0.032 inch or less shall be subject to 300-hour repetitive displacement inspections. Engines with third-stage turbine blade mismatch confirmed by an initial displacement inspection and two 300-hour repetitive displacement inspections during which there is no change in blade position, indicating blades were mismatched at last assembly, may then revert to the 1,000-hour repetitive inspection interval.

NOTE.—a. Mismatch of the blade relative to the disk or the blade root platform rear surface relative to an adjacent blade root platform rear surface is the result of manufacturing tolerance buildup.

b. Displacement of the blade is axial movement of the blade relative to its position when originally installed.

c. A piece of 0.032-inch safety wire may be used with the borescope technique as a guide to determine the position of the blade relative to the disk rear face or the blade root platform rear surface relative to an adjacent blade root platform rear surface.

d. The rigid borescope and radioisotope inspection methods provide blade displacement information by comparing one blade root platform rear surface to an adjacent blade root platform rear surface. The flexible borescope inspection method provides blade displacement information by comparing the blade root with the disk rear surface.

2. Install by June 30, 1980, improved third-stage turbine blade retention rivets, P/N 759351, in accordance with Pratt & Whitney Aircraft Service Bulletin No. 4592, Revision 1, dated August 20, 1976, or later revision approved by the Chief, Engineering and Manufacturing Branch, FAA, New England Region.

Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, New England Region, may adjust the inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

The manufacturer's alert service bulletin identified and described in this directive is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Pratt & Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Hartford, Conn. 06108. This document may also be examined at the Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. An historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at New England Region.

This amendment becomes effective December 20, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The incorporation by reference provisions of this document was approved by the Director of the Federal Register on June 19, 1967.

Issued in Burlington, Mass., on October 3, 1978.

ROBERT E. WHITTINGTON,
Director, New England Region.

[Airspace Docket No. 78-EA-37]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone: Lakehurst, N.J.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule will alter the Lakehurst, N.J., control zone. This alteration will permit changes in the daily time of control by publication in the notices to airmen. This is needed in the interest of more flexible utilization and scheduling of aircraft by the commanding officer of the naval facility.

EFFECTIVE DATE: 0901 G.m.t., November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, JFK. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3091.

SUPPLEMENTARY INFORMATION: The FAA published a notice of proposed rulemaking in the FEDERAL REGISTER on Thursday, June 29, 1978, on page 28207. Interested parties were given time in which to submit comments on the proposal. There were no objections.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, subpart F of part 71 of the Federal aviation regulations (14 CFR part 71) is amended, effective 0901 G.m.t., November 2, 1978, as published.

(Secs. 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Issued in Jamaica, N.Y., on September 28, 1978.

WILLIAM E. MORGAN,
Director, Eastern Region.

1. Amend § 71.171 of part 71 of the Federal aviation regulations by adding the following to the description of the Lakehurst, N.J., control zone: "or during the specific dates and times established in advance by a notice to airmen. The effective date and time will thereafter be continuously published in the airport/facility directory."

[Airspace Docket No. 78-WE-17]

PART 73—SPECIAL USE AIRSPACE

Redesignation of Ajo, Ariz., Restricted Area; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: In a rule published in the FEDERAL REGISTER of August 21, 1978 (43 FR 36896) the amendatory action to divide the Ajo, Ariz., Restricted

V 43 / 198 0 OCT 12 78 UM1

Area, inadvertently omitted rescission of the original area and inclusion of the east area. This correction includes the omitted action to the amendatory language of this docket.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER IMFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The FEDERAL REGISTER Document 78-23449 was published on August 21, 1978 (43 FR 36896) with an effective date of November 2, 1978, and divided the Ajo, Ariz., Restricted Area R-2301 into two areas, R-2301W and R-2301E. Action is taken herein to include in the amendatory language of the docket the description of R-2301E and the deletion of R-2301.

ADOPTION OF THE CORRECTION

Accordingly, pursuant to the authority delegated to me by the Administrator, FR Doc. 78-23449 as published on August 21, 1978 (43 FR 36896) is amended in the ADOPTION OF THE AMENDMENT by adding, between "as follows:" and "R-2301W" the following: R-2301 Ajo, Ariz. Title and text is deleted.

R-2301E Ajo East, Ariz., is added as follows:

R-2301E AJO EAST, ARIZ.

Boundaries. Beginning at lat. 32°50'25" N., long. 112°48'00" W.; thence direct to lat. 32°11'30" N., long. 112°56'45" W.; thence direct to lat. 32°11'30" N., long. 113°05'30" W.; thence direct to lat. 31°58'00" N., long. 113°05'30" W.; along the United States-Mexican border to the intersection of the United States-Mexican border and long. 113°30'30" W.; thence direct to lat. 32°44'15" N., long. 113°41'05" W.; thence direct to lat. 32°45'50" N., long. 113°34'30" W.; thence direct to the point of beginning.

Designated altitudes: Surface to flight level 800.

Time of designation: Intermittent.

Controlling agency: Federal Aviation Administration, Albuquerque ARTC Center.

Using agency: Commander, Luke AFB, Ariz.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)), sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document involves a regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on October 3, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

Title 19—Customs Duties

[T.D. 78-381]

CHAPTER I—U.S. CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

PART 4—FEE SCHEDULE FOR VESSEL SERVICES

Navigation Fees

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: The Customs Service charges and collects fees under several statutes for specific services provided to vessels by Customs officers. Because the fees do not cover the costs of providing the services, and to give the Secretary of the Treasury discretion to set fees sufficient to cover the costs, the statutes have been repealed. This notice informs the public that until a new schedule of fees is established to return to the Government the approximate costs of the services, Customs will continue to charge and collect the fees presently provided in its regulations.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerry Laderberg, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5706.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pub. L. 95-410, the "Customs Procedural Reform and Simplification Act of 1978," approved October 3, 1978 ("the Act"), repealed sections 2654, 4381, 4382, and 4383 of the Revised Statutes of the United States (19 U.S.C. 58; 46 U.S.C. 329, 330, and 333), the statutory authority under which Customs has been charging and collecting fees for specific services provided to vessels by Customs officers. These fees designated as "Navigation Fees" in § 4.98, Customs Regulations (19 CFR 4.98), are as follows:

Fee No	Description of services	A	B
1	Entry of vessel, including American, from foreign port (19 U.S.C. 58):		
	(a) Less than 100 net tons	$1.50	
	(b) 100 net tons and over	2.50	
2	Clearance of vessel, including American, to foreign port (19 U.S.C. 58):		
	(a) Less than 100 net tons	1.50	
	(b) 100 net tons and over	2.50	
3	Issuing permit to foreign vessel to proceed from district to district, and receiving manifest (46 U.S.C. 325, 330)	2.00	$0.10
4	Receiving manifest of foreign vessel on arrival from another district, and granting a permit to unlade (46 U.S.C. 329, 330)	2.00	0.10
5	Receiving post entry (19 U.S.C. 58, 46 U.S.C. 330)	2.00	2.00
6	Receiving official bond not otherwise provided for (19 U.S.C. 58)	0.40	
7	Certifying payment of tonnage tax for foreign vessels only (19 U.S.C. 58)	0.20	0.20
8	Furnishing copy of official document, including certified outward foreign manifest, and others not elsewhere enumerated (19 U.S.C. 58)	0.20	0.20

The fees in column A are those collectible on the Atlantic, Gulf, and Pacific coasts and on the Mississippi River and tributaries; those in column B are collectible on the northern, northeastern, and northwestern frontiers (Great Lakes, Lake Champlain, and St. Lawrence River).

Because these fees do not cover the costs of providing the services, section 214 of the Act authorizes the Secretary of the Treasury to establish a new schedule of fees to be charged and collected for furnishing these services. These fees are to be consistent with section 501 of the Independent Offices Appropriation Act, 1952 (31 U.S.C. 483a), the so-called "User Charges Statute," which provides that the costs of specific services for private interests shall be reimbursed to the Government.

A new fee schedule to replace the existing fee schedule in section 4.98 is now being prepared. It is anticipated that the fees to be charged and collected will be based upon the amount of time the average service in a specific area requires of a Customs officer in the third step of GS-11 plus an allowance for overhead costs. When completed, the new fee schedule will be published in the FEDERAL REGISTER and interested parties will be provided an opportunity to submit written comments before the new schedule is incorporated into the Customs regulations. Until the new fee schedule is effective, however, interim action is required so that fees may be charged and collected for the services provided.

ACTION

Until the new fee schedule becomes effective, Customs will continue to charge and collect the fees set forth in § 4.98, Customs regulations, for services provided to vessels by Customs officers.

AUTHORITY

(R.S. 251, section 501, 65 Stat. 290, Pub. L. 95-410, 92 Stat. 888 (19 U.S.C. 66, 31 U.S.C. 483a).)

DRAFTING INFORMATION

The principal author of this document was Charles D. Ressin, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

R. E. CHASEN,
Commissioner of Customs.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

PART 640—CERTIFICATION ACCEPTANCE

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule prescribes the regulations which provide an alternative procedure authorized by section 117 of title 23, United States Code, for administering Federal-aid highway projects not on the Interstate System. The procedure is an alternative to that otherwise prescribed in title 23, United States Code, and provides for processing projects by using State laws, regulations, directives, and standards and reducing Federal involvement in individual project actions.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph W. Burdell, Jr., Chief, Federal-Aid Division, 202-426-0442; or Ruth R. Johnson, Office of the Chief Counsel, 202-426-0781, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION: On January 9, 1978, the Federal Highway Administration (FHWA) published an interim rule (23 CFR part 640 at 43 FR 1328) on certification acceptance (CA). The effective date for the regulations was January 13, 1978. As indicated at that time, the CA regulations were again issued as interim regulations due to substantive changes that had been made from the version proposed in the notice of proposed rulemaking. The agency invited comments on the interim regulations.

Comments were received from eight agencies and organizations and two individuals regarding the interim rule. The comments were generally favorable toward the CA concept.

The Center for Auto Safety's comments expressed concern and disappointment that FHWA had not accepted more of the revisions it had urged. The center, however, refrained from taking issue with the regulations pending further developments in the litigation in progress regarding FHWA's acceptance of a Georgia certification in September 1974.

Several varied comments suggested editorial changes to the text of the regulations and these have been incorporated where appropriate. Most of the substantive comments were primarily addressed to three major areas: (1) The scope of an FHWA evaluation of a State's performance and resources to provide a basis for a finding of State capability, (2) the "less than $500,000" criteria for projects administered under a limited-coverage State certification, and (3) the requirement that a State certification include a listing and a copy of the State laws, regulations, directives, and standards marked to show coverage to accomplish policies and objectives of title 23, United States Code.

DISCUSSION OF MAJOR COMMENTS

The Illinois Department of Transportation commented that the new interim regulations have increased the complexity of the certification process by requiring a detailed review of a State's performance and resources. Section 640.109 was written to clearly specify an FHWA finding that the State highway agency has the capability to carry out projects in accordance with State requirements as a prerequisite to acceptance of either a full or partial coverage State certification. We believe this is a sound administrative practice.

With regard to detail, an attempt was made to be more specific on the materials which may be considered in making a "finding." With few exceptions, the reviews and reports listed have been previously made and, when aggregated and categorized, provide a comprehensive record of FHWA's ongoing evaluation of a State's performance and resources. Where additional reviews are necessary, the responsibility rests primarily with FHWA and should impose very little burden on the State.

Comments from the Illinois Department of Transportation and two individuals expressed concern with the $500,000 limitation in the limited-coverage State certification option described in § 640.107(d). We are cognizant that the dollar limit will make this option unattractive to some States, but all States have the alternative of requesting acceptance of either a full or partial coverage certification structured to meet their particular needs.

Although the possibility for manipulation exists whenever a dollar value is specified as a control, we do not envision administrative problems with the $500,000 limit. Should flagrant abuse occur, the FHWA has the authority to rescind acceptance of a State's certification.

Several comments took issue with the procedural requirement for sub-

V 43 / 198 0 OCT 12 78 UMI

mission of the State laws, regulations, directives, and standards marked to show coverage to accomplish the objectives of title 23 described in the interim regulations. The language of 23 U.S.C. 117 requires the Secretary, before accepting a State certification, to make a finding that projects will be carried out in accordance with State requirements which will accomplish the policies and objectives contained in or issued pursuant to title 23. We believe that submittal of a marked copy of State requirements would facilitate the finding. However, we have reconsidered the matter and decided that identification of pertinent State requirements will suffice. Experience has shown that this finding can best be accomplished through a cooperative State and FHWA effort.

The regulations have been revised to require that a State certification, providing full or partial coverage, contain a listing of applicable title 23 policies and objectives and citation of State laws, regulations, directives, and standards that will be applied to accomplish each of them. In making a finding the FHWA will rely on copies of State publications either previously furnished or made available by the State for inspection.

NOTE.—The Federal Highway Administration has determined that this document does not contan a significant proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

Issued on September 25, 1978.

JOHN S. HASSELL, JR.,
Deputy Administrator.

Part 640 of title 23, Code of Federal Regulations, is hereby amended to read as follows:

Sec.
640.101 Purpose.
640.103 Definitions.
640.105 Effect of certification acceptance.
640.107 Coverage.
640.109 Requirements for certification acceptance.
640.111 Content of State certification.
640.113 Procedures.
640.115 Evaluations.
640.117 Rescission.
Appendix A—FHWA reports.

AUTHORITY: 23 U.S.C. 101(e), 117, and 315; 49 CFR 1.48(b).

§ 640.101 Purpose.

The purpose of this regulation is to provide instructions for preparation and acceptance of State certification proposals to accomplish the policies and objectives of title 23, United States Code, using State laws, regulations, directives, and standards. Also covered are procedures for administering projects under certification acceptance and evaluating State performance.

§ 640.103 Definitions.

As used in this regulation:

(a) Action plan—A document describing the organization to be utilized and the process to be followed in the development of Federal-aid highway projects to assure public participation and consideration of social, economic, and environmental effects of such projects (23 CFR 795).

(b) Certification acceptance (CA)—the alternative procedure authorized by 23 U.S.C. 117(a) for administering Federal-aid projects not on the Interstate System.

(c) Secondary road plan—a written statement setting forth the standards and procedures adopted by the State highway agency to be used in the administration of Federal-aid projects on the Federal-aid secondary (FAS) system (23 CFR 642).

(d) State certification—a written statement prepared by a State highway agency setting forth the laws, regulations, directives, and standards it will use, or cause to be used, in the administration of certain highway projects.

§ 640.105 Effect of certification acceptance.

(a) Acceptance of a State certification permits a State to discharge certain responsibilities otherwise assigned to the Secretary under title 23, United States Code, for Federal-aid projects. A State may permit performance and project certification by capable local governments.

(b) Acceptance of a State certification does not constitute a commitment or obligation of Federal funds.

(c) Acceptance of a State certification does not preclude FHWA access to and review of a Federal-aid project at any time.

(d) Certification acceptance as an alternative procedure does not replace the fundamental provisions of law in title 23 with respect to the basic structure of the Federal-aid highway program, such as the authorization of funds (23 U.S.C. 102), Federal-aid systems (23 U.S.C. 103), apportionments (23 U.S.C. 104), programs (23 U.S.C. 105), designation of urbanized area boundaries (23 U.S.C. 101(a)), allocation of urban system funds (23 U.S.C. 150), Federal share payable (23 U.S.C. 120), toll roads and bridges (23 U.S.C. 129), and maintenance (23 U.S.C. 116). Acceptance of a CA proposal does not preclude application of any provision of title 23 that may be advantageous to the State.

(e) Nothing in this regulation shall affect or discharge any responsibility or obligation of the FHWA under any Federal law other than title 23.

§ 640.107 Coverage.

(a) Certification acceptance may apply to projects on all Federal-aid highway systems except the Interstate System. If other FHWA regulations and title 23 permit, projects not on a Federal-aid system may be administered under the provisions of an accepted State certification.

(b) The CA procedure shall not apply to transportation planning and research (23 U.S.C. 134 and 307), highway safety (chapter 4, title 23), or those public transportation projects not administered by FHWA under title 23.

(c) A State certification may provide for either full or partial coverage of the eligible systems, programs, phases of work, and classes of projects.

(d) A simplified CA application procedure is provided in paragraph (b) of § 640.109 of this regulation, should a State desire to limit coverage to projects which are both (1) determined to be a nonmajor action in accordance with 23 CFR 771.9 and (2) estimated to cost less than $500,000 for physical construction. Such limited-coverage State certification will apply only to the FHWA responsibilities for project plans, specifications, estimates, surveys, contract award, design, inspection, and/or construction.

§ 640.109 Requirements for certification acceptance.

(a) Acceptance of either a full or partial coverage State certification as described in § 640.107(c) will be based upon:

(1) A State request and identification of the State laws, regulations, directives, and standards that will accomplish the policies and objectives contained in or issued pursuant to title 23, United States Code, and

(2) An FHWA finding that the State highway agency has the capability to carry out projects in accordance with such State requirements.

(i) State laws, regulations, directives, and standards, either separately or collectively, must be aimed at accomplishing the following title 23 policies and objectives:

(A) Public involvement in the development of projects in the location and design stages,

(B) Application of appropriate design and construction standards,

(C) Emphasis on increasing safety in location, design, and construction of projects,

(D) Controls to assure quality and economy of construction and maintenance,

(E) Provision of adequate signing, marking, and traffic control devices,

(F) Minimizing adverse economic, social, and environmental impacts of any project,

(G) Equal employment opportunity, nondiscrimination on the basis of sex, and highway construction training,

(H) Competitive bidding and payment of prevailing wage rates on construction contracts, and

(I) Preservation of natural beauty.

(ii) The finding that the State highway agency has the capability to carry out project responsibilities will be based on an FHWA evaluation of the State's performance and resources.

(A) Evaluation of a State's performance shall be based on previously conducted reviews, including secondary road plan reviews, action plan reviews, safety reviews and reports, audit reports, reviews of State bidding practices, inspections in depth, and maintenance inspections. If these reviews are considered to be insufficient to form a conclusive judgment, they may be supplemented by inquiries or additional reviews in specific areas to determine the State's performance. These additional reviews may involve examination of a sample of typical projects in varying degrees of development.

(B) Evaluation of a State's resources shall be based on previously conducted reviews, including financial and administrative studies and reports, or on FHWA's general knowledge of the State and its highway agency. If this information is considered to be insufficient to form a reasonable judgment of State resource adequacy, inquiries or additional reviews may be made of the State highway agency. These inquiries or reviews may include such things as the availability of professional and technical personnel, training provided State personnel, control of contract administration, the planned reassignment of responsibilities and/or personnel if the State certification is accepted, and the State's internal review practices.

(b) Acceptance of a limited-coverage State certification as described in § 640.107(d) will be based on an evaluation of the State's operations and performance under an approved secondary road plan. These evaluations must support findings that:

(1) The policies and objectives of title 23 are being accomplished under the State's approved secondary road plan and action plan. Supplementary standards and procedures appropriate to the types of projects to be added to the coverage must provide similar assurance, and

(2) The State's performance under the plan has been found to be satisfactory in the last 4 years by an FHWA evaluation of the State's operation.

(c) A State certification may be accepted in whole or in part, depending on FHWA findings. Where minor deficiencies are found, acceptance may be conditioned or may exclude the affected State operations until the deficiences are corrected. Where deficiencies are found which are of such magnitude as to create doubt that the policies and objectives of title 23 would be accomplished, the State certification will not be accepted until the deficiencies are corrected.

§ 640.111 Content of State certification.

(a) The State certification shall include the following:

(1) The name of the State highway agency and the legal authority which permits such agency to accomplish the policies and objectives contained in or issued pursuant to title 23, United States Code,

(2) A statement of the systems, programs, phases of work, and classes of projects or combinations thereof that the State is including in the certification being submitted for acceptance,

(3) For submissions providing full or partial coverage of projects as described in § 640.107(c), a listing of the title 23 policies and objectives described in § 640.109(a)(2)(i) and citation of State laws, regulations, directives, and standards that will be applied to accomplish each of them. Any of the policies and objectives that are not applicable due to partial coverage may be omitted. For submissions providing limited coverage as described in § 640.109(b), supplementary standards and procedures which, together with the State's approved secondary road plan, will apply to the types of projects to be covered. Design standards include noise, geometric, hydraulic, structural (including pavements), and traffic control device standards. Construction standards include standard plans and standard specifications covering contract, construction, and material requirements, and

(4) A description of the State's methods for assuring local government knowledge of an compliance with State and Federal requirements where they perform services on projects administered under this alternative procedure.

(b) Existing assurances and formal agreements between the State and FHWA with respect to equal employment opportunity, current billing, and control of outdoor advertising will continue in full force and effect and may be incorporated by reference. Likewise, the State's approved action plan may be incorporated by reference.

(c) State certifications are to be signed by the chief official of the State highway agency and submitted through the FHWA Division Administrator.

§ 640.113 Procedures.

(a) Established procedures for system revisions, program actions, and record retention will not be affected by acceptance of a State certification.

(b) Authorization by FHWA to proceed with work on a CA project shall be in writing in response to a request from the State highway agency.

(c) If the State finds that exceptions to CA procedures or standards are appropriate on a project, such exceptions shall be brought promptly to the attention of the FHWA for consideration.

(d) A project agreement shall be executed as soon as practicable after authorization on form PR-2 (Federal-Aid Project Agreement), based on the best available cost estimate. Agreement amounts shall be modified promptly on Form PR-2A (Modification of Federal-Aid Project Agreement) upon the award of a contract for construction or when any other project action substantially changes total costs.

(e) Reports requested by FHWA are to be furnished by the State for projects administered under CA. (See appendix A.)

(f) The FHWA shall make an inspection of each physical construction project upon its completion. The State is to notify FHWA when a project is complete and/or ready for such inspection. Form FHWA 1446C may be used for this purpose.

(g) Final vouchers shall be submitted to the FHWA on form FHWA 1447, on which the State certifies that the plans, design, and construction for the project were in accord with the laws, regulations, directives, and standards contained in the State certification or such project exceptions as were approved by the FHWA.

(h) Revisions or amendments to State certifications will be made when necessary and processed as provided in § 640.111(c). The existing State certification is to be reviewed periodically to determine its adequacy in light of this regulation, the statutes in effect at the time of the review, and the operational reviews made by FHWA.

§ 640.115 Evaluations.

(a) Periodically, evaluations of the State's operations under CA shall be made. These evaluations shall include coverage of all areas of the State's administration of CA projects at least once every 4 years.

(b) If a failure to comply with Federal or State laws occurs and the State is unable or unwilling to effect corrective action of the deficiency, an evaluation report, together with recommendations of the regional office, shall be furnished to FHWA headquarters office for advice.

§ 640.117 Rescission.

The acceptance of a State certification may be rescinded at any time upon request of the State or if considered necessary by FHWA to protect the Federal interest. The rescission may be applied to all or part of the programs or projects covered in the State certification.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-4583]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule

SUMMARY: This rule lists communities participating in the national flood insurance program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATE: The date listed in the fourth column of the table.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the national flood insurance program (NFIP) at: P.O. Box 34294, Bethesda, Md. 20034, phone 800-638-6620.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The national flood insurance program (NFIP), administered by the Federal Insurance Administration, enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administration has identified the special flood hazard areas in some of these communities by publishing a flood hazard boundary map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

§ 1914.6 List of eligible communities.

[4210-01-M]

[Docket No. 4582]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Changes in Base Flood Elevations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the flood insurance rate map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Federal Insurance Administrator reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESS: The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the community listed in the fifth column of the table. Send comments to that address also.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The numerous changes made in the base (100-year) flood elevations of the flood insurance rate map(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection. Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may, at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities.

The changes in the base (100-year) flood elevations listed below are in accordance with 24 CFR 1916.8:

State	County	Location	Name and date of newspaper where notice was published	Chief executive officer of community	Effective date of modified flood insurance rate map	New community No.
Florida	Dade County		Miami Herald, Aug. 18, and Aug. 25, 1978.	Mr. Merrett Stierheim, county manager of Dade County, 73 West Flagler, Miami, Fla. 33130.	Aug. 25, 1978	125098B

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER W—MISCELLANEOUS ACTIVITIES

PART 258—INDIAN FISHING—HOOPA INDIAN RESERVATION

Rescission of Fishing Closure Order

AGENCY: Department of the Interior.

ACTION: Final rule; Cancellation of in-season adjustment No. 3, issued August 28, 1978.

SUMMARY: The rules governing Indian fishing on the Hoopa Valley Indian Reservation, as promulgated on July 7, 1978, and published in the FEDERAL REGISTER on July 13, 1978 (43 FR 30047), have since been modified by various in-season adjustment orders issued pursuant to § 258.12 of this part. In-season adjustment order No. 3, as issued and effective on August 28, 1978, placed certain restrictions on Indian fishing which are hereby rescinded.

DATE: Effective date: 12:01 a.m., October 11, 1978.

FOR FURTHER INFORMATION CONTACT:

Galen Buterbaugh, Deputy Associate Director—Fisheries, Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202-343-5333.

SUPPLEMENTARY INFORMATION: The Department adjusted the regulations appearing at 25 CFR Part 258 on August 8, 18 and 28 to be consistent with conservation management of the fishery. The major underlying concern addressed by the development, promulgation and enforcement and adjustment of the regulations has been the conservation of the resource. The adjustment of the regulations promulgated on August 18 recognized the smaller than usual size of the fall salmon run.

In-season adjustment No. 3 was issued on August 28, 1978. This adjustment stipulated the closure of all Indian fishing effort below the Highway 101 bridge, and all Indian commercial fishing above the bridge. The State of California initiated action to close the sport fishery on the Klamath River at the same time. These actions were taken in an effort to allow passage of sufficient numbers of chinook salmon to the spawning grounds to perpetuate the run. Biologists estimated at the time of closure that less than 10 percent of the anticipated run had entered the river.

Biologists now estimate that the run is more than 80 percent complete. It is expected that the 1978 chinook run will approximate 125,000 fish, or about 90 percent of expected numbers. Although the size of the returning population is reduced, the closure instituted by in-season adjustment No. 3 resulted in about 100,000 of the returning fish reaching the spawning area. With proper management of future offshore and river fishing efforts, this population will perpetuate the run. However, indiscriminate fishing pressure on this year class when they return as adults will further reduce the population. If sound management practices are instituted, including the restricting of fishing effort, both offshore and in the river, the population can be stabilized and a fishery maintained.

The 1978 run of chinook salmon is almost complete. There are sufficient fish in the spawning area to assure, with good management, that the population can be perpetuated. In our opinion reopening of the subsistence fishery at this time will not cause harm to the population.

Section 258.12 contemplates that in-season adjustment No. 3 would be effective upon issuance and remain effective until terminated. By their emergency nature, the issuance of these adjustments cannot be preceded by the notice and public participation procedures of the Administrative Procedure Act, 5 U.S.C. 553. To the extent that such requirements apply, it is hereby found that they are impractical, unnecessary, and contrary to the public interest.

Accordingly, effective at 12:01 a.m. on October 11, 1978, the closure instituted by in-season adjustment order No. 3 of August 28, 1978, will be rescinded. The rules published on July 13, 1978 (43 FR 30047) remain in effect. Under these rules, commercial fishing is prohibited [§ 258:11 (a), (b)] and Indian subsistence fishing is allowed above and below the Highway 101 bridge, pursuant to the restrictions found in [§ 258:11 (c)].

Issued this 6th day of October 1978.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

[USASCH Reg. 210-21]

PART 552—REGULATIONS AFFECTING MILITARY RESERVATIONS

Entry Regulations for Certain Army Training Areas in Hawaii

AGENCY: Department of the Army.

ACTION: Final rule.

SUMMARY: This section clarifies the entry procedures for certain Army training areas in Hawaii as defined herein. The clarification is needed to provide public notice that entry onto the training areas described herein is prohibited except as authorized under the procedures established by this section. Entry upon these training areas is restricted because the continued and uninterrupted use of these training areas by the military is vital in order to maintain and improve combat readiness. In addition, conditions exist within these training areas which could be dangerous to any unauthorized persons who enter these areas. The intended effect of this section is

V 43/198 0C 12 78 UM

to alert the public to the fact that entry onto these training areas in Hawaii is prohibited at all times except as authorized under the procedures established by this section. On August 1, 1978, this proposed rule was published in the FEDERAL REGISTER (43 FR 33749) with information that all comments pertaining thereto must be received by September 5, 1978. No comments were received during the comment period.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert N. Kittel, Major, JAGC, Assistant Staff Judge Advocate, 808-438-2287.

Dated: September 26, 1978.

WILLIAM MASTORIS, Jr.,
Colonel, Infantry
Chief of Staff.

Accordingly, 32 CFR part 552 is amended by adding a new § 552.25 to read as follows:

§ 552.25 Entry regulations for certain Army training areas in Hawaii.

(a) *Purpose.* (1) This regulation establishes procedures governing the entry upon certain Army training areas in Hawaii as defined by paragraph (d) of this section.

(2) These procedures have been established to prevent the interruption of the use of these Army training areas by any person or persons. The continued and uninterrupted use of these training areas by the military is vital in order to maintain and improve the combat readiness of the U.S. Armed Forces. In addition, conditions exist within these training areas which could be dangerous to any unauthorized persons who enter these areas.

(b) *Scope.* The procedures outlined herein apply to all individuals except for military personnel and civilian employees of the United States who in performance of their official duties enter the areas defined herein.

(c) *Definition.* For the purpose of this regulation, "certain Army training areas in Hawaii" is defined as:

(1) Makua Valley, Waianae, Oahu, Hawaii: That area reserved for military use by Executive Order No. 11166, paragraph (f)(3) of this section.

(2) Pohakuloa Training Area, Hawaii: That area reserved for military use by Executive Order No. 11167, paragraph (f)(4) of this section.

(d) *Procedures.* (1) Except for military personnel and civilian employees of the United States in the performance of their official duties, entry upon any Army training area described herein for any purpose whatsoever without the advance consent of the Commander, U.S. Army Support Command, Hawaii or his authorized representative, is prohibited (reference paragraph (f)(1) and (f)(2) of this section).

(2) Any person or group of persons desiring the advance consent of the Commander, U.S. Army Support Command, Hawaii, shall, in writing, submit a request to the following address:

Commander, USASCH, Attention: Chief of Staff, Fort Shafter, Hawaii 96858.

(3) Each request for entry will be considered on an individual basis weighing the operational and training commitments of the area involved, security, and safety with the purpose, size of party, duration of visit, destination, and the military resources which would be required by the granting of the request.

(e) *Violations.* (1) Any person entering or remaining upon any training area described herein without the advance consent of the Commander, USASCH, or his authorized representative shall be subject to the penalties prescribed by reference paragraph (f)(1) of this section, which provides in pertinent part: "Whoever, within the jurisdiction of the United States, goes upon any military, naval * * * reservation, post, fort, arsenal, yard, station, or installation, for any purpose prohibited by law or lawful regulation * * * shall be fined not more than $500 or imprisoned not more than 6 months or both."

(2) Moreover, any person who willfully violates this regulation is subject to a fine not to exceed $500 or imprisonment for not more than one (1) year or both as provided in reference paragraph (f)(2) of this section.

(3) In addition, violation of this regulation by persons subject to the Uniform Code of Military Justice (10 U.S.C. 801-940) is a violation of Article 92 of the Uniform Code of Military Justice.

(f) *References.* (1) Title 18, United States Code, section 1382.

(2) Internal Security Act of 1950, section 21 (50 U.S.C. 797).

(3) Executive Order No. 11166 of August 15, 1964 (3 CFR, 1964-1965 Comp., pp. 219-220).

(4) Executive Order No. 11167 of August 15, 1964 (3 CFR, 1964-1965 Comp., pp. 220-222).

CHAPTER IV—FEDERAL MARITIME COMMISSION

[General Order 7; Docket No. 73-64]

PART 528—SELF-POLICING REQUIREMENTS FOR SECTION 15 AGREEMENTS

Correction

AGENCY: Federal Maritime Commission.

ACTION: Correction.

SUMMARY: In FR Doc. 78-26488 appearing at page 42757 in the issue of Thursday, September 21, 1978, on page 42757, in the first column, in the "SUMMARY" paragraph, the last sentence is incorrect and should be changed to read: "A provision was added which prohibits rate-fixing agreements from preventing the release of self-policing body records to the Commission."

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20781; RM-2585]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations in Decatur and Huntsville, Ala.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action adds TV channel 54 at Huntsville-Decatur, Ala., so that a new station could be built in either Huntsville or Decatur, and deletes channel 23 from Decatur.

EFFECTIVE DATE: November 6, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Carol F. Foelak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: September 22, 1978.

Released: October 3, 1978.

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Huntsville and Decatur, Ala.), docket No. 20781, RM-2585.

1. In response to a petition filed by Pioneer Communications, Inc. ("Pioneer"), we adopted a notice of proposed rulemaking, 41 FR 17785 (April 26, 1976), which proposed adding TV channel 54 at Huntsville, Ala. After analyzing comments on that proposal, we issued a further notice of proposed rulemaking, 42 FR 62164 (November 30, 1977), proposing, as an alternative to assigning channel 54 at Huntsville, to assign it to Decatur and delete channel 23 at Decatur.

2. Comments responding to our further notice were filed by Pioneer; North Alabama Broadcasters, Inc. ("WHNT"), licensee of station WHNT-TV, channel 19 Huntsville; Rocket City Television, Inc. ("Rocket City"), licensee of station WAAY-TV, channel 31, Huntsville; Tennessee Valley Radio & Television Corp. ("WYUR"), licensee of station WYUR-TV, channel 48, Huntsville; the Association of Maximum Service Telecasters ("MST"); and C. H. Quick of radio station WMSL, Decatur. Reply comments were filed by Pioneer, WHNT; WYUR; MST; and American Family Corp. ("AFC"), proposed assignee of WYUR-TV.

3. *Background.* Huntsville (1970 pop. 139,282), seat of Madison County (1970 pop. 186,540), is located 37 kilometers (23 miles) northeast of Decatur, Ala. (1970 pop. 38,044), and 132 kilometers (83 miles) north of Birmingham, Ala. The four UHF television channels assigned to Huntsville are occupied by station WHNT-TV, channel 19 (CBS); WAAY-TV, channel 31 (NBC); WYUR (TV), channel 48 (ABC); and WHIQ (TV), channel *25 (noncommercial educational). Channel 23 is the only channel assigned to Decatur, and it is presently unoccupied.

4. In response to our original proposal to assign channel 54 at Huntsville, Pioneer stated generally that with three successful network affiliates in the Huntsville area, there is need for an independent program service, and that it would apply for channel 54 if assigned. The opponents, Huntsville TV stations, argued that Huntsville and Decatur are part of the same TV market and that since channel 23, Decatur, is vacant, no channel should be added at Huntsville, since this would foreclose development of channel 23. Further, they said, whether considering the population of Huntsville alone, with four existing TV assignments, or of Huntsville and Decatur together, with five existing assignments, an additional assignment is not warranted, based on the population criteria enunciated in the Sixth Report and Order on Television Allocations, 41 FCC 148, 169 (1952).

5. In reply, Pioneer alleged that channel 23 could not be developed as a competitive station, noting that WYUR's predecessor had operated channel 23 for several years before abandoning it in favor of channel 48, Huntsville. Pioneer stated that while the Huntsville stations transmit from sites 1,000 to 1,200 feet above sea level, Decatur, measured at the county courthouse, is only 588 feet above sea level. Channel 23 cannot operate from Monte Sano Mountain, where the Huntsville stations are, due to spacing requirements. Thus, because of the height advantage enjoyed by the Huntsville stations and the fact that receiving antennas would be oriented away from where channel 23 would have to be located, Pioneer believes that a competitive station could not possibly be developed on channel 23.

6. After analyzing these comments, we stated in our further notice that, in accordance with the sixth report and order, we would certainly place a higher priority on having a first operating station at Decatur than a fifth (fourth commercial) at Huntsville. Huntsville stations, with only a secondary obligation to serve Decatur, cannot substitute for a station at Decatur with a primary obligation to Decatur. However, we observed that there seemed to be no interest in channel 23, and if it is really impractical for use at Decatur, then it should be deleted. Further, channel 54 could be assigned to Decatur instead of Huntsville, or to both on a hyphenated basis, and still operate from Monte Sano Mountain where the other stations are. Thus, we proposed as an alternative to our original proposal which was to add channel 54 at Huntsville, to add channel 54 at Decatur instead and delete channel 23.

7. *Response to our further notice.* Pioneer reiterates its interest in assigning channel 54 at Huntsville, stating generally that there is a demand for additional TV service in Huntsville as shown by the fact that independent TV stations are viewed locally on cable and by the financial success of the existing Huntsville stations. As to the argument that Huntsville is not entitled to an additional assignment under the population criteria in the sixth report and order, Pioneer says that there is a large population served by Huntsville stations and that the population criteria in the sixth report and order have not been applied rigidly. Pioneer states that it has no interest in channel 54 at Decatur, stating that it wishes to locate near the Huntsville stations on Monte Sano Mountain and believing this would not be possible for a Decatur station. Pioneer also argues against a hyphenated assignment to Huntsville-Decatur since it believes that it would be necessary to maintain staffs and studios in two cities with such an assignment.

8. C. H. Quick of WMSL radio, Decatur, tells us that he owns the tower and antenna used by the defunct channel 23 station, having bought them with the intention of applying for channel 23. Because it would not be possible to get a network affiliation, he says that it has been difficult to put together a group to apply for it, but he assures us of his feeling that there is still interest in channel 23 in Decatur. On this basis, he urges that channel 23 not be deleted and channel 54 not be added at Huntsville since development of another Huntsville station would make it impossible ever to operate another independent station at Decatur in the same market.

9. Pioneer argues in its reply comments that the prospects of a future channel 23 station appear dim and thus we should not protect such a possible station by refraining from assigning channel 54 at Huntsville. It observes that Mr. Quick has had about 8 years to apply for channel 23 and has not yet been able to do so. Further, it questions whether his old antenna would meet FCC standards today and whether it is capable of transmitting an acceptable signal. Pioneer believes that the antenna has been used for many years and was causing problems to the station when it was taken out of service in 1969. The tower, it says, is the same short tower which proved inadequate for the defunct station.

10. MST commented that channel 54 at the Decatur reference point would be short-spaced by about 18 miles to the reference point for allocated, but unoccupied channel 47 at Tuscumbia, Ala., and a channel 47 station at Tuscumbia would have to be located, to avoid short-spacing to an unrestricted channel 47 assignment at Decatur, at least 13 miles beyond the common transmitter site of stations WOWL-TV and WFIQ-TV, Florence, Ala. At the closest point to Tuscumbia at which a channel 47 station might locate, the station would be subject to disadvantageous receiving antenna orientation vis-a-vis the other two stations. Thus, it urges that any channel 54 assignment to Decatur must be subject to a requirement that a site must be used

V 43 / 198 OCT 12 78 UM

which meets all mileage separation requirements.

11. Based on the information presented and the history of the matter, it seems clear that channel 23 is most unlikely to be activated at Decatur at any time soon. Continuing that assignment there serves no useful purpose and it will be deleted. In view of Pioneer's obvious intention to apply for a station and our concern over the lack of a station licensed to Decatur, we will assign channel 54 as a hyphenated assignment at Huntsville-Decatur. This does not mean, as Pioneer supposed, that an applicant for the facilities must maintain facilities and staffs in the two cities. It only means that an applicant may apply for a station to be licensed to either (or both). Thus, Pioneer can apply for Huntsville, if it chooses, and owe no greater duty to Decatur than would any other Huntsville station. It will be necessary to select a site that will not be short-spaced to channel 47 at Tuscumbia, Ala. Since there is reason to believe that a channel 54 station licensed to either Huntsville or Decatur would locate on Monte Sano Mountain, the highest spot around and the location of other area stations, this should present no problem. Assigning the channel on a hyphenated basis permits the filing of an application for Decatur if real interest in such an operation exists. However, if this is not the case, it will not impede a proposal for Huntsville. We think this course best serves the public interest.

12. *It is ordered*, That effective November 6, 1978, the television table of assignments (§ 73.606(b) of the Commission's rules) is amended as follows:

City	Channel No.
Decatur, Ala.	23
Huntsville-Decatur, Ala.	54

13. Authority for the action taken herein is found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

14. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083 (47 U.S.C. 154, 303, 307).)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER C—ACCOUNTS, RECORDS, AND REPORTS

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

PART 1249—REPORTS OF MOTOR CARRIERS

Annual Reports and Uniform System of Accounts for Class I and Class II Motor Carriers of Property; Correction

AGENCY: Interstate Commerce Commission.

ACTION: Correction notice.

SUMMARY: Parts 1207 and 1249 of the October 1, 1977, edition of Title 49, Transportation, Code of Federal Regulations, are not correct. In part 1207, notes D and E to the text of account 5930, Professional Services—Debit, contain errors. In part 1249, sections 1249.4, 1249.5, 1249.6, 1249.11, 1249.12 and 1249.15 were omitted. This notice corrects part 1207 and reinstates the appropriate sections in part 1249. The errors in part 1207 and omissions in part 1249 apparently stem from changes authorized in docket No. 36556, Annual Reports and Uniform System of Accounts for class I and class II Motor Carriers of Property. This appeared in the October 3, 1977, FEDERAL REGISTER (42 FR 53622). Notes D and E to account 5930 in part 1207 were correct in the FEDERAL REGISTER but incorrect in the CFR edition. The language amending part 1249 inadvertently omitted the paragraphs being reinstated by this notice.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Bryan Brown, Jr., Chief, Section of Accounting, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, phone 202-275-7334.

H. G. HOMME, Jr.,
Acting Secretary.

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

Account 5930, Professional Services—Debit, Notes D and E, is corrected to read as follows:

5930 Professional Services—Debit.

. . . . . .

NOTE D.—Regulatory expenses which by approval or direction of the Commission are to be spread over future periods shall be charged to Account 1512—Other Deferred Debits, and amortized by charges to this account.

NOTE E.—This account shall not be used to record charges for services by affiliated companies that are routine in nature. Such amounts shall be charged to the appropriate transportation related operating expense account.

PART 1249—REPORTS OF MOTOR CARRIERS

Part 1249 is amended by adding the following to the list of sections appearing at the beginning of the part:

. . . . . .

1249.3 . . .
1249.4 Annual reports of class III carriers of property.
1249.5 Annual reports of class I carriers of passengers.
1249.6 Annual reports of carriers of passengers other than class I carriers.
1249.11 Quarterly reports of passenger revenues, expenses, and statistics.
1249.12 Quarterly financial reports.
1249.15 Quarterly report of freight loss and damage claims.

The following sections are added after the text of § 1249.3—Annual reports of motor carrier holding companies:

. . . . . .

§ 1249.4 Annual reports of class III carriers of property.

Commencing with the year ended December 31, 1976, and for subsequent years thereafter, until further order, all class III motor carriers of property, as defined in § 1240.5 of this chapter, are required to file a uniform annual report in accordance with Motor Carrier Annual Report Form M-3 (property). Such report shall be filed in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before April 30 of the year following the year to which it relates.

§ 1249.5 Annual reports of class I carriers of passengers.

Commencing with reports for the accounting year of 1974, as described in part 1206 instruction 3 of this chapter, and thereafter, until further order, all class I motor carriers of passengers, as defined in § 1240.4 of this chapter, are required to file annual reports in accordance with Motor Carrier Annual Report Form MP-1 (passenger). Such annual report shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before March 31 of the year following the year to which it relates.

§ 1249.6 Annual reports of carriers of passengers other than class I carriers.

Commencing with the reports for the accounting year 1974, as described in part 1206 instruction 3 of this chapter, and thereafter, until further order, all motor carriers of passengers other than class I carriers, as defined in § 1204.4 of this chapter, are required to file annual reports in accordance with Motor Carriers' Annual Report Form MP-2 (passenger). Such report shall be filed in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before April 30 of the year following the year to which it relates.

§ 1249.11 Quarterly reports of passenger revenues, expenses, and statistics.

Commencing with reports for the quarter ended March 31, 1968, and for subsequent quarters thereafter, until further order, all class I common and contract motor carriers of passengers, as defined in § 1240.4 of this chapter, subject to part II of the Interstate Commerce Act, shall compile and file quarterly reports in accordance with motor carrier Quarterly Report of Revenues, Expenses, and Statistics (class I carriers of passengers), form QPA. Such quarterly reports shall be filed in duplicate in the Office of the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, within 30 days after the close of the period to which it relates.

§ 1249.12 Quarterly financial reports.

Commencing with reports for the quarter ending March 31, 1974, and for subsequent quarters thereafter, until further order, all class I and class II common and contract motor carriers of property as defined in § 1240.5 of this chapter, subject to part II of the Interstate Commerce Act, shall compile and file quarterly financial reports in accordance with the Quarterly Results of Operations Form QFR. Such quarterly reports shall be filed in duplicate in the Office of the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, within 30 days after the close of the period to which it relates.

§ 1249.15 Quarterly report of freight loss and damage claims.

Commencing with reports for the quarter beginning January 1, 1976, and for subsequent quarters thereafter, until further ordered, all common and contract carriers of property having annual operating revenues (including interstate and intrastate) of $1 million, or more, from property motor carrier operations, shall compile and file quarterly reports in accordance with Motor Carrier Quarterly Report of Freight Loss and Damage Claims, form QL&D. Carriers shall be exempt from filing such quarterly reports commencing with the year immediately following the third consecutive year in which a carrier fails to meet the minimum revenue qualification. Such quarterly reports (which need not include damage to shipments transported in armored truck service, as described in Classification of Motor Carriers of Property, 2 MCC 703, at page 712) shall be filed in duplicate in the Office of the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, within 40 days after the close of each quarter.

Title 50—Wildlife and Fisheries

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

Prohibition of Take Incidental to Commercial Fishing Operations—Northern Striped Dolphin

AGENCY: National Marine Fisheries Service.

ACTION: Notice of prohibition of take of the northern stock of striped dolphin incidental to commercial fishing operations.

SUMMARY: A prohibition on taking the northern stock of striped dolphin (*Stenella coeruleoalbra*) is being implemented because observer records show that the 1978 quota for that stock has been exceeded. The northern stock of striped dolphin may not be taken incidental to fishing operations pursuant to the general permit issued to the American Tunaboat Association, category 2; encircling gear, purse seining involving the intentional taking of marine mammals.

DATES: The effective date of this notice is October 19, 1978.

ADDRESS: Observer records may be reviewed at the Office of the Director, Southwest Region, 300 South Ferry Street, Terminal Island, Calif., telephone: 213-548-2575.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal Program Manager, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235, telephone 202-634-7461.

SUPPLEMENTARY INFORMATION: 50 CFR 216.24(d)(2)(i)(A), (3) and the permit issued to the American Tunaboat Association for 1978, impose a limit of fifty (50) mortalities of the northern stock of striped dolphin in 1978. The Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration has determined that this limit has been exceeded. Therefore, further taking of the northern stock of striped dolphin will be prohibited except as provided for in 50 CFR 216.24(d)(2)(i)(C) (accidental take policy), and notice of the effective date of this prohibition is hereby published in accordance with 50 CFR 216.24(d)(2)(i)(B).

Dated: October 6, 1978.

JACK W. GEHRINGER,
Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules

[6714-01-M]

FEDERAL DEPOSIT INSURANCE CORPORATION

[12 CFR Parts 303, 304, and 328]

REMOTE SERVICE FACILITY

Proposed Revision of Procedures

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: These rules would revise FDIC procedures relating to "remote service facilities." Remote service facilities include automated teller machines, cash dispensing machines, point-of-sale terminals, and other remote electronic facilities where deposits are received, checks paid, or money lent. The proposed regulations are designed to (1) comply with judicial branching decisions, (2) reduce administrative burdens for applicant banks as well as the FDIC, and (3) provide the FDIC with information relating to these facilities necessary for proper supervision.

DATE: Comments must be received by November 13, 1978.

ADDRESS: Interested persons are invited to submit written data, views, or arguments regarding the proposed amendments to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, D.C. 20429. All written comments submitted will be made available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT:

Roger A. Hood, Assistant General Counsel, Federal Deposit Insurance Corporation, Washington, D.C. 20429, 202-389-4628.

SUPPLEMENTARY INFORMATION: In recent years there has been controversy concerning whether remote service facilities (also called EFT or CBCT) constitute branches. Following a ruling by the Comptroller of the Currency that CBCT's were not branches, numerous lawsuits were filed. In all cases where this issue has been decided by U.S. Courts of Appeals, the courts have concluded that such facilities are branches. (See for example, *IBAA* v. *Smith*, 402 F. Supp. 207, aff'd 534 F. 2d 921 (D.C. Cir. 1976), cert. denied 429 U.S. 862; *State of Illinois* v. *Continental Illinois National Bank & Trust Co.*, 409 F. Supp. 1167 aff'd and rev'd in part 536 F. 2d 176 (7th Cir. 1976) cert. denied 429 U.S. 871; *State of Colorado* v. *First National Bank of Fort Collins*, 394 F. Supp. 979, aff'd 7 rev'd in part 540 F. 2d 497 (10th Cir. 1976), cert. denied 429 U.S. 1091; *State of Missouri* v. *First National Bank in St. Louis*, 405 F. Supp. 733, aff'd 538 F. 2d 219 (8th Cir. 1976), cert. denied 429 U.S. 941.)

These regulations are also designed to relieve some administrative burdens both for banks and the FDIC. Existing application and publication requirements have proven unduly burdensome when large numbers of banks share a network of remote facilities. Some States require any financial institution that establishes a remote service terminal to share any such terminal with all banks which wish to participate in the system. Under existing procedures each time another terminal is added to such a system, every State nonmember bank in the system must (a) have its board of directors adopt a resolution authorizing the application, (b) file a lengthy application form, and (c) publish notice in a newspaper in the community where ther terminal is located. These proposed regulations considerably simplify application requirements.

SUMMARY OF NEW PROCEDURES

Authority is to be delegated to the Director of the Division of Bank Supervision and Regional Diectors to approve remote service facility branches. Approval of remote service facility branches would be based on the six statutory factors listed at 12 U.S.C. 1816, and approval under delegated authority would not be subject to the additional criteria listed in § 303.12(c)1-9. Banks which establish (own or rent) remote service facilities would file a revised form 6210/09. Approval of this application will entitle the bank to establish additional terminals without further formal application by advising the FDIC in advance, by publishing notice of its intention, and by providing a current list of banks or other entities (if any) which share in the use of the facility. The FDIC would reserve the right during the 30-day period following the last publication of notice to suspend the automatic approval, and provide for approval or denial of the terminal by specific order. Denial of original applications or disapproval of new terminals will not be made through delegated authority.

2. Existing procedures permit banks to elect whether they want branch consideration of a proposed facility. These proposed rules attempt to minimize any refiling burden by treating original filings as applications under the new procedures, and requiring only minimal supplementation to place banks which have already filed in the same position as new applicants.

3. Remote service facilities will be excepted from certain requirements relating to posting of the official FDIC sign.

It is therefore proposed to amend parts 303, 304, and 328 of 12 CFR in the manner set forth below.

By order of the Board of Directors, October 5, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

PART 303—APPLICATIONS, REQUESTS, AND SUBMITTALS

1. By revising paragraph (c) of § 303.12 to read as follows:

§ 303.12 Applications where authority is not delegated.

. . . . . .

(c) *Conditions precedent to delegation to approve branch applications other than remote service facility branch applications.* (Important: The requirements set forth in this paragraph (c) are procedural in nature only and should not be construed as standards or criteria which will be used in determining whether a specific application will be approved or denied.) Authority to approve branch applications, other than remote service facility branch applications, pursuant to § 303.11(a)(7) is delegated only where each of the six factors set forth in section 6 of the Federal Deposit Insurance Act has been considered and favorably resolved and, in addition, all the following requisites have been satisfied:

. . . . . .

2. By revising paragraph (a) (2) and (3) of § 303.14 to read as follows:

§ 303.14 Application procedures.

(a) • • • (2) applications by insured State nonmember banks to establish branches, including remote services facility branches; (3) applications by insured State nonmember banks to relocate their main or branch offices, including remote service facility branches offices; • • •

. . . . . .

3. By adding a new paragraph (*l*) to § 303.14 to read:

. . . . . .

(*l*) *Special procedures for remote service facility branches.*—(1) *Definition.* Remote service facilities include automated teller machines, cash dispensing machines, point-of-sale terminals, and other remote electronic facilities where deposits are received, checks paid, or money lent.

(2) *Application procedures.*—(i) *Establishing a remote service facility or system of facilities.* For purposes of this section "establishing" means owning or leasing a remote service facility either individually or jointly. An establishing bank will file a revised form 6210/09 with the appropriate Regional Office and comply with the notice provisions of paragraph (b) of this section. The applicant will be advised whether the application is approved. Once this application is approved, an establishing bank may add additional sites without further formal application by:

(A) Advising the appropriate Regional Office of the bank's intention to establish a new facility or facilities,

(B) Complying with the notice provisions of paragraph (b) of this section, and

(C) Providing a current list of banks, or other entities if any, which may share in the use of the facility.

Unless notified otherwise within 30 days of the last publication of the notice required by paragraph (b) of this section, the additional facility will be considered approved.

(ii) *Procedures for banks which have filed under preexisting regulations for consent to operate remote service facilities as branches.* (A) Establishing bank which has had one or more remote service facilities approved as a branch: The bank's previous filing will be considered an approved application under subparagraph (2)(i) of this paragraph, and additional sites may be added in accordance with that paragraph.

(B) Establishing bank which has established remote service facilities without obtaining branch approval: The bank's previous filing will be considered a pending application under subparagraph (2)(i) of this paragraph, except compliance with procedures for publication of notice will not be required. Unless the bank is notified otherwise by the Regional Director within 60 days of the effective date of this amendment, the application will be considered approved. Notification by the Regional Director during this period may be in the form of a request for additional information, and is not necessarily an indication the application will be denied. However, once notified by the Regional Director, the application will not be considered approved unless the bank receives a formal order from the FDIC. Once approval has been obtained, either through the passage of 60 days without notification, or the issuance of a formal order, additional sites may be added in accordance with subparagraph (2)(A) of this paragraph.

PART 304—FORMS, INSTRUCTIONS, AND REPORTS

4. By revising paragraphs (a), (b), (d), (e), (g), (h), and (z) of § 304.3 to read as follows:

§ 304.3 Forms and Instructions.

. . . . . .

(a) *Form 82: Application of proposed bank (other than mutual savings) for Federal deposit insurance.* The proposed incorporators are required to make statements and representations and to submit information with respect to the several factors enumerated in section 6 of the Federal Deposit Insurance Act (12 U.S.C. 1816). The application on form 82 must be executed in quadruplicate. Three applications signed by the proposed incorporators must be forwarded to the Regional Director of the Federal Deposit Insurance Corporation region in which the proposed bank will be located and the other application may be retained by the prospective incorporators. Applications filed on form 82 must be accompanied by a certified copy of the proposed articles of incorporation or association and the requisite number of properly executed forms 83. A proposed bank's application on form 82 must be accompanied by a properly executed form 85 for each branch, other than a remote service facility branch, which it intends to establish, and by a properly executed form 6210/09 if it intends to establish one or more remote service facility branches. After incorporation is duly effected, the bank must submit a properly executed form 82a.

(b) *Form 82-M: Application of proposed mutual savings bank for Federal deposit insurance.* Form 82-M, which is substantially the same as form 82, should be used when the proposed bank is to be a mutual savings bank and should be prepared and submitted in the same manner as form 82. A proposed bank's application on form 82-M must be accompanied by a properly executed form 85-M for each branch, other than a remote service facility branch, which it intends to establish, and by a properly executed form 6210/09 if it intends to establish one or more remote service facility branches.

. . . . . .

(d) *Form 84: Application for Federal deposit insurance by an existing noninsured State bank (other than mutual savings).* The applicant bank is required to submit statements, representations, and information with respect to the several factors enumerated in section 6 of the Federal Deposit Insurance Act (12 U.S.C. 1816) and a copy of the resolution of its board of directors authorizing the bank's president or vice president and cashier or secretary to make the application. The application must be executed in quadruplicate, signed by such officers, and the bank's corporate seal attached thereto. Three signed applications must be forwarded to the Regional Director of the Federal Deposit Insurance Corporation region in which the bank is located and the other application may be retained by the bank. Applications filed on form 84 must be accompanied by the requisite number of properly executed form 83 and a certified copy of the articles of incorporation or association, including any amendments thereto. A bank's application on form 84 must be accompanied by a properly executed form 85 for each branch, other than a remote service facility branch, and by a properly executed form 6210/09 for any or all of its remote service facility branches.

(e) *Form 84-M: Application for Federal deposit insurance by an existing noninsured mutual savings bank.* Form 84-M, which is substantially the same as form 84, should be used by mutual savings banks and should be prepared and submitted in the same manner as form 84. A bank's application on form 84-M must be accompanied by a properly executed form 85-M for each branch, other than a remote service facility branch, and by a properly executed form 6210/09 for any or all of its remote service facility branches.

(f) • • •

(g) *Form 85, form 85a, and form 85b: Application of insured State nonmember bank (except district bank and mutual savings bank) to establish or move its main office or branch (other than remote service facility branch).* (1) Form 85 is an application to establish a branch other than a remote service facility branch. The applicant bank is required to submit statements, representations, and infor-

V 43/198 OCT 78 UM

mation with respect to the several factors enumerated in section 6 of the Federal Deposit Insurance Act (12 U.S.C. 1816) and a copy of the resolution of its board of directors authorizing the bank's president or vice president and cashier or secretary to make the application. The application must be executed in quadruplicate, signed by the president or vice president, have the corporate seal of the bank affixed thereto, and be attested by the cashier or secretary. Three signed applications must be forwarded to the Regional Director of the Federal Deposit Insurance Corporation in which the applicant bank is located and the other application may be retained by the bank. The application must be accompanied by a certified copy of the bank's articles of incorporation or association, including any amendments thereto unless previously submitted to the Corporation and not subsequently amended.

(2) Form 85a is an application to move a main office or branch other than a remote service facility branch. It is similar to form 85 and should be prepared and submitted in the same manner as form 85.

(3) Form 85b is an application to establish a branch other than a remote service facility branch pursuant to designation as depository and financial agent of the U.S. Government. It is similar to form 85 and should be prepared and submitted in the same manner as form 85.

(h) *Form 85-M and form 85a-M: Application by insured nonmember mutual savings banks to establish a branch other than a remote service facility branch; or move its main office or branch other than a remote service facility branch.* (1) Form 85-M is substantially the same as form 85 and should be prepared and submitted in the same manner as form 85.

(2) Form 85a-M is substantially the same as form 85a and should be prepared and submitted in the same manner as form 85a.

* * * * *

(z) *Form 6210/09: Remote service facility branch.* Form 6210/09 is an application by an insured State nonmember bank to establish a remote service facility branch or branches. Form 6210/09 is to be filed with the Regional Director of the Federal Deposit Insurance Corporation region in which the bank's main office is located.

PART 328—ADVERTISEMENT OF MEMBERSHIP

5. By revising paragraphs (a) and (c) of § 328.1 to read as follows:

§ 328.1 Mandatory requirements with regard to the official sign and its display.

(a) *Insured banks to display official sign.* Each insured bank shall continuously display an official sign as prescribed below at each station or window where insured deposits are usually and normally received in its principal place of business and in all its branches except remote service facility branches as defined in paragraph (a) of § 303.15: *Provided*, That no bank becoming an insured bank shall be required to display such official sign until twenty-one (21) days after its first day of operation as an insured bank. The official sign may be displayed by any insured bank prior to the date display is required. Additional signs in other sizes, colors, or materials, incorporating the basic design of the official sign, may be displayed in other locations within an insured bank.

* * * * *

(c) *Receipt of deposits at same teller's station or window as noninsured bank or institution.* An insured bank is forbidden to receive deposits at any teller's station or window, except a remote service facility as defined in paragraph (a) of § 303.15, where any noninsured bank or institution receives deposits or similar liabilities.

* * * * *

(Secs. 9 and 18, Pub. L. 797, 64 Stat. 881, 891 (12 U.S.C. 1819, 1829).)

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 78-ASW-47]

TRANSITION AREA

Proposed Alteration: Raton, N. Mex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of the action being taken is to propose alteration of the transition area at Raton, N. Mex. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new instrument approach procedure to the Crews Field Airport. The circumstance which created the need for the action was the establishment of a nondirectional radio beacon (NDB) off the airport.

DATE: Comments must be received by November 13, 1978.

ADDRESSES: Send comments on the proposal to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch, ASW-536, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart G 71.181 (43 FR 440) of FAR Part 71 contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting IFR activity. Alteration of the transition area at Raton, N. Mex., will necessitate an amendment to this subpart.

COMMENTS INVITED

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received by November 13, 1978, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

PROPOSAL

The FAA is considering an amendment to subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area at Raton, N. Mex. The FAA believes this action will enhance IFR operations at the Crews Field Airport by providing additional controlled airspace for aircraft executing proposed instrument approach procedures using the newly established NDB located off the airport. Subpart G of part 71 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 440).

PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) by altering the Raton, N. Mex., transition area to read as follows:

RATON, N. MEX.

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Crews Field (latitude 36°44'29" N., longitude 104°30'04" W.) excluding that portion northwest of a line 5 miles northwest of and parallel to the Cimarron VORTAC 050° radial, an within 3.5 miles each side of the 214° bearing from the NDB (latitude 36°42'02" N., longitude 104°32'21" W.) extending from the 8.5-mile radius area to 9.5 miles southwest of the NDB; and that airspace extending upward from 1,200 feet above the surface within 6.5 miles northwest of the Cimarron VORTAC 050° radial extending from the VORTAC to 45 miles northeast, within 16.5 miles southeast of the Cimarron VORTAC 050° and 230° radials extending from 1.5 miles southwest to 29 miles northeast of the VORTAC, and within 8.5 miles southeast of the Cimarron VORTAC 050° radial extending from 29 miles northeast to 45 miles northeast of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on September 29, 1978.

PAUL J. BAKER,
Acting Director, Southwest Region.

[FR Doc. 78-28712 Filed 10-11-78; 8:45 am]

[4910-13-M]

[14 CFR Part 71]

[Airspace Docket No. 78-ASW-46]

TRANSITION AREA

Proposed Designation: Kountze-Silsbee, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of the action being taken is to propose designation of a transition area at Kountze-Silsbee, Tex. The intended effect of the proposed action is to provide controlled airspace for aircraft executing instrument approach procedures to the Hardin County Airport. The circumstance which created the need for the action was the establishment of a nondirectional radio beacon (NDB) on the airport to provide capability for flight under instrument weather conditions to the airport.

DATE: Comments must be received by November 13, 1978.

ADDRESSES: Send comments on the proposal to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch, ASW-536, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart G 71.181 (43 FR 440) of FAR Part 71 contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting IFR activity. Designation of the transition area at Kountze-Silsbee, Tex., will necessitate an amendment to this subpart.

COMMENTS INVITED

Interested persons may submit such written data, views, or arguments as they may desire. AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

PROPOSAL

The FAA is considering an amendment to subpart G of part 71 of the Federal aviation regulations (14 CFR Part 71) to designate a transition area at Kountze-Silsbee, Tex. The FAA believes this action will enhance IFR operations at the Hardin County Airport by providing controlled airspace for aircraft executing proposed instrument approach procedures using the newly established nondirectional radio beacon (NDB) located on the airport. Subpart G of part 71 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 440).

PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend 71.181 of part 71 of the Federal aviation regulations (14 CFR Part 71) as republished (43 FR 440) by adding the Kountze-Silsbee, Tex., transition area as follows:

V 43 / 198 0 OCT 12 78 UMI

KOUNTZE-SILSBEE, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Hardin County Airport (latitude 30°20'13" N., longitude 94°15'34" W.) and within 3.5 miles either side of the 327° bearing from the NDB (latitude 30°20'14" N., longitude 94°15'36" W.) extending from the 5-mile radius to 8.5 miles northwest of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on October 2, 1978.

PAUL J. BAKER,
Acting Director, Southwest Region.

CIVIL AERONAUTICS BOARD

[14 CFR Part 399]

[PSDR-37C; Docket No. 25875; Dated: September 29, 1978]

U.S./EUROPE CHARTER SERVICE

General Rate Policy; Termination of Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Termination of rulemaking in docket 25875; PSDR-37.

SUMMARY: The Civil Aeronautics Board is terminating a proposed rulemaking which would have established minimum-rate guidelines for charter service between the United States and Europe. This action is being taken on the Board's initiative formally to close this proceeding.

FOR FURTHER INFORMATION CONTACT:

Steven Rothenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5205.

SUPPLEMENTAL INFORMATION: In PSDR-37, 38 FR (25453), September 7, 1973, the Board proposed to amend part 399 of its regulations (14 CFR Part 399) by establishing minimum-rate guidelines for charter service between the United States and Europe.

Citing the deteriorating health of the charter industry and the inability of the carriers to establish an acceptable minimum charter rate structure themselves, the Board issued a final rule in PS-57 on October 18, 1974, adopting minimum charter rate guidelines. The guidelines set by the Board were not those suggested in its notice of proposed rulemaking but, rather, reflected the comments and cost data subsequently submitted by the carriers. The guidelines adopted added seasonal variations, equipment differentials, and some other minor adjustments.

On February 11, 1975, the Board issued PS-64, vacating the guidelines adopted in PS-57. In doing so, we cited our inability to determine the proper equipment differentials with the information then available to us and the impossibility of adopting guidelines soon enough to be applicable to the 1975 charter season.[1] PS-64 also invited comments from interested parties on what further steps the Board might take in dealing with charter fares.

Ten comments were received, four favoring an unregulated charter market and six favoring some form of price control.[2] Those opposing a price floor argued that it would harm the educational system, tour operators, the airline industry, and the public generally. Those favoring minimum-rate guidelines cited the need to coordinate policies with other governments, protect scheduled carriers, and foster the charter industry.

After reviewing those comments, we have concluded that there is no reasonable basis upon which to reestablish minimum-fare guidelines and that we should terminate the proceeding. Minimum ratefixing is contrary to the competitive pricing policies we are trying to implement, and there is no reason in this instance to make an exception. The charter industry is an important component of the air transportation system, which provides a competitive spur to scheduled service. Setting minimum prices might tend to raise charter prices and thus weaken that pressure. Reestablishing minimum fare guidelines would be especially unwise now because they would reduce the ability of charters to compete with scheduled carriers, which have been given increased pricing flexibility. Thus, minimum charter price regulation would provide no protection for charter carriers; significantly, the all-charter carriers oppose the idea.

Because there is no reasonable basis for minimum-rate guidelines, the Board is formally terminating this proceeding.

Accordingly, the Civil Aeronautics Board terminates the proceeding in docket 25875.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28830 Filed 10-11-78; 8:45 am]

[1] The Board's decision to vacate its minimum-rate guidelines was also a response to a suit brought by the Department of Justice challenging PS-57 and a report issued by the Senate's Subcommittee on Administrative Practice and Procedure severely criticizing the guidelines.

[2] Comments were received from the Rochester Institute of Technology, the Airline Charter Tour Operators Association, the National Student Travel Bureau, Roger Conant, British Caledonian Airways, the Justice Department, the European Civil Aviation Conference, British Airways, Trans World Airlines, and Pan American World Airways.

[7040-01-M]

SUSQUEHANNA RIVER BASIN COMMISSION

[18 CFR Part 809]

WATER CONSERVATION POLICY AND STANDARDS FOR THE SUSQUEHANNA RIVER BASIN

Public Hearing

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice of proposed policy, proposed regulation, and opportunity for public comment.

SUMMARY: The Commission proposes to adopt a water conservation policy requiring new users and suppliers to maximize their water use efficiency by using available, feasible water conservation technology. Existing water users and suppliers would also have to comply with the conservation requirement within a reasonable time. In conjunction with adoption of the policy, the Commission also proposes to amend its regulations governing review of projects.

DATES: A public hearing to receive comments has been scheduled for November 9, 1978, beginning at 2 p.m. Written comments from those not wishing to testify at the hearing must be submitted by December 8, 1978.

ADDRESSES: The public hearing will be held at the Penn Harris Motor Inn, Bypass Routes 11 and 15, Camp Hill, Pa. Written comments should be sent to the Office of the Executive Director, Susquehanna River Basin Commission, 1721 North Front Street, Harrisburg, Pa. 17102.

FOR FURTHER INFORMATION CONTACT:

Robert J. Bielo, Executive Director, Susquehanna River Basin Commission, 1721 North Front Street, Harrisburg, Pa. 17102, 717-238-0422.

SUPPLEMENTARY INFORMATION: The Commission is a Federal-interstate agency charged with the overall management and development of the water and related resources of the basin. As the water resource management agency with basinwide authority, the Commission's goal is to effect coordinated planning, conservation, management, utilization, development, and control of the basin's water resources.

The proposed water conservation policy and implementing measures are one part of a three-part program to fulfill the Commission objective of assuring the availability of water for all users. Wise use of the basin's available resources is an important element to justifying future water supply development programs and reconciling potential water use conflicts.

The proposed policy requires that all new water users and suppliers maximize their water use efficiency by using available, feasible water conservation technology. Existing users and suppliers would also have to comply with the conservation requirement within a reasonable time. Available technology to reduce water usage includes reuse of water, metering, and pressure control as well as water reduction devices.

The proposed water conservation policy is considered by the Commission as a logical step toward achieving its overall water supply objective as set forth in the comprehensive plan, and as a necessary action to assure efficient use of available surface and ground water supplies. Expected beneficial effects of the policy when implemented are reduced water use, waste water flow and treatment costs, and energy consumption in the basin's water supply/waste water management systems.

The Commission will coordinate its water conservation program with appropriate signatory agencies and to the extent practical utilize their existing resources and authority. To implement the water conservation policy, the Commission will adopt appropriate standards, evaluate economic incentives, and actively promote through an information program the public's understanding and acceptance of water conservation measures.

Standards that the Commission is proposing to adopt are listed below. They would be applied in the Commission's review of proposed projects and promoted through direct contacts with existing users. Because the Commission is considering adoption of the proposed standards concurrently with the proposed policy, the attention of interested parties is directed to the proposed standards and comments on the standards are solicited.

Economic incentives often provide a mechanism to allocate resources to the best uses. Evaluation of a water pricing program designed to encourage demand reduction and support development of increased water supplies will be a part of the conservation program development.

The Commission will develop information reports relating to the varied aspects of water conservation measures and their applicability. This information will be made available on request and informational meetings will be held with various interest groups from agriculture, industry, and municipalities to discuss conservation technology, droughts, and problems.

The proposed water conservation policy and implementing standards are printed below. For a copy of background information regarding the proposed policy and standards, contact the Office of the Executive Director at the address given above.

PROPOSED POLICY

Now therefore be it resolved, That:

1. The Commission hereby adopts a water conservation policy (a) to require new industrial, commercial, municipal, and agricultural water users in the Susquehanna River Basin to maximize their water use efficiency by utilizing available, feasible water conservation technologies including the reuse of water, metering, pressure control and other use reduction techniques and (b) to require within reasonable time and as may be feasible existing users adopt similar water conservation practices.

2. To implement this policy, the Commission shall develop a water conservation program consisting of appropriate standards, economic incentives, and measures to promote the public understanding of conservation benefits and costs.

3. The Commission shall coordinate implementation of its conservation program with the appropriate signatory agencies to take full advantage of their ongoing programs and capabilities.

PROPOSED STANDARDS

§ 803.63 **Water conservation requirements.**

Any project sponsor proposing to withdraw water from surface or ground water sources or both shall comply with the following requirements:

(a) *Public water supply utilities.* As circumstances warrant, the utility shall:

(1) Reduce distribution system losses to a level not exceeding 20 percent of the gross withdrawal.

(2) Install meters for all users and/or otherwise establish a program of water conservation that will include:

(i) The installation of water conservation devices, as applicable, by all classes of users;

(ii) Preparation and distribution of literature to customers describing available water conservation techniques; and

(iii) Implementation of a water pricing structure which encourages conservation.

(b) *Industrial water users.* Industrial users shall:

(1) Establish a company representative to manage plant water use.

(2) Install meters as necessary for accurate determination of water use by various parts of the company operation.

(3) Install flow control devices, which match the needs of the equipment being used for production.

(4) Evaluate and implement applicable recirculation and reuse practices.

(c) *Agricultural irrigation.* Water users for irrigation purposes shall:

(1) Utilize irrigation systems properly designed for the farm's respective soil characteristics, topography, and cropping systems.

(2) Irrigate for food crops only as necessary to achieve optimum crop production, except in periods of prolonged drought when irrigation is applied to protect against crop failure.

Dated: October 3, 1978.

ROBERT J. BIELO,
Executive Director.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 6]

INTERNATIONAL AIRPORTS OF ENTRY

Proposed Revocation of International Airport Status of Akron Municipal Airport, Akron, Ohio

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule

SUMMARY: This document proposes to revoke the international airport status of Akron Municipal Aiport in Akron, Ohio. Air traffic in the area has shifted to the newer and larger Akron-Canton Airport, located between Akron and Canton in Summit County, Ohio. Because of this shift, the volume of Customs business clearing through Akron Municipal Airport no longer justifies the maintenance of inspection equipment and personnel. In addition, it is becoming increasingly difficult for Customs to provide adequate and timely service to both airports. If this change in status is made, all international flight normally will be inspected by Customs at Akron-Canton Airport. This will enable Customs to improve service to the public and provide for more effective enforcement of the Customs laws and regulations.

V 43 / 198 OCT 12 78 UM1

DATE: Comments must be received on or before December 11, 1978.

ADDRESS: Comments (preferably in triplicate) should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, Room 2335, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Robert Schenarts, Inspection and Control Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-8151.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Under section 1109(b), Federal Aviation Act of 1958, as amended (49 U.S.C. 1509(b)), the Secretary of the Treasury is authorized to designate places in the United States as ports of entry for civil aircraft arriving from any place outside of the United States and for merchandise carried on the aircraft. These airports are referred to as "international airports," and the location and name of each are listed in § 6.13, Customs Regulations (19 CFR 6.13). In accordance with § 6.2, Customs Regulations (19 CFR 6.2), the first landing of every civil aircraft arriving in the United States must be at one of these international airports unless the aircraft has been specifically exempted from this requirement or permission to land elsewhere has been granted. Customs officers are assigned to all international airports to accept entries of entries of merchandise, collect duties, and enforce Customs laws and regulations. If a civil aircraft desires to land at a "landing rights airport," which means an airport which has not been designated as an international airport, permission must first be obtained and Customs must assign personnel to that airport for that aircraft.

Within the Akron, Ohio, area there are two airports: Akron Municipal Airport, which has been designated as an "international airport," and Akron-Canton Airport, A "landing rights airport."

There has been a significant decrease in the number of international arrivals landing at Akron Municipal Airport. During the past 3 years, only 146 aircraft required Customs clearance there. International flights have shifted to the newer and larger Akron-Canton Airport, located between Akron and Canton, in Summit County, Ohio.

A review of Customs operations in the area indicates that because of this shift in air traffic, the volume of business clearing through Akron Municipal Airport no longer justifies the maintenance of inspection equipment and personnel. In addition, it is becoming increasingly difficult for Customs to provide adequate and timely service to both airports.

Therefore, to improve service to the public and provide more effective enforcement of the Customs laws and regulations, it is considered desirable to revoke the international airport status of Akron Municipal Airport. This revocation would not preclude aircraft arriving from foreign countries from applying for permission to land at Akron Municipal Airport as a "landing rights airport" under the same procedure aircraft now use to land at the Akron-Canton Airport. Aircraft denied permission to land at Akron Municipal Airport could easily be handled, without undue inconvenience, at Akron-Canton Airport, where Customs service would be available.

AUTHORITY

The authority for this proposed revocation is provided in section 1109(b), Federal Aviation Act of 1958, as amended (49 U.S.C. 1509(b)).

COMMENTS

Before adopting thisd proposal, consideration will be given to any written comments that are submitted timely to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b), Customs Regulations, (19 CFR 103.8(b)), during regular business hours at the Regulations and legal Publications Division, Headquarters, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this document was Harold M. Singer, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

PROPOSED AMENDMENTS

It is proposed to amend § 6.13, Customs Regulations (19 CFR 6.13) by deleting "Akron, Ohio-Akron Municipal Airport" from the alphabetical list of international airports set forth in that section.

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: September 21, 1978.

RICHARD J. DAVIS,
Assistant Secretary of the Treasury.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 1]

[Docket No. 19660; RM-690]

INTERNATIONAL RECORD CARRIER'S SCOPE OF OPERATIONS IN THE CONTINENTAL UNITED STATES, INCLUDING POSSIBLE REVISIONS TO THE FORMULA PRESCRIBED UNDER SECTION 222 OF THE COMMUNICATIONS ACT

Order Extending Time for Filing Requested Information

AGENCY: Federal Communications Commission.

ACTION: Order extending time.

SUMMARY: Action taken herein extends the time for filing comments in a proceeding involving the authorization of additional gateways and free direct access.

DATE: Comments must be received on or before October 30, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Helene Bauman, Common Carrier Bureau, 202-632-7834.

SUPPLEMENTARY INFORMATION: None.

Order. In the matter of International record carrier's scope of operations in the continental United States, including possible revisions to the formula prescribed under section 222 of the Communications Act, docket No. 19660, RM-690.[1]

1. The Commission is herein considering a motion for extension of time filed by TRT Telecommunications Corp. (TRT) on September 14, 1978, requesting an extension of time from September 29, 1978, until October 30, 1978, in which to file an amended gateway application and related data required by paragraphs 14 and 17 of the Commission's notice of inquiry and further notice of proposed rulemaking (notice) released in this docket on July 28, 1978 (FCC 78-511).

2. In reply to TRT's motion, Western Union International, Inc. (WUI) submitted a letter of support on September 20, 1978. RCA Global Communications, Inc. (RCAGC) also submitted a letter, and ITT World Communications Inc. (ITTWC) submitted a reply, both filed September 22, 1978.

3. TRT states that the notice calls for the submission of detailed data and information which is not readily obtainable from TRT's records, involving the collection of historic data, the formulation of forecasts, and the conduct of engineering and cost studies for 26 gateway areas. TRT further states that although it is proceeding diligently, it is clear that it will be impossible to complete this task by September 29, 1978, for filing in a form facilitating review by the Commission and other parties. The above-mentioned submissions by WUI, RCAGC, and ITTWC, in essence, support TRT's motion.

4. We find the foregoing adequate cause for the requested extension of time. Accordingly, your request is hereby granted, and the time in which all parties may file the above-mentioned requested information is extended until October 30, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
LARRY F. DARBY,
Acting Chief, Common Carrier Bureau.

[CC Docket No. 78-183]

PERMITTING THE USE OF OFFSET CHANNELS IN THE DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE ON THE 150 MHZ BAND

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: The FCC extends the time period within which to file reply comments on the notice of inquiry on whether to permit the use of offset channels in the domestic public land mobile radio service on the 150 MHz band. The extension is in response to a request from the American Telephone & Telegraph Co.

DATE: Reply comments must be filed on or before October 6, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert J. Miller, Common Carrier Bureau, 202-632-6450.

Adopted September 29, 1978.

Released October 3, 1978.

Order. In the matter of amendment of part 21 of the Commission's rules to permit the use of offset channels in the domestic public land mobile radio service on the 150 MHz band, CC docket No. 78-183.[1]

1. The American Telephone & Telegraph Co. (A.T. & T.) has filed a request for an extension of time from September 29, 1978, to October 6, 1978, to file its reply comments on the above-captioned proceeding.

2. According to A.T. & T., it did not receive copies of the comments filed from its copy service until September 12, 1978, despite ordering the service 2 weeks earlier on a "rush basis." A.T. & T. claims that because of the technical complexity of the issues involved, coupled with the late date it received the comments, it now needs additional time to file its comments. Based on these reasons set forth by A.T. & T., we believe that the requested extension of time is consistent with the public interest.

3. We believe that the difficulty of the issues involved also warrants additional time for the other parties to file their reply comments. Therefore, the request made by A.T. & T. to extend the filing date for reply comments will apply to all parties to this proceeding.

4. Accordingly, *it is ordered*, pursuant to § 0.303 of the Commission's rules, that the extension of time request to file reply comments is granted.

LARRY F. DARBY,
Acting Chief, Common Carrier Bureau.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON JUDICIAL REVIEW

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States, to be held at 10 a.m., Thursday, October 26, 1978, in the seventh floor conference room at Covington and Burling, 888 Sixteenth Street NW., Washington, D.C.

The Committee will meet for the second time to discuss Professor Frederick Davis' report on whether or not Veterans Administration determinations should be subject to judicial review.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least 2 days in advance. The committee Chairman, if he deems it approriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the committee before, during or after the meeting.

For further information concerning this meeting contact Jeffrey S. Lubbers 202-254-7065. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

COMMITTEE ON RULEMAKING AND PUBLIC INFORMATION

Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rulemaking and Public Information of the Administrative Conference of the United States, to be held at 10:30 a.m., October 27, 1978, in the Library of the Conference, 2120 L Street NW., Suite 500, Washington, D.C.

The committee will meet to discuss the Conference's project on the Federal Trade Commission, trade regulation rulemaking.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least 2 days in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the committee before, during, or after the meeting.

For further information concerning this committee meeting, contact Joseph B. Scott, 202-254-7020. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

Soil Conservation Service

DRY CREEK WATERSHED, KANSAS

Intent To Not Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Qualities Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Dry Creek Watershed, Clay, Cloud, Republic, and Washington Counties, Kans.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the human environment. As a result of these findings, Mr. Robert K. Griffin, State conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The Dry Creek Watershed project concerns watershed protection and flood prevention. The proposed project is to be implemented under authority of the Watershed Protection and Flood Prevention Act (Pub. L. 566, 83d Cong., 68 Stat. 666) as amended. The plan includes three floodwater retarding dams, an accelerated land treatment program to achieve 90 percent of the needed land treatment in the watershed, and an educational program on wildlife habitat improvement.

The notice of intent to not prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 760 South Broadway, Salina, Kans. 67401, 913-825-9535. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until November 13, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and flood Prevention Program—Pub. L. 83-566, 16 U.S.C. 1001-1008.)

Dated: October 4, 1978.

VICTOR H. BARRY, JR.,
Deputy Administrator for Programs, Soil Conservation Service, U.S. Department of Agriculture.

[3410-16-M]

INDIAN CREEK-VAN BUREN WATERSHED PROJECT, IOWA AND MISSOURI

Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Indian Creek-Van Buren Watershed Project, Van Buren County, Iowa and Clark County, Mo.

The environmental assessment of this federally assisted action indicates that the project may cause significant local regional, or national impacts on the environment. As a result of these findings, Mr. William J. Brune, State conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The project concerns a plan for flood prevention, fish and wildlife development, and additional water for municipal and industrial and other agricultural use. The planned works of improvement include one multiple purpose structure for flood prevention, fish and wildlife, and additional water for municipal and industrial and other agricultural use and nine additional structures for flood prevention.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. William J. Brune, State Conservationist, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, Iowa 50309, 515-284-4260.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Public L. 83-566, 16 U.S.C. 1001-1008.)

Dated: October 4, 1978.

LOWER ELK RIVER WATERSHED SUPPLEMENTAL PLAN NO. 1, KANSAS

Intent To Not Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lower Elk River Watershed Supplemental Plan No. 1, Elk, Chautauqua, and Wilson Counties, Kans.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the human environment. As a result of these findings, Mr. Robert K. Griffin, State conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The supplemental project action involves adding municipal and industrial water supply to Floodwater Retarding Structure No. 21. The supplemental action will provide 170,000 gallons per day water supply for the city of Moline and a rural water district. Surface area permanently inundated by this structure will increase from 55 to 185 acres.

The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 760 South Broadway, Salina, Kans. 67401, 913-825-9535. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until November 13, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Pub. L. 83-566, 16 U.S.C. 1001-1008.)

Dated: October 4, 1978.

CIVIL AERONAUTICS BOARD

[Docket No. 30390; Order 78-9-136]

ALLEGHENY AIRLINES, INC., AND EASTERN AIR LINES, INC.

Order To Show Cause Regarding Route Realinement

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By application and petition filed October 29, 1976, conforming to the June 26, 1976 informational guidelines in order 76-7101, Eastern Air Lines has requested the Board to issue an order directing interested persons to show cause why Eastern's certificate of public convenience and necessity for route 5 should not be amended and modified to realine the existing certificates for route 5, and the domestic authority on routes 6, 10, 71 and 145, into a single linear segment and to eliminate specific operation restrictions which Eastern claims are no longer required for competitive reasons.

In support of its application and petition, Eastern alleges that the goals sought by route realinements of increased economic efficiency and improved service to the public apply to the unsubsidized trunk carriers as well as the local service carriers. Furthermore, Eastern claims its proposed realinement is consistent with our realinement guidelines established in orders 76-5-101 and 76-7-101, issued May 21, 1976 and July 26, 1976, respectively.

V 4 3 / 1 9 8
0 C 1 2 7 8

Answers in opposition were filed by several carriers and two civic parties. The following local service carriers objected to Eastern's proposed realinement because of their general opposition to trunkline realinements,[1] in addition to their objection to the removal of restrictions in specific markets: Allegheny Airlines, Frontier Airlines, North Central Airlines, Ozark Air Lines, Piedmont Aviation, Southern Airways, and Texas International Airlines.[2,3] Objections to specific markets in Eastern's petition were filed by the following trunk carriers: American Airlines, Braniff Airways, Continental Air Lines, Delta Air Lines, National Airlines, Trans World Airlines, United Air Lines and Western Air Lines. Finally, the State of Maryland and the cities and Chambers of Commerce of Tallahassee, Fla., and Cincinnati, Ohio, have filed objections to Eastern's proposed realinement which concern the possible increase of dormant authority at Baltimore/Washington International Airport, Tallahassee, and Cincinnati, respectively in addition to Maryland's opposition to the use of show-cause procedures rather than oral hearing for realinements generally. The Cincinnati parties otherwise favor the adoption of Eastern's proposed realinement.

Eastern filed a reply to the answers in opposition to its petition.

As we stated in Ozark, Delta, and Western route realinements,[4] it is our policy to realine the route systems of the certificated scheduled carriers to maximize the opportunities for scheduling flexibility and equipment utilization, to conform route authority to traffic flows, and to eliminate or modify certificate conditions which serve no useful purpose, impair meaningful market development, and inhibit significant improvement in the carrier's economic performance. These objectives are equally applicable to trunk and local service carriers.[5]

We tentatively conclude that Eastern's proposed realinement, as modified by this order, and in accordance with our realinement guidelines, conforms with the board's policy and objectives discussed above and that substantial service and carrier benefits will result from the realined route system. Furthermore, the proposed realinement will allow Eastern significantly to improve its operating efficiency and permit it to provide improved service to the traveling public.

No arguments have been raised by the local service carriers, the trunk carriers, or the civic parties that we have not already fully discussed in the Western, Delta, Ozark and American realinement orders. In our orders in the Western (order 76-5-101) and Delta (order 78-4-109) realinements, we have in effect addressed ourselves to the concerns of the local service carriers and the civic parties over the use of show-cause procedures and the increase in dormant authority which is likely to occur if Eastern receives improved authority in minor and monopoly markets; the contention that the doctrine of *Ashbacker Radio Corp. v. F.C.C.*, 326 U.S. 327 (1945) bars the Board's consideration of requests by Eastern for improved authority in specific markets; and the problem of realinement applicants receiving under the guidelines authority at satellite airports which is superior to what they could obtain at principal metropolitan airports under the same guidelines. As stated more fully in the previous realinement orders: Show-cause procedures protect the rights of all parties; *Ashbacker* is not a bar to our realinement decisions; and authority will not be granted to a realinement applicant at satellite airports which is superior to that which it could obtain under the realinement guidelines at the principal municipal airport, unless its satellite authority is already superior to its main airport authority.

Finally, Eastern has requested a waiver of the requirements of Part 312 of the Board's Procedural Regulations, which require the filing of an environmental evaluation. Eastern supports its request by stating that the realignment of its routes will enable it to operate more efficiently and produce greater opportunities for improved scheduling, flexibility and equipment use. Furthermore, Eastern states that, while it is possible some new service may be provided as a result of the realignment, in any given market it will be relatively minor and cannot be projected with any degree of specificity. We tentatively find that the action we propose here will not constitute a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and, under our authority in section 312.6, we waive the requirement of filing an environmental evaluation. We also tentatively find, under Part 313 of our Procedureal Regulations, that realignment of Eastern's Route 5 will probably lead to more efficient use of fuel through the greater opportunity to provide nonstop and single-plane service in place of multi-stop service and on-line connections. Therefore, our action does not constitute a major regulatory action requiring an energy statement under the Engery Policy and Conservation Act (42 U.S.C. 6201 et seq.).

The restriction removals proposed for Allegheny, American, Braniff, National, North Central, Northwest, Piedmont, Southern, Texas International, TWA and United in the accompanying orders will enable those carriers to operate more efficiently, and will not constitute either major Federal actions within the meaning of NEPA or major regulatory actions within the meaning of the energy Policy and Conservation Act.

We further tantatively find that Eastern is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final; answers will be due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examinatin is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain gereral, vague, or unsupported objections.

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Eastern's certificates for Routes 5, 6, 10, 71 and 145 in the manner set forth in the accompanying proposed certificate (Appendix A[6]);

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I a statement of objections together with a summary of testimony, statistical data, and evidence expected to be relied upon to suport the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed we will accord full consideration to the matters or issues raised by the objections before we take further action; [6a]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action;

5. We grant Eastern's application for a waiver of Part 312;

6. We will serve a copy of this order upon all persons listed in Appendix I; and

7. We deny Allegheny's motion to consolidate its application for certificate amendment.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[7]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28813 Filed 10-11-78; 8:45 am]

[1] Eight local service carriers, including those in this case, filed a motion requesting a stay of further procedural steps on trunkline realinement applications for purposes of receiving written and oral argument on certain legal and policy issues. This motion was denied in the Western realinement proceeding by Order 77-11-74, November 17, 1977, at 4-13. See also, Order 78-4-109, April 19, 1978, at 3 n.6, for fuller history of this motion.

[2] Piedmont, on January 10, 1977, filed an application to amend its certificate for inclusion of various markets involved here. Piedmont did not file a motion to consolidate its application, but requested contemporaneous consideration with the Eastern realinement. We will not consider Piedmont's application here. See fn. 3 below.

[3] Allegheny, on January 21, 1977, filed a motion to consolidate its own application for certificate amendment for Route 97 into the Eastern proceeding. Subsequently, American, Delta, Eastern and United filed answers in opposition to Allegheny's Motion to Consolidate. We view Allegheny's motion as repetitive of the local service carriers' motion denied in Order 77-11-74, November 17, 1977, at 4-13, and will deny it.

[4] Orders 78-6-4, 78-4-109 and 77-11-74, finalizing Order 76-5-101, respectively.

[5] See Order 78-6-4 at 2; Order 78-4-109 at 4-5.

[6] Appendices A through I filed as part of the orginal document.

[6a] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[7] All Members Concurred.

[Docket No. 33320]

HOUSTON SERVICE INVESTIGATION

Prehearing Conference

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on November 2, 1978, at 10 a.m. in Room 1003, Hearing Room C, Universal Building North, 1875 Connecticut Avenue NW., Washington, D.C., before the undersigned Judge.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to each party and four copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Pricing and Domestic Aviation will circulate its material on or before October 13, 1978, and the other parties on or before October 26, 1978. The submissions of the other parties shall be limited to points on which they differ with the Bureau of Pricing and Domestic Aviation, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., October 5, 1978.

RUDOLF SOBERNHEIM,
Administrative Law Judge.

[6320-01-M]

[Docket No. 32845]

BALTIMORE/WASHINGTON-ST. LOUIS ROUTE PROCEEDING

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing in the above-entitled proceeding will be held on November 28, 1978, at 9:30 a.m. (local time), in Room 1003, Hearing Room D, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C.

For information concerning the issues involved and other details in this proceeding, interested persons are referred to the prehearing conference report served May 18, 1978, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., October 6, 1978.

RICHARD J. MURPHY,
Administrative Law Judge.

[Docket Nos. 31496, etc.; Order 78-9-148]

PIEDMONT AVIATION, INC. AND SOUTHERN AIRWAYS, INC.

Order To Show Cause and Granting Exemption

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

In the matter of application of Piedmont Aviation, Inc., for amendment of its certificate for Route 87, application of Piedmont Aviation, Inc., for an exemption under section 416(b) of the Federal Aviation Act of 1958, as amended, and application of Southern Airways, Inc., for amendment of its certificate for Route 98.

On October 7, 1977, Piedmont applied to amend its certificate of public convenience and necessity for Route 87 to add a new segment between the terminal point Charleston, S.C., and the terminal point Miami-Fort Lauderdale. On December 16, 1977, it filed an amended application to authorize air transportation over a new segment between the terminal points of Charleston and Columbia, S.C., on the one hand, and the hyphenated terminal point Miami-Fort Lauderdale, on the other. It simultaneously moved for a hearing.[1] On August 4, 1978, it applied for an exemption from section 401 of the act to permit it to operate one daily nonstop round trip between Columbia and Miami. It requested this authority for 2 years, or until 60 days after final Board decision on its application in Docket 31496.[2]

Southern, on August 23, 1978, applied to amend its certificate for Route 98, to add a new segment between the coterminal points Charleston and Columbia, and the terminal point Miami-Fort Lauderdale, and it simultaneously moved to consolidate with Piedmont's applications and motion for hearing in Dockets 31496 and 33150.[3]

Piedmont supports its request to extend its system to Miami/Fort Lauderdale by arguing that, if it receives this authority, nearly 290,000 passengers will be benefited in the first year of its operations; that it will make $14.1 million in passenger revenues (amounting to 10 percent of its total 1976 transport revenues); and that it will be able to operate the Columbia-Charleston-Miami route at lower than its average systemwide costs, because the length of hop will be twice that of its current system and its passenger haul 1.75 times. Finally, it states that the new route will strengthen its system and contribute to the efficiency of the air transportation industry, without significantly harming other carriers. It suggests the use of a show-cause order.

The Greensboro-High Point Airport Authority, the State of Maryland, Dade County, Fla., the Miami Traffic Association, the Metropolitan Richmond Chamber of Commerce, the Charleston County Aviation Authori-

[1] Docket 31496.

[2] Docket 33150. On August 19, 1978, by means of Order 78-4-129, we granted Piedmont an exemption to permit it to operate one daily round trip flight between Charleston and Miami. We took this action in response to an October 4, 1977, exemption request by it, the Charleston County Authority, County of Charleston, city of North Charleston, and all other related aviation interests, and the State of Maryland.

[3] Docket 33280. Southern currently holds authority at all three points, but its route structure prohibits it from operating nonstop frequencies between Columbia or Charleston and Miami.

V 4 3 / 1 9 8 0 C 1 2 7 8 UM

ty, the Commonwealth of Virginia, and the Richland-Lexington Airport Commission answered in support of Piedmont's proposal. The North Carolina Department of Transportation moved for leave to file an untimely answer in support. We will grant its motion.

Delta, National, and Eastern oppose and question Piedmont's exhibits. They claim that its projected stimulation and participation factors are overstated and that it did not adequately account for the services currently available in the Miami-Charleston/Columbia/Greensboro/Raleigh/Richmond markets.[4] Eastern argues that, once these factors are considered, Piedmont's proposed services would produce an operating profit of only $88,000 (as opposed to Piedmont's forecast of $2.64 million)[5] and would divert $3.304 million of Eastern's revenues.[6]

The opposing carriers also argue that additional service is not warranted by the size of these markets and the service currently offered in them. Indeed, Delta and Eastern contend that Piedmont does not need Miami authority to operate some of the flights it proposes (i.e., between Charleston and Columbia, on the one hand, and Baltimore, Richmond, and Raleigh, on the other). They calculate that it can make a profit on these flights independently of Miami traffic, and conclude[7] that it should concentrate on those markets.

The carriers also make the procedural arguments that we should not give Piedmont priority hearing treatment, in view of allegedly more important and urgent matters on our docket, and that show-cause procedures should not be used because material facts are in dispute.

Piedmont filed a consolidated reply.[7]

In support of its request for exemption authority, Piedmont states that it is concerned that we may not be able to take final action on its Miami entry application in time for it to prepare its schedule changes for the Miami peak season, which begins on December 15;[8] that the public interest requires the grant of the exemption because its service will remedy existing service deficiencies in the market and produce significant low fare benefits; that the grant of the exemption will produce an operating profit of $955,000 and will result in minimal diversion from other carriers; and that its proposal meets the statutory prerequisites of section 416(b) of the act.

Dade County, Fla., the Greater Miami Traffic Association, the Metropolitan Richmond Chamber of Commerce, and the Richland-Lexington Airport Commission support the exemption application.

Eastern opposes the exemption request, contending that there is no "imminent crisis or critical shortage of service" in the Columbia-Miami market that would justify a statutory finding of unusual circumstances; it and Delta are providing adequate service in the market; and the market is not subject to significant seasonal variations.

Piedmont replied to Eastern's answer.

Southern moved for leave to file an untimely answer opposing Piedmont's exemption application.[9] It objects to any award of Columbia-Miami authority to Piedmont unless and until the Board considers its own application for authority in the Charleston/Columbia-Miami market. It did not file for an exemption to operate in the Columbia-Miami market.

Piedmont replied to Southern's answer and in opposition to its motion to consolidate.

On the basis of the tentative findings below, we tentatively conclude that the public convenience and necessity require the addition of new segments to Piedmont's certificate for Route 87 and to Southern's certificate for Route 98,[10] between the coterminal points [11] Charleston and Columbia, on the one hand, and the coterminals Miami and Fort Lauderdale, on the other.[12] We will also grant Piedmont's exemption request for a period of 2 years or until 60 days after final decision in Docket 31496, whichever occurs first.[13][14] The grant of the certificate requests by an order to show cause is warranted because there are no issues involving material, determinative facts requiring resolution in an oral evidentiary hearing. The requests clearly fall within the class of applications we have considered by show-cause procedures.[15]

Implementation of the proposal will produce significant improvements in single plane and competitive service in many markets, as shown in the appendix.[15a] The contention that Piedmont can operate some of its proposed routes without the Miami extension does not dissuade us from our tentative conclusion that the public will be benefited from the grant of its application.

As to Eastern's downward revisions of Piedmont's profit forecast,[16] we find that there is sufficient traffic in the markets for which it would receive authority to sustain profitable operations, if not under its proposal, then under a plausible variation.[17] We need not find that Piedmont's precise proposal here, or any other specific service pattern, can in fact be profitably operated.[18] If Piedmont's proposal or a variation can be operated on a profitable basis, service is likely to be provided, and we are persuaded that this has been plausibly shown here.[19] However, even if the service is or becomes unprofitable the carrier is free, under permissive authority, to cease serving the markets We are satisfied that nothing developed in an oral evidentiary hearing would reverse this conclusion.[20] Further, since we propose to make these operations permissive and Category II subsidy-ineligible, Piedmont can reduce them or leave the market if its predictions prove overly optimistic and its service unprofitable.

Eastern is the only carrier that complained of diversion. Piedmont's exhibits calculate diversion from the incumbents, using both the projected participation and growth offset methods. Under the projected participation method, Piedmont forecasts diversion of $4.276 million from Eastern,[21] and, under the growth offset method, $1.451 million.[22] Eastern made no attempt to show that either figure is incorrect or that diversion will threaten its ability to perform its certificate obligations or necessarily will result in their termination of essential services that could not be replaced by other carriers. Either amount is substantially less than 1 percent of Eastern's commercial revenues.[23]

The public interest warrants grant of Piedmont's exemption request since the Columbia-Miami market currently lacks nonstop service and Piedmont's proposal will fill that gap in time for the peak winter season. It also will offer improved service in four beyond markets, as a result of its New York/Newark-Richmond-Columbia-Miami flight routing.[24] In view of the circumstances, and given the time required for a certification proceeding, enforcement of section 401 would deprive the public of required service.

We find that enforcement of the act and the terms, conditions, and limitations of the carrier's certificate would be an undue burden by reason of the limited extent of, and unusual circumstances affecting, its operations. Clearly the expense of a certification proceeding would be prohibitive in view of the limited and temporary operation to be authorized and would be totally out of proportion of the benefits to be derived by the carrier.[25]

We will not take Piedmont's Columbia-Miami operations into account in making our final detemination in this proceeding. As the carrier is aware, commencing service under exemption authority before the outcome of a certificate application is inherently risky. In this case, we do not believe the risk is economically unjustifiable. Since exemption authority is permissive, Piedmont will be able to reduce or eliminate its services without prior Board approval if they prove uneconomic; and since Piedmont already has stations at both Columbia and Miami, the operation will not require a great commitment of resources.

Accordingly, we find that enforcement of section 401 of the act, and the terms, conditions, and limitations of Piedmont's certificate for Route 87, to the extent they would otherwise prevent Piedmont from providing one daily round trip Columbia-Miami flight, would be an undue burden on it by reason of the unusual circumstances affecting its operations and would not be in the public interest.[26]

We will give interested persons 30 days following the date of service of this order to show cause why these tentative findings and conclusions should not be made final. We expect their objections to be supported by detailed economic or legal arguments. If an oral evidentiary hearing is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague or unsupported objections. Answers shall be filed within 10 days after the date for filing objections.

Accordingly, 1. We direct all interested persons to show cause why we should not issue an order making final the tentative findings and conclusions stated here and amending Piedmont's certificate for Route 87 and Southern's certificate for Route 98 so as to add a new segment, which is permissive and Category II subsidy ineligible, to each of the respective routes, between the coterminal points Charleston and Columbia, S.C., on the one hand, and the coterminal points Miami and Fort Lauderdale, on the other;

2. We order any interested person objecting to the issuance of an order making final the proposed findings, conclusions and certificate amendments set forth here to, no later than November 2, 1978, file with us and serve upon all persons listed in paragraph 9 a statement of objections together with a summary of testimony, statistical data, and evidence expected to be relied upon to support its objections; answers to objections shall be filed no later than November 13, 1978;

3. If timely and properly supported objections are filed, we will fully consider the issues raised before we take further action; [27]

4. In the event no objections are filed, we will deem all further procedural steps to have been waived and we may proceed to enter an order in accordance with the tentative findings and conclusions we have set forth here;

5. We exempt Piedmont Aviation from the provisions of section 401 of the act and the terms, conditions, and limitations of its certificate of public convenience and necessity for Route 87 to the extent necessary to permit it to provide one daily round trip flight between Columbia, S.C. and Miami, Fla.;

6. The authority granted in paragraph 5 shall be on a Category II subsidy-ineligible basis, shall be effective on the date of this order, shall terminate after 2 years or 60 days after final decision in Docket 31496, whichever occurs first, and may be amended or revoked at any time in our discretion without a hering;

---

[1] In September 1977, National discontinued its Charleston-Miami single-plane service and reinstated a two-stop north-bound flight in the peak winter season. Delta and National argue that Piedmont should have considered National's service in its analysis of its projected market share.

[2] PI-401.

[3] Eastern's answer, at 11.

[4] The reply was accompanied by a motion to file an unauthorized document. We will grant this motion.

[5] Piedmont requests that we act on its exemption application by October 15, so that it can make the necessary schedule changes in time for the start of the winter season.

[6] We will grant its motion.

[7] We have tentatively decided to amend Southern's certificate because this amendment is in the nature of a restriction removal, and it is our policy to remove restrictions in the absence of affirmative reasons for their retention. The amendment of its certificate will make possible improvement in its scheduling flexibility, equipment utilization, and operating efficiency. We have not received any objections to its application. Further, we believe that the award of authority to both carriers is in the public interest because, even if one carrier does not use its authority, its presence on the edge of the market will influence the incumbents to offer the price/service options desired by the traveling public. (See also Piedmont's Dallas/Fort Worth Entry Application, Order 78-9-60, September 13, 1978, at 3).

[8] By our designation of certain city-pairs as coterminals, we intend to permit the carriage of local traffic between them. See Order 78-3-45, March 9, 1978, fn. 1, indicating that the terminology, "coterminal points" signifies the authority to carry local traffic between them.

[9] We have decided to add Miami and Fort Lauderdale as separate points, even though Piedmont and Southern requested their hyphenation. Our decision is based on the fact that, by virtue of Order 78-8-192, we proposed to grant Braniff, Continental, National, Delta, Northwest, United, Eastern, and TWA operating authority between Miami and Fort Lauderdale, in the interests of affording them servicing and operating flexibility. It is only fair to give Piedmont and Southern the same flexibility. Charleston and Columbia will also be separately added in recognition of the carriers' current authority to carry local traffic between them.

[10] This authority also will be subsidy-ineligible under Category II.

[11] We tentatively find that Piedmont and Southern are citizens of the United States and are fit, willing, and able properly to perform the proposed air transportation and to conform to the provisions of the Act and the Board's rules.

On the basis of Piedmont's environmental evaluation, we tentatively conclude that our proposed action will not be a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, or a major regulatory action under the Energy Policy and Conservation Act of 1975 (EPCA), as defined in § 313.9(2)(1) of the Board's Procedural Regulations. Southern did not file an environmental evaluation or request a waiver under Part 312 of the Board's Procedural Regulations. We tentatively find, however, that this certificate amendment is not likely to be a major Federal action with a significant effect on the quality of the human environment or a major regulatory action under EPCA. It will make possible improved scheduling flexibility, equipment utilization, and operating efficiency, and produce greater opportunities for reduction in fuel consumption, air pollution, and ambient noise levels. We will waive the filing of an environment evaluation.

[12] E.g., Piedmont Boston Entry, Order 78-8-97, August 17, 1978; Eastern Albany Entry, Order 78-7-168, July 31, 1978, and Air New England Hartford/Springfield Entry, Order 78-8-129, August 23, 1978.

[13] Appendix filed as part of the original document.

[14] EA-1. We note, however, that even under Eastern's forecast Piedmont would make a profit.

[15] Order 78-4-69. For the calendar year 1977, the O. & D. plus connecting traffic in the Miami-Charleston market was 17,990, and 17,850 in the Miami-Columbia market. Source: CAB O. & D. Survey Tables 8 and 10.

[15a] See Piedmont Boston Entry Application Order 78-4-69 (order to show cause), at pp. 6-7, Order 78-8-97 (final order).

[16] As noted in Order 78-4-69, our conclusion that Piedmont has made a plausible showing that service can be profitably provided is not an element of our tentative findings of public convenience and necessity but rather of our determination to give this application priority of processing.

[17] National and Delta claim that Piedmont's base year statistics are too high and its estimated growth rate excessive. The objecting carriers also argue that Pidemont's true O. & D. plus on-line connecting stimulation factors are excessive. Even if all of these criticisms are well taken, our conclusion that Piedmont's proposal, or some plausible variation, can be operated on an economic basis, is not undermined.

[18] PI-502.

[19] PI-504.

[20] PI-502, 504.

[21] It will offer the only Newark-Columbia service, both northbound and southbound and provide the only morning service from New York to Columbia. In the New York/Newark-Richmond market, it will offer the first morning departure at 8:15. It will supplement the existing one-stop round trip service offered in the Richmond-Miami market, and will offer the first single-plane service between Richmond and Columbia.

[22] We have granted exemption applications under similar circumstances. *See, e.g.*, Order 78-4-129, April 19, 1978.

[23] As only one daily round trip is involved, we find that this decision does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

[24] Since we have provided for the filing of objections, we will not entertain petitions for reconsideration of the show cause order.

V 4 3 / 1 9 8
0 C 1 2 7 8

7. We consolidate into Docket 31496 Southern's application, filed in Docket 33280;

8. We grant Piedmont's motion for leave to file an unauthorized document and those of the North Carolina Department of Transportation and Southern Airways to file late;

9. We waive Southern's requirement to file an environmental evaluation under Part 312 of the Board's Procedural Regulations; and

10. We will serve this order on Piedmont Aviation, Allegheny Airlines, Ameican Airlines, Braniff International, Continental Air Lines, Delta Air Lines, Eastern Air Lines, National Airlines, Northwest Airlines, Ozark Air Lines, Southern Airways, Trans World Airlines, The Maryland Department of Transportation, United Air Lines, the North Carolina Department of Transportation, the South Carolina Aeronautics Commission, the Greensboro/High Point Airport Authority, the Charleston County Aviation Authority, New Jersey Department of Transportation, the Newark Airport Authority, the Columbia Airport Authority, the Virginia Division of Aeronautics, the Charleston International Airport, The Richmond Airport Authority, the Airport Director Raleigh/Durham Airport Authority, the Airport Managers, Byrd International Airport and Roanoke Municipal Airport, the Greater Miami Traffic Association, the Richmond-Metropolitan Chamber of Commerce, the Mayors of West Columbia, Charleston, Columbia, Raleigh, Durham, Greensboro, Miami, Richmond, Fort Worth, and the Governors of the States of North Carolina, Virginia, Florida, and South Carolina.

We will publish this order in the FEDERAL REGISTER.

[Docket No. 33575; Order 78-9-144]

SOUTHERN AIRWAYS, INC.

Order To Show Cause Regarding Amendment of Certificate of Rublic Convenience and Necessity for Route 98

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realine the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in 14 minor markets [1] where Southern holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Southern as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on Southern's operations in the 14 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Southern's certificate for Route 98 to remove operating restrictions in the markets listed in Appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

[Docket No. 33577; Order 78-9-146]

TRANS WORLD AIRLINES, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 2

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By order 78-9-136, issued concurrently with this order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in the Columbus-Nashville minor market [1] where TWA holds restricted authority.[2] As discussed in orders 78-4-109, 77-11-74, and 76-5-

[28] All Members concurred.

[1] A minor market is one with fewer than 20 true O. & D. plus interline connecting passengers a day or 7,300 per year.

[2] The minor markets where both Southern and Eastern currently hold restricted authority are set forth in Appendix A to this order. (Appendix A filed as a part of the original document.)

[3] We further conclude that Southern is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All members concurred.

[1] A minor market is one with fewer than 20 true O. & D. plus interline connecting passengers a day or 7,300 per year.

[2] For the year ending Sept. 30, 1975, there were 6,280 true O. & D. plus interline connecting passengers in this market, where TWA currently has one-stop via St. Louis authority.

101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on TWA as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in order 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on TWA's operations in the Columbus-Nashville market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to the specific market, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly, 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending TWA's certificate for Route 2 to remove operating restrictions in the Columbus-Nashville market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments the modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in appendix I of order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in appendix I of order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

[Docket No. 33576; Order 78-9-145]

TEXAS INTERNATIONAL AIRLINES, INC.

Order to Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 82

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in the Corpus Christi-Memphis minor market [1] where TXI holds unrestricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on TXI as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on TXI's operations in the Corpus Christi-Memphis market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to the specific market, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending TXI's certificate for Route 82 to remove operating restrictions in the Corpus Christi-Memphis market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues

[3] We further conclude that TWA is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All members concurred.

[1] A minor market is one with fewer than 20 true O&D plus interline connecting passengers a day or 7,300 per year.

[2] For the year ending September 30, 1975, there were 2,850 true O&D plus interline connecting passengers in this market, where TXI currently has one-stop authority.

[3] We further conclude that TXI is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[Docket No. 33578; Order 78-9-147]

UNITED AIR LINES, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 1

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in 92 minor markets[1] where United holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on United as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on United's operations in the 92 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending United's certificate for Route 1 to remove operating restrictions in the markets listed in Appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

[Docket 33568; Order 78-9-137]

ALLEGHENY AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 97; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in 28 minor markets [1] where Allegheny holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Allegheny as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on Allegheny's operations in the 28 markets listed in appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Allegheny's certificate for Route 97 to remove restrictions in the markets listed in appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

[Docket 33569; Order 78-9-138]

AMERICAN AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 4; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of September, 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, given Eastern unrestricted authority in three minor markets[1] where American holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on American as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on American's operations in the three markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings, and conclusions stated here and amending American's certificate for Route 4 to remove operating restrictions in the markets listed in appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take furtyher action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

By Civil Aeronautics Board.[5]

[Docket 33570; Order 78-9-139]

BRANIFF AIRWAYS, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 9; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this order, the Board has proposed to realine the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in 14 minor markets[1] where Braniff holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Braniff as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on Braniff's operations in the 14 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly, 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Braniff's certificate for Route 9 to remove operating restrictions in the markets listed in Appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action;[4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

[Docket No. 33571; Order 78-9-140]

NATIONAL AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 31; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of September 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realine the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in 27 minor markets[1] where National holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on National as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on National's operations in the 27 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this Order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections[3]

[1] A minor market is one with fewer than 20 true O&D plus interline connecting passengers a day or 7,300 per year.

[2] The minor markets where both Braniff and Eastern currently hold restricted authority are set forth in Appendix A to this order. (Appendix A filed as part of the original document.)

[3] We further conclude that Braniff is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All Members concurred.

[1] A minor market is one with fewer than 20 true O. & D. plus interline connecting passengers a day or 7,300 per year.

[Docket 33573; Order 78-9-142]

NORTH CENTRAL AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 86; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of September, 1978.

By Order 78-9-136, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in the Columbus-Omaha minor market[1] where North Central holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on North Central as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on North Central's operations in the Columbus-Omaha market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to the specific market and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly, 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending North Central's certification for Route 86 to remove operating restrictions in the Columbus-Omaha market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action;[4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Northwest as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on Northwest's operations in the Portland-Tampa market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to the specific market, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly:

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Northwest's certificate for Route 3 to remove operating restrictions in the Portland-Tampa market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action;[4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to such part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

[6320-01-M]

[Docket Nos. 31897 and 32821; Order 78-10-4]

PAN AMERICAN WORLD AIRWAYS, INC., AND TRANS WORLD AIRWAYS, INC.

Order Extending Authorizations

Issued under delegated authority, October 3, 1978.

In the matter of application of Pan American World Airways, Inc. for further extension of authority to discuss the feasibility of a joint computerized reservations system for use in Germany and application of Trans World Airlines, Inc. for an extension of authority to discuss the feasibility of a joint computerized reservations system for use in Ireland.

By Order 78-1-70, January 17, 1978, the Board approved the petition by Pan American World Airways, Inc. (Pan American) for authorization to discuss with various other parties, including U.S. certificated and foreign air carriers, the feasibility of a joint computerized reservations system for use within the Federal Republic of Germany. The Board, by Order 78-2-75, February 14, 1978, extended the duration of that discussion authority to July 31, 1978. By Order 78-6-53, June 7, 1978, the Board approved the petition of Trans World Airlines, Inc. (TWA) for authority to discuss the implementation of a similar system within the Republic of Ireland. The order specified that TWA's authorization would expire after June 22, 1978.

Pan American, in Docket 31897, and TWA, in Docket 32821, now request that the Board extend their respective discussion authorizations for an additional six-month period.

Pan American states that the carrier participants in the earlier discussions continue to be interested in exploring the feasibility, cost, and pricing of the system proposed for Germany. Similarly, TWA states that various carriers present at its discussions demonstrated sufficient interest in a joint computerized reservations system to warrant formation of an airline committee to discuss further the pricing and development of a multi-access system for Ireland.[1] Both carriers submit that these systems could provide important public benefits through increased convenience for the traveling public public as well as through time and cost savings for the industry. In doing so they refer to the Board's discussion of these benefits in earlier orders.[2]

TWA filed an answer in support of Pan American's request. No answers in opposition to either petition have been received.

We conclude that the requests for extension of the discussion authorizations are reasonable and may result in a more definitive and useful period of research than might otherwise be possible. As the applicants submit, the Board previously has established that discussions of this type clearly could secure important public benefits. Therefore, we will waive the requirement that the applicants justify their requests in accordance with Order 78-7-110, July 21, 1978,[3] and will approve the requests. However, as we noted in approving the original discussion authority requests, we are concerned that all interested parties, not merely air carriers, are able to participate in the discussions and to have their comments considered by the air carrier participants. Therefore, we will attach conditions to our approval of these extensions.

Under authority delegated by the Board in its orders granting the origi-

Footnotes continued from last page

Northwest currently has one-stop via Chicago authority.

[3]We further conclude that Northwest is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4]All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5]All Members concurred.

[1]TWA indicates that carrier participation in this working group initially will consist of Air Canada, British Airways, British Caledonian Airways Limited, Scandinavian Airlines System, and TWA, with the participation of all carriers having a sales interest in Ireland being solicited.

[2]The carriers cite the Board's approval of Pan American's earlier discussions in Germany and our approval in Orders 76-3-36, March 5, 1976, and 76-8-156, August 31, 1976, regarding the development of a multi-access computerized reservations system for use in the United States.

[3]In that order, we declared our intention to require that all future requests for discussion authority be fully justified under our Local Cartage standard as enunciated in the *Capacity Reduction Agreements Case*, Order 75-7-98, July 21, 1975, in order to show clearly and convincingly that the discussion authority is required by a serious transportation need or is necessary to secure other important public benefits.

nal discussion authorizations in Dockets 32821 and 31897, we will extend the duration of the respective authorizations for six (6) months from the date of service of this order, subject to conditions.

Accordingly,

1. We approve the petition of Trans World Airlines, Inc. for extension of its discussion authorization in Docket 32821, subject to the conditions set forth in subparagraphs 2(a) through 2(f) below;

2. We approve the petition of Pan American World Airways, Inc. for extension of its discussion authorization in docket 31897, subject to the following conditions:

(a) All U.S. certificated air carriers and foreign air carriers serving the country covered by the authorization, all interested travel agents and/or their trade associations, all interested government agencies, and all other interested persons shall be given an opportunity to be present at, to observe or participate in all discussions held pursuant to this order;

(b) Any notices agenda, or rules for the presentation of interested persons' views during the discussions shall be sent to all participants, the Board's Docket Section, and all persons who so request. The rules shall provide for the consideration of interested persons' views before the start of, or during, the discussions, and then after an oral presentation by the air carrier participants;

(c) Complete and detailed minutes of these discussions shall be maintained by the participants, including a summary of each item discussed and the opinions expressed on each point. These minutes shall be filed with the Board's Section, and sent to all other persons who so request,[4] within 5 business days after the date of the discussions;

(d) Any agreement or agreements reached as a result of the discussions shall be filed with the Board, pursuant to the requirements of section 412(a) of the Act (49 U.S.C. 1382) and Part 261 of the Board's Economic Regulations (14 CFR 261) and Subpart P of the Board's Rules of Practice (14 CFR 302.1608) and shall not become effective unless and until approved by the Board pursuant to section 412(b) of the Act; the air carriers filing the agreement shall accompany their application with a detailed justification for each aspect of it;

(e) The authorization granted shall extend to six (6) months after the date of service of this order;

(f) The authorization granted may be extended, modified, clarified, or revoked at any time.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within 10 days of the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless within such period a petition for review is filed, or the Board gives notice that it will review this order on its own motion.

This order shall be served on all certificated air carriers, on all other persons who responded to the application, and on the United States Departments of Transportation and Justice.

This order shall also be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28820 Filed 10-11-78; 8:45 am]

[6320-01-M]

[Docket 33354; Order 78-10-01]

PAN AMERICAN WORLD AIRWAYS, INC.

Petition for Authority To Discuss Feasibility of a Joint Computerized Reservations System For use in Italy; Order Authorizing Discussions

Issued under delegated authority, October 2, 1978.

On September 5, 1978, Pan American World Airways petitioned the Board for authorization to discuss with various other parties, including U.S. certificated and foreign air carriers, the feasibility of a multicarrier computerized reservations system for use within the Republic of Italy. Pan American states that, along with other international carriers serving Italy,[1] it has been invited to attend a meeting sponsored by KLM-Royal Dutch Airlines to discuss the technical and cost feasibility of jointly developing such a system. The initial meeting to be held in London on or about the last week in October, is expected to be followed by subsequent meetings in which interested carriers will discuss the pricing and possible implementation of the system. Thus, Pan American requests that the Board authorize discussions which would take place over a 6-month period.

Pan American submits that the Board previously has authorized similar discussions regarding the development of multicarrier computerized reservations systems for use abroad.[2] It contends that the important public benefits which the Board concluded could accrue from those discussions could also flow from these discussions.

Trans World Airlines, Inc. has filed an answer in support of the petition. We have received no answers in opposition to the petition.

We have decided to grant Pan American's request. As the applicant contends, the factors which moved the Board previously to authorize other discussions concerning joint computerized reservations systems are present here. The Board has established that discussions of this type clearly could secure important public benefits.[3] Thus, we will waive the requirement that the applicant justify its request in accordance with Order 78-7-110, July 21, 1978,[4] and will approve the request. However, as previously has been the case with discussions in this area, travel agents, various equipment and service suppliers, as well as all air carriers, may have an interest in the discussions.[5] Therefore, we will attach conditions to our approval to insure that all interested persons will be able to participate in the discussions and to provide that their comments will be considered by the air carrier participants.

Accordingly, we grant Pan American's petition in Docket 33354 for authorization to discuss the feasibility of a multicarrier computerized reservations system for use in Italy, subject to the following conditions:

(a) All U.S. certificated air carriers and foreign air carriers serving the Republic of Italy, all interested travel agents and/or their trade associations, all interested government agencies, and all other interested persons shall be given an opportunity to be present at, to observe or participate in all discussions held pursuant to this order;

(b) Any notices, agenda, or rules for the presentation of interested persons'

[4]The participants are not precluded from setting a nominal charge to be paid for those requesting copies of the minutes; such charge should not exceed the cost of duplicating and sending such copies.

[1]According to Pan American, KLM-Royal Dutch Airlines, Trans World Airlines, Inc., British Airways and CP Air have expressed an interest in attending the discussions.

[2]Pan American cites Orders 78-1-70, January 17, 1978, and 78-6-53, June 7, 1978, respectively authorizing analogous discussions with respect to the Federal Republic of Germany and the Republic of Ireland.

[3]In addition to those orders cited by Pan American, see Order E-25635, September 6, 1967, approving various carriers' participation in the development of a common automated reservations system; Order 74-11-37, November 8, 1974, approving American Airlines' application for discussion authority; Order 76-3-36, March 3, 1976, approving ASTA's application for discussion authority, and order 76-8-156, August 31, 1976, approving the resulting agreement establishing pilot projects for a multicarrier/travel agent automated reservations system.

[4]In that order, we declared our intention to require that all future requests for discussion authority be fully justified under our local cartage standard as enunciated in the *Capacity Reduction Agreements* case, Order 75-7-98, July 21, 1975, in order to show clearly and convincingly that the discussion authority is required by a serious transportation need or is necessary to secure other public benefits.

[5]See Order 74-11-37, discussed in footnote 3.

V 4 3 / 1 9 8 0 C 1 2 7 8 UNI

views during the discussions shall be sent to all participants, the Board's Docket Section, and all persons who so request. The discussants shall provide for the consideration of interested persons' views before the start of, or during, the discussions, and then after an oral presentation by the discussants of the tentative conclusions reached in their discussions;

(c) Complete and detailed minutes of these discussions shall be maintained by the participants, including a summary of each item discussed and the opinions expressed on each point. These minutes shall be filed with the Board's Docket Section, and sent to all other persons who so request,[6] within 5 business days after, the date of the discussions;

(d) Any agreement or agreements reached as a result of the discussions shall be filed with the Board, under section 412(a) of the act and Part 261 of the Board's Economic Regulations and Subpart P of the Board's Rules of Practice and shall not become effective unless and until approved by the Board under section 412(b) of the act; the air carriers filing the agreement shall accompany their application with a detailed justification for each aspect of it;

(e) The authorization shall extend to six (6) months after the date of service of this order;

(f) The authorization granted may be extended, modified, clarified, or revoked at any time.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within 10 days of the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless within such period a petition for review is filed, or the Board gives notice that it will review this order on its own motion.

This order shall be served on all certificated air carriers, on all other persons who responded to the application, and on the U.S. Departments of Transportation and Justice.

This order shall also be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28821 Filed 10-11-78; 8:45 am]

[6] The discussants are not precluded from setting a nominal charge to be paid for those requesting copies of the minutes; such charge should not exceed the cost of duplicating and sending such copies. Pan American will serve as the party to contact to make such requests.

[6320-01—M]

[Docket 33574; Order 78-9-143]

PIEDMONT AVIATION, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 87; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 29th day of September, 1978.

By Order 78-9-136, issued concurrently with this order, the Board has proposed to realine the domestic route system of Eastern Air Lines in a manner which would, among other things, give Eastern unrestricted authority in four minor markets [1] where Piedmont holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Piedmont as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carrriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively conclude that the elimination of restrictions on Piedmont's operations in the four markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

We will give interested persons 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.[3]

Accordingly, 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Piedmont's certificate for Route 87 to remove operating restrictions in the markets listed in Appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than November 6, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-136, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than November 16, 1978;

3. If timely and properly supported objections are filed, we will accord full consideration to the markets or issues raised by the objections before we take further action; [4]

4. In the event no objections are filed to any part of this order, we will deem all further procedural steps relating to sueh part or parts to have been waived, and we will take final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-136.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28822 Filed 10-11-78; 8:45 am]

[1] A minor market is one with fewer than 20 true O. & D. plus interline connecting passengers a day or 7,300 per year.

[2] The minor markets where both Piedmont and Eastern currently hold restricted authority are set forth in Appendix A to this order. (Appendix A filed as part of the original document.)

[3] We further conclude that Piedmont is a citizen of the United States within the meaning of the act, and is fit, willing, and able to perform properly the air transportation proposed here and conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All Members concurred.

COMMISSION ON CIVIL RIGHTS

MINNESOTA ADVISORY COMMITTEE

Meeting Cancellation

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Minnesota Advisory Committee (SAC) of the Commission scheduled for October 13, 1978 (FR Doc. 78-24004) on page 38068 has been canceled.

Dated at Washington, D.C., October 6, 1978.

JOHN I. BINKLEY,
Advisory Committee Management Officer.

DEPARTMENT OF DEFENSE

Department of the Army

ARMY SCIENCE BOARD

Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following Committee meeting:

NAME OF COMMITTEE: Army Science Board

DATES OF MEETING: 31 October-1 November 1978.

PLACE: The Pentagon, Washington, D.C. (2E715B).

TIME: 0800-1700 hours, 31 October 1978; 0800-1600 hours, 1 November 1978.

PROPOSED AGENDA: The meeting is partially closed because the members will receive classified briefings and classified discussions regarding the threat which relate to the offensive and defensive postures of the U.S. and other nations in the area of "Chemical Decontamination/Contamination Avoidance." The portion of the meeting which will be closed is between 0800-1230 hours, 31 October 1978. This portion will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof.

ROBERT F. SWEENEY,
Lieutenant Colonel, GS Executive Secretary Army Science Board.

[FR Doc. 78-28732 Filed 10-11-78; 8:45 am]

Office of the Secretary

DEFENSE INTELLIGENCE AGENCY SCIENTIFIC ADVISORY COMMITTEE

Closed Meeting

Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that closed meetings of the DIA Scientific Advisory Committee will be held at the Pentagon, Washington, D.C. on: Wednesday and Thursday, 6 and 7 December 1978.

The entire meetings commencing at 0900 hours are devoted to the discussion of classified information as defined in section 552b(c)(1), title 5 of the United States Code and therefore will be closed to the public. The Committee will receive briefings on and discuss several current critical intelligence issues and advise the Director, DIA on related scientific and technical intelligence matters.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

OCTOBER 6, 1978.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

POWER AUTHORITY OF THE STATE OF NEW YORK AND LONG SAULT, INC.

Application to Amend Presidential Permits PP-24, 25

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Application to amend Presidential Permits PP-24, 25.

SUMMARY: The Department of Energy given notice of application by Power Authority of the State of New York and Long Sault, Inc. to amend their respective Presidential Permits so as to modify an existing international transmission line at the United States-Canadian border.

DATE: Petitions and protests must be received by November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

James M. Brown, Jr, Systems Reliability and Emergency Response Branch, Department of Energy, Room 538, Vanguard Building, 2000 M Street NW., Washington, D.C. 20461, 202-634-5620.

Lise Courtney Howe, Office of General Counsel, Department of Energy, Room 5116, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9995 or 202-566-9380.

SUPPLEMENTARY INFORMATION: On August 22, 1978, the Power Authority of the State of New York (PASNY) and Long Sault, Inc. (Long Sault) filed for modification of Presidential Permits issued by the Federal Power Commission pursuant to Executive Order No. 10485 in Docket Nos. E-6631 and E-6632 respectively authorizing the construction, operation, maintenance and connection of electric transmission facilities to cross the United States-Canadian border. The modifications requested are: (1) That ownership of an existing 115 kilovolt circuit, which was constructed and maintained by PASNY on PASNY's double circuit tower, but owned and operated by Long Sault in accordance with FPC Docket No. E 6632, be transferred to PASNY pursuant to a prior agreement between the two companies; (2) That the 115 kV circuit be operated at 230 kV, and (3) that the present interconnection at the international border with facilities of Cedars Rapids Transmission Co, Ltd. a Canadian corporation (Cedars) be abandoned and the line be made part of the 230 kV interconnection between PASNY and Ontario Hydro. According to the applicants, no change in the facilities will be required since the tower, insulators and conductors were initially designed and installed for eventual operation of the 115 kV line at 230 kV.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Director, Division of Power Supply and Reliability, Economic Regulatory Administration, room 538, Vanguard Building, 2000 M Street NW., Washington, D.C. 20461 in accordance with sections 1.8 and 1.10 of the Rules of Practice and Procedure (18 CFR 1.8, 1.10).

All such petitions and protests should be filed on or before November 30, 1978. Protests will be considered by ERA in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must filed a petition to intervene. Copies of this application are on file with the Economic Regulatory Administration and will, upon request, be made available for public inspection and copying at the ERA Docket room, room B-210, 2000 M Street NW., Washington, D.C., and at the Division of Power Supply and Reliability, room 4070, 1111 20th Street NW., Washington, D.C.

Issued in Washington, D.C. on October 5, 1978.

JERRY L. PFEFFER,
Acting Assistant Administrator for Utility Systems, Economic Regulatory Administration, U.S. Department of Energy.

1384	Minnesota Pipeline Co., 4111 E. 37th St., North, Wichita, Kans. 67220.
131	Mobil Pipe Line Co., First International Building, 1201 Elm, Dallas, Tex. 75270.
1292	Ohio River Pipe Line Co., 1409 Winchester Ave., Ashland, Ky. 41101.
1417	Olympic Pipe Line Co., P.O. Box 900, Dallas, Tex. 75221.
1420	Paloma Pipe Line Co., 1600 First National Bank Building, Dallas, Tex. 75202.
1396	West Shore Pipe Line Co., 200 East Randolph Drive, Chicago, Ill. 60601.
1362	West Texas Gulf Pipe Line Co., P.O. Box 3706, Houston, Tex. 77001.
1421	White Shoal Pipeline Corp., Kerr-McGee Center, Oklahoma City, Okla., 73102.
1423	Williams Pipe Line Co., P.O. Drawer 3448, Tulsa, Okla. 74101.
1377	Wolverine Pipe Line Co., P.O. Box 900, Dallas, Tex. 75221.
1355	Wyco Pipe Line Co., 200 East Randolph Drive, Chicago, Ill. 60601.
1373	Yellowstone Pipe Line Co., P.O. Drawer 1267, Ponca City, Okla. 74601.

On or before November 13, 1978, persons other than those specifically designated in section 19a(h) of the Interstate Commerce Act having an interest in this valuation may file, pursuant to rule 72 of the Interstate Commerce Commission's "General Rules of Practice" (49 CFR 1100.72), and original and three copies of a petition for leave to intervene in this proceeding. Jurisdiction over oil pipelines, as it relates to establishment of valuations for pipelines, was transferred from the Interstate Commerce Commission to the Federal Energy Regulatory Commission (FERC), pursuant to sections 306 and 402 of the Department of Energy Organization Act, 42 U.S.C. §§ 7155 and 7172, and Executive Order No. 12009, 42 FR 46267 (September 15, 1977).

If the petition for leave to intervene is granted the party may thus come within the category of "additional parties as the FERC may prescribe" under section 19a(h) of the act, thereby enabling it to file a protest. It is required that a copy of the petition to intervene be served on the individual company at the address shown above and that an appropriate certificate of service be attached to the petition. Persons specifically designated in section 19a(h) of the act need not file a protest as a matter of right under the statute.

LEON J. SLAVIN
Administrative Officer
Oil Pipeline Board.

Office of the Secretary

International Energy Agency, Industry Working Party

Voluntary Agreement and Plan of Action to Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94-163), notice is hereby provided of the following meeting:

A meeting of the Industry Working Party (IWP) to the International Energy Agency (IEA) will be held on October 12, 1978, at the offices of the International Energy Agency, 2 Rue Andre Pascal, Paris 16, France, beginning at 9:30 a.m. The purpose of this meeting is to permit attendance by representatives of the IWP at a meeting of the IEA Standing Group on the Oil Market (SOM). The agenda for the meeting is under the control of the SOM, and is as follows:

1. Discussion of FIS Forms IV and V and instructions for their completion.
2. Discussion of IWP response to SOM paper on publication of oil market data.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and conservation Act, this meeting will not be open to the public, as provided by § 209.32 of DOE regulations, IEP requirements and unanticipated procedural delays in processing this notice require the usual 7 day notice period to be shortened.

Issued in Washington, D.C. October 5, 1978.

ROBERT C. GOODWIN, Jr.,
Assistant General Counsel for International Trade and Emergency Preparedness.

ENVIRONMENTAL PROTECTION AGENCY

(FRL 985-7); [OPP-50385]

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 3125-EUP-153. Mobay Chemical Corp., Chemagro Agricultural Division, Kansas City, Mo. 64120. This experimental use permit allows the use of 375 pounds of the herbicide 4-amino - 6 - (1,1-dimethylethyl) - 3- (methylthio)-1,2,4-triazin-5(4*H*)-one on sugar cane to control certain grasses and broadleaf weeds. The experimental use permit is effective from August 15, 1978 to August 15, 1979. (Room E-315, telephone 202/755-4851)

No. 3125-EUP-154. Mobay Chemical Corp., Chemagro Agricultural Division, Kansas City, Mo. 64120. This experimental use permit allows the use of 375 pounds of the herbicide 4-amino - 6 - (1,1-dimethylethyl) - 3- (methylthio)-1,2,4-triazin-5(4*H*)-one on sugar cane to evaluate control of certain grasses and broadleaf weeds. A total of 500 acres is involved for both this permit and the one above; the programs are authorized only in the State of Florida. This experimental use permit is also effective from August 15, 1978 to August 15, 1979. The permits will use the same active ingredient, but different formulations. A permanent tolerance for residues of the active ingredient in or on sugarcane has been established (40 CFR 180.332). Food additive regulations for residues of the active ingredient in sugarcane molasses and sugar cane bagasse have been established (21 CFR 561.41 and 21 CFR 193.25). (Room E-315, telephone 202/755-4851)

No. 41847-EUP-1. Mobil Chemical Co., Plastics Division, Macedom, N.Y. 14502. This experimental use permit allows the use of 3.95 pounds active ingredient of a formulation of cinnamaldehyde and methyl nonyl ketone to evaluate its effectiveness as a dog and cat repellent on trash bags/cans in households at 60 locations. The program is authorized only in the State of New York. The experimental use permit is effective from August 17, 1978 to August 17, 1979. (Room E-229, telephone 202/755-9315).

Interested parties wishing to review the experimental use permits are refered to the Registration Division (TS-767), Office of Pesticide programs, EPA, 401 M Street, SW., Washington, D.C. 20460. The descriptive paragraph for each permit contains a telephone number and room number for information purposes. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. The files will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

STATUTORY AUTHORITY: Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated October 4, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FRL 985-8]

REGULATORY REFORM INITIATIVES

Quarterly Report and Request for Public Comments

ACTION: Quarterly report and request for public comments.

SUMMARY: The Environmental Protection Agency (EPA) reports on its progress in identifying and implementing regulatory reforms. The reforms include specific initiatives to use alternatives and supplements to direct regulation, to improve the regulation development process, to reduce regulatory burdens on the public, and to improve external participation in EPA decision making.

CONTACT: If you have suggestions or comments, please contact Lawrence E. McCray, Regulatory Reform Unit (PM-223), EPA, Washington, D.C. 20460.

EPA'S REGULATORY REFORM INITIATIVES

THE ADMINISTRATOR'S STATUS REPORT: AUGUST 1978

Preface

Regulatory reform is one of the Environmental Protection Agency's top priorities. We are trying:

- To test new, flexible approaches to Government regulation;
- To improve the quality of our regulations;
- To minimize both avoidable costs and regulatory delay;
- To open the regulatory process as much as possible to outside ideas and participants;
- And, most important, to insure that the Nation's environment and public health are adequately protected.

Last December, I released a list of 40 regulatory reform initiatives EPA was proposing. Attached is the first of our quarterly status reports on those and subsequent reforms.

EPA has a very broad, rapidly evolving, and technically complex set of jobs to do. In large part, regulatory reform means learning how to do these jobs better—more surely, more efficiently, less intrusively. We are trying to find better ways. To reduce the health risks of our advanced industrial technology, particularly risks from increased use of toxic chemicals; to make the air, water, and land safe; and to encourage new pollution control technologies and new economic patterns that conserve scarce environmental resources.

Our reform agenda grows largely out of specific problems and opportunities the Agency has identified as a result of a series of critical reviews we have undertaken of our operations. I am sure there are many other opportunities we should exploit. Please let me or my regulatory reform staff know if you have any suggestions. We will follow up, and future reports will summarize our progress in exploring and implementing suggestions that I feel offer real promise.

There are many different types of regulatory reform. Let me identify the

V 4 3 / 1 9 8

most important and give an example or two of each from the list of projects on which we are now working.

Alternatives/Complements to Traditional "Command and Control" Regulation

Most regulation now follows a common pattern: The regulatory agency writes a series of rules that define what the public must do, and then it seeks to enforce these rules through the courts. Because this form of regulation cannot make fine or quick distinctions, it tends to be rigid, wasteful, and sometimes simply illogical. We are trying to complement this traditional legalistic approach with more flexible, more economically-oriented alternatives where possible.

EPA commonly regulates individual processes in a plant such as storage vessels and loading/transfer facilities. This approach facilitates our inspections, but leaves the plant's managers little room to find more cost effective ways of reducing the plant's overall emissions. We are working to develop an easily enforceable way to put an emissions control "bubble" over the plant as a whole and let the plant manager substitute a relatively inexpensive tightening of his storage vessel controls for more costly abatement in his loading and transfer facilities. Removing a pound of pollution for fifty cents rather than a dollar is good for the manager as well as the environment.

We are already implementing another example: economically determined penalties for firms that ignore their clean-up responsibilities. Until now, delay in complying with the law has been profitable. Now we will seek penalties equal to what violators save by not complying, including the rate of return they can earn on the use of these savings. This new approach finally makes compliance economically profitable, protects complying firms from the unfair edge a noncomplying firm would otherwise gain, and gives both the Agency and the courts an objective standard to use in assessing uniform penalties across the country.

The Regulation Development Process

We are further refining the internal process we use to develop regulations. Our process (the model for the President's recent Executive Order on Improving Governmental Regulations) ensures an open discussion, a review of all the issues (environmental impact, economic, public participation, etc.), and full peer collaboration across organizational lines. Strengthening this process is the most effective way of improving the quality of our regulations.

We will adopt our new, improved regulation development process in a formal Agency Manual this fall. The changes we are now proposing will help move us toward a number of important goals:

- It will help top management *focus on the most important regulations.*
- We will subject the most significant new regulations to a *Regulatory Analysis,* which will study the environmental, economic, and energy effects of each proposal and of a number of alternative options. All Regulatory Analyses will be made public in draft and final form.
- We have made *English our official language:* We will not approve regulations unless they are clearly and understandably written.
- We will continue to publish a *Regulatory Agenda* on a regular basis. It describes each regulatory proposal on which the Agency is working and lists its expected date of publication and the name, address and telephone number of an Agency contact.
- We are beginning to *review all our existing regulations* to root out those that are duplicative or otherwise do not contribute to effective environmental protection and to simplify or improve the rest.
- We have coordinated our regulatory actions for hazardous substances with three other Federal agencies—the Food and Drug Administration, the Occupational Safety and Health Administration, and the Consumer Product Safety Commission. So far, the *Interagency Regulatory Liaison Group* has set up eight teams, each working to avoid duplication and conflicting action in such areas as enforcement, testing, research, risk assessment, public education, and regulation writing. The regulation writing team has already developed an *early warning system* to ensure cooperative action on upcoming regulations that affect more than one agency.

Reductions in Avoidable Regulatory Burdens

Where we can reduce the burden of regulation without any substantive relaxation, we must do so.

Reducing the paperwork burden we impose on both business and State and local governments is one such opportunity we are pursuing vigorously. Starting this summer, all reporting requirements contained in new regulations will be subject to a "sunset" provision, by which they will lapse after five years (in most cases) unless EPA can justify a continued need for the information. In addition, we will subject these new requirements to a reports impact analysis before we formally propose them, in order that we can determine in advance if the degree of burden imposed is justified by the need for the information.

We are also trying to encourage industry to use new pollution control techniques which show promise but which may not yet meet current standards. Under new provisions of the 1977 Clean Air and Clean Water Amendments, EPA can waive some control requirements for limited periods of time to test these new control systems.

Simpler, Faster Proceedings

We are trying to simplify and speed our hearings, grant reviews, permitting procedures, etc.

We have changed our grant regulations to allow applicants to file only one application when seeking funds under different EPA programs. We have appointed permit expeditiors in each regional office to harmonize scheduling for different new source permit applications, help resolve potential conflicts among different environmental requirements, and help reduce duplicate reviews. We are working to develop common forms for a number of different permit programs.

Increased Public Participation in EPA Decisionmaking

We are trying to remove obstacles to public participation.

We have begun a pilot project to reimburse the expenses of participants in Agency rulemaking on the recently proposed regulations to control polychlorinated biphenyls (PCBs). The Agency will pay the costs of participants in its public hearings who will make a substantial contribution to a fair determination of the issues, who have a small economic stake in the issues, and who do not have sufficient resources to participate without EPA assistance. The results of this pilot project should help us extend the concept of reimbursement to other types of agency proceedings so that financial barriers no longer inevitably prevent an outside group or individual from participating in the decisionmaking process.

With this first quarterly report, EPA reaffirms its commitment to be a regulatory reform leader.

OCTOBER 4, 1978.

DOUGLAS M. COSTLE,
Administrator.

REGULATORY REFORM INITIATIVES
ENVIRONMENTAL PROTECTION AGENCY

AUGUST 1978, STATUS REPORT

I. ALTERNATIVES TO TRADITIONAL "COMMAND AND CONTROL" REGULATORY APPROACHES

1. *Clean Air Noncompliance Penalties.* In the Clean Air Act Amendments of 1977, Congress for the first time gave an executive agency the authority to use economic disincentives as a supplement to traditional regulation. Under section 120 of the new law, EPA will collect from each violator of air pollution standards the amount of money which the violator has saved by not installing pollution control equipment. EPA, rather than a court as is true with traditional civil penalties, will assess and collect the penalties. The noncompliance penalties will provide more effective enforcement for air pollution regulations, end the current economic incentive to resist environmental standards rather than comply with them, and remove the competitive advantage which violators currently enjoy because their costs are lower than those of companies that have complied with the laws.

The Administrator vigorously supported the proposed noncompliance penalties when testifying before Congress on the Clean Air Act Amendments.

The Agency created a work group in September 1977, shortly after passage of the amendments, to begin implementation of the section. The group has prepared working drafts of the regulations and of a technical support document, and together with a contractor has developed a proposed formula for the calculation of the penalties.

The amendments set a February 1978, deadline for EPA to issue the noncompliance regulations. The Agency missed that deadline, but the work group hopes to publish proposed regulations in the FEDERAL REGISTER this month.

Agency contact: Bob Homiak, Stationary Source Enforcement Division (EN-341), 755-2581.

2. *Economic Disincentive Basis for Air and Water Civil Penalties.* The Agency's Office of Enforcement (OE) last year began using the amount of a violator's cost savings as the starting point for setting the amount of a traditional (court-imposed) civil penalty for a violator of the Clean Air Act or the Clean Water Act. A private contractor helped OE develop uniform formulas for calculating the amount of the violator's savings. After using these formulas to determine how much the violator has saved, OE examines other relevant factors to see if it should adjust this amount before proposing it to the court as the civil penalty.

Agency contact: Mike Richardson, Office of Enforcement (EN-329), 755-2500.

3. *Study of Economic Incentives.* EPA initiated in 1977 a major research program on economic incentives as alternatives to traditional regulatory controls. The agency has designed and is carrying out the program with the cooperation of the Council on Environmental Quality, the Council of Economic Advisors, and a panel of experts from industry, academia, and local government. EPA is paying for the program with money from its research and development budget.

The research program is in three phases. Phase One is an evaluation of existing regulatory and administrative programs for controlling air pollution from stationary sources. For this phase, a contractor will collect data on: Actions which trigger the existing incentives (such as permit writing); compliance and noncompliance; ways of determining whether sources are in compliance (such as reporting, monitoring, inspecting, and sampling); the types of sanctions available to, and their use by government agencies; and the response of polluters to these sanctions. EPA has requested and received proposals for research in this phase, and expects to award a contract calling for a study and final report by January 1979.

Phase Two will focus on the effectiveness of existing economic incentive programs. A contractor will collect and analyze data on municipal sewer "surcharges" (now used in Los Angeles, Calif.; Salem, Oreg.; and Cincinnati, Ohio); selected European effluent charge systems; and the Connecticut delayed compliance fee program. EPA is now reviewing an internal draft request for proposals for a research contract for this phase.

Phase Three is a study of using economic incentives to get companies to properly operate and maintain the pollution control equipment which they have installed. This phase of the research program is a part of the evaluation of operation and maintenance strategies which is described in item I. 8.

In addition to this three-phase research program, the Agency is conducting, under the Clean Air Act Amendments of 1977, related studies of economic incentives for air pollution control. One study, mandated by section 405(f) of the act, concerns the possible use of economic incentives to: (1) Strengthen the effectiveness of existing methods of controlling air pollution; (2) abate air pollution to a greater degree than current regulatory approaches do; and (3) control air pollution problems that the current programs do not address. The interagency work group has identified several possible uses of economic incentives, and has awarded a contract to a Harvard research team to study the use of economic incentives to reduce: (1) nitrogen oxide pollution from motor vehicles, (2) sulfuric oxide pollution from copper smelters, and (3) benzene pollution. The group is planning to award other contracts to study other possible uses of economic incentives, such as ensuring that owners properly operate and maintain pollution control equipment for stationary sources of air pollution, and that automobiles meet pollution standards while they are in use (as well as when they come off the assembly line).

Agency contacts: Jim Vickery, Program Evaluation Division (PM-222), 755-0306, for Phases One and Two; Willard Smith, Economic Analysis Division (PM-220), 755-2887, for Phase Three and section 405.

4. *Analysis of Alternative Means for Limiting Fluorocarbon Emissions.* In September 1977, EPA contracted with the Rand Corp. for an evaluation of ways other than traditional "command and control" regulation to reduce fluorocarbon emissions from non-aerosol sources. Among the alternative ways of control Rand will examine is the use of marketable permits. Under this scheme EPA would allocate (possibly by auction) permits for the production or use of fluorocarbons. The manufacturers or users getting permits in turn could trade or sell them. The market, not the government, would thus determine which fluorocarbon uses should continue and which should end. Rand will also assess the relative advantages and disadvantages of product charges and emission fees to control fluorocarbon emissions. After the contractor completes its evaluation of the different strategies, the Agency will be able to choose among those innovative approaches and a traditional "command and control" regulatory approach which a work group in the Office of Toxic Substances is developing.

The contractor has completed its collection of data on fluorocarbon production and use, and is now beginning the analysis of alternative ways of emission reduction. Rand will make an interim report this summer on the basic data and the models for analysis of the data. A draft of the final report should be ready in December, 1978, with the final report itself ready in March of 1979.

To increase external participation in the evaluation of the alternative strategies and to encourge independent evaluations, EPA will release publicly Rand's interim report. This will make readily available to any interested person the contractor's data and models.

Agency contact: Douglas Hale, Economic Analysis Division (PM-220), 755-2669.

5. *Federal Procurement Incentives.* The Federal Government could use its purchase of goods from private industry to encourage the development of environmentally superior products. EPA is cooperating with other agencies in two efforts in this area, both as-

OCT 12 1978

V 43 / 198 0 OCT 12 78 UM1

sociated with EPA's noise control program.

The first of EPA's efforts is under the authority of the Noise Control Act of 1972. Section 15 of that law authorizes the Federal Government to pay a premium for products which EPA has certified as low noise emitters. Under this premium program, the Government can pay for each low noise emission product as much as 12.5 section of the lowest bid price for a comparable uncertified product. In May 1977, as a step towards setting up this program, EPA proposed rules for certifying medium and heavy duty trucks and portable air compressors. The program office has spent the past 13 months resolving the issue of how much quieter than EPA standards a product must be to be eligible for certification, and expects to soon submit the final rules for internal Agency review.

In its second effort in this area, EPA has cooperated with the General Services Administration (GSA) and the Experimental Technology Incentives Program (ETIP) of the National Bureau of Standards in a successful experiment of Federal procurement of low noise lawn mowers. In 1977, when purchasing mowers, GSA indicated its willingness to pay more than the regular purchase price for mowers that are quieter than the normal GSA specification. The amount that GSA was willing to pay for the mowers increased as the mowers became quieter. GSA bought 10,000 mowers which were half as noisy as the normal specification, even with the premium, GSA paid less than the amount it normally pays for mowers, EPA, ETIP, and GSA are planning to extend this concept to other products. EPA and GSA have entered into an interagency agreement, which ETIP is now reviewing, for an expanded program. This summer EPA expects to identify other types of products for possible purchase under the expanded program.

Agency contact: Stanley B. Durkee, Technology and Federal Programs Division (AW-471), 557-8292.

6. *Study of Innovative Resource Conservation and Solid Waste Management Alternatives.* With enactment of the Resource Conservation and Recovery Act of 1976, Congress established the cabinet-level, interagency Resource Conservation Committee. The administrator of EPA chairs the committee, which is composed of the Secretaries of Treasury, Interior, Commerce, and Labor; the Chairman of the council on Environmental Quality; and representatives from the Council of Economic Advisors, the Office of Management and Budget, and the Department of Energy. The committee is examining serveral innovative actions as possible ways to conserve resources and manage solid waste.

In January 1978, the Committee issued a report to Congress and the public entitled "Committee Findings and Staff Papers on National Beverage Container Deposits". The committee found that a uniform deposit, of at lest five cents per container, on all sealed containers for beer and soft drinks would be an effective way to reduce litter, and could eliminate as much as 2 percent of the Nation's solid waste. However, the Committee postponed a decision on whether to recommend legislation establishing a national deposit on beverage containers. The Committee will decide whether to make that recommendation after it completes other studies.

In addition to beverage container deposits, the Committee is studying several other measures besides traditional requlation to conserve resources. These possible measures include:

- Imposing charges on products which will likely become solid waste, with the amount of the charge depending upon the amount of potential solid waste;
- Giving subsidies to users or suppliers of recycled materials;
- Requiring deposits on durable goods;
- Helping local governments impose user fees on people using municipal solid waste systems;
- Imposing small excise taxes on goods which consumers often throw away as litter;
- Using serverance taxes to discourage the use of virgin natural resources; and
- Revising existing Federal policies (such as depletion allowances, capital gains taxes, and shipping rates) which may encourage resource consumption.

The Committee held public meetings on June 23, 26, and 30, 1978 to gather public comment on the options before it. Although the Resource Conservation and Recovery Aet requires the Committee to issue a final report by October, 1978, the committee does not expect to make its report until March, 1979.

Agency contact: John Robinson, Policy Planning Division (PM-221), 755-2733.

7. *Noise Emission Labelling for Consumer Products.* Although Congress has given EPA authority to directly regulate the noisc emitted by consumer products, the Agency is trying to abate the noise products by requiring manufacturers to label them with their noise levels. Consumers can then make informed choices among competing products on the basis of their noise levels.

In June 1977, EPA proposed general product labelling provisions and specific rules covering effectiveness labels for hearing protectors. The Agency has not yet proposed final rules. EPA is also developing proposed labelling rules for vacuum cleaners, air conditioners, and chain saws.

Agency contact: Edwin Ricci, Office of Noise Abatement and Control (AW-471), 557-7695.

B. 8. *Study of Operation and Maintenance Strategies.* The Nation's recent pollution control efforts have emphasized installing new control equipment and facilities. A separate task, equally important to pollution control, is operating and maintaining the equipment and facilities.

In October 1977, the Agency began a 1 year examination of ways to insure that companies operate their pollution control equipment. Focusing on publicly owned treatment works, stationary sources of air pollution, and industrial dischargers of water pollution, the work group is analyzing three issues: (1) Whether there are operation and maintenance problems; (2) what is currently being done to deal with those problems; and (3) what alternatives exist for solving the problems.

Among policy options that the Agency is evaluating are two that may not resort to traditional Government requlations. These are (1) requiring suppliers of pollution control equipment to post performance bonds as a quarantee that the equipment will work and (2) calculating penalties for those who violate pollution standards at the level necessary to remove their cost savings from not maintaining the equipment.

Agency contacts: Ed Reich, Stationary Source Enforcement Division (EN-341), 755-2550; Walt Mardis, Office of Planning and Evaluation (PM-219), 755-0350.

9. *Study of Alternative Strategies for Clean Air Nonattainment Areas.* One of the most complex and difficult issues under the Clean Air Act is whether and to what extent the national ambient air quality standards permit new industrial growth in areas where pollution exceeds the standards. In December 1976, EPA issued a rule interpreting the law to allow the construction of a new or modified stationary source of air pollution in nonattainment areas if certain requirements are met. One of the requirements is that either the owner of the new source or others in the nonattainment area reduce emissions from existing sources enough to more than offset the expected pollution from the new source. Under this policy, a company which does not have existing plants in the area must seek either to persuade other companies to reduce their pollution enough to allow the first company to build its new plant, or to persuade the local government to require that reduction. This has created the possibility of an offset emissions market, since existing sources can in effect sell their reducible pollution to others wanting to build plants in the area.

At the direction of both Congress and the President, EPA is reviewing this policy and alternative ways to deal with the control of pollution in nonattainment areas. In August 1977, a task force began examining, among other matters, policy options for new construction and pollution reduction in the areas. This analysis will include evaluations of such nontraditional means of pollution control as emission charges, the offset emissions market, and other economic approaches. The task force expects to make an interim report this month describing: (1) The nature and extent of the nonattainment problems; (2) the results of studies in three regions (Houston-Galveston, Philadelphia, and Chicago); and (3) the experience so far under the offset policy. The task force expects to make a final report by October or November 1978. The final report will include analysis of: (1) the costs of attainment, (2) the impacts on the iron and steel industry and the petroleum industry, and (3) policy alternatives.

Agency contacts: Cheryl Wasserman, Policy Planning Division (PM-221), 755-2733; Darryl Tyler, Office of Air Quality Planning and Standards, Research Triangle Park, N.C., FTS 629-5497.

10. *Study of Economic Incentives for Prevention of Significant Deterioration of Air Quality.* EPA is examining the merits and feasibility of marketable permits and other economic incentives for use in implementing the prevention of significant deterioration (PSD) of air currently cleaner than the national standards. This study will develop an alternative to the traditional system of "first come, first served" permit allocation. The Agency will make the results of the study available to States to use if they so desire in revising their implementation plans to prevent significant deterioration. The Agency hopes to complete its study by October; the States must revise their implementation plans by March 1979.

Agency contact: Marty Wagner, Policy Planning Division (PM-221), 755-4803.

11. *Plantwide Emission Reduction ("Bubble" Concept).* EPA is studying the "bubble" concept appropriate to air and water pollution control. Under their current policies, EPA and State agencies set separate pollution control standards for each polluting process in an industrial plant. Under the bubble concept, EPA would give a company some flexibility to adjust the stringency of its control efforts on different processes—further reducing pollution where the control is easiest and cheapest, and allowing more pollution where the control is more difficult and expensive—so long as total pollution from the plant (viewed as if it were under a bubble) would not exceed that allowed under the current standards. This concept offers the potential of meeting pollution standards at a lower cost.

The Agency organized a task force in May 1978 to examine the bubble concept and prepare a plan for implementing it. The group plans to propose its plan by the end of the summer.

Agency contact: James Kamihachi, Economic Analysis Division (PM-220), 755-2677.

II. IMPROVEMENTS IN THE QUALITY OF REGULATION

The procedure by which an agency develops a regulation is a prime determinant of the quality of the final regulation. EPA develops its regulations through procedures set forth in the Agency's manual, *Development of Regulations.* The basic procedural requirements in the Manual form the foundation upon which the Agency is building many of its regulatory reforms.

EPA produces regulations in a five stage process: (1) Starting work on a regulation, (2) preparing a development plan, (3) preparing a decision package, (4) internally reviewing the regulation and decision package, and (5) publishing the regulation in the FEDERAL REGISTER. Each regulation goes through the last three stages twice, first as a proposed regulation and again as a final regulation.

To begin work on a regulation, the lead office—the program office with primary responsibility for the subject of the planned regulation—prepares a decision memorandum for the Administrator. The memorandum includes enough information for the Administrator to determine whether: (1) A regulatory action is the most appropriate and effective course; (2) there will be an effective program of public participation throughout the regulation development process; and (3) the Agency has the resources necessary to develop the regulation. The lead office includes in the memorandum, among other information, an analysis of the alternatives to regulation and a public participation plan for involving other levels and agencies of government and the public in the regulation development. Before the lead office submits the decision memorandum to the Administrator, it is circulated through "red border" review (an internal agency review in which Assistant Administrators and staff office directors evaluate proposed Agency actions).

After the Admininstrator authorizes the lead office to begin preparing the regulation, the office forms a work group with members from relevant Agency offices. With the help of the work group, the lead office then prepares a plan for developing the regulation. The Steering Committee—a group of representatives of the Assistant Administrators and chief staff offices, that generally oversees the regulation development process—reviews the plan.

After the Steering Committee approves the development plan, the lead office, with the help of the work group, carries out the plan. Upon completion of that process, the office submits an action memorandum and supporting material to the Steering Committee and senior officials on the red border list for their review, and then to the Administrator for his decision. After the Administrator approves a proposed or final regulation, the Agency publishes it in the FEDERAL REGISTER.

Agency contact: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265.

1. *Priority Classification of Regulations.* As part of its response to President Carter's Executive Order on improving Government regulations, EPA on June 28, 1978 changed its regulation development procedures to make them conform with the President's requirements. One of these changes is a classification of proposed regulations into priority categories, so that Agency officials and interested people outside EPA can concentrate their attention on the most important areas.

First, the lead office will classify proposed regulations as either significant or minor. The Agency will follow more stringent procedures in its review of significant regulations. (See, for example, II.7.

The lead office will further divide all significant regulations into major and routine. The lead office will prepare regulatory analyses on major regulations meeting certain criteria. (See II.4.)

The lead office will further divide all significant regulation into major and routine. The lead office will prepare regulatory analyses on major regulations meeting certain criteria. (See II.4.)

The Acting Administrator approved this classification system on June 28, 1978. The system will apply to all regulations that were not already before the Steering Committee for review on that date.

Agency contact: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265.

2. *Regulatory Agenda and Regulatory Calendar.* EPA is currently preparing and preparing and printing a regulatory agenda and a regulatory calendar to inform both EPA staff and others of the status of regulations

V 4 3 / 1 9 8
0 C 1 2 7 8

which the Agency is developing. The regulatory agenda is a semiannual statement, published in the FEDERAL REGISTER, on the subject of regulations the Agency is preparing; of the authority for the possible Agency actions; of the expected dates for publication of the proposed or final regulations; and of the name, address, and phone number of an Agency contact for each regulation. The regulatory calendar is a quarterly booklet, for internal Agency use, containing similar information.

Agency contact: Phil Schwartz, Standards and Regulations Evaluation Division (PM-223), 755-2693.

3. *Evaluation of Regulatory alternatives.* Under the Agency's old procedures, a lead office included an analysis of alternatives to regulations in the decision memorandum it submitted to the Administrator before beginning work on a regulation. (See the introduction to category II.) Because this was the first step in the regulatory process, the decision memorandum in effect forced the program office to evaluate (and rule out, if it decided to proceed, with regulation development) alternatives to regulation early in the process, with no input from outside the program office.

Therefore, the Acting Administrator on June 28, 1978, approved new procedures under which a program office merely notifies the Agency's senior management that work is beginning on a regulation. The notification form does not include an evaluation of alternatives to regulation, as the current decision memorandum does. Instead, it informs others in the Agency that the program office is contemplating a regulation and invites relevant offices to designate members of the work group.

Under the new procedures, the lead office, with the advice and assistance of the work group, then prepares a development plan which includes a brief description of the possible need to regulate and the consequences of no regulation and a summary of the major options (including alternatives and supplements to traditional regulation) the lead office will evaluate. The Agency must approve the development plan before work can proceed. For routine regulation, the lead office must approve and the Steering Committee must review the development plan. For a major regulation, the Steering Committee must review the plan and the Administrator and Assistant Administrators must approve it.

When a lead office, after completing its analysis, submits to the Administrator a recommendation for action, it must attach an analysis of alternatives and supplements to traditional, direct regulation. Before making the final Agency decision to regulate, the Administrator will thus be able to satisfy himself that regulation would be preferable to possible alternatives.

Further, the Standards and Regulations Evaluation Division is in the process of hiring a contractor who will evaluate upcoming Agency actions to insure that the program offices consider all reasonable alternatives to regulations.

Agency contact: Henry Beal, standards and Regulations Evaluation Division (PM-223), 755-2265.

4. *Evaluation of the Impacts of Regulation.* EPA's current Regulation Development Manual requires the lead office to prepare economic impact analyses for all regulations which will:

- Impose additional costs on the regulated industries of at least $100 million within 1 year;
- Increase the price of a major product by more than 5 percent;
- Increase national energy consumption by the equivalent of 25,000 barrels of oil a day; or
- Increase the demand for or decrease the supply of key materials by three percent.

These economic impact analyses include identification of the incremental costs of compliance, the people who will pay those costs, the effects on economic productivity, indirect effects on the economy, and impacts on energy consumption. The Agency makes this information publicly available, and considers it during internal preparation and review of the proposed regulation.

To conform with President Carter's Executive Order on improving Government regulation, the Acting Administrator on June 28, 1978, approved a new Agency requirement for a regulatory analysis rather than the economic impact analysis. Except for the different name, the regulatory analysis differs from the economic impact analysis only in that the former includes an evaluation of alternatives to regulation.

Agency contacts: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265; Frans J. Kok, Economic Analysis Division (PM-220), 755-0733.

5. *Studies of Cumulative Regulatory Impacts.* EPA is conducting, with contractor assistance, a number of studies of the cumulative impacts of the Agency's air and water regulations on major industries. These studies are assessments of the effects which pollution control has on prices, production, capital formation, employment, and the balance of trade, with forecasts of effects into the mid-1980's. The Agency can then use the studies to increase its awareness of the overall impacts of EPA regulations and to identify any industries which deserve special EPA attention.

The Agency completed studies of the petroleum refining and electric utility industries in 1976; of the integrated iron and steel industry, and the pulp and paper industry in 1977; and of the copper smelter industry in early 1978. The Agency is now conducting studies of the automobile and iron foundry industries and plans to undertake studies of the chemical and agricultural industries.

Agency contact: Willard Smith, Economic Analysis Division (PM-220), 755-2887.

6. *Plain English.* The Agency has established new requirements and has undertaken new projects to ensure that it writes its regulations and other documents in plain English.

Lead offices are primarily responsible for writing their regulations clearly. As part of their responsibility for helping lead offices prepare regulations, staff members of the Office of Planning and Evaluation and the Office of General Counsel are helping the program offices use clear language. They will recommend that their superiors not concur in poorly written new regulations.

The Agency is undertaking two specific projects to help its regulation writers use plain English. First, the Standards and Regulations Evaluation Division and the Office of General Counsel (OGC) are concentrating their efforts on the development of model regulations in plain English. The Acting Administrator on June 28, 1978 requested each program office to select an upcoming regulation and, with SRED and OGC assistance, prepare it in plain English. Those selections have been made and the regulations are now undergoing editorial review.

As a second project to help the Agency use plain English, SRED will hire one or more editorial consultants or contractors to help program offices use plain English and to review the language of proposed regulations. SRED has advertised its need for the consultant, and is now reviewing candidates. The Division hopes to have the consultant at work by this fall.

Agency contacts: Chris Kirtz, Standards and Regulations Evaluation Division (PM-223), 755-9010; Nell Minow, Office of General Counsel (A-130), 755-0709.

7. *Evaluation of New Regulations.* President Carter's Executive Order on Government regulation requires that each agency include in its new significant regulations a plan for a future evaluation of its effectiveness. To comply with the Executive Order, EPA requires each lead office, in consultation with the Program Evaluation Division, to develop an evaluation plan. Evaluation plans will indicate the resources and data needed for the evaluation and a schedule for the review.

Agency contacts: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265; Tom Kelly, Program Evaluation Division (PM-222), 755-3975.

8. *Retrospective Review of Existing Regulations.* EPA is in the first stages of beginning a review of all existing regulations to decide which can be eliminated, simplified, or otherwise improved. President Carter's Executive Order on improving Government regulation requires all agencies to undertake this review.

The Agency was already preparing to review many of its most important regulations in response to judicial or legislative requirements. These regulations in the air program cover ambient air quality standards; new source performance standards; and approval of implementation plans and monitoring and reporting procedures. These regulations in the water program cover water quality management regulations and national pollutant discharge elimination system (NPDES) permit regulations. The Agency will review these regulations first under the new Agencywide retrospective review.

To make the review of existing regulations a comprehensive program, EPA will screen all existing regulations to select those for more detailed review. Each program office will form a work group to conduct the screening. After completion of the initial screening, the program office will summarize its assessment of each regulation, designate those selected for intensive review, and prepare a plan for completion of that intensive review within 5 years.

The Acting Administrator approved on June 28, 1978, the procedures for the retrospective review, and the program offices are now conducting the initial screening.

Agency contacts: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265; Tom Kelly, Program Evaluation Division (PM-222), 755-3975 for the initial screening.

9. *Interagency Regulatory Liaison Group (IRLG). EPA, the Food and Drug Administration, the Occupational Safety and Health Administration, and the Consumer Product Safety Commission have formed the Interagency Regulatory Liaison Group to coordinate all Federal efforts to reduce public exposure to harmful substances.*

The principals of the four agencies direct the IRLG, and have established interagency work groups to coordinate action in these eight areas:

Testing standards and guidelines,
Epidemiology,
Information exchange,
Regulatory development,
Compliance and enforcement,
Research planning,
Public education and communication, and
Risk assessment.

Agency contact: Toby Clark, Office of the Administrator (A-100), 755-0453.

III. REDUCTIONS IN THE BURDENS OF REGULATIONS AND AGENCY PROCEEDINGS

1. *Sunset Policy for New Reporting Requirements.* To reduce the burden on private industry of reporting information to the Government, the Agency adopted on June 28, 1978, a "sunset" policy for reporting requirements in new regulations. This policy will force a cyclical review of the burdens and benefits of all reports which EPA proposes to require from private parties, after the Agency and the people preparing the report have experience with the requirement, and repeal automatically those which the Agency cannot justify.

Under the sunset policy, new regulations that impose a reporting requirement will include a date on which the requirement will expire unless the Agency renews it. The date will normally be five years after the regulation takes effect, but the program office may adopt a different date in certain situations.

Six months before a requirement ends, the Agency will publish a notice of the upcoming expiration. If the program office or another party requests extension of the requirement, the Agency will create a work group to assess its costs, burdens, and usefulness. The work group will recommend whether the Agency should continue the requirement, modify it or allow it to die. The Administrator will decide what action to take, following Steering Committee review of the work group's recommendation.

Agency contact: Henry Beal, Standards and Regulations Evaluation Division (PM-223), 755-2265.

2. *Reports Impact Analysis.* President Carter's Executive Order requires all agencies to analyze any new reporting or recordkeeping requirements before adopting new significant regulations. On June 28, 1978, the Acting Administrator approved a new Agency policy of a reports impact analysis for new regulations. This analysis will describe the reason for any reports required by the regulation; evaluate alternatives to the reports (such as using existing information); outline the information the report would require and the format of the report; and estimate the costs of the report to EPA and the people collecting and preparing the information. The report's impact analysis will be part of the decision package for the regulation.

Agency contact: Richard M. Hardesty, Program Reporting Division (PM-227), 245-3000.

3. *Retrospective Review of Reporting Requirements.* During the Agency's review of existing regulations to see if it should eliminate or change them (see item II, 7), EPA will focus particular attention on the need to eliminate or modify current reporting and record-keeping requirements.

Agency contact: Richard M. Hardesty, Program Reporting Division (PM-227), 245-3000.

4. *Zero-Based Review of Reporting Requirements.* Before President Carter issued his Executive Order requiring agencies to retrospectively review their existing requirements for reports, EPA had initiated a pilot project for zero-based review of its existing reporting requirements, using procedures similar to zero-based budgeting. The Agency has tested the procedures using requirements for reports from grant recipients, and is now revising its Zero-base Reporting (ZBR) Manual. The Agency will test the ZBR procedure on a major program area reporting requirement in the near future.

Agency contact: Richard M. Hardesty, Program Reporting Division (PM-227), 245-3000.

5. *Report Reduction Task Forces.* In 1977 EPA established two task forces to reduce the reports it requires from its regional offices and State agencies.

In early 1977, the Deputy Administrator appointed a task force to examine the necessity for the reports which the Agency requires in its annual guidance to the regional offices. In April 1977 the task force reported to the Deputy Administrator that it had reduced by 36 percent the reports required by the Agency's formal planning and reporting system.

After completion of the first task force's work, the Deputy Administrator created another task force with the broader mission of identifying and reducing the major reporting problems at the EPA regional office and State levels. The task force visited five State governments that helped identify the problems. The task force has prepared a draft report on those reports which the regional offices and State governments identified as candidates for major reductions, and has discussed those candidates with the appropriate program offices. The task force is now preparing a final report to the Deputy Administrator, indicating the reductions which the task force and the program office agreed to, and recommending that she direct the program offices to make reductions in some instances where the task force and the program offices could not reach agreement.

Agency contacts: Ferial Bishop, Office of Toxic Substances (TS-794), 755-8963; Jack Stanton, Program Reporting Division (PM-227), 245-3064;

V 4 3 / 1 9 8 0 0 C 1 2 7 8 LIM

and Larry Reed, Program Evaluation Division (PM-222), 755-0306.

6. *Guidelines for Water Program Reports.* Section 308 of the Clean Water Act authorizes EPA to request information from dischargers. To ensure that the Agency does not overuse this authority, the Office of Water Planning and Standards in October 1977 required all offices preparing questionnaires to gather information from dischargers to comply with detailed guidelines and to prepare a justification. Statisticians review the proposed questionnaire and its justification to guarantee that the Agency is gathering the information with minimal cost and annoyance to the dischargers. As one example of the results of their review, the statisticians could propose a representative survey rather than an industry-wide questionnaire.

Agency contact: Swep T. Davis, Office of Water Planning and Standards (WH-551), 755-0402.

7. *Reduction in Small Business Impacts.* In the fall of 1977, EPA and the Small Business Administration (SBA) entered into an interagency agreement to coordinate EPA's requirements for pollution control by small businesses and SBA's programs of financial assistance to small businesses. Under our Memorandum of Understanding, the agencies cooperate to assure that small businesses do not bear an undue proportion of the impacts of environmental requirements, and that assistance is available to small businesses for their pollution control efforts.

Agency contact: Sheldon Sacks, Office of Analysis and Evaluation (WH-586), 426-2503.

8. *Encouragement of Innovative Technology.* In 1977, Congress added to the Clean Air Act two new provisions to encourage private industry to develop and use innovative technology to reduce air pollution from stationary sources. Under Section 113 EPA can give an existing source using innovative technology an extension of up to 5 years for meeting emission standards. Under Section 111 EPA can give a new source using innovative technology a waiver from the otherwise applicable new source performance standards for up to 4 years from the time the source begins operating. This flexibility will allow polluters to solve startup problems common to new mechanical systems.

The Agency has issued preliminary guidelines to its regional offices on the use of these provisions, and expects to issue final guidelines by the end of this summer. Meanwhile, seven existing sources have applied for section 113 extensions and three new sources have applied for section 111 waivers as of August 1. Of the seven section 113 applications, the Agency has sent three back to the regional offices for more information, has denied two, and is evaluating two. Of the three section 111 applications, the Agency has denied two and is evaluating one.

In 1977 Congress added similar flexibility to the Clean Water Act. Under the new provisions, EPA or a State can give a point source of water pollution (other than a publicly owned treatment facility) an extension of the normal date for compliance with an effluent limitation, if the source is using an innovative system of pollution control that has potential for industry-wide application. An extension under this section can be until as late as July 1987.

In addition, Congress instructed EPA to not make any grants to State or local government agencies for construction of treatment facilities unless the agencies had first fully investigated innovative alternatives to treatment plants. EPA has proposed regulations covering this requirement and expects to issue final regulations in September 1978.

Further, Congress authorized EPA to grant to State and local governments 85 percent of the construction cost of innovative and alternative pollution control facilities and processes, rather that 75 percent of the construction cost as is true for conventional facilities. Similarly, Congress authorized EPA to warrant the effectiveness of these innovative facilities and techniques. The Agency has proposed regulations covering these programs and expects to issue final regulations in September, 1978.

Agency contacts: Francis J. Biros, Stationary Source Enforcement Division (EN-341), 755-2560 for air program compliance date extensions; Stephen Bugbee, Permits Division (EN-336), 472-3665 for water program compliance date extensions; Tom O'Farrell, Municipal Construction Division (WH-547), 426-8976 for consideration of alternative systems; Joe Easley, Municipal Construction Division (WH-547), 426-4445 for grants and warranties for innovative systems.

9. *Simplified New Source Permit Reviews.* Different levels and agencies of government often require numerous permits before a company can begin construction of a new source of pollution. EPA often requires a new source to secure difficult permits from it different program offices. To reduce the delay, complexity, and uncertainty inherent in this type of situation, EPA in early 1978 created a New Source Review Task Force.

Last month the Deputy Administrator circulated to the Agency's senior management for comments a set of six management initiatives which the task force proposed. Upon final adoption of the recommendations, the Agency will:

- Appoint a new source permit facilitator/expeditor in each regional office to coordinate and track different offices' reviews of a new source's permit applications;
- Establish a permit tracking system with administrative milestone for each new source;
- Harmonize the schedules and procedures for the different permit reviews of a single applicant;
- Assist applicants in the completion of their permit applications;
- Agree with each State to reduce duplication among EPA, State, and local reviews; and
- Assess and resolve early in an applicant's review any potential conflict among different environmental requirements for that source.

The task force will next consider projects:

- To develop a consolidated permit application form;
- To computerize a system for tracking the progress of multiple permit applications;
- To harmonize regulatory procedures;
- To possibly consolidate one or more permit programs;
- To conditionally indicate to a company the likely acceptability of proposed new sources for which the company has not completed detailed designs;
- To develop screening procedures for companies to use in their early planning of new projects; and
- To encourage companies to consult with environmental agencies as early as possible in their planning for new sources.

Agency contact: Cheryl Wasserman, Policy Planning Division (PM-221), 755-2723.

10. *Revised Adjudicatory Hearing Procedures.* EPA's statutes require the Agency to use formal adjudicatory hearings in two types of agency proceedings: Cancellation of pesticide registration and issue of water pollution discharge permits. These hearings are patterned after formal court proceedings and are in many ways ill-suited for agency decisionmaking based upon complex technical information.

OGC is revising the pesticide cancellation procedures to use technical panels for gathering information and to increase the administrator's direction of the process by deciding interlocutory appeals. For the discharge permits, where the statute gives EPA greater flexibility, OGC is proposing to change the hearings from adversary proceedings to informal legislative style hearings before relevant program staffers under the direction of an Administrative Law Judge. In both situations, the proposed changes should

lead to better decisionmaking while preserving the parties' rights.

OGC has submitted its proposal for changes in the water pollution permit hearings to the Administrator, and will shortly circulate its proposal for changes in pesticide registration hearings for internal agency review.

Agency contact: Bill Pederson, Office of General Counsel (A-130), 426-0508 for water permits; David E. Menotti, Office of General Counsel (A-132), 755-9301 for pesticide registrations.

11. *Consolidation of Grant Procedures.* EPA has proposed to the Office of Management and Budget draft legislation to simplify and to increase the flexibility of its grant programs. Under the proposed bill, for example, an applicant receiving grants under different EPA programs could transfer money from one program category to another. OMB has not yet given EPA approval for submitting the bill to Congress.

Further, the Agency has administratively consolidated its grants program so that an applicant need file only one request for grants under different programs.

Agency contact; Gary Katz, Grants Administration Division, (PM-216), 755-2896.

IV. INCREASED EXTERNAL PARTICIPATION IN EPA DECISIONMAKING

1. *Special Assistant to the Administrator.* To increase public participation in the Agency's decisionmaking, the Administrator in April 1978 created the new position of Special Assistant to the Administrator for public participation and appointed Sharon Francis to that position.

Agency contact: Sharon Francis, Office of the Administrator (A-100), 755-0425.

2. *Public Participation Task Force.* In April 1978 the Administrator and Deputy Administrator created an internal task force on public participation, chaired by the Administrator's Special Assistant and composed of representatives of all major EPA offices. The task force is working to:

- Improve EPA's ability to involve the public in program development and implementation;
- Increase the effectiveness of EPA's techniques of obtaining public participation;
- Assure consistency and coordination of public participation efforts among programs and the wisest allocation of the Agency's public participation resources; and
- Recommend public participation goals for EPA.

The task force first met on May 30, 1978.

Agency contact: Sharon Francis, Office of the Administrator (A-100), 755-0425.

3. *Office of Public Awareness.* The Agency has reorganized the old Office Affairs, changing its title to the Office of Public Awareness and expanding its institutional support of public participation.

Agency contact: Joan Martin Nicholson, Office of Public Awareness (A-107), 755-0700.

4. *Agency Policy on Public Participation.* EPA plans to set up a standard policy for public participation in the regulation writing process. The Standards and Regulations Evaluation Division began working with the Administrator's task force and other Agency offices and members of the public in June 1978, to develop the policy.

Agency contact: Stephen Saunders, Standards and Regulations Evaluation Division (PM-223), 755-2884.

5. *Office of Water and Waste Management Public Participation Policy.* OWWM has prepared a proposed regulation establishing public participation requirements for programs under the Safe Drinking Water Act, the Resource Conservation and Recovery Act, and the Clean Water Act.

OWWM began work on the regulation in November 1977, with the creation of a working group. Before drafting the proposed rule, the working group prepared a set of concept papers on public participation and used them to solicit comments from 10,000 individuals, interested groups, EPA headquarters and regional staff, and State and local governments. OWWM has submitted the proposed regulation to the Administrator for his approval. After publication of the proposal in the FEDERAL REGISTER, OWWM will hold a public hearing and operate a toll-free long distance telephone line to gather public comments.

Agency contact: Lee Daneker, Office of Water and Waste Management (WH-556), 755-7638.

6. *Reimbursement for Public Participation.* The Agency has begun a pilot project on reimbursement of the expenses of participants in Agency rulemaking. The pilot project is on the regulation proposed on June 6, 1978, for control of polychlorinated biphenyls.

The Agency will pay the costs of participants in the public hearings who will "substantially contribute to a fair determination of the issues", whose economic state in the issue is small, and who do not have sufficient resources to participate on their own.

Agency contact: Bill Pederson, Office of General Counsel (A-130), 426-0508.

7. *Increased Participation by State and Local Governments.* EPA has undertaken two projects to expand State and local government participation in its operations.

First, the Agency has given a grant to the National Governors Association (NGA), the National Association of Counties (NACO), and the National League of Cities (NLC) to facilitate EPA, State, and local cooperation in the first year of implementation of the Clean Air Act Amendments of 1977. NGA, NACO, and NLC have held meetings in Washington, and are now holding regional meetings on implementation of the amendments. In addition, the three associations are disseminating information on the new law to their members.

Second, EPA is cooperating with the Southern California Association of Governments (SCAG) in a pilot project to improve the Office of Management and Budget's Circular A-85 guidelines for cooperation among the Federal and local governments. EPA gives SCAG quarterly reports to inform the Association members of upcoming regulatory actions; the local governments are therefore better able to contribute to EPA decisionmaking.

Agency contact: Dennis Tapsak, Office of Regional and Intergovernmental Operations (A-101), 755-0444.

8. *Toll-free Information Telephones.* The Agency has had two different sets of telephones for people to call for information on the status of regulations and other matters. Both have toll-free long distance lines. The Standards and Regulations Evaluation Division operated an experimental service for information on the status of regulations listed in the regulatory agenda. The Industry Assistance Office of the Office of Toxic Substances operates a service (No. 800-424-9065) for information on implementation of the Toxic Substances Control Act.

Agency contacts: Phil Schwartz, Standards and Regulations Evaluation Division (PM-223), 755-2693; John B. Ritch, Jr., Industry Assistance Office (TS-788), 755-3852.

FEDERAL HOME LOAN BANK BOARD

[H. C. No. 2255]

HIGHFIELD FINANCIAL GROUP (U.S.A.) LTD., AND KEY SAVINGS AND LOAN ASSOCIATION

Receipt of Application for Approval of the Acquisition of

OCTOBER 6, 1978.

Notice is hereby given that the Federal Savings and Loan Insurance Corporation has received an application from Highfield Financial Group (U.S.A.) Ltd., 1773 South 8th Street, Building L, Suite 3, Colorado Springs, Colo. 80906 for approval, pursuant to

V 4 3 / 1 9 8 0 C 1 2 7 8 LIM

section 408(e) of the National Housing Act and § 584.4 of the regulations for Savings and Loan Holding Companies, of the acquisition of Key Savings and Loan Association 3501 South Broadway, Englewood, Colo 80110. Said acquisition is proposed to be accomplished through the purchase of approximately 89 percent of the outstanding common stock of Key Savings and Loan Association pursuant to a certain stock purchase agreement, and applicant's agreement to offer to purchase the remaining outstanding common stock. Comments on the proposed acquisition should be submitted to the Director, Office of District Banks, Federal Home Loan Bank Board, 1700 G Street, Washington, D.C. 20552, within 30 days of the date this notice appears in the FEDERAL REGISTER.

RONALD A. SNIDER,
Assistant Secretary,
Federal Home Loan Bank board.

FEDERAL MARITIME COMMISSION

AGREEMENT FILED

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 23, 1978. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement Nos. T-3727 and T-3727-A. Filing party: Mr. Stuart R. Breidbart, Secretary and General Counsel, United States Lines, Inc., One Broadway, New York, N.Y. 10004.

Summary: Agreement No. T-3727, between Sea-Land Service, Inc., (Sea-Land) and United States Lines, Inc. (USL), provides for USL's 5-year (with renewal options) sublease from Sea-Land of the berth space rights of Wharf 68 and right of use of Gantry Cranes Nos. 8 and 9, at Kaohsiung, Taiwan. Under the terms of the agreement, Sea-Land, as prime tenant, has priority berthing rights at Wharf 68. The rights subleased to USL are secondary, as outlined in the agreement. As compensation, USL shall pay a rental for berthing at Wharf 68 at a rate to be established in accordance with the proportion of the number of gantry crane moves (as defined by the Kaohsiung Harbour Bureau Tariff) made by or for USL during each rental period in relation to the total number of gantry crane moves during that period, such proportion to be calculated in accordance with the provisions set forth in FMC Agreement No. T-3727-A.

Agreement No: T-3727-A, between the same parties, provides that Sea-Land will: (1) sublease USL certain container yard, warehouse, and office facilities, together with four transtainers, two gantry cranes and berthing space; (2) furnish USL container crane services; and (3) furnish stevedoring services at Berth 68, Kaohsiung. The term of Agreement No. T-3727-A is coextensive with that of Agreement No. T-3727, above. Compensation is as set forth in detail in the agreement.

By order of the Federal Maritime Commission .

Dated: October 6, 1978.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 78-35]

ALLIED CHEMICAL, S.A. v. FARRELL LINES, INC.

Filing of Complaint

Notice is hereby given that a complaint filed by Allied Chemical, S.A. against Farrell Lines, Inc. was served October 3, 1978. Complainant alleges that it has been subjected to charges in excess of those lawfully applicable in violation of section 18(b)(3) of the Shipping Act, 1916.

Hearing in this matter, if any is held, shall commence on or before April 3, 1979. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

FRANCIS C. HURNEY,
Secretary.

[6730-01-M]

[Docket No. 78-36]

BALTIC SHIPPING CO.

RATES AND PRACTICES IN THE U.S. GULF COAST/NORTH EUROPE TRADE; ORDER TO SHOW CAUSE

The Baltic Shipping Co. (Baltic) is a common carrier in the foreign commerce of the United States providing liner service between the United States Gulf of Mexico ports and Continental European ports in the Bordeaux/Hamburg range. Baltic is a state corporation of the Union of Soviet Socialist Republics.

Pursuant to section 21 of the Shipping Act, 1916, the Comission issued an Order to Baltic to furnish certain specified information concerning its activities in the foreign commerce of the United States. The Order was issued on April 17, 1978. As indicated in that Order, the Commission has reason to believe that Baltic may be in violation of sections 15, 16, 17 and 18 of the Shipping Act, 1916, and the Commission has determined that the information requested of Baltic is necessary to establish whether such violations exist. Also, as indicated in the section 21 Order, the requested information will enable the Commission to determine whether conditions unfavorable to shipping in the foreign trade in the United States exist and have arisen out of, or result from, competitive methods or practices employed by Baltic requiring the Commission to promulgate rules and regulations pursuant to section 19 of the Merchant Marine Act, 1920, to adjust or meet such conditions.

On May 17, 1978, Baltic filed a Petition for Reconsideration of the Commission's section 21 Order. by Order dated May 26, 1978, the Commission denied Baltic's Petition for Reconsideration, established an extended timetable for compliance with its section 21 order, and required Baltic to file, no later than June 13, 1978, any further legal objections to compliance. The May 26, 1978 order notified Baltic that the filing of objections would not operate to stay the prescribed time for compliance. Baltic filed its legal objections on June 13, 1978.[1]

To date, Baltic has filed cargo manifests and other documentation which respond adequately to paragraphs (A)(1) through (A)(3)(d), and paragraphs (C)(3) through (C)(5) of the Commission's April 17, 1978 section 21 order. Baltic has not, however, adequately responded to paragraphs (A)(3)(e), (B)(1) through (B)(3), (C)(1) and (C)(2) of the section 21 order.

Paragraph (A)(3)(e) of the order calls for tariff item numbers and tariff authority for Baltic rate assessments. Only Baltic knows the basis upon which it assessed rates; the Commission could only speculate, and even speculation would require an extremely cumbersome search of all the possible tariff provisions that might apply. The Commission cannot make a definitive determination of the legality of Baltic's rates and practices if it does not know how Baltic assessed the rates or established the practices.

Paragraphs (B)(1) through (B)(3) of the order call for records, descriptions and memoranda concerning the practice of combining Baltic's equipment with that of other carriers, and concerning container leasing arrangements with other carriers by Baltic. Through counsel, Baltic filed a response indicating that there are no such records, descriptions or memoranda. This response was accompanied by the sworn statement of Bernard Katz, employee of Baltic's sole general agent in the U.S. Gulf Coast/North Europe trade, stating that: "To the best of my personal information, knowledge, and belief, Baltic's Response herein is true and accurate and contains all documents requested in the order that are under the care, custody and control of Baltic in the United States." This statement apparently limited Baltic's response to information located within the United States, despite the fact that the information sought by the order would be more likely to exist outside the United States. In its May 26, 1978 order, the Commission required that: "[I]f Baltic's response to this paragraph is consistent with the statement made in the Affidavit of Bernard Katz, • • • the response shall be verified by a principal of Baltic, authorized to make such a statement, and who has made the necessary inquiries to determine the truth of the statement." If Baltic's original statement were true as to all the information in Baltic's possession *wherever located*, compliance with the requirements of the May 26, 1978 order by the June 30, 1978 deadline prescribed therein would have been a simple matter. Baltic has neither complied with the May 26, 1978 order nor offered any explanation for its failure to elaborate upon its initial response after being notified of its inadequacy. The information sought in paragraphs (B)(1) through (B)(3) is essential to the Commission's inquiry into Baltic's practices in the foreign commerce of the United States and is not available to the Commission except through Baltic.

Paragraphs (C)(1) and (C)(2) of the Commission's April 12, 1978 order apply to "space charters (containerships)", as described under rule 575, Baltic Shipping Co. Eastbound Gulf Intermodal Tariff No. 4, FMC 34, for the period of March 31, 1977 through March 31, 1978. Paragraphs (C)(1) and (C)(2) call for descriptions of all negotiations with other carriers subject to the Shipping Act regarding the chartering of space blocks, and copies or memoranda of all requests (written or oral) received from each "established common carrier." Baltic has not responded to paragraphs (C)(1) or (C)(2); it has only reiterated its legal objections and indicated that there are no *written* requests from "established common carriers" in its possession. The information sought in paragraphs (C)(1) and (C)(2) is necessary to an adequate evaluation by the Commission of the legality of Baltic's space charter rates and practices under the Shipping Act, 1916. The information is not accessible to the Commission except through Baltic.

To date, Baltic has not come forward with any adequate legal justification or factual excuse for its failure to comply with paragraphs (A)(3)(e), (B)(1)-(B)(3), and (C)(1)-(C)(2) of the Commission's section 21 order. In an attempt to justify its failure to comply fully with the Commission's orders of April 17, 1978 and May 26, 1978, Baltic has made the following legal arguments: (1) that the Commission's reach under section 21 of the Shipping Act, 1916, is limited to "facts and historical data" reflected in presently existing business records, and does not extend to information not contained in such records, such as the terms of oral agreements or negotiations; (2) that full compliance with the section 21 order would impose an unreasonable financial burden upon Baltic which is not justified by the scope of the Commission's inquiry; and (3) that Baltic is prevented by foreign law from complying with any portion of the section 21 order which would require the production of documents or information located outside the United States.

In support of the first argument, Baltic refers to cases and legislative history wherein the power of regulatory agencies to *inspect* corporate records has been limited to comport with the agencies' power to prescribe and regulate corporate record keeping procedures in the first instance.[2] The authorities cited by Baltic are not apposite to orders issued pursuant to section 21 of the Shipping Act to *produce* specific information.

Section 21 was enacted to enable the Commission to inquire into the possible violations of the Shipping Act, 1916:

> The purpose of section 21 is not far to seek. Other sections forbid allowance of rebates, require the filing of agreements fixing or regulating rates, granting special rates, accommodations or privileges, which may be disapproved, cancelled, or modified if the board finds them unjustly discriminatory or violative of the act, prohibit undue or unreasonable preferences or the cutting of established rates and unjust discrimination between shippers or ports. To enable it to perform its functions the [Federal Maritime] board may well need such information as that which the section gives it power to demand.[3]

To construe section 21 as limiting the Commission's inquiry to business records that the carrier chooses to keep would render it virtually useless in light of the fact that the Commission does not specify which records must be maintained in the normal course of the carrier's business. Congress did not intend such a result, and the courts have not attributed any such intent to it. Section 21 orders requiring that the terms of certain oral agreements be "set forth in a memorandum in sufficient detail to represent a true and complete record of the contract" have been upheld.[4] The fact that the information sought concerns oral discussions or other matters not presently memorialized in business records is beside the point. The permissible scope of an order issued pursuant to section 21 of the Shipping Act, 1916, is determined by the relevancy of the information sought to matters within the authority of the Commission, and:

---

[1] The Commission's Bureau of Hearing Counsel submitted a memorandum of law in response to Baltic's legal objections, and, on July 12, 1978, Baltic filed a reply to hearing counsel's memorandum.

[2] *Alcoa Steamship Co. v. Federal Maritime Commission*, 348 F. 2d 756 (D.C. Cir. 1965), *Burlington Northern, Inc. v. Interstate Commerce Commission*, 462 F. 2d 280 (D.C. Cir. 1972).

[3] *Isbrandtsen-Moller Co. v. United States*, 300 U.S. 139, 144-145 (1937).

[4] *Kerr Steamship Co. v. United States*, 284 F. 2d 61 (2d Cir. 1960) *appeal dismissed as moot*, 369 U.S. 422 (1962). Baltic attempts to distinguish the *Kerr* case on the ground that it required only the filing of agreements that were required to be filed by other provisions of the Shipping Act. Baltic's assertion is incorrect; the *Kerr* case also upheld that portion of the contested section 21 order which required the filing of agreements between a carrier and another person "whether or not he was 'subject to the Act'." *Id.* at 64. *See also Montship Lines, Ltd. v. Federal Maritime Board*, 295 F. 2d 147 (D.C. Cir. 1961).

V 4 3 / 1 9 8

Nobody would argue, we should suppose, that oral agreements made in other countries could have no effect upon the commerce of the United States, which was the subject being investigated * * *. It would be absurd, for example, to hold that the [Federal Maritime] Board had no power to examine a witness as to what had been agreed abroad, if that was relevant to the terms and conditions of the eventual carriage.[4]

In support of its argument that the Commission's section 21 Order is unreasonably burdensome, Baltic had asserted, in its May 17, 1978 Petition for Reconsideration, that the commission's inquiry is essentially limited to Baltic's space charter shipments. The Commission corrected this misapprehension in its May 26, 1978 Order by again advising Baltic of the full Scope of its inquiry, which includes possible violations of sections 15, 16, 17 and 18 of the Shipping Act, 1916 and the possible existence of unfavorable conditions in the foreign trade, within the meaning of section 19 of the Merchant Marine Act, 1920. The matters encompassed by the sction 21 Order are of legitimate concern to the commission, and are within the scope of its statutory authority; the demand for informatin is not vague or indefinite and the information sought is clearly relevant to the matters under inquiry. This being the case, the Commission's section 21 Order is both reasonable and lawful.[5]

Finally, Baltic argues that "to the extent that certain documents or information requested by the Commission exist and are in the care, custody or control of Baltic outside the United States, the production of such documents or information in this proceeding is barred by the laws of the country(ies) in which such documents or information are located." Baltic refers to no specific laws, and no particulr country, in making the foregoing assertion, nor does it make any attempt to describe what type of information would be considered confidential under foreign law. Further, Baltic has not presented any evidence that it is unable to obtain a waiver of any applicable foreign law. The Commission cannot adequately consider Baltic's argument that foreign law precludes its compliance with the Commission's orders unless it has more information. Therefore:

Prior to determining whether these foreign laws do in fact forbid the production of documents such as those required by the * * * order and, if so, what effect this should have upon compliance, the appropriate procedure is to require these petitioners to make a good faith attempt to obtain a waiver of such restrictions from their respective governments * * *. *Societe Internationale* v. *Rogers*, 1958, 357 U.S. 197, 78 S. Ct. 1087, 2 L.Ed 1255.[7]

All of Baltic's legal objections to compliance with the commission's section 21 Order other than the applicability of foreign law have been aired and fuly considered by the Commission. They are without merit, and are rejected. It appears, therefore, that Baltic shipping Co. is in violation of the Commission's Order of April 17, 1978, as modified by its Order of May 26, 1978, to produce information in accordance with section 21 of the Shipping Act, 1916. Before finding that Baltic is in violation of section 21 and considering appropriate sanctions, however, the Commission wishes to consider the possible affirmative defense of foreign law which has been adverted to, but not yet presented, by Baltic.

Therefore, It Is Ordered, That pursuant to section 21 of the Shipping Act, 1916, and in accordance with Part 502.66 of the Commission's rules (46 CFR 502.66), the Baltic Shipping Co. is ordered to show cause why it should not be found to be in violation of section 21 of the Shipping Act, 1916, by reason of its failure fully to comply with the commission's Orders of April 17, 1978, and May 26, 1978 issued pursuant thereto;

It is Further Ordered, That this proceeding is limited to the submission of affidavits of fact and memoranda of law solely on the issue of the applicability and effect of foreign law upon the information sought by the commission's Orders of April 17, 1978 and May 26, 1978. Should any party feel that an evidentiary hearing is required, that party must accompany any request for such hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding, a description of the evidence which would be adduced to prove those facts, and why such proof cannot be submitted through affidavit. Request for hearing shall be filed no later than November 27, 1978.

It is further ordered, That pursuant to part 502.66 of the Commission's rules (46 CFR 502.66), Baltic Shipping Co. is required to answer this show cause order by providing all information available to it concerning:

(1) The existence and terms of any applicable foreign law or regulation which purports to prohibit the gathering or release of information by Baltic Shipping Co. in response to the Commission's Orders of April 17, 1978, and May 26, 1978;

(2) The nature, description and location of the information or documents covered by the Commission's Orders of April 17, 1978 and May 26, 1978, the gathering or release of which the foreign law purports to prohibit, or which Baltic Co. has not yet released for any other reasons;

(3) The penalties provided by the foreign law in the event it is violated; and

(4) The nature and extent of any efforts by Baltic Shipping Co. to obtain a waiver of any applicable foreign law purporting to prohibit the gathering or release of information by Baltic Shipping Co. in response to the Commission's Orders of April 17, 1978 and May 26, 1978;

It is further ordered, That notice of this show cause order be published in the FEDERAL REGISTER and that a copy thereof be served upon the Baltic Shipping Co.; and

It is further ordered, That the Baltic Shipping Co. shall file the information described in the third ordering paragraph hereof, together with any additional matters it may wish to submit in accordance with the second ordering paragraph hereof, no later than October 25, 1978 with the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, in an original and 15 copies;

It is further ordered, That the Commission's Bureau of Hearing Counsel be made a party to this proceeding. Reply affidavits and a memorandum of law shall be filed by the Bureau of Hearing Counsel no later than November 9, 1978, with the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, in an original and 15 copies; and

It is further ordered, That a rebuttal memorandum and affidavits responding to the memorandum and affidavits filed by the Bureau of Hearing Counsel shall be filed by Baltic Shipping Co. no later than November 20, 1978 with the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573 in an original and 15 copies.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL RESERVE SYSTEM

COLONIAL AMERICAN BANKSHARES CORP.

Proposed Retention of Colonial American Mortage Corp. Lynchburg, Va. Office.

Colonial American Bankshares Corp., Roanoke, Va., has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. §1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to retain the Lynchburg, Va. office of Colonial American Mortgage Corp., Roanoke, Va.

Notice of the application was published on August 21, 1978 in *The News*, a newspaper circulated in Lynchburg, Va.

Applicant states that the proposed subsidiary would engage in the activities of making, acquiring or servicing loans secured primarily by second mortgages on real property and acting as agent in the sale of credit life insurance and credit accident and health insurance in connection with such loans. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested person may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased compitition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than November 3, 1978.

Board of Governors of the Federal Reserve System, October 4, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FALSBUILDING, INC.

Acquistion of Bank

Falsbuilding, Inc., Columbia Falls, Mont., has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3) to indirectly acquire 80 percent of the voting shares of United National Bank of Libby, Libby, Mont., by directly acquiring Lincoln Corp., Libby, Mont. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than November 6, 1978.

Board of Governors of the Federal Reserve System, October 5, 1978.

FIRST TEXAS BANCORP, INC.

Proposed Acquisition of Universal Bankers Life Insurance Co. of Texas

First Texas Bancorp, Inc., Georgetown, Tex. has applies, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c) (8)) and § 22.4(b) (2) of the Board's regulation Y (12 CFR 225.4 (b) (2)), for permission to aquire voting shares of Universal Bankers Life Insurance Co. of Texas, Georgetown, Tex. ("Bankers"). Notice of the application was pubished on: September 3, 1978, in the Killeen Daily Herald of Killeen; September 14, 1978, in the Lampasas Record of Lampasas County, the Round Rock Leader of Williams County, and the Temple Daily Telegram of Bell County; and September 17, 1978, in the Sunday Sun of Williamson County; all in Texas.

Applicant states that Bankers would engage in the activity of acting as underwriter for credit life insurance and credit accident and health insurance, which is directly related to extensions of credit by the member banks in the holding company system. Mortgage redemption and mortgage cancellation insurance will not be underwritten. Such activities have been specified by the Board in § 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as under concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than November 6, 1978.

Board of Governors of the Federal Reserve System, October 5, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on September 29, 1978. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before October 30, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory reports Review, United States General Accounting Office, room 5106, 441 G Street, NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

INTERSTATE COMMERCE COMMISSION

The ICC requests clearance for the new reporting requirements embodied in Ex Parte No. 55 and identified as 49 CFR 1106.7. This section provides for the inclusion of energy impact information along with other evidence submitted by the applicant in support of an application. The information is required with applications identified in section 1106.5 as major regulatory actions. The data will be used by the Commission to consider energy impact in its decisions as required by the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6201, et. seq.). The ICC states that respondents will be ICC regulated transportation firms. The ICC estimates that it will receive 10,000 responses annually and that reporting burden for the energy impact information will average 1 hour per response.

0 C 1 2 7 8

Ex Parte 55, which was served on July 12, 1978, made this reporting requirement effective immediately. However, the reporting is contingent on ICC's compliance with 44 U.S.C. 3512 which precludes the collection of information from 10 or more persons until the Comptroller General has had the opportunity to determine that the information required is not presently available from other Federal sources and that the proposed reporting requierment is consistent with section 3512. This notice represents the beginning of the GAO review.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institute of Education

PANEL FOR THE REVIEW OF LABORATORY AND CENTER OPERATIONS

Meeting

Notice is hereby given that the next meeting of the Panel for the Review of Laboratory and Center Operations will be held on October 28-29, 1978, in room 823 of the National Institute of Education, 1200 19th Street NW., Washington, D.C. The Panel will meet from 9 a.m. until 5:30 p.m. on Saturday, October 28 and from 9 a.m. until 3 p.m. on Sunday, October 29.

The Panel for the Review of Laboratory and Center Operations is established under section 405 of the General Education Provisions Act, as amended by section 403(d) of the Education Amendments Act of 1976, 20 U.S.C. 1221e. Its functions include: (a) The review of long-range plans submitted by the 17 existing educational laboratories and research and development centers to the National Institute of Education; (b) the review of the operations of the laboratories and centers; and (c) making recommendations for the improvement and continuation of individual laboratories and centers and for the support of new laboratories and centers.

The entire meeting will be open to the public. Although the agenda cannot be specified with precision, it will consist of four main elements: (1) Discussion and determination of recommendations to NIE and the Congress with regard to the support of individual laboratories and centers, based in part on the Panel's review of long-range institutional plans and the recommendations of Panel site visit teams; (2) discussion of the scope and content of the final report to Congress and the Director of NIE, including discussion of the first drafts of aspects of the report prepared by Panel members and groups of Panel members since the last meeting (September 23-24, 1978); (3) discussion of the schedule and strategies for completing the writing and production of the final report; and (4) discussion of the dates and purposes of future meetings. The discussion of recommendations for the support of individual labs and centers will be the first major item on the agenda on October 28, and will likely carry over into the afternoon. The remainder of the session on October 28 and on October 29 will be devoted to issues related to the Panel's final report and future activities.

Interested persons are invited to attend these sessions. Written statements relevant to an agenda item or any topic deemed of interest to the Panel may be submitted to the Panel staff at the address below.

Copies of the records of all Panel proceedings may be obtained through the office of the Panel staff. Minutes require approval by the Panel at a subsequent meeting and are available to the public 2 weeks following their approval.

In order to verify the tentative agenda, or assure adequate seating arrangements, persons likely to attend the Panel meeting may contact the Panel staff office as indicated below:

Panel for the Review of Laboratory and Center Operations, National Institute of Education, Washington, D.C. 20208, 202-254-5830 or 254-5306.

Dated: October 10, 1978.

GRADY McGONAGILL,
Staff Director, Panel for the Review of Laboratory and Center Operations.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES 18073; Survey Group 108]

MINNESOTA

Filing of Plats of Survey

On September 27, 1977, four plats of survey of islands were accepted. They will be officially filed in this office as of 10 a.m. on November 6, 1978.

The plats represent surveys of islands omitted from the original township surveys. All of the following described lands are similar to the adjacent surveyed lands in that they were formed by the deposition of glacial debris, and all are located in the fifth Principal Meridian, Minnesota:

T. 142 N., R. 37 W.
Tract 37 (2.86 acres);
Tract 38 (0.88 of an acre);
Tract 39 (0.44 of an acre).
T. 143 N., R. 37 W.
Tract 37 (0.78 of an acre);
Tract 38 (2.69 acres);
Tract 39 (3.13 acres).
T. 143 N., R. 39 W.
Tract 37 (3.52 acres);
Tract 38 (0.56 of an acre).
T. 146 N., R. 39 W.
Tract 37 (3.64 acres);
Tract 38 (0.40 of an acre).

The area aggregates 18.90 acres, more or less.

The islands in T. 142 N., R. 37 W., which are located in Lake of the Valley, have a soil composition of a thin layer of organic matter on a base of glacial till. All are scattered with rocks. Tract 37 rises from the ordinary high water line to an elevation of approximately 10 feet; Tract 38 rises to approximately 8 feet; and Tract 39 rises to approximately 6 feet. Timber on these islands consists primarily of Norway and Jack pine, spruce, balsam, birch, and poplar. The undergrowth is comprised of young timber, briars, hazel, juneberry, and/or native grasses and vines.

In T. 143 N., R. 37 W., the islands described are located in Long Lost Lake. All have a soil composed of a base of glacial till with a layer of duff and undergrowth primarily consisting of native grasses and young timber. On Tract 37, the timber is mainly red and white pine, aspen, and white birch. The timber on Tracts 38 and 39 is mostly red and white pine, ash, oak, basswood, and aspen. Tracts 37, 38 and 39 rise to elevations of approximately 4 feet, 10 feet, and 12 feet, respectively.

The two islands in Bass Lake were omitted from the original survey of T. 143 N., R. 39 W. Tract 37, rising to an elevation of approximately 20 feet, has a soil composition of glacial till with a moderate amount of organic matter

V 43 / 198 0 OCT 12 78 (PM)

incorporated in the top layer. Timber consists of white and red pine, oak, ash, basswood, aspen, elm, and birch; undergrowth consists of native grasses, willow, hazel, briars, and vines. Tract 38, having a soil composition of a thin layer of duff on a base of glacial till, rises to an elevation of approximately 6 feet. The timber therein is comprised of red and white pine, aspen, and white birch with an undergrowth of grasses and young timber.

Located in Island Lake are the two tracts described in T. 146 N., R. 39 W. Rising to approximately 7 feet, Tract 37 has: Soil composed of a thin layer of duff on a base of glacial till; timber consisting of red and white pine, aspen, elm, ash, birch, willow, balm of Gilead, oak, poplar, balsam, and spruce; and an undergrowth of native grasses, briars and small trees. Tract 38 barely rises above the ordinary high water mark, has soil composed of glacial till covered with a thin layer of sand and gravel, and has vegetation consisting of native grass, briars, and willows.

Tract 38, T. 146 N., R. 39 W., was found to be less than 50 percent upland in character within the interpretation of the Swampland act of September 28, 1850. Therefore, title to that tract inured to the State of Minnesota as of that date, and it is subject only to selection by the State under that act.

The remaining lands described are over 50 percent upland in character within the meaning of the Act of September 28, 1850. They are, therefore, held to be public land.

Except for valid existing rights, there lands will not be subject to application, petition, location, selection, or to any other type of appropriation under any public law, including the mining and mineral leasing laws, until a further order is issued.

All inquiries relating to these lands should be addressed to Director, Eastern States Office, Bureau of Land Management, 7981 Eastern Avenue, Silver Spring, Md. 20910.

LANE J. BOWMAN,
Acting Director,
Eastern States.

Copies of the notice will be mailed to:

NEW MEXICO

Application

OCTOBER 3, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Southern Union Gathering Co. has applied for one 4-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 31 N., R. 11 W.,
Sec. 1, S½SW¼.

This pipeline will convey natural gas across 0.20 of a mile of public land in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promtly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Application

OCTOBER 2, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Yates Petroleum Corp. has applied for two 2⅞-inch natural gas pipelines right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 20 S., R. 24 E.,
Sec. 1, SW¼NE¼ AND SE¼NW¼.

These pipelines will convey natural gas across .604 of a mile of public land in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Application

OCTOBER 3, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Phillips Petroleum Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 14 S., R. 28 E.,
Sec. 11, SE¼SW¼.

This pipeline will convey natural gas across .126 of a mile of public land in Chaves County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Applications

OCTOBER 2, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), transwestern Pipeline Co. has applied for three 4-inch natural gas pipeline and related facilities rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 17 S., R. 24 E.,
Sec. 4, E½SW¼;
Sec. 8, E½NE¼, SW¼NE¼ AND NW¼SE¼;
Sec. 9, NW¼NW¼;
Sec. 18, SE¼SW¼.
T. 18 S., R. 24 E.,
Sec. 12, SW¼SE¼.

These pipelines will convey natural gas across 1.06 miles of public lands in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

[4310-84-M]

[NM 34734, 34736, 34739, 34767, 34768, 34769, 34770, 34776 and 34777]

NEW MEXICO

Applications

OCTOBER 2, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for nine 4½-inch natural gas pipelines and related facilities rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 26 N., R. 7 W.,
Sec. 4, S½NW¼.
T. 28 N., R. 7 W.,
Sec. 8, SW¼SW¼;
Sec. 11, SE¼SW¼;
Sec. 17, NW¼NE¼ AND N½NW¼;
Sec. 19, NW¼NE¼;
Sec. 32, NE¼NW¼.
T. 30 N., R. 7 W.,
Sec. 3, SE¼NW¼;
Sec. 9, SW¼NE¼ AND W½SE¼.

These pipelines will convey natural gas across 2.445 miles of public lands in Rio Arriba and San Juan Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

DEPARTMENT OF JUSTICE

DRUG ENFORCEMENT ADMINISTRATION

[Docket No. 78-14]

THOMAS R. PRENDERGAST, CONROY'S PHARMACY, CORAOPOLIS, PENNSYLVANIA

Hearing

Notice is hereby given that on June 30, 1978, the Drug Enforcement Administration, Department of Justice, issued to Thomas R. Prendergast, Conroy's Pharmacy, Coraopolis, Pa., an Order to Show Cause as to why the Drug Enforcement Administration should not deny Respondent's application for registration, executed March 17, 1978, under 21 U.S.C. 823, to dispense controlled substances listed in Schedule(s) II, IIN, III, IIIN, IV and V as a retail pharmacy.

Thirty days having elapsed since the said Order to Show Cause was received by the Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 9:30 a.m. on Friday, October 27, 1978, in the Hearing Room, room 1210, Drug Enforcement Administration, 1405 I Street NW., Washington, D.C.

Dated: October 4, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-41]

ACCIDENT REPORT; RESPONSES TO SAFETY RECOMMENDATIONS

MARINE ACCIDENT REPORT

The National Transportation Safety Board has released its report on investigation into the accident involving the M/V CHESTER A. POLING which occurred January 10, 1977, about 6nmi ESE of Cape Ann, Mass. The report, No. NTSB-MAR-78-7, was made available October 3, 1978.

Investigation revealed that the 281-foot coastal tankship broke in two in 25- to 30-foot seas while en route from Everett, Mass., to Newington, N.H., during a severe winter storm. The vessel was partially ballasted and carried no cargo; only a minor pollution resulted. Of the seven persons aboard, six were rescued. One person, who fell into the ocean while attempting to enter the Coast Guard helicopter's

V 43 / 198 0 OCT 12 78 UMI

rescue basket, is missing and presumed dead.

The Safety Board determined that the probable cause of the accident was the brittle fracture of a bottom longitudinal stiffener, which led to buckling of the adjacent bottom plating panels and subsequent failure of the complete bottom and sides. The bottom longitudinal stiffener failed because of the high stresses created by the improper distribution of ballast water and the heavy seas. Contributing to the accident were the lack of a loading manual to indicate proper ballasting procedures, the speed of the vessel, and the inaccuracy of the National Weather Service's weather forecasts.

Contributing to the loss of life were the lost seaman's failure to wear a personal flotation device, and the improper handling of the Coast Guard helicopter's resuce basket by the POLING's crew, which resulted from the crew's lack of training and their inability to hear Coast Guard instructions over the noise created by the helicopter, high winds, and breaking seas.

As a result of investigation of this accident, the Safety Board in two separate letters dated September 22, 1978, addressed the following recommendations to:

U.S. Coast Guard—

Require that a loading manual indicating proper cargo and ballast loading arrangements and procedures be prepared for each coastal tankship. (M-78-63)

Study the feasibility of providing estimated hull stress information based on loading condition, sea state, and ship speed and relative heading in graphical form in coastal tankship loading manuals. (M-78-64)

Require that exposure suits be provided for each crewmember on vessels that routinely operate in areas of cold air or sea temperatures. (M-78-65)

Require that at least one inflatable liferaft be stowed near each accommodation and working space on coastal tankships. (M-78-66)

Develop an effective method to insure that each merchant seaman is instructed and trained in the proper use of helicopter-borne rescue baskets. (M-78-67)

Install a placard of simple user instructions suitable for emergency situations on each Coast Guard helicopter-borne resuce basket. (M-78-68)

Maritime Administration of the U.S. Department of Commerce—

With assistance from the U.S. Coast Guard and maritime industry management and labor, develop a survival and rescue training course to provide instruction in Coast Guard sea rescue methods and in the proper actions merchant seaman should take to aid in their rescue. (M-78-69)

With the exception of M-78-64, each of the above recommendations is designated "Class II, Priority Action." Recommendation M-78-64 is designated "Class III, Longer Term Action." The recommendations are reproduced in the accident report.

Responses to Safety Recommendations

Highway

H-77-21.—Letter of September 20 from the Federal Highway Administration (FHWA) responds to one of three recommendations issued following investigation of the October 16, 1976, accident on Interstate 70 near Byers, Colorado. This and four similar accidents occurring at this location resulted in 12 deaths in less than 5 years as a result of errant vehicles entering the median, driving behind the guardrail, and plunging over the embankment between twin bridges.

The Safety Board Recommended that FHWA insure that all State highway departments are using current FHWA and American Association of State Highway and Transportation Officials (AASHTO) guidelines for barriers installed at bridge approaches, and insure that the departments periodically inform and instruct their maintenance forces about changes to these guidelines.

In response, FHWA reports that it has for some time been conducting safety design reviews in the individual States with the primary objective to determine whether States are incorporating into their projects safety design features which represent the current state of the art. A major national review of safety design has been made on new projects and safety upgrading of previously constructed projects. A major thrust of this review was to evaluate barriers installed at bridge approaches and to review current design standards for these barriers. Also, FHWA continues to develop training courses in the area of safety design. These courses are for FHWA, State, and local personnel involved in all facets of highway work which includes maintenance forces.

Specifically in the area of traffic barriers, FHWA has distributed to its field offices copies of the new AASHTO Guide for Selecting, Locating, and Designing Traffic Barriers. This publication was transmitted with an FHWA Notice which specifically requested field offices to review traffic barrier practice, in light of the Guide, to effect improvements in practices that fall short of suggestions in the Guide. FHWA notes that information from the AASHTO Guide is a significant feature of a training course entitled "Safety Design and Operational Factors for Streets and Highways" which is being conducted by FHWA for Federal, State, and local engineers.

FHWA also reports on issuance on November 17, 1977, of Notice N7560.5, "Federal-Aid Participation in Highway Appurtenances" which directly addresses the intent of H-77-21; a copy is attached to FHWA's letter. Further, an FHWA Bulletin is being prepared to alert FHWA elements and others of the continuing need to insure that State and local authorities use the latest guidelines for barriers.

H-78-42.—FHWA's letter of September 21, is in response to a recommendation developed as a result of investigation into the Ford Construction Company truck-semitrailer/Dodge van collision on U.S. Route 221 near Marion, N.C., May 12, 1977. The recommendation urged FHWA to maintain strict surveillance of Ford Construction Company's compliance with the provisions of the Federal Motor Carrier Safety Regulations (FMCSR).

In response, FHWA notes that the transportation involved in this accident was an interstate movement of construction equipment in furtherance of a commercial enterprise, serving primarily to move equipment intermittently to and from or between job sites. Ford Construction Co. is not engaged in "for hire" transportation operations. Such an operation is deemed to be private carriage subject to FMCSR. There is no Federal requirement that private carriers obtain operating authority or register their operations in any manner. FHWA states that this carrier was unknown to the Bureau of Motor Carrier Safety (BMCS) and had not been served with the FMCSR or subjected to any prior safety compliance investigation.

FHWA reports that 3 weeks after the accident the carrier's president was personally served with the FMCSR, and a safety compliance survey conducted at that time disclosed a pattern of general noncompliance with the FMCSR. FHWA reports that another safety compliance survey made on the carrier on July 18, 1978, disclosed improvement in compliance but still some areas of violation, particularly in recordkeeping. Intention to bring about full compliance has been indicated to BMCS, and a third safey survey will be conducted in about 6 months. FHWA will continue surveillance and will take enforcement action if necessary.

H-78-1 through 4.—FHWA has provided the following responses (letters dated September 20 regarding H-78-2 and September 22 regarding H-78-1, 3 and 4) to highway safety recommendations resulting from investigation of the collision of the *S.S. Marine Floridian* with the Benjamin Harrison Bridge at Hopewell, Va., February 24, 1977.

Recommendation H-78-1 asked FHWA to study and report on the completeness and effectiveness of its bridge classification/inspection program under 23 U.S.C. 144, 23 CFR Part 650, and the AASHTO "Manual for Maintenance Inspection of Bridges" Part 2.5, especially as to bridges over navigable channels, for their ability to sustain pier impact at water level and for the design of the traffic control system on the bridges.

In response, FHWA notes that under 23 CFR Part 650, Subpart C, and 23 U.S.C. 144, all bridges on the Federal-Aid system are inspected and classified every 2 years and reports on the state of the Nation's bridges, with recommendations, are made to the Congress annually. The States record the condition of the bridge substructure and channel protection and note the condition and effectiveness of the fendering system if any exists (p. 3-13, Bridge Inspector's Training Manual 70). This data is for State use and is retained in the State's files. FHWA further states, "It would be counterproductive as well as a monumental task to ask the States to calculate the ability of their bridge piers to sustain a pier impact at water level." FHWA plans no additional action in response to H-78-1.

Recommendation H-78-2 asked FHWA to work with the U.S. Coast Guard to develop specifications for design, and issue guidelines for placement of dolphins, fenders, and other energy absorbtion and/or vessel redirection devices for the protection of both bridge and vessel during an accidental impact. FHWA's interim response reports a meeting with Coast Guard to plan a course of action, and notes that Coast Guard has a research study underway on the design of dolphins and fenders which is being conducted by the University of Maryland. When the report is received, FHWA/Coast Guard engineers will evaluate it, but it is too early to predict implications of the study. Reportable progress is not expected until next April.

In response to recommendation H-78-3, which asked FHWA to bring together in one publication all guidelines for traffic control at movable bridges, including signs, signals, pavement markings, and restraint devices, FHWA is completing the following actions: (1) Consolidation of requirements for traffic controls in the Manual on Uniform Traffic Control Devices (MUTCD); (2) removal of material in Federal-Aid Highway Program Manual (FHPM) 6-3-3-1 related to movable bridges; and (3) including detailed guidelines for traffic controls at movable bridges in the MUTCD Handbook.

FHWA states that revision of MUTCD has been accomplished through a change "Sg-67 (Chng.)—Traffic Control Devices at Movable Bridges," approved May 9, 1977, which revises sections 4E, 4E-14, 4E-15, 4E-16, and 4E-17 to incorporate standards on traffic control devices on movable bridges taken form the FHPM Volume 6, Chapter 8, Section 3, Subsection 1, "Traffic Control Devices on Federal-Aid and Other Streets and Highways," and from the Code of Federal Regulations 655.603. A copy of the revised text of MUTCD sections 4E-13 through 4E-17 is attached to FHWA's response. Further, FHWA reports that FHPM 6-8-3-1 is in final stages of complete revision, and material related to movable bridges will be deleted to avoid duplication of regulations. Finally, FHWA is preparing an MUTCD Handbook which will include detailed information as guidelines for traffic control devices at movable bridges—estimated completion date June 1980.

Recommendation H-78-4 asked FWHA to include as part of the Federal-Aid Highway Program Manual 6-8-3-4, Paragraph 5d(3), "Special Purpose Surveillance and Control Systems," a description of surveillance and control systems used on multispan bridges over wide navigable waterways. FHWA states that regulations on surveillance and control systems for bridges are included in FHPM Volume 6, Chapter 8, Section 3, Subsection 4. FHWA's Regulations Reduction Task Force has concluded that the FHPM's should contain only regulatory materials, so FHWA will issue descriptive material concerning surveillance and control systems in another form. A "Technical Advisory" on surveillance and control systems is being prepared with a planned issuance in April 1979. Also, a new edition of MUTCD Handbook, which is planned for June 1980, will contain such descriptive material.

In the covering letter of September 22, FHWA states that copies of the above responses are being forwarded to its field offices with instructions to take on an active role in assuring that the information in the updated version of the MUTCD on movable bridges, as well as the bridge inspection program itself, will pay special attention to movable bridges and the issues raised by the Safety Board.

Pipeline

P-78-45 through 49.—Columbia Gas of Ohio, Inc., on September 25 responded to the Safety Board's recommendations issued following investigation of the pipeline accident at the company's facilities in Mansfield, Ohio, which occurred last May 17 when a low-pressure distribution system was overpressured. (See 43 FR 38960, August 31, 1978.)

Columbia, in response to recommendation P-78-45, reports that it has already taken action to see that a pressure gauge is utilized whenever there are two or more mains in the same location that cannot be positively identified, as recommended.

Columbia indicates that further consideration will have to be given to implementing recommendation P-78-46, which called for devising a method of physically marking and identifying high- and low-pressure mains if they are the same size and are installed on the same side of the street or have the possibility of crossing each other during installation. Columbia states that at the present time there is no practical way to accomplish this objective on existing facilities, nor would a crew working on a job like the situation in the Mansfield incident be assured that this type of marking or identifying could be relied upon. Columbia believes that the positive way to identify this type of situation is to actually check the pressure in the line.

Concerning recommendation P-78-47, which called for revised mapping procedures to require that details of intersections crossed by many gas mains be shown on larger scale drawings where lot line dimensions can be shown. Columbia does not believe that such revision of its mapping procedures would prevent a similar incident. Columbia states, "The Mansfield incident indicates again that maps should not be relied upon for positive identification when making 'hot taps.'" Columbia's maps provide for larger scale detail where gas mains are close to each other, but Columbia's crews are advised not to rely on drawings for exact pipeline locating purposes. The company stresses this fact in its procedure.

Columbia agrees with recommendation P-78-48, and has already reviewed the Columbia incident with company supervisors, again emphasizing the need for positive identification of the type of gas main involved before tapping it. This same information is reviewed with each construction crew involved with tapping operations.

Recommendation P-78-49 asked Columbia to revise its company procedure manual to require the use of pressure gauges before tapping a gas main that cannot be positively identified by other means. Columbia notes that while its procedure did contain some material with respect to the use of pressure gauges, after the Mansfield incident, this requirement was reviewed and the manual has been revised as recommended.

Railroad

R-78-23.—Letter of August 8 from the Federal Railroad Administration is in response to the recommended developed following investigation of the side collision of two Southern Railway Company trains at Spencer, N.C., October 8, 1977. FRA was asked to require that the track shunt circuit imposed by contact closure in a circuit controller be phased out as soon as

V 43 / 198 0 OCT 12 78

practicable and a series break-type circuit, which will satisfy the requirements of FRA's Rules, Standards, and Instructions, be used in place thereof.

In response, FRA expresses its belief that the design of the switch shunting circuit does satisfy the requirements of the Rules, Standards, and Instructions for Railroad Signal System, § 236.5 of which reads, "All control circuits the functioning of which affects safety on train operation shall be designed on the closed circuit principle." FRA contends that the switch shunting circuit, which is not designed on the closed circuit principle, is not subject to § 236.5 because it is not a control circuit. "A control circuit is an electrical circuit, while a switch shunting circuit is a shunting circuit, one which bypasses an electrical circuit," FRA states. FRA notes that it is the purpose of the track circuit, an electrical circuit designed on the closed circuit principle, to determine that the track is in place in proper condition for the passage of trains at maximum speed. Thus, the track circuit, not the switch shunting or series break-type circuits, provides broken rail protection and is subject to § 236.5.

FRA believes that as protective circuits, the purpose of which is to determine the switch is lined properly for the passage of trains at maximum speed, the switch shunting and series break-type circuits are equally effective. Either is subject to malfunction caused by improper maintenance or other factors, FRA states.

In FRA's opinion, the choice between switch shunting circuits and series break-type circuits becomes one of economics. Both designs have similar average life spans and normal maintenance costs, but differences arise in installation, replacement, and conversion costs. FRA says that to convert about 125,000 switch shunting circuits now installed on the Nation's railroads to the more expensive series break-type circuits would cost about $312,500,000, or about $2,500 per circuit. Therefore, FRA states, it will not require all track shunt circuits to be replaced by series break-type circuits.

R-78-38 and 40.—Amtrak on August 23, in reply to the Safety Board's request of August 3, furnished copies of Amtrack Bulletin Orders applicable to these two recommendations which were issued in connection with the Board's investigation of the collision last June 9 of Amtrak's "Montrealer" and a ConRail commuter train at Seabrook, Md. Amtrak has also furnished a copy of the notice posted in the cab of all self-propelled cars and locomotives equipped with the signal appliance in question. With respect to the Signal System Study referenced in Amtrak's initial response of June 30 (43 FR 35567, August 10, 1978), Amtrak states that a great deal of data has been accumulated, but there are additional tests to be performed.

NOTE: The above notice summarizes Safety Board documents recently released and recommendation response letters received. Single copies of accident reports are available without charge as long as supplies last. Copies of the Board's recommendation letters and letters in response to such recommendations may be obtained free of charge.

All requests for copies must be in writing, identified by report or recommendation number. Address requests to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20494.

Multiple copies of accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virgina 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)))

MARGARET L. FISHER,
Federal Register Liaison Officer.

[7715-01-M]

POSTAL RATE COMMISSION

[Docket No. MC76-5]

BASIC MAIL CLASSIFICATION REFORM SCHEDULE, 1976

Possible Technical Changes in Appendix A of Stipulation and Agreement of January 30, 1978

OCTOBER 5, 1978.

Pursuant to Commission Order No. 158 and Presiding Officer's Notice of February 3, 1978, we currently have under consideration a proposed Stipulation and Agreement concerning the proper scope, extent, and degree of detail of the Domestic Mail Classification Schedule. In accordance with the terms of the settlement agreement, the Commission is considering appropriate resolutions of those issues—stated in app. B to the agreement—on which evidentiary hearings were held.

In addition, the Commission has at the same time been examining the uncontested portions of the draft classification schedule furnished by the signatories (in app. A to the proposed Stipulation and Agreement) for consistency with applicable statutory standards and the policies of the Postal Reorganization Act. While the Commission has not yet reached an overall conclusion regarding the consistency of the uncontested classification provisions with the applicable standards, we have identified several provisions which, if recommended, we would be inclined to change in order to state currently applicable mail classification law more accurately. Specifically, we believe the following changes in the identified app. A provisions would result in more technically accurate statements of pre-existing rules:

Page	Section	Possible Change
11	100.022	Change to read as follows: "Presorted first-class mail is regular or post card first-class mail which is presented in a single mailing of 500 or more pieces, properly prepared and presorted, and posted at the applicable first-class rates."
11	100.031	Change to read as follows: "Cards exceeding the maximum post card dimensions set forth in section 100.021 c. may be mailed only at regular first-class rates applicable to matter defined in section 100.020 or section 100.022."
13	100.060	Insert "that" between "except" and "when"
41	300.020	Change "sections 300.021 and 300.022," to "sections 300.021 or 300.022."
41	300.021	Change to read as follows: "Bulk mail is third-class mail consisting of properly prepared and presorted mailings of not less than 50 pounds or not less than 200 pieces identical in size and weight. Each piece of the minimum quantities required must be addressed to a different addressee."
54	400.022 c.	Insert "public" before the word "library."

The Commission realizes that paragraphs 4.a. and 13.a. of the Stipulation and Agreement of January 30, 1978, are intended by the signatories to limit severely the Commission's decisional function with respect to the uncontested provisions contained in app. A. However, the possible modifications set out above are technical in character and would not, in our view, vary the scope, extent, or degree of detail embodied in the provisions to which they pertain. For these reasons, we are giving notice of the contemplated changes in order to give interested parties the opportunity to comment upon these possible technical improvements. such comments should be filed with the Commission by October 16, 1978.

DAVID F. HARRIS,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Rel No. 15204; SR-CBOE-78-24]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

OCTOBER 2, 1978.

On August 3, 1978, the Chicago Board Options Exchange, Incorporated ("CBOE") La Salle at Jackson Chicago, Illinois 60603 filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change which amends its disciplinary rules. The proposed changes would: (1) make explicit the obligation of all CBOE members and associated persons to cooperate in Exchange investigations involving possible rule violations; (2) codify the right of all CBOE members to be represented by counsel during an Exchange investigation; (3) provide that the Exchange staff submit reports to the Business Conduct Committee only with respect to investigations where the staff finds reasonable grounds to believe a violation has been committed; (4) require that the Board of Directors, as well as the member who is the subject of the investigation and the complainants, if any, be notified when the Business Conduct Committee, upon consideration of a staff report determines not to initiate charges; (5) require parties to an investigation to exchange documents and witness lists well in advance of the hearing date and to attempt to arrive at agreeement on uncontroverted issues in advance of the hearing; (6) provide the Business Conduct Committee with the authority to call for the production of witnesses and evidence; (7) make explict that the Board of Directors upon review of Business Conduct Committee decisions, may increase the sanctions; and (8) provide that sanctions imposed by the Business Conduct Committee will become effective upon completion of the Exchange review process, notwithstanding further appeal to the Commission.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-15063, August 14, 1978) and by publication in the FEDERAL REGISTER (43 FR 36727, August 18, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Administrative Proceeding, File No. 3-5545; File No. 2-53436 et al.]

IMPERIAL CHEMICAL INDUSTIRES LIMITED AND UNION PACIFIC CORP.

Application and Opportunity for Hearing

OCTOBER 3, 1978.

In the matter of IMPERIAL CHEMICAL INDUSTRIES, File Nos. 2-53436 and 2-60564 and Union Pacific Corp. File Nos. 2-53284 and 2-55431.

Notice is hereby given that Imperial Chemical Industries Ltd., an English company ("Imperial"), and Union Pacific Corp., A Utah corporation ("UP"), have filed a joint application (the "application") under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Securities and Exchange Commission ("Commission") that the trusteeships of Morgan Guaranty Trust Co. of New York (the "Bank") under four existing indentures which are qualified under the Act (the "Four Qualified Indentures") and under two new indentures which are not qualified under the Act (the "Two New Indentures") are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as trustee under any of the Four Qualified Indentures.

Imperial and UP allege that:

1. *Summary.* The application relates to a highly complex series of transactions. In essence, eight insurance companies in a private placement are buying notes issued under one new indenture from a corporation, which in turn re-lends the funds under the second new indenture to an affiliated partnership, which is building a petrochemical complex in Corpus Christi, Tex. The corporation and the partnership are ultimately controlled as follows: 37½ percent by Imperial; 37½ percent by UP; and 25 percent by Solvay & Cie, N.A., a Belgian corporation ("Solvay"). Imperial and UP each have certain ultimate obligations to put up cash if the partnership or the corporation defaults. Should these ultimate obligations make Imperial and UP "obligors" on the securities issued under the Two New Indentures, the application seeks a Commission finding that the trusteeship of the Bank under the Four Qualified Indentures is not so likely to involve a material conflict of interest as to disqualify the Bank from acting as trustee under any of the indentures.

2. (a) *1975 ICI Indenture.* The Bank, as Trustee, has entered into an Indenture dated as of June 1, 1975 (the "1975 ICI Indinture") with ICI North America Inc., a Delaware corporation ("ICI NA"), and Imperial pursuant to which $100,000,000 aggregate principal amount of ICI NA's 9.05 percent Guaranteed Sinking Fund Debentures due June 1, 1995 have been issued. These debentures are fully guaranteed by Imperial. Imperial's guaranty is wholly unsecured. The 1975 ICI Indenture was filed as Exhibit 4 to Registration Statement No. 2-53436 under the Securities Act of 1933 (the "1933 Act"), and has been qualified under the Act.

(b) *1978 ICI Indenture.* The Bank, as Trustee, has also entered into an Indenture dated as of January 15, 1978 (the "1978 ICI Indenture") with ICI NA and Imperial pursuant to which $175,000,000 aggregate principal amount of ICI NA's 8¾ percent Guaranteed Sinking Fund Debentures due January 15, 2003 have been issued. These debentures are fully guaranteed by Imperial. Imperial's guaranty is wholly unsecured. The 1978 ICI Indenture was filed as ICI NA's Exhibit 4(b) and Imperial's Exhibit 4 to Registration Statement No. 2-60564 under the 1933 Act and has been qualified under the Act.

(c) Hence, Imperial is an "obligor" with respect to the securities outstanding under two of the Four Qualified Indentures (ICI NA, also such an "obligor", is unrelated to the balance of this application).

(d) *1975 UP Indenture.* The Bank, as Trustee has entered into an Indenture dated as of May 1, 1975 (the "1975 UP Indenture") with UP pursuant to which $100,000,000 aggregate principal amount of UP's 8.60 percent Notes due 1983 have been issued. The 1975 UP Indenture was filed as Exhibit 2 Registration Statement No. 2-53284 under the 1933 Act and has been qualified under the Act.

(e) *1976 UP Indenture.* The Bank, as Trustee has entered into an Indenture dated as of March 1, 1976 (the "1976 UP Indenture") with UP pursuant to which $150,000,000 aggregate principal amount of UP's 8.40 percent Sinking Fund Debentures due 2001 have been issued. The 1976 UP Indenture was filed as Exhibit 2 Registration State-

V 4 3 / 1 9 8
0 C 1 2 7 8

ment No. 2-55431 under the 1933 Act and has been qualified under the Act.

(f) *UP's Insecured Obligations.* The securities issued under the 1975 UP Indenture and the 1976 UP Indenture are wholly unsecured obligations of UP. Hence, UP is an "obligor" with respect to securities outstanding under two of the Four Qualified Indentures.

3. *New Unqualified Collateral Trust Indenture.* The Bank, as Trustee (the "Purchasers Trustees"), has entered into a Collateral Trust Indentures dated as of July 26, 1978 (the "Collateral Trust Indenture") with Corpus Christi Capital Corp., a New York corporation ("CCCC") pursuant to which up to $525,000,000 aggregate principal amount of CCCC's 9¼ Series A Secured Notes (the "Secured Notes") may be issued over a period of approximately two years. The Secured Notes are to be sold to eight insurance companies (the "Purchasers") pursuant to separate Secured Note Agreements dated as of July 26, 1978 between CCCC and Corpus Christi Petrochemical Co., a Texas general partnership ("CCPC"), on the one hand, and each of the Purchasers on the other hand. On July 26, 1978, $126,537,000 aggregate principal amount of Secured Notes were issued and sold to the Purchasers.

4. *New Unqualified Mortgage Note Indenture.* The Bank and Mr. Malcolm S. Nielson, as Trustees (the "Company Trustees"), have entered into an Indenture of Mortgage and Deed of Trust dated as of July 26, 1978 (the "Mortgage Note Indenture") with CCPC pursuant to which up to $525,000,000 aggregate principal amount of CCPC's 9¼ percent Series A Mortgage Notes (the "Mortgage Notes") may be issued. The Mortgage Notes are to be sold to CCCC pursuant to a Mortgage Note Agreement dated as of July 26, 1978 between CCPC and CCCC. On July 26, 1978 a Mortgage Note in the principal amount of $126,537,000 was issued and sold to CCCC. The Collateral Trust Indenture and the Mortgage Note Indenture have not been qualified because the issuer alleges that the sale of the securities issued thereunder is exempt as a private placement under the applicable provisions of the Securities Act of 1933 and the Act.

5. *Ownership of CCCC.* The stock of CCCC is owned as follows:

(a) 37½ percent by ICI Petrochemicals Inc., a Delaware corporation ("ICI Petrochemicals"), which is a wholly-owned subisidiary of ICI Americas Inc., a Delaware corporation ("ICI Holdings"), which is a wholly-owned subsidary of Imperial;

(b) 37½ percent by Champlin Petrochemicals, Inc., a Delaware corporation ("Champlin Petrochemicals"), which is a wholly-owned subisidiary of Champlin Petroleum Co., a Delaware corporation ("Champlin Petroleum"), which is a wholly-owned subsidiary of UP; and

(c) 25 percent by Soltex Petrochemicals, Inc., a Delaware corporation ("Soltex Petrochemicals"), which is a wholly-owned subsidiary of Soltex Polymer Corp., a Delaware corporation ("Soltex Polymer"), which is a wholly-owned subsidiary of Solvay.

6. *Ownership of CCPC.* ICI Petrochemicals, Champlin Petrochemicals and Soltex Petrochemicals (each a "Partner" and collectively, the "Partners") are also the partners in CCPC, having partnership interests in CCPC in the same portion as their respective stock ownership interests in CCCC.

7. *Investment in Petrochemical Complex.* CCCC will apply the proceeds from the issuance to the Purchasers of Secured Notes to the purchase of CCPC's Mortgage Notes, which have financial terms identical to the Secured Notes and which will be pledged with the Bank, as Purchasers Trustee under the Collateral Trust Identure, as security for the Secured Notes. CCPC will use the proceeds from the issuance of its Mortgage Notes to finance the construction of a petrochemical complex and related facilities (the "Project") in Corpus Christi, Texas. The Mortgage Notes pledged under the Collateral Trust Indenture will be secured by a security interest in the Project in favor of the Company Trustees under the Mortgage Note Indenture. Thus the Secured Notes issued to the Purchasers will be indirectly secured by a security interest in the Project.

8. *Chain of Payment Commitments from Intermediary Corporation.* In addition, CCPC has entered into Partner Cash Deficiency Agreements dated as of July 26, 1978 (the "Partner Cash Deficiency Agreements") with each Partner has agreed to pay directly to the Purchasers Trustee its percentage (37½ percent in the case of the Imperial and UP subsidiaries) of amounts due and payable but unpaid by CCPC with respect to the Mortgage Notes. Amounts so paid will be applied by the Purchasers Trustee to amounts due with respect to the Secured Notes and extinguish the corresponding liability of CCPC on the Mortgage Notes.

CCPC has also entered into Direct Parent Financing Agreements dated as of July 26, 1978 (the "Direct Parent Financing Agreements") with ICI Americas and ICI Holdings (acting jointly and severally), Champlin Petroleum and Soltex Polymer (each a "Direct Parent" and collectively, the "Direct Parents"), pursuant to which each Direct Parent has agreed to pay directly to the Purchasers Trustee any amounts which the Partner subsidiary of such Direct Parent fails to pay pursuant to its Partner Cash Deficiency Agreement.

9. *Payment Obligations of Ultimate Parents.* Finally, CCPC has entered into Ultimate Parent Financing Agreements dated as of July 26, 1978 (the "Ultimate Parent Financing Agreements") with Imperial, UP and Solvay (each an "Ultimate Parent" and collectively, the "Ultimate Parents"), pursuant to which each Ultimate Parent has agreed to pay directly to the Purchasers Trustee any amounts which the Direct Parent subsidiary of such Ultimate Parent fails to pay pursuant to its Direct Parent Financing Agreement.

10. *Unsecured Nature of Respective Payment Obligations.* The payment obligations contained in the Partner Cash Deficiency Agreements, the Direct Parent Financing Agreements and the Ultimate Parent Financing Agreements are unsecured general obligations of the respective corporations.

The rights of CCPC to enforce certain covenants in such agreements have been assigned to the Company Trustees as security for the Mortgage Notes. However, the assigned covenants are not for the payment of money and, in the case of Imperial and UP, rather related merely to the maintenance of corporate existence of the obligors and other similar matters.

11. *Additional Unsecured Payment Obligations.* Still another set of agreements and obligations serves to "back up" payment of the Secured Notes. CCPC has entered into a Pipeline Service Agreement dated as of July 26, 1978 (the "Pipeline Service Agreement") with South Texas Pipeline Co., a Delaware corporation ("STPC"), whose capital stock is owned by the Direct Parents as follows: ICI Americas: 37½ percent, Champlin Petroleum: 37½ percent and Soltex Polymer: 25 percent. In the Pipeline Service Agreement, STPC has agreed to develop, construct, maintain, operate and, in certain events, expand pipelines to be used by CCPC to ship the ethylene and propylene produced by the Project to storage facilities or to market. CCPC has entered into Shareholder Pipeline Agreements dated as of July 26, 1978 (the "Shareholder Pipeline Agreements") with the Direct Parents pursuant to which each Direct Parent has agreed to pay to STPC its share of amounts necessary to enable STPC to pay all of its costs, expenses, liabilities, obligations and charges. In addition, CCPC has entered into Pipeline Guaranty Agreements") with the Ultimate Parents pursuant to which each Ultimate Parent guarantees the performance by its Direct Parent subsidiary of its payment obligations under such Direct Parent's Shareholder Pipeline Agreement. The payment obligations of the Direct Parents and Ultimate Parents in the Shareholder Pipeline Agreements and Pipeline Guaranty Agreements, respectively, are unsecured general obligations of the obligors thereon.

12. *Pledges of Shares.* ICI Americas, Champlin Petrolem and Soltex Polymer have also entered into Pledge Agreements dated as of July 26, 1978 with the Purchasers Trustee, as Pledgee, pursuant to which each such company has pledge its shares of STPC stock with the Purchasers Trustee as further security for the Secured Notes. Neither Imperial nor UP has made any pledge in connection with these transactions.

13. *Relevant Provisions of ICI Indenture.* Under sections 8.08(c)(1) of the two ICI Indentures, the Bank shall not be deemed to have a conflicting interest by reason of being trustee under another indenture under which any other securities are outstanding where Imperial is an "obligor" if Imperial shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeships under the two ICI Indentures and such other indenture are not so likely to involve a material conflict of interest to disqualify the Bank from acting as Trustee under one of such Indentures.

14. *Relevant Provisions of UP Indentures.* Similar provisions are contained in Sections 608(c)(1) of the two UP Indentures with respect to trusteeships held by the Bank under other indentures relating to securities where UP is an "obligor".

15. *Other Pertinent Provisions of the Four Qualified Indentures.* No default has at any time existed under any of the Four Qualified Indentures. The obligations of Imperial and UP in respect of the securities issued under such Indentures and, pursuant to their Ultimate Parent Financing Agreements and the Pipeline Guaranty Agreements, in respect of the Secured Notes and the Mortgage Notes are wholly unsecured and rank pari passu with their respective obligations under the Four Qualified Indentures. The two ICI Indentures contain covenants of Imperial relating to limitations on liens and sale and lease-backs. The two UP Indentures contain covenants of UP relating to limitations on liens, limitations on disposition of certain assets and limitations on dividends and other payments on account of stock. The Ultimate Parent Financing Agreements and the Pipeline Guaranty Agreements include no comparable covenants.

16. *No Likelihood of Material Conflicts of Interest.* The respective obligations of (a) Imperial under the two ICI Indentures and under Imperial's Ultimate Parent Financing Agreement and Pipeline Guaranty Agreement and (b) UP under the two UP Indentures and under UP's Ultimate Parent Financing Agreement and Pipeline Guaranty Agreement are all wholly unsecured and rank pari passu and are therefore not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under any of such Indentures.

Imperial and UP state that the application assumes, without conceding, that the obligations of Imperial and UP under their respective Ultimate Parent Financing Agreement and Pipeline Guaranty Agreements could be deemed to make them "obligors" on the Secured Notes or Mortgage Notes, or both. Imperial and UP submit that, but for the obligations of the Ultimate Parents under the Ultimate Parent Financing Agreements to make payments directly to the Bank, as Purchasers Trustee, the application would not be necessary.

Imperial and UP have waived notice of hearing and any and all rights to specify procedures under the rules of practice of the Securities and Exchange Commission in connection with the matter.

For a more detailed statement of the matters of fact and law asserted here, all persons are referred to said application, which is a public document on file in the offices of the Commission, at the Public Reference Room, 1100 L Street NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than October 24, 1978 request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission, may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10424; 812-4355]

CAPITAL FUND OF AMERICA, INC., AND NEW PERSPECTIVE FUND, INC.

Application for an Order Exempting Proposed Transaction

OCTOBER 13, 1978.

Notice is hereby given that Capital Fund of America, Inc. ("CAP"), Two Embarcadero Center, P.O. Box 7650, San Francisco, CA 94120, and New Perspective Fund, Inc. ("NPF"), c/o Thomas E. Terry, Esq., 611 West Sixth Street (32d floor), Los Angeles, CA 90017 (hereinafter collectively referred to as "Applicants") have filed an application on August 23, 1978, and an amendment thereto on September 28, 1978, pursuant to section 17(b) of the Investment Company Act of 1940 ("Act") for an order exempting from the provisions of section 17(a) of the Act a proposed sale of substantially all of CAP's assets to NPF. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

CAP was incorporated in the State of Delaware on April 4, 1960, and is registered under the Act as an open-end diversified management investment company having, as of June 30, 1978, 12,280,236 shares outstanding and net assets of $94,355,450. NPF, also a registered open-end diversified management investment company, was incorporated in the State of Maryland on September 5, 1972, and as of June 30, 1978, had net assets of $173,281,077 with 9,709,815 shares outstanding. Capital Research and Management Co. ("CRMC") is the investment adviser for both CAP and NPF.

The Applicants propose to enter into an Agreement Plan of Reorganization ("Agreement") under which NPF will purchase the assets and assume the liabilities of CAP. The application states that, before such transactions become effective, the following contingencies must occur: (1) The Agreement must be approved by a majority vote of the shareholders of CAP; (2) legal counsel to each Applicant must furnish an opinion that the transaction will constitute a tax-free reorganization; (3) the Order requested herein must be issued; and (4) issuance of any other orders of State or Federal regulatory authorities which may be necessary. The Applicants assert that the Agreement contains customary warranties and representations by each Applicant, the truth and correctness of which are also conditions precedent to the consummation of the reorgani-

V 43 / 198 0 C 12 7 8

zation. The above-mentioned shareholders vote is proposed to occur at a special meeting of CAP shareholders called for that purpose and which is scheduled for October 23, 1978. The proposed effective date of the reorganization is November 3, 1978.

If the Agreement is consummated, the Applicants state that the assets and liabilities of CAP will be transferred to NPF in exchange for that number of full and/or fractional shares of NPF which will have an aggregate net asset value equal to the total net asset value of CAP. CAP will then distribute to each of its shareholders NPF shares the aggregate net asset value of which is equal to the net asset value of such shareholder's CAP shares. Net asset value per share is to be determined by each Applicant in the manner described in their respective prospectuses and will be calculated at the close of the New York Stock Exchange on the effective day of the reorganization; provided, however, that should the Exchange not be open on that date, the calculation will be based on the last preceding date on which the Exchange was open, but in no event more than 3 days prior to the effective date of the reorganization. Following distribution of NPF shares to its shareholders in the manner proposed, CAP intends to dissolve pursuant to the Corporation Law of the State of Delaware.

The Application states that as of May 31, 1978, CAP had a capital loss carry-over of approximately $73,200,000, of which $5,800,000, $22,300,000, $31,000,000, and $14,100,000 may be used to offset capital gains during the years 1979, 1981, 1982, and 1983, respectively. As of that same date, CAP had net realized gains of approximately $2,600,000 and net unrealized gains of $10,200,000. The application further states that, as of May 31, 1978, NPF had no capital loss carryovers, but that it had net realized gains of $5,900,000, which will be distributed prior to the effective date of the reorganization, and $37,600,000 of unrealized capital gain. According to the application, Applicants respective Boards of Directors have concluded that the value of the capital loss carryovers is not readily determinable and would be largely a matter of speculation. The Boards have therefore recommended that no adjustment be made to Applicants net asset values to reflect any potential income tax effect on their shareholders resulting from their respective tax positions.

Prior to the effective date of the reorganization, CAP states that it will distribute to its shareholders a dividend consisting of substantially all its net taxable income.

Applicants believe that the combination of CAP and NPF will produce lower proportionate expenses due to the economies of scale which may be achieved through the spreading, over Applicants combined assets, of such fixed expenses as: (1) Audit, accounting and legal fees; (2) qualification of shares in the various jurisdictions where shares are sold; (3) preparation and printing of stockholder reports, prospectuses and proxy materials; and (4) custodian fees and other expenses. According to the application, the expense ratio of CAP for the fiscal years ending November 30, 1975, 1976, and 1977 were 0.8 percent, 0.86 percent, and 0.94 percent, respectively. The expense ratios of NPF for the last 3 fiscal years ending September 30, 1975, 1976, and 1977 were 0.99 percent, 0.95 percent, and 0 99 percent, respectively. It is asserted by the Applicants that, had the Applicants been combined for the 12 months period ending May 31, 1978, the expense ratio would have been approximately 0.92 percent. The exhibits attached to the application disclose that the number of shares outstanding of CAP has decreased from 24,670,000, at the close of the November 30, 1971 year to 14,582,000 for the 6 months ending May 31, 1977. The application further states that, in a declining stock market situation, with the reduced number of CAP shares outstanding, the problem of increasing expense ratios could become particularly acute.

It is asserted in the application that the Directors of the Applicants considered the timing of the reorganization and chose to recommend the period between the close of NPF's fiscal year (September 30) and the conclusion of CAP's fiscal year (November 30) as the most beneficial time for the reorganization. According to Applicants, while CAP's capital loss carryovers are of indeterminate value, they are of potential value. By effecting the reorganization during the above period, acceleration of the expiration of capital loss carryover periods will, according to the application, be minimized. After balancing the cost of delaying the anticipated savings in operating expenses, the loss of a portion of the capital loss carryover, and the probability of shareholder approval of the reorganization against the expected costs of the special shareholders meeting, the Board of Directors of CAP considers it desirable and in the best interest of its shareholders to effect the reorganization during the above mentioned period.

According to the application, each of the Applicants proposes to pay its own expenses incurred in connection with the reorganization. Applicants estimate that CAP will incur expenses of $40,000, including the cost of its special shareholders meeting, and that approximately $35,000 of expenses will be incurred and borne by NPF. In addition, Applicants estimate that between $15,000 and $20,000 of brokerage commissions will be generated by reason of the elimination of securities presently held by CAP, which are not fully compatible with NPF's objectives. It is proposed that such elimination take place following the effective time of the reorganization.

The application describes the primary investment objective of both CAP and NPF as long term growth of capital. The stated secondary objective of CAP is current income, while the secondary objective of NPF is the production of future income. CAP invests primarily in common stocks of both foreign and domestic corporations while NPF invests primarily in common stock and securities convertible into common stock. NPF is authorized to have up to 40 percent of its investments in foreign securities.

The application states that both Applicants have the same investment adviser, CRMC, which is a subsidiary of the Capital Group, Inc. The Investment Advisory and Service Agreement between CRMC and NPF provides for a fee payable to the adviser of 0.75 of 1 percent per year on the first $160,000,000 of NPF's net assets, plus 0.50 of 1 percent of net assets over $160,000,000 but less than $600,000,000, and 0.45 of 1 percent on net assets in excess of $600,000,000. The investment Advisory and Service Agreement between CRMC and CAP provides for a fee of 0.50 of 1 percent per year on net assets up to $150,000,000 and 0.40 of 1 percent per year on net assets in excess of that amount. The Applicants state that, had the reorganization been in effect on May 31, 1978, the pro forma fee paid to the investment adviser would have been at a rate of 0.65 of 1 percent of the combined assets. According to the application, at present asset levels, the fees payable to CRMC will not be increased by reason of the proposed reorganization.

Section 17(a) of the Act, in pertinent part, provides that it shall be unlawful for any affiliated person of a registered investment company knowingly to sell or to purchase from such registered company any security or other property. Section 17(b) of the Act provides that the Commission, upon application, shall exempt a proposed transaction from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company involved and with the general purposes of the Act. While Applicants do not concede that they are affiliated persons of each other, or that they are affiliated persons of such persons, they acknowledge that the view has been taken that registered investment companies have a common investment adviser are under that adviser's common control and therefore are affiliated persons of each other. Applicants have, therefore, filed this application to avoid any question being raised under section 17(a) of the Act with respect to the proposed transaction.

The Applicants assert that the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person.

Applicants further assert that the transaction is consistent with the policies of each of them and is consistent with the general purposes of the Act. The Applicants assert that the shareholders of both will benefit from the spreading of relatively fixed costs over the combined assets of the Applicants. Applicants concede that the shareholders of CAP are not expected to see an immediate substantial reduction in the expense ratio; however, Applicants assert that, in the future, the combined fund should experience certain economies of scale since there would be a larger asset base to absorb fixed costs.

Notice is further given that any interested peson may, not later than October 27, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof-of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20723; 70-6207]

CENTRAL POWER & LIGHT CO.

Proposed Settlement Agreement Involving Subsidiary's Receipt of Interest in a Trust Holding Securities

OCTOBER 14, 1978.

Notice is hereby given that Central Power & Light Co. ("CPL"), P.O. Box 2121, Corpus Christi, Tex. 78403, an electric utility subsidiary company of Central & South West Corp., a registered holding company, has filed with this Commission an application pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 9(a) and 10 thereof as applicable to the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

CPL seeks authority to enter into a settlement agreement in its suit against Coastal States Gas Producing Co. ("Producing"). Such settlement, which is further described below, involves CPL's acquisition of a security and of an option on coal properties, both of which acquisitions are subject to the approval of this Commission.

In 1974 CPL sued Producing, a subsidiary of Coastal States Gas Corp. ("Coastal"), alleging contractual violations by Producing and its subsidiary, Lo-Vaca Gathering Co. ("Lo-Vaca"), CPL's principal gas supplier, and seeking damages of $623 million. Some 400 other customers of Lo-Vaca and Producing filed claims against them, mainly in the 200th Judicial District Court of Travis County, Tex. ("District Court"). On December 12, 1977, the Railroad Commission of Texas ("Railroad Commission"), which has jurisdiction over rates charged for intrastate sales of natural gas, ordered refunds to customers of Lo-Vaca and Producing of about $1,600 million. On March 10, 1978, the Railroad Commission granted a rehearing with respect to its December 12 order and on August 7, 1978, determined that the proposed settlement agreement, tentatively agreed to by customers representing over 90 percent of Lo-Vaca's 1975 sales volume, was a viable alternative to its December 12 order.

Under the settlement agreement CPL will receive as consideration for its dismissal of the 1974 suit and its release of any liability of Producing and Lo-Vaca under it, an appoximate 9.7 percent interest in the settlement trust and an approximate 10.6-percent interest in the gas search program described below.

The settlement agreement provides that Producing will be reorganized and renamed Valero Energy Corp. ("Valero"), all of whose common stock will be initially held by Coastal but which will be distributed as a dividend to the holders of Coastal common stock. Most of the Texas gas pipeline assets currently owned by Producing and its subsidiaries, including Lo-Vaca, will be owned by Valero. In addition, certain lignite properties owned by Coastal, located in the Texas counties of Bastrop, Fayette, and Washington, will be sold by Coastal at book value to a newly created subsidiary of Valero. CPL and three other settling customers (the city of Austin, Tex., the Lower Colorado River Authority and the City Public Service Board of San Antonio, Tex.) will have a 2-year option to purchase such properties at net book value. Exercise of such option by CPL will require separate authorization from this Commission.

A banking corporation appointed by the District Court will administer the settlement trust, to be established pursuant to the settlement agreement, for the benefit of all settling customers of Lo-Vaca and Producing. There will be transferred to the settlement trustee the following securities, which will constitute the corpus of the settlement trust: (1) Approximately 1,196,218 shares of Coastal common stock; (2) 13.4 percent of the outstanding common stock of Valero; (3) 1,150,000 shares of Valero's $8.50 cumulative preferred stock, series A ($115 million aggregate liquidation value); and (4) a promissory note of Valero in the amount of $8 million, due in 1 year. The settlement trustee is required to use its best efforts to sell the trust securities by public or private sale for cash within 7 years, and distribute the net proceeds from such sales to the settling customers on a pro rata basis. The settling customers have no right to control the sales of or to vote the securities in the trust.

The settlement agreement also provides that Coastal will enter into a gas search agreement to find and develop reserves which will be sold by Coastal at current prices to Lo-Vaca customers. Coastal will be entitled to fixed prices for the natural gas sold and any difference between the fixed prices in the gas search agreement and the then current market price will be paid to the settlement trustee for distribution to the settling customers. Coastal's obligation is to expend a minimum of $180 million and a maximum of $240 million over a period not longer than 15 years, upon such pro-

V 4 3 / 1 9 8 0 C 1 2 7 8

gram. Coastal will issue note obligations to the settlement trustee subject to payment in the event the necessary expenditures are not made in the amount or in the periods required by the gas search agreement.

The settlement agreement is subject to the favorable resolution of certain Federal tax questions, certain questions under the Securities Act of 1933, approval by customers representing at least 90 percent of the gas sales volume of Lo-Vaca in 1975, approval by certain creditors of Coastal and Producing, the approval of the District Court and the meeting of certain other conditions.

CPL proposes to account for the settlement by debiting Account No. 124, Other Investments—Investments in Lo-Vaca Settlement Trust, and crediting Account No. 253, Other Deferred Credits—Deferred Credits Lo-Vaca Settlement Trust, for the estimated value of CPL's interest in the securities to be issued to the settlement trust. As funds are distributed by the settlement trustee, CPL will credit such amounts to its investment and write off a like amount from other deferred credits to fuel expense, thus passing such benefits to its customers through its fuel adjustment clause. Proceeds received from the settlement trustee as a result of the gas search program will be credited to fuel expense as received and thus passed through to customers through the fuel adjustment clause.

The fees and expenses to be incurred by CPL in connection with the proposed transactions are estimated at $7,000, including legal fees of $4,000. The Railroad Commission of Texas has jurisdiction over the proposed transaction. No other State commision and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than November 1, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20722; 70-5769]

CENTRAL POWER & LIGHT CO.

Proposed Increase in Fuel Exploration and Development Budget

OCTOBER 14, 1978.

Notice is hereby given that Central Power & Light Co. ("CPL"), P.O. Box 2121, Corpus Christi, Tex. 78403, an electric utility subsidiary of Central & South West Corp. ("CSW"), a registered holding company, has filed with this Commission a posteffective amendment to its application previously filed and amended in this matter pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 9(a) and 10 thereof as applicable to the proposed transaction. All interested persons are referred to the amended application, which is summarized below, for a complete statement of the proposed transaction.

By order dated December 29, 1977 (HCAR No. 20352), CPL was authorized to expend up to $8,192,000 for the year ending December 31, 1978, for fuel exploration and development activities. Approximately $3,036,000 of such amount represented budgeted expenditures for oil and gas ventures to be conducted in south Texas, and $5,156,000 represented budget expenditures for coal, lignite, and uranium reserves, all of which are conducted in joint ventures with other CSW utility subsidiaries.

By posteffective amendment CPL requests an increase in its budget authorization from $8,192,000 to $9,192,000 for the year ending December 31, 1978. CPL estimates the additional $1 million of expenditures will be required beyond the $3,036,000 tentatively allocated for oil and gas exploration and development in 1978, for previously nonbudgeted expenditures described below.

Approximately $713,500 of nonbudgeted expenditures will be required for the drilling ($612,000) and, if drilling is successful, the completion ($101,500) of a 12,000-foot test well on State tract 125 in the Bartell's Pass area of Aransas County, Tex. It is stated that drilling on such site was originally scheduled for January 1979, but has become possible earlier since a drilling rig has recently become available. Approximately $700,500 of nonbudgeted expenditures will also be required for the drilling ($488,500) and completion ($212,000) of an 11,000-foot test well on a tract on the Morales Prospect in Starr County, Tex. Recent acquisitions by CPL in this area include leases which begin to expire at the end of 1978. CPL states that such lease expirations would deny it a coherent tract upon which to conduct exploration and development activities and seriously impair its ability to assemble similar tracts in the future. Expenditures for this drilling were not included in the 1978 budget because lease acquisitions on this prospect were not expected to be completed in time for drilling to commence in 1978.

CPL estimates that $500,000 of the $1,414,000 additional expenditures described above could be absorbed by the unexpended portions of the tentative allocation for oil and gas in its currently authorized fuel budget. CPL requests an additional $1 million authorization to cover the $914,000 additional expenditures which cannot be absorbed in the budget and allow a small margin for possible additional lease acquisitions. CPL states that it had spent $2,025,124.72, or approximately 67 percent of the $3,036,000 tentative allocation for such activities, for oil and gas exploration and development from January 1, 1978, through August 31, 1978.

The additional fees and expenses to be incurred in connection with the proposed transaction are estimated at $1,000. No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than November 1, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application, as further amended by said posteffective amendment, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as amended by said posteffective amendment, or as it may be further amended, may be granted as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 5967; 18-21]

DEFERRED COMPENSATION AND SAVINGS PLAN OF BAKER & BOTTS

Filing of Application for an Order Exempting From Provisions

OCTOBER 15, 1978.

Notice is hereby given that Baker & Botts, 3000 Shell Plaza, Houston, Tex. 90071 a law firm organized as a partnership under the laws of the State of Texas ("Applicant"), on September 18, 1978, filed an application for an exemption from the registration requirements of the Securities Act of 1933 (the "Act") for interests or participations issued in connection with the Baker & Botts deferred compensation and savings plan (the "Plan"). All interested persons are refered to that application, which is on file with the Commission, for the facts and representations contained therein, which are summarized below.

INTRODUCTION

Applicant's plan provides that partners and employees of the Applicant are eligible to participate therein if they have completed the requisite hours of service and received admissible annual compensations (i.e., the portion of the first $100,000 of their annual earnings in excess of the maximum considered wages for FICA tax purposes for such year). Participation in the Plan by eligible partners and employees of Applicant is mandatory, and each eligible employee is automatically admitted to participation as of the first anniversary date following his commencement of service of a Plan year during which he or she received admissible annual compensation and during which either: (i) He or she completed 1,000 or more hours of service or (ii) he or she completed an employment year which ended with or within such Plan year and within which he or she completed 1,000 or more hours of service.

The Plan is a trusteed profit-sharing plan which covers persons (in this case Applicant's partners) who are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954, as amended (the "Code") and, therfore, is excepted from the exemption provided by section 3(a)(2) of the Act for interests or participations in certain employee benefit plans of corporate employers.

Section 3(a)(2) of the Act provides, however, that the Commission may exempt from the provisions of section 5 of the Act any interest or participation issued in connection with a pension or profit-sharing plan which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

DESCRIPTION AND ADMINISTRATION OF THE PLAN

Applicant represents that the Plan was adopted effective as of January 1, 1968, and was amended and restated in its entirety, effective as of January 1, 1976, in order to comply with the Employee Retirement Income Security Act of 1974 ("ERISA"). Applicant has adopted the second amendment which makes certain changes in the vesting rules under the Plan and other nonsubstantive changes to comply with recent Internal Revenue Service and Department of Labor Regulations. In connection with these amendments to the Plan, Applicant has applied to the Internal Revenue Service ("IRS") for a determination that the Plan, as amended, will continue to be qualified under section 401(a) of the Code. Applicant requests that the Commission assume that the IRS will rule favorably as to the qualification of the Plan.

Applicant states that, under the Plan, contributions to the Plan are made by Applicant based on a percentage of the participating employees' admissible annual compensation. In addition, an active participant may make voluntary additional contributions to the Plan for his or her account subject to limitations as to the amount set forth in the Plan. Such voluntary contributions may be withdrawn by a participant upon notice to the trustee. Each participant may designate annually the percentage of the contributions for his or her account to be invested in either of two investment funds: An equity fund and a fixed income fund, maintained by the trustee, the Texas Commerce Bank of Houston, Tex. In addition, each participant may elect annually to transfer all or part of his or her account in one investment fund to the other. In the event a participant does not designate the fund into which contributions on his or her behalf are to be paid, they will be invested in the fixed income fund.

Applicant represents that the Plan is administered by a committee (the "Committee") consisting of three to five persons each of whom may or may not be a participant in the Plan. The Committee has overall responsibility and authority for administration of the Plan, including interpretation of the provisions of the Plan, establishment and enforcement of rules and regulations relating to administration of the Plan, determination of the amounts of benefits which shall be payable to any person in accordance with the Plan and authorization of payment of such benefits and of the proper expenses of administering the Plan.

Applicant states that the assets of the Plan will be held in a trust for the exclusive benefit of Plan participants or their beneficiaries. Each participant may designate annually the percentage of the contributions for his or her account to be invested in either of the two investment funds. In addition, each participant may elect annually to transfer all or part of his or her account in one investment fund to the other. In the event a participant does not designate the fund into which contributions on his or her behalf are to be paid, they will be invested in the fixed income fund. The administrative committee has the power to appoint and to remove investment managers with respect to Plan assets. Applicant has retained power to amend the Plan, subject to the conditions that no amendment will cause any of the Plan's assets to be used or diverted to any purpose other than the exclusive benefit of participants, former participants or their beneficiaries.

The Plan is subject to the reporting and disclosure requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"). A summary plan description has been delivered to each participant and person currently receiving benefits and Applicant represents it will continue this practice. Certain forms and reports to which the participants have access have been filed with the IRS and Department of Labor and Applicant represents that such reports will be filed on a timely basis in the future as required under applicable regulations.

V 43 / 198 OCT 12 78

DISCUSSION

Applicant contends that if Applicant were a corporation, rather than a partnership, interests or participations issued in connection with the Plan would be exempt from registration under section 3(a)(2) of the Act. Applicant further represents that the Plan assets are not commingled in collective investment media with the assets of any plan of any other employer; that the Plan is subject to the fiduciary standards and reporting and disclosure requriements of ERISA; that the Applicant has retained substantial administrative control of the Plan, including ultimate control over investment policies; that the Applicant is engaged in providing legal services involving sophisticated and complex financial matters and can adequately represent its and its employees' interests; and that no solicitation of voluntary contributions has been or will be made.

Applicant submits that, in light of the foregoing, granting the requested exemptive order would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the Act.

Notice is further given that any interested person may, not later than October 30, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application, accompanied by a statement of the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he or she may request that he or she be notified if the Commission shall order a hearing theron. Any such communication shall be addressed to: George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. An order disposing of the matter will be issued as of course following October 30, 1978, unless the Commission therafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20721; 70-6210]

GEORGIA POWER CO.

Proposal To Lease Hopper Cars

OCTOBER 3, 1978.

Notice is hereby given that Georgia Power Co. ("Georgia"), 270 Peachtree Street NW., Atlanta, Ga. 30303, an electric utility subsidiary of the Southern Co., a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act ("Act"), designating sections 9(a) and 10 of the Act and rule 23 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Georgia proposes to enter into a lease arrangement ("Lease") with GATX/G.P. Leasing Corp. ("Lessor") with respect to 150 Ortner rapid discharge open-top hopper cars ("cars"). The cars are currently on order from the Ortner Freight Co. ("Ortner") at a quoted price of $37,000 per car (Lessor's total purchase price $15,550,000). Delivery of the cars to Georgia is scheduled to commence on November 13, 1978, at a rate of 15 cars per week. Under the terms of the arrangement with Lessor, Georgia will be treated as the purchaser of "new section 38 property", pursuant to I.R.C. section 48(d) in order that the investment tax credit be available to Georgia.

The terms of the lease provide, among other things, that the cars will be divided into two groups, group A to include those cars delivered on or before December 31, 1978 (approximately 88 cars), and group B to include those cars delivered between January 1, 1979, and April 1, 1979 (approximately 62 cars); that Georgia will make semiannual rental payments for each group at a rate estimated to be between 5.1 percent and 5.6 percent of the Lessor's purchase price, stated above, such rental rate being subject to certain enumerated financial variables; that Lessor will enter into a car service agreement and will maintain or cause to be maintained the cars at the rate of cost plus 15 percent if maintenance work is performed by Lessor and cost plus 5 percent for maintenance performed elsewhere; that the Lease will be a net financial lease with all fixed expenses, other than Lessor's net income taxes, to be paid by Georgia; and that Georgia may, with at least 120 days prior written notice, renew such Lease for all of the Equipment for its then Fair Rental Value. Georgia contemplates utilizing all of the cars for its own purposes throughout the Lease term; in the event, however, any of the cars are subleased, Georgia would account for the proceeds therefrom by crediting FERC account 151, such account previously having been properly charged with the Lease expense.

Georgia states that neither Ortner nor Lessor is affiliated with Georgia and that the terms of the Lease, negotiated at arm's length, are competitive with the terms which would otherwise be available in the market. Georgia currently leases 874 other coal cars under a similar lease with Lessor. Georgia believes that the terms of the Lease are fair and reasonable and that it is in the best interests of Georgia's investors and consumers. Georgia further states that Lessor is a large company with considerable experience and expertise in leasing and maintaining coal cars, and that Lessor's particular combination of qualifications is a unique and necessary feature in Lessor's obligations to maintain Georgia's coal cars.

A statement of the fees, commissions, and expenses to be incurred in connection with the proposed transaction will be filed by amendment. Georgia believes that the proposed transaction may be construed under Georgia law as an issue of an "evidence of debt" (Ga. Code Ann. Section 93-414) and accordingly may require approval of the Georgia Public Service Commission ("GPSC"). Application for such approval will be made and any order of decision thereon will be filed by amendment hereto. It is stated that no other State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 30, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be address: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application, as filed

or as it may be amended, may be granted effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10427; 812-4361]

MASSACHUSETTS MUTUAL LIFE INSURANCE CO. AND MASSMUTUAL CORPORATE INVESTORS, INC.

Filing of Application for Order

OCTOBER 5, 1978.

Notice is hereby given that Massachusetts Mutual Life Insurance Co. ("Insurance Company"), 1295 State Street, Springfield, Massachusetts 01111, a mutual life insurance company organized under the laws of the Commonwealth of Massachusetts, and MassMutual Corporate Investors, Inc. ("Fund"), a nondiversified, closed-end, management investment company registered under the Investment Company Act of 1940 ("Act") (hereinafter collectively referred to as "Applicants"), filed an application on August 31, 1978, pursuant to section 17(d) of the Act and rule 17d-1 thereunder, for an order of the Commission permitting the Insurance Company to purchase at direct placement a 12-year mortgage loan in the amount of $1,400,000 at 9¾ percent interest (the "Mortgage Loan") of Aberdeen Manufacturing Corp. ("Aberdeen") secured by a first mortage on real property. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that pursuant to an order of the Commission issued on August 19, 1971 (Investment Company Act Release No. 6690, referred to herein as the "Order"), the Insurance Company, which acts as investment adviser to the Fund, is permitted to invest concurrently for its general account in each issue of securities purchased by the Fund at direct placement, and to exercise warrants, conversion privileges and other rights at the same time as the Fund. Among the conditions of the order are that neither the Insurance Company nor the Fund, unless otherwise permitted by order of the Commission, may acquire any further interest in the issuer or in any affiliated person of the issuer or in securities issued by such issuer or affiliated person, other than interests in all respects identical.

The application states that the Insurance Company has been offered for purchase, at direct placement, the Mortgage Loan of Aberdeen, secured by a first mortgage on real property in Kaufman, Tex., and that the Insurance Company will be the sole purchaser of the Mortgage Loan if it secures the order requested by the application. The Insurance Company states that Aberdeen intends to apply the proceeds from the sale of the Mortgage Loan to provide long-term financing for a 156,250 square foot light manufacturing and warehouse building located in Kaufman, Tex., on an irregular site of approximately 14.2 acres. The application states that the land and the improvements subject to the proposed first mortgage lien have been valued by the Insurance Company at $1,670,000.

The application state that the Insurance Company holds $1,454,500 in principal amount of Aberdeen 7¾ percent senior notes due 1989; $390,000 in principal amount of Aberdeen 5¾ percent convertible subordinated debentures due 1988; and $5,000,000 in principal amount of Aberdeen 9½ percent senior notes due 1992 (collectively referred to as the "Insurance Company-Held Aberdeen Securities"). The Insurance Company and the Fund each hold the following Aberdeen securities: (1) $962,500 in principal amount of Aberdeen 9 percent senior notes due 1989, and (2) $500,000 in principal amount of Aberdeen 7¼ percent convertible senior notes due 1989 collectively referred to as the "Jointly Held Aberdeen Securities"). The application further states that the 7¼ percent convertible senior notes are convertible into shares of common stock of Aberdeen presently at $9.26 per share, and that the AMEX-Composite closing price for a share of Aberdeen common stock was $9.125 as of August 25, 1978. Applicants state that neither the Insurance Company or any affiliated person nor the Fund or any affiliated person of the Fund own any securities of Aberdeen other than those described above.

Applicants submit that, unless the relief they seek is granted, the aforementioned condition of the order, which was issued pursuant to section 17(d) of the Act and rule 17d-1 thereunder, would preclude the Insurance Company from acquiring the Mortgage Loan.

Section 17(d) of the Act and rule 17d-1 thereunder, taken together, provide, in part, that it is unlawful for an affiliated person of a registered investment company, acting as principal, to effect any transaction in which such investment company is a joint participant, without the permission of the Commission. Rule 17d-1 provides, in part, that in passing upon applications for orders granting such permission, the Commission will consider (1) whether the participation of the investment company in such transaction on the basis proposed is consistent with the provisions, policies, and purposes of the Act, and (2) the extent to which such participation is on a basis different from or less advantageous than that of other participants.

Applicants submit that the investment opportunity presented to the Insurance Company by the Mortgage Loan is not less advantageous to the Fund than to the Insurance Company and is consistent with the provisions, policies and purposes of the Act. The Fund's investment policy specifies that the principal investments of the Fund will be long-term obligations and, occasionally, preferred stocks, purchased directly from the issuers, if such obligations or preferred stocks have equity features such as accompanying shares of common stock or rights to acquire, or to convert such obligations or preferred stocks into, such shares. Applicants assert that the Mortgage Loan does not have any accompanying equity features and, therefore, would not be an investment permitted by the investment policies of the Fund. Applicants further assert that the Fund is not designed as a vehicle for mortgage investment.

Applicants state that at the time of the purchase of the Jointly-Held Aberdeen Securities in 1973, and the purchase by the Insurance Company of the Aberdeen 9½ percent senior notes in 1977, the Insurance Company did not contemplate any investment in the Mortgage Loan, nor were the purchases of the Insurance Company-Held Aberdeen Securities or the Jointly-Held Aberdeen Securities tied to or induced by any discussions with respect to the purchase and sale of the Mortgage Loan or any similar securities. Applicants further state that there is no connection between the purchasers of the Insurance Company-Held Securities or the Jointly-Held Aberdeen Securities and the proposed issuance and sale of the Mortgage Loan to the Insurance Company other than the fact that the Insurance Company, continued a relationship with Aberdeen at the time of the acquisitions of the Insurance Company-Held Aberdeen Securities and the Jointly-Held Aberdeen Securities.

V 4 3 / 1 9 8 0 C 1 2 7 8

The application states that in the judgement of the Insurance Company, the Mortgage Loan would be an attractive investment for the Insurance Company. Applicants state that the purpose of the application is to avoid disadvantage to the Insurance Company, which they assert will occur if the Insurance Company is not permitted to invest in the Mortgage Loan.

Notice is further given that any interested person may, not later than October 30, 1978 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20724; 70-6181]

OHIO POWER CO. AND CENTRAL OHIO COAL CO.

Proposed Bank Borrowing by Subsidiary Coal Company

OCTOBER 5, 1978.

Notice is hereby given that Ohio Power Co. ("Ohio"), 301 Cleveland Avenue SW., Canton, Ohio 44702, an electric utility subsidiary company of American Electric Power Co., Inc., a registered holding company, and Central Ohio Coal Co. ("COCO"), P.O. Box 98, Cumberland, Ohio 43732, a coal mining subsidiary company of Ohio, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6, 7, and 12 of the Act as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

COCO was organized in 1946 for the purpose of conducting surface mining operations on behalf of Ohio. COCO operates three mines owned by Ohio in Morgan, Muskingum, and Noble Counties, Ohio; and its total output is utilized by Ohio's Muskingum River Generating Station. It is stated that the Muskingum Mine has produced coal at an annual level of 3.0 to 3.2 million tons, but that to meet environmental standards which become effective in 1979, 2.3 to 2.5 million annual tons will be required. It is further stated that unless new equipment is acquired, production will drop to 1.4 million annual tons by 1981. It was determined that a 110 cubic yard dragline, to remove overburden, would be an appropriate mining machine to help avoid a drop in annual production below 2.3 to 2.5 million tons. Additionally, a 23 cubic yard shovel is required to load uncovered coal, and movable electric substations are required to support these mining machines. On December 15, 1977, Ohio acquired one Marion (Model 8750) 110 cubic yard dragline ("Dragline") from AMAX, Inc. for $18,742,000. Since the Dragline was delivered unassembled, Ohio is entering into a contract for the erection of the Dragline ("Erection Contract").

It is currently estimated that the total erected cost of the Dragline will be $27,000,000. Ohio also contracted to purchase one Bucyrus-Erie (Model 295) 23 cubic yard shovel ("Shovel"), having an approximate cost of $2,000,000, and two 138/22.9 kVA skid mounted substations and related electrical support equipment for the Dragline ("Electrical Support Equipment"), having an approximate cost of $1,000,000.

It is proposed that Ohio sell the Dragline to COCO, which will reimburse Ohio for the amount expended by Ohio to acquire the Dragline. Ohio will also assign the Erection Contract and the contract for the Electrical Support Equipment to COCO, and COCO will pay for the erection of the Dragline and for the purchase of the Electrical Support Equipment. The Commission, by order of August 7, 1978, in File No. 70-6157 (HCAR No. 20660), has authorized the assignment of the Shovel by Ohio to Girard Bank as trustee under a trust for the benefit of C.I.T. Corp., a wholly owned subsidiary of C.I.T. Financial Corp., and the leaseback of the Shovel to COCO.

To finance the acquisition and erection of the Dragline and the acquisition of the Electrical Support Equipment for the Dragline, COCO proposes to enter into a Credit Agreement with Irving Trust Co. pursuant to which COCO may borrow an aggregate principal amount not to exceed $30,000,000 outstanding at any one time. These borrowings will be evidenced by a note or notes issued by COCO to Irving Trust Co. Each note will represent the obligation of COCO to pay Irving Trust Co. the unpaid amount of the loan made by Irving Trust Co. pursuant to such note, together with interest thereon as set forth below. Each note is to be dated as of the date of the loan evidenced thereby. Borrowings may be made from time to time on or after the date of execution of the Credit Agreement to, but not including, February 29, 1980. Borrowings made pursuant to the Credit Agreement will be due and payable on February 29, 1980. Each note will bear interest from the date thereof on the principal amount thereof from time to time at an annual rate of interest equal to 105 percent of the prime rate of Irving Trust Co. in effect from time to time. Each note will be prepayable by COCO at any time without premium or penalty. In the event that the Indenture, dated as of February 15, 1946, between COCO and Ohio ("Coal Supply Agreement") shall cease to be fully enforceable by COCO in accordance with its terms or in the event a regulatory body with jurisdiction in the premises shall initiate proceedings directed at the termination of the Coal Supply Agreement, COCO shall, within 90 days thereafter, prepay in full each and every Note issued pursuant to the Credit Agreement.

It is further stated that subject to the receipt of regulatory approval, COCO will pay to Irving Trust Co. a commitment fee for the period from July 1, 1978, to, but not including, February 29, 1980, or such earlier date as of which the Credit Agreement may be terminated pursuant to the terms thereof, computed at the rate of one-half of 1 percent per annum on an amount equal to the difference between $19,000,000 and the aggregate amount of borrowings outstanding from time to time: *Provided, however,* That no commitment fee will accrue in the event the aggregate amount of borrowings outstanding from time to time shall equal or exceed $19,000,000.

It is stated that borrowings pursuant to the Credit Agreement will be made in contemplation of a sale-leaseback transaction involving the Dragline, the Shovel and the Electrical Support Equipment for the Dragline, which transaction is the subject of the application in File No. 70-6057, supra.

It is further stated that as an inducement to Irving Trust Co. to make loans to COCO pursuant to the Credit Agreement, Ohio proposes to give to Irving Trust Co. a letter ("Letter Agreement") advising Irving Trust Co. (1) that, while any such loans are outstanding, Ohio intends to maintain 100 percent voting control of the capital stock of COCO and to continue to own the coal lands mined by COCO, (2) that any such loans are to be made in contemplation of a sale-leaseback transaction involving the Dragline, the Shovel and the Electrical Support Equipment for the Dragline, the proceeds of which sale-leaseback transaction would be used to repay any such loans, and (3) that, if such sale-leaseback transaction is not consummated, COCO would repay any such loans with funds supplied to COCO by Ohio pursuant to the Coal Supply Agreement.

Fees and expenses, exclusive of commitment fees, to be incurred in connection with the proposed transactions are estimated at $6,000, including legal fees of $2,000. It is stated that the Public Utilities Commission of Ohio may have jurisdiction over the Letter Agreement, and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than October 30, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted, and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 5896; 18-10]

RETIREMENT PLAN FOR LEGAL AND OTHER PERSONNEL OF SIMPSON THACHER & BARTLETT

Filing of Application for an Order Exempting From Provisions

OCTOBER 3, 1978.

Notice is hereby given that Simpson Thacher & Bartlett, One Battery Park Plaza, New York, N.Y. 10004, a law firm organized as a partnership under the laws of the State of New York (hereinafter referred to as the "Applicant" or "Firm"), on March 20, 1978, filed an application for exemption from the registration requirements of the Securities Act of 1933 (the "Act") for interests or participations issued in connection with the Retirement Plan for Legal and Other Personnel of Simpson Thacher & Bartlett (the "Plan"). All interested persons are referred to that document, which is on file with the Commission, for the facts and representations contained therein, which are summarized below.

I. INTRODUCTION

All employees and partners are eligible to participate in the Plan if they are at least 25 years of age and have completed three years of service with the Applicant. As of September 30, 1977, 53 partners, 48 associates, and 138 nonlegal employees of Applicant were entitled to participate in the Plan.

Applicant states that the Plan is of the type commonly referred to as a "Keogh" plan, whose participants include persons (in this case Applicant's partners) who are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954 (the "Code"), and, therefore, is excepted from the exemption from the registration provisions of the Act provided by section 3(a)(2) of the Act for interests or participations in certain employee benefit plans of corporate employers. However, section 3(a)(2) of the Act provides that the Commission may exempt from the provisions of section 5 of the Act any interest or participation issued in connection with a pension or profit-sharing plan which covers employees, some or all of whom are employees within the meaning of section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

II. DESCRIPTION AND ADMINISTRATION OF THE PLAN

Applicant states that the Plan was originally adopted in 1964 and was amended and restated in its entirety, effective as of October 1, 1976, in order to comply with the Employee Retirement Income Security Act of 1974 ("ERISA"). Applicant has applied to the Internal Revenue Service (the "IRS") for a determination that the Plan as amended will continue to be a qualified plan under section 401(a) of the Code.

Contributions are made by Applicant each year on behalf of all employee participants in amounts equal to specified percentages of their compensation. Contributions are also made each year by each partner in amounts designated by such partner no less than a specified minimum and no greater than the lesser of $7,500 or a specified percentage of such partner's compensation. In addition, each Plan participant may make voluntary contributions in any year up to the lesser of $10,000 or 10 percent of such participant's compensation.

Applicant states that the assets of the Plan are segregated into two investment funds—a discretionary fund consisting of stocks and other securities selected by a registered investment advisor, which serves as investment manager for the discretionary fund, and a fixed income fund whose assets are presently invested in a group annuity contract issued by a major insurance company. Each participant's interest in the Plan is allocated between these two funds according to the participant's specific designation.

Applicant states that the assets of the Plan are maintained by Manufacturers Hanover Trust Co. as Trustee (the "Trustee") for the Plan under an amended trust agreement (the "Trust Agreement"). Under the Trust Agreement, the Trustee has exclusive authority and discretion to manage such assets except to the extent that Applicant has appointed one or more investment managers to manage some or all of the assets of the Plan. The Plan provides for the appointment of a Retirement Committee which at present consists of five partners in the Firm. The Committee has overall responsibility and authority for administration of the Plan and for setting investment policy. The Administrative Committee of the Firm has responsibility and authority under the Plan for appointing the Trustee, any investment managers, and the members of the Retire-

V 4 3 / 1 9 8

0 C 1 2 7 8

ment Committee, as well as for making any amendments to the Plan.

Applicant states that if it were a corporation or if its partners were not included among Plan participants, interests and participations in the Plan would be exempt from registration under section 3(a)(2) of the Act. Applicant submits that Congress excepted interests issued in connection with Keogh plans from the section 3(a)(2) exemption primarily out of concern over interests in commingled or collective Keogh funds which might be marketed by sponsoring financial institutions to self-employed persons unsophisticated in financial matters. Applicant notes that the Plan is not a prototype or master plan marketed to the public by a sponsoring financial institution and that Plan assets are not commingled in collective investment media with the assets of plans of other employers. Applicant states that the characteristics of the Plan are essentially no different from the retirement plans maintained by many single corporate employers, for which section 3(a)(2) provides an exemption, and that the concerns which led to that section's inapplicability to Keogh plans do not apply to Applicant's Plan.

Applicant represents that it has not distributed and does not intend to distribute any type of promotional material relating to the Plan (other than such material as Applicant is required under ERISA to distribute to participants or to employees) and has not made and does not intend to make any solicitation of voluntary contributions under the Plan. Applicant makes available to Plan participants upon request and without charge, copies of the Plan, the Trust Agreement and the latest interim financial statements of the Plan.

Applicant states that it is engaged in furnishing legal services of a type which necessarily involves financially sophisticated and complex matters and for that reason, as well as the extensive administrative control over the Plan maintained by the Firm, is able to represent adequately its interests and the interests of its employees who are participants in the Plan.

Applicant concludes that for the foregoing reasons, granting the requested exemptive order would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice if further given that any interested person may, not later than October 27, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application, accompanied by a statement of the nature of his or her interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he or she may request that he or she be notified if the Commission shall order a hearing thereon. Any such communication should be addressed to: George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the matter will be issued as of course following October 27, 1978, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20725; 70-6208]

SYSTEM FUELS, INC., ET AL.

Proposal Relating to Short-Term Debt Issued To Finance Nuclear Fuel Procurement by a Nonutility Subsidiary for Use by Operating Companies.

OCTOBER 5, 1978.

In the matter of System Fuels, Inc., 225 Baronne Street, New Orleans, La. 70112; Arkansas Power & Light Co., First National Building, Little Rock, Ark. 72203; Louisana Power & Light Co., 142 Delaronde Street, New Orleans, La. 70174; Middle South Energy, Inc., 225 Baronne Street, New Orleans, La. 70112; Mississippi Power & Light Co., Electric Building, Jackson, Miss. 39205; New Orleans Public Service, 317 Baronne Street, New Orleans, La. 70112.

Notice is hereby given that Arkansas Power & Light Co. ("Arkansas"), Louisiana Power & Light Co. ("Louisiana"), Mississippi Power & Light Co. ("Mississippi"), and New Orleans Public Service Inc. ("NOPSI") (collectively referred to as "Operating Companies"), all public utility subsidiary companies of Middle South Utilities, Inc. ("Middle South"), a registered holding company, and System Fuels, Inc. ("SFI"), a jointly-owned nonutility subsidiary company of the Operating Companies, have filed a declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a), 7, 12(b) and 12(f) of the Act and Rules 45 and 50 promulgated thereunder as applicable to the following proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Under a Nuclear Fuel and Fuel Services Purchase Agreement ("Purchase Agreement"), dated as of June 15, 1978, among SFI, Arkansas, Louisiana, and Middle South Energy, Inc. ("MSE"), a subsidiary of Middle South Utilities, Inc., organized in 1974 to own and finance certain future base load generating plants in the System, Arkansas, Louisiana, and MSE have previously agreed with SFI, with certain exceptions noted in the Purchase Agreement, to purchase their requirements of certain nuclear materials and nuclear fuel services from SFI (HCAR No. 20525). Based upon current estimates, SFI anticipates net expenditures for the above referenced program of $35,897,000, and $34,961,000, for 1978 and 1980, respectively; SFI anticipates to generate net sales of $22,100,000, and $16,169,000, for 1979 and 1981, respectively.

In order to finance the above requirements or to provide funds to reimburse the parent companies for borrowings previously made to effect certain of the above acquisitions of nuclear materials or nuclear fuel services, SFI proposes to issue its Commercial Paper Notes ("Notes" or individually, "Note"), pursuant to an arrangement by which the Aetna Casualty and Surety Co. ("Aetna") would, under a Bond of Indemnity ("Bond"), undertake to pay any Note if it is not paid when presented. The maximum principal amount of the Notes outstanding at any one time until November 1, 1981, may not exceed $60,000,000 less the amount, if any, of Notes paid by Aetna for which Aetna shall not have been reimbursed. The Notes will be discount notes payable to bearer at the office of an issuing and paying agent ("Agent"), which will be a major commercial bank located in New York, N.Y.

The Notes will be in the form of unsecured promissory notes with varying maturities not to exceed 270 days, the actual maturities to be determined by market conditions, effective cost of money to SFI and SFI's anticipated cash requirements at the time of issuance. In accordance with the established custom and practices in the market, the Notes will not be payable prior to maturity. SFI proposes to issue, reissue and sell the Notes in denominations of not less than $50,000 directly to Lehman Brothers Kuhn

Loeb Inc., or Lehman Commercial Paper Inc. ("Lehman"), a dealer in commercial paper, pursuant to a Placement Agreement ("Placement Agreement") to be entered into between SFI and Lehman. The Notes will be sold to Lehman at a discount which will not be in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality of that particular maturity sold to commercial paper dealers. No commission or fee will be payable by SFI in conneciton with the issuance and sale of the Notes. Lehman, as principal, will reoffer and sell the Notes at a discount rate of ⅛ of 1 percent per annum less than the prevailing discount rate to SFI. The dealer in reoffering the commercial paper will limit the reoffer and sale to a nonpublic customer list of not more than 200 buyers of commercial paper. Each such list will be prepared in advance of each offering and will include commercial banks, insurance companies, corporate pension funds, investment trusts, foundations, colleges and university funds, municipal and state funds and other financial and nonfinancial corporations which normally invest funds in commercial paper. Such list will be furnished to the Commission and no change will be made therein without advising the Commission of such change.

SFI and Aetna will enter into a Participation Agreement ("Participation Agreement") which will set forth the terms under which the Bond will be issued. Under the Bond, Aetna will agree unconditionally that, if at any time there shall be insufficient funds on deposit with the Agent and available for the payment of Notes. Aetna shall deposit with the agent the funds required to make the paymants in full. SFI will pay Aetna quarterly a premium at a per annum rate equal to the sum of (a) ½ of 1 percent plus (b) 7 percent of the minimum commercial lending rate charged from time to time by Morgan Guaranty Trust Co. of New York for loans in New York City ("Morgan Guaranty MCLR"), computed on the daily average principal amount of Notes outstanding during such quarter. Based upon present interest rates, the effective cost of the Aetna proposal to SFI is estimated to be 9.81 percent. Under the terms of the Participation Agreement, SFI may reimburse Aetna within 60 days after the date of any payment for each payment made by Aetna under the Bond, together with interest thereon at a per annum rate equal to 125 percent of the Morgan Guaranty MCLR. SFI may also reimburse Aetna within such 60 day period for all losses and expenses incurred in connection with the Bond and in connection with the enforcement of SFI's obligations under the Participation Agreement, including interest thereon, at the same rate as applied to payments by Aetna. Prior to such reimbursement, SFI may issue Notes, provided certain terminating events have not occurred, but may use the proceeds only for the purposes of refunding outstanding Notes and acquiring funds in order to effect such reimbursement.

In the event that Aetna is not reimbursed for any payment made by it under the Bond or for any other losses, expenses, or interest under the Participation Agreement within such 60 days, SFI may not issue or sell any additional Notes without Aetna's written approval, and Aetna may cancel the Bond. Following such a cancellation SFI shall, as specified below, (i) pay Aetna all amounts then owed by SFI under the participation Agreement or the Security Agreement (as hereinafter defined) and (ii) pay the Agent an amount sufficient to provide for the payment of all Notes issued by SFI and unpaid at the time of such cancellation. Any cancellation of the Bond by Aetna shall relate solely to Notes issued after the effectiveness of such cancellation and shall not affect Aetna's obligation under the Bond with respect to Notes issued prior to the effectiveness of such cancellation.

To the extent internal funds are unavailable, SFI proposes to obtain funds to pay the Notes and reimburse Aetna, as may be required by the Participation Agreement during 1978, through borrowings under its Loan Agreement ("Loan Agreement") with its parent companies, dated January 4, 1978 (HCAR No. 20363). Authority is herein requested to make borrowings under such Loan Agreement, if necessary, in an amount sufficient to enable SFI to make such payment and reimbursement. Requisite borrowing capacity is available for such purpose as the $40,000,000 of loans from Citibank, N.A., which matured April 17, 1978, were extended through April 17, 1980.

Under the terms of a Security Agreement to be entered into between SFI and Aetna ("Security Agreement"), Aetna will also receive a security interest (i) in SFI's nuclear materials and nuclear fuel services inventory which is to be financed through the sale of the Notes, (ii) in payments for such materials and services under the Purchase Agreement and (iii) in certain contract rights, funds, and claims related to the sale of the Notes and to such materials and services.

In connection with the proposed transactions, the parent companies will covenant and agree with Aetna that so long as SFI shall have any obligations under the Participation Agreement, the Bond, the Security Agreement or the Placement Agreement, the parent companies will, severally in accordance with their present respective shares of ownership of the common stock of SFI, take any and all action as, from time to time, may be necessary to keep SFI in a sound financial condition and to place SFI in a position to perform and discharge, and will cause SFI to perform and discharge, in a timely manner, all of its obligations under the documents referred to in this application and under the Purchase Agreement.

Before SFI accepted the Aetna proposal, the Company requested proposals from four investment institutions and received a response from three. SFI evaluated all proposals. Based on economics, utilization, and other subjective matters, such as Middle South Utilities System Companies' other financing arrangements and future financing needs, it was determined that the Aetna proposal was the most economical and in the best interest of SFI and the Middle South Utilities System.

The fees and expenses to be incurred in connection with the proposed transactions are to be filed by amendment. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions; however, Arkansas must file pertinent information relating to its participation in the proposed transactions with the Arkansas Public Service Commission ("APSC") two weeks prior to this filing, such APSC filing having been made on September 1, 1978.

Notice is further given that any interested person may, not later than October 30, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commisison should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, of the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will re-

V 4 3 / 1 9 8 0 C 1 2 7 8 IM

ceive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

[Release No. 10426; 812-4271]

VANCE, SANDERS INVESTORS FUND, INC., AND ERIC PIERCE

Filing of Application for Order Exempting Proposed Transaction From Provisions; Permitting Participation in Such Transaction; and Granting Exemption From Provisions

Notice is hereby given that Vance, Sanders Investors Fund, Inc. (the "Fund"), an open-end, diversified, management investment company registered under the Investment Company Act of 1940 (the "Act"), and Mr. Eric Pierce, One Beacon Street, Boston, Mass. 02109, a director of the Pierce Co., Inc. ("PCI") (hereinafter the Fund and Mr. Eric Pierce are collectively referred to as "Applicants"), filed an application on September 29, 1978, pursuant to sections 6(c), 17(b) and 17(d) of the Act and Rule 17d-1 thereunder, for an order of the Commission (1) exempting from the provisions of section 22(d) of the Act the Fund's issuance of shares, at net asset value, in connection with a reorganization of the Fund with PCI, and exempting from the provisions of Rule 22c-1 under the Act the issuance of shares at a price based upon the net asset value per share determined on the business day immediately preceeding the closing date of such reorganization, (2) exempting the proposed transaction from the provisions of section 17(a) of the Act, and (3) permitting the participation in such reorganization, of Mr. Pierce. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that PCI is a corporation orgainized and existing under the laws of Massachusetts, which files its tax returns as a personal holding company, and that PCI's only class of securities outstanding is common stock, which is held of record and beneficially by fewer than one hundred persons. Applicants assert that PCI is not making and does not propose to make a public offering of its securities, and assert that PCI is not, accordingly, an investment company as defined in the Act. Mr. Eric Pierce is a director and shareholder of PCI, and participated in PCI's determination to reorganize with the Fund to the extent described below. Mr. Pierce owns less than 5 percent of PCI's outstanding shares.

According to the application, the Fund and PCI have entered into an agreement and plan of reorganization (the "Plan") which provides for the transfer of substantially all of the assets of PCI to the Fund in exchange for shares of common stock of the Fund. To preclude variations in valuation procedures, the Plan provides that the assets of PCI will be valued in accordance with the valuation procedures followed by the Fund. Thus, Applicants assert that the value of assets transferred to the Fund will substantially equal the net asset value of shares of the Fund received by PCI in such transfer. The valuation of PCI's assets and determination of the Fund's net asset value per share is proposed to be made as of the close of business on the New York Stock Exchange on the business day next preceding the closing date, which will be within twenty-four hours of such valuation. The Plan provides that PCI will retain cash in an amount estimated by PCI to be sufficient to pay its debts, obligations and liabilities. On a date subsequent to the closing date any such cash so retained and not expended for such purposes shall be transferred to the Fund in exchange for additional Fund shares. Applicants state that this transfer will be based upon the net asset value per share of the Fund next computed after receipt of such cash.

Applicants represent that the securities of PCI are suitable for the Fund and consistent with its investment objective and policies as set forth in its current registration statement.

Applicants state that, as of June 30, 1978, the net assets of PCI were $7,474,587 and that such assets had a book cost, for fedral income tax purposes, of $8,285,865. At the same date the Fund had net assets of $133,746,643 and a cost for federal income tax purposes of $122,296,756.

Applicants state that PCI will bear its costs incurred in connection with the reorganization, and the Fund will bear its costs, including costs of filing a registration statement with respect to the Fund shares to be transferred in the reorganization and costs of seeking Commission exemptive orders, which expenses are not expected by Applicants to exceed $7,000.

Applicants state that the average commission paid by the Fund in purchasing preferred and common stocks is approximately eight cents per share, making a net savings of brokerage commissions on the acquisition of the common and preferred shares held by PCI of approximately $9,300. Applicants further assert that the imputed commission on bonds and U.S. Government obligations is approximately $2,500, for a total net brokerage saving by the Fund of approximately $11,800.

Applicants represent that there is no connection between the Fund and PCI, other than as described below, and that no officer, director, or shareholder of PCI is an affiliated person of the Fund.

Vance, Sanders & Co., Inc. ("Vance, Sanders") is the investment adviser and principal underwriter of the Fund. Mr. Eric Pierce, a shareholder and director of PCI, is an officer, director, and shareholder of Vance, Sanders. Section 2(a)(3) of the Act includes, within the definition of the term "affiliated person" of another person, an officer or director of such other person. Therefore, as an officer and director of Vance, Sanders, Mr. Pierce is an affiliated person of Vance, Sanders.

Section 2(a)(3) of the Act also includes, within the definition of "affiliated person" of an investment company, the investment adviser of the investment compan·. Therefore, as the investment adviser to the Fund, Vance, Sanders is an affiliated person of the Fund, and Mr. Pierce is an affiliated person of an affiliated person of the Fund.

Section 17(a) of the Act provides, in part, that it is unlawful for any affiliated person of a registered investment company, or any affiliated person of such person, knowingly to sell to such registered investment company any security or other property. Pursuant to section 17(b) of the Act, the Commission, upon application, shall grant an exemption from such prohibition if evidence establishes that the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Section 17(d) of the Act, and rule 17d-1 thereunder, taken together, provide, in part, that it is unlawful for an affiliated person of a registered investment company, or an affiliated person of such a person, acting as principal, to effect any transaction in which such investment company is a joint participant, without the permission of the Commission. Rule 17d-1 provides, in part, that in passing upon applications for orders granting such permission, the Commission will consider (1) whether the participation of the investment company in such transaction on the basis proposed is consistent with the provisions, policies, and purposes of the Act, and (2) the extent to which such participation is on a basis

different from or less advantageous than that of other participants.

Applicants state that Mr. Pierce participated in the PCI Board of Directors' determination to seek to merge with a registered investment company, and in the Board's establishment of certain criteria that such investment company must meet. Applicants state that Mr. Pierce participated in the discussions leading up to the selection of the Fund, but did not participate in the actual decision of the Board to enter into the Plan. Applicants assert that Mr. Pierce did not, in any manner, participate in the decision of the Fund's Board of Directors to enter into the Plan.

Applicants submit that if the Fund were acquiring the assets of PCI under a statutory merger whereby the Fund acquired outstanding shares of PCI in exchange for Fund shares, an order would have to be granted pursuant to sections 17(b) and 17(d) of the Act and Rule 17d-1 thereunder because of Mr. Pierce's affiliation with Vance, Sanders and his role in the negotiations. Applicants state that since the Plan provides for the sale of PCI's assets to the Fund in exchange for Fund shares which then are to be distributed to the shareholders of PCI, the transaction may similarly be deemed to be subject to the provisions of sections 17(a) and 17(d) of the Act. Applicants request an order of the Commission pursuant to section 17(b) of the Act exempting the proposed transaction from the provisions of section 17(a) of the Act, and pursuant to section 17(d) of the Act and Rule 17d-1 thereunder permitting the participation of Mr. Pierce in the transaction.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company shall sell any redeemable security issued by it except to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person, except a dealer, a principal underwriter, or the issuer, except at a current public offering price described in the prospectus.

Applicants state that the Fund's current prospectus states that the Fund may issue shares at net asset value in connection with the acquisition of the assets of an investment company. Applicants submit, notwithstanding this fact, that it may be that the basis upon which the Fund will issue its shares in exchange for assets of the company and the transfer of any retained cash for shares of the Fund at net asset value on a date subsequent to the original closing date will be different from the public offering price described in the Fund's current prospectus. Therefore, Applicants request an order of exemption pursuant to section 6(c) of the Act from the provisions of section 22(d) of the Act to permit the exchange of assets of PCI at the closing of the proposed transaction (and to permit the proposed later cash transfer) to be effected at net asset value.

Rule 22c-1 promulgated under the Act provides, in pertinent part, that no registered investment company issuing any redeemable security shall sell any such security except at a price based on the current net asset value of such security which is next computed after receipt of an order to purchase such security. Applicants submit that, since the shares to be issued on the closing date will be issued at a price based upon the net asset value per share determined as of the close of business of The New York Stock Exchange on the business day immediately preceding the closing date, an exemption from the provisions of Rule 22c-1 under the Act is necessary in order that the exchange may be consummated. Applicants seek such an exemption pursuant to section 6(c) of the Act.

Applicants state that the management of the Fund believes (1) that the proposed acquisition by the Fund of substantially all of the assets of PCI in exchange solely for shares of the Fund at net asset value is at a reasonable and fair price, arrived at by arms-length bargaining; does not involve overreaching on the part of any person concerned; does not involve the participation of the Fund on any basis different from or less advantageous than any other person; and is consistent with the policy of the Fund as recited in its registration statement; and (2) that the granting of the proposed exemptions in connection with the transaction is appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act. Applicants state that the management of the Fund further believes that the proposed transaction will be beneficial to the shareholders of the Fund because (1) the transfer of securities will cause the Fund less expense than the purchase of securities of the same issuers in the open market because there will be no brokers' commissions, (2) those expenses of the Fund which do not rise proportionately with an increase in portfolio size will be spread over a larger number of shares and therefore will be a smaller amount per share to the benefit of existing shareholders, and (3) the Fund will acquire additional securities for its existing portfolio without affecting the market in such securities.

Section 6(c) of the Act provides, in pertinent part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than October 30, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20459. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[8025-01-M]

MAXIMUM INTEREST RATES

Notice is given that the Small Business Administration ("SBA") has established the maximum rates of interest that lending institutions participating with SBA may charge on loans approved by SBA on and after October 5, 1978, under section 7 of the Small Business Act, as amended, and section 502 of the Small Business Investment Act, as amended.

Effective October 5, 1978, the maximum rate of interest acceptable to SBA on a guaranteed loan or a guaran-

V 4 3 / 1 9 8 0 C 1 2 7 8 UM

teed revolving line of credit shall be eleven and one-quarter percent (11¼%) per year, and the maximum rate on an immediate participation loan shall be ten and one-quarter percent (10¼%) per year. These maximum interest rates are one-half percent higher than the rates published in the FEDERAL REGISTER on July 26, 1978, and shall remain in effect until notification of a change is issued by SBA.

In recognition of the substantially different characteristics of the economy of Alaska, including a substantially higher level of loan interest rates, as compared with the "lower 49 States", an interest rate differential of three-fourths percent (¾%) above the maximum allowable interest rate otherwise applicable for SBA loans remains in effect for SBA loans made to borrowers in Alaska by lenders located in Alaska. This action is taken in light of the relatively limited availability of loan funds, and the higher costs experienced by lenders in Alaska. The action is consistent with the fact that, SBA in recognition of the State's economy, has published a size standard differential for Alaskan small businesses, and in further recognition of existing differentials to wage scales and cost of living allowances as applicable to Alaska.

The "SBA Optional Peg Rate" for the October-December 1978 quarter will be eight and one-half percent (8½%) per year. This is an optional "peg" rate for use in connection with fluctuating interest rate loans made in participation with SBA.

This notice is issued under 13 CFR 120.3(b)(2)(iv). Catalog of Federal Domestic Assistance programs:

Catalog No.:

59.002 Economic injury disaster loans (E,F).
59.012 Small business loans (E,F).
59.013 State and local development company loans (E,F).
59.014 Coal mine health and safety loans (E,F).
59.017 Consumer protection loans (E,F).
59.018 Occupational safety health loans (E,F).
59.001 Displaced business loans (E,F).
59.005 Economic opportunity loans for small businesses (E,F).
59.010 Product disaster loans (E).
59.020 Base closing economic injury loans (E,F).
59.021 Handicapped assistance loans (E,F).
59.022 Emergency energy shortage economic injury loans (E,F).
59.023 Strategic arms economic injury loans (E,F).
59.024 Water pollution control loans (E,F).
59.025 Air pollution control loans (E,F).

Dated: October 2, 1978.

A. VERNON WEAVER,
Administrator.

DEPARTMENT OF STATE

Agency for International Development

A.I.D. MISSIONS AND OFFICES IN NEAR EAST REGION

Redelegation of Authority No. 162-8

Pursuant to the authority delegated to me by A.I.D. Delegations of Authority No. 5, dated December 29, 1961 (27 FR 449), as amended, with respect to Loan Agreements; No. 38, dated June 21, 1977 (42 FR 31511), as amended, with respect to Project Agreements, Trust Fund Agreements, and Grant Agreements; No. 40, dated March 5, 1978 (43 FR 11293) with respect to Source, Origin and Nationality for Procurement; and No. 113, dated October 15, 1975, I hereby redelegate to the Directors of A.I.D. Missions in Afghanistan, Egypt, Jordon, Morocco, Syria and Tunisia and the A.I.D. Representative in Portugal, authority to exercise any of the following functions assigned to me for the country to which such official is assigned, retaining for myself concurrent authority to exercise any of the functions herein redelegated:

1. Authority to execute loan and grant agreements (including project agreements), (hereinafter referred to as "such agreements") and amendments thereto with respect to loans and grants authorized under the Foreign Assistance Act of 1961, as amended, (the Act) in accordance with the terms of the authorizations of such loans or grants.

2. Authority to negotiate and implement such agreements with respect to loans and grants authorized under the Act and loans authorized by the Board of Directors of the corporate Development Loan Fund, in accordance with Regulations, Policies and Procedures now or hereafter established or modified and promulgated within A.I.D. This authority shall include the following:

(a) Authority to prepare, negotiate, and execute letters of implementation;

(b) Authority to review and approve documents and other evidence submitted by borrowers or grantees in satisfaction of conditions precedent to financing under such agreements;

(c) Authority to negotiate, execute and implement all documents ancillary to such agreements;

(d) Authority to sign or approve Project Implementation Orders;

(e) Authority to review and approve the terms of country contract and contractors, amendments and modifications to such contracts, and invitations for bids and requests for proposals with respect thereto;

(f) Authority to waive source, origin and nationality requirements for individual transactions of goods and services up to $250,000 (exclusive of transportation cost) and of motor vehicle up to $25,000; and

(g) Authority to extend terminal dates for signing such agreements, and meeting initial and additional conditions precedents for a cumulative period of not to exceed 180 days for each; and to extend terminal dates for requesting disbursement authorizations, terminal disbursement dates and Project Assistance Completion Dates (PACD's) for a cumulative period of not to exceed 365 days for each.

3. The authorities redelegated in paragraphs 1 and 2 may be exercised only after consultation with appropriate Mission or Office technical personnel and the Regional Legal Advisor.

4. The authorities herein redelegated are subject to guidance by the Office in AID/Washington (Office of Project Development or Office of Technical Support) having responsibility for supporting implementation of the activity.

5. The authorities herein redelegated may be exercised by a person who is serving in an "Acting Director" or "Acting Representative" capacity and may be redelegated but not successively redelegated, except that the authorities enumerated in paragraph 1, paragraph 2(e) with respect to approval of the terms of country contracts and amendments and modifications thereto of over a 10 percent increase in total contract price, and paragraph 2(f) may not be redelegated.

6. The authorities enumerated in paragraph 1 are also hereby redelegated under the same terms and conditions set forth herein to the U.S. Ambassadors to the countries covered by this Redelegation and to any person acting in the Ambassador's official capacity, except that such authorities may not be redelegated.

7. The following Redelegations of Authority are hereby revoked:

a. No. 162-4, dated October 20, 1976 (41 FR 49688), as amended, to Mission Director, USAID/Egypt.

b. No. 162-6 dated March 7, 1976 (43 FR 9402) to Mission Director, USAID/Afghanistan.

8. Any official action taken prior to the effective date hereof by officers duly authorized pursuant to the redelegations revoked hereunder are hereby continued in effect unless modified or revoked by an official to whom I have redelegated relevant authority in this redelegation.

9. This Redelegation of Authority is effective immediately.

Dated: September 20, 1978.

JOSEPH C. WHEELER,
Assistant Administrator,
Bureau for Near East.

Office of the Secretary

[Public Notice CM-8/115]

ADVISORY COMMITTEE ON HISTORICAL DIPLOMATIC DOCUMENTATION

Meeting

The Advisory Committee on Historical Diplomatic Documentation will meet on November 3, 1978, at 9 a.m. in room 1205 of the department of State Building.

The principal purpose of the Committee is to give advice to the Bureau of Public Affairs (particularly the Office of the Historian) regarding the solution of professional problems connected with the preparation of the "Foreign Relations" series and other responsibilities of that Office. Special attention will be given to classified documents, more than 20 years old, that are now being reviewed for possible declassification and publication.

In accordance with section 10(d) of the Advisory Committee Act (Pub. L. 92-463) it has been determined that a portion of the above meeting will necessarily involve discussion concerned with matters recognized as not subject to public disclosure under 5 U.S.C. 552(b)(c)(1), and that the public interest requires that such activities be withheld from disclosure. The meeting beginning at 9 a.m. will be open to the public, and the chairman will entertain questions and discussion from the public as time allows. Following completion of public discussion, the remainder of the meeting will be closed in accordance with section 10(d) cited above.

Persons wishing to attend the open portion of the meeting should come before 9 a.m. to the diplomatic entrance of the Department of State building at 22d and C Streets NW., Washington, D.C. They will be escorted to room 1205 and (at the conclusion of the open portion of the meeting) back to the diplomatic entrance.

Any questions concerning the meeting should be directed to David F. Trask, Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Washington, D.C. 20520, telephone 202-632-8888.

DAVID F. TRASK,
Executive Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 78-132]

CHEMICAL TRANSPORTATION ADVISORY COMMITTEE

Annual Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) (1976 edition), notice is hereby given of a meeting of the Chemical Transportation Advisory Committee to be held on Tuesday, 14 November 1978, beginning at 9:00 a.m. in Room 2230, Nassif Building, 400 7th Street SW., Washington, D.C. 20590.

Reports from the following subcommittees will be presented to the Advisory Committee for review:

1. Liquefied gas facilities
2. Bulk liquid facilities
3. Break bulk and container facilities
4. Commercial explosives
5. Chemical vessels
6. Liquefied gas vessels
7. Ship stores

Participation by the Coast Guard in UN and IMCO conferences concerning the Transport of Dangerous Goods by Water will also be reviewed.

Attendance is open to the interested public. Members of the public may present oral statements at the meeting, with the approval of the Chairman. Persons wishing to make oral statements should notify Captain William N. Spence, Commandant (G-MHM/83) U.S. Coast Guard, Washington, D.C. 20590, telephone 202-426-2306, not later than November 9, 1978. Any person may present a written statement to the Committee at any time.

Issued in Washington, D.C., on October 4, 1978.

W. D. MARKLE, Jr.,
Captain, U.S. Coast Guard,
Acting Chief, Office of Merchant Marine Safety.

[4910-22-M]

Federal Highway Administration

[FHWA Docket No. 78-6]

EFFECTS OF DELAYED OR HALTED HIGHWAY PROJECTS

Request for Public Comments

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Highway Administration (FHWA) is issuing this notice to request information on adverse social and economic effects caused by delayed or halted highway projects and on possible ways of dealing with these effects.

DATES: Information and suggestions must be received on or before (December 11, 1978.

ADDRESS: FHWA Docket No. 78-6, Federal Highway Administration, HCC-10, room 4205, 400 Seventh Street SW., Washington, D.C. 20590. All responses to this notice will be availabale for examination at the above address between 7:45 a.m. and 4:15 p.m. eastern time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert G. King, Chief, Relocation Assistance Division, 202-426-0116; or Mr. Stanley H. Abramson, Office of the Chief Counsel, 202-426-0791, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are Monday through Friday from 7:45 a.m. to 4:15 p.m. eastern time.

SUPPLEMENTARY INFORMATION: Over the past 10 years, the FHWA has concentrated its efforts on studying the adverse social, economic, and environmental effects of proposed highway projects and developing ways to minimize these effects before any land is acquired or construction work begins. The purpose of this notice is to request information on the adverse effect that delays in the completion of ongoing highway projects have had on communities and neighborhoods and on the lives and properties of individuals, families and businesses and, in particular, on those who live or work in the path of highway projects that have been delayed or halted after land or "right-of-way" acquisition has begun. The FHWA is also interested in receiving suggestions on possible ways to avoid these effects and to deal with them when they occur.

Highway projects may be delayed from several months to 10 years or more for a variety of reasons including funding problems of acquiring agencies, changing legal requirements, shifting local priorities, and lawsuits. These delays can occur at any time during the development of a project and often occur after right-of-way acquisition has begun.

While projects are halted, those who own properties in the path of the highway are unable to sell their homes or businesses at a fair price and are reluctant or unable to spend money for needed repairs. Even when a willing buyer can be found, it is often impossible to get a mortgage. The inability to sell and the lack of maintenance often adversely affect homeowners, tenants and businesses, with additional complications caused by advanced age, poor health, fixed income, extreme financial problems, or endangered health, safety and welfare.

Recent preliminary surveys by FHWA indicate that the following problems may be developing in urban areas around the Nation where ongoing highway projects are delayed or halted, particularly after right-of-way acquisition has begun:

A. Dangerous and adverse living conditions.
1. Higher crime rates.
a. Robbery.
b. Burglary.
c. Assault.
d Murder.
e. Muggings.
f. Rape.
g. Arson.
g. Vandalism.
2. Health Hazards.
a Rodents.
b. Emotional and nervous strain.
c. Reduction of available medical personnel and facilities.
3. Curtailment of public facilities and services.
4. Large number of elderly and/or incapacitated residents.
5. Isolation of remaining homes, apartment buildings and businesses.
6. Fewer retail and service establishments.
B. Economic Conditions.
1. Large number of low income residents.
2. Abandoned and boarded up homes and businesses.
3. Buildings condemned and demolished as health and safety hazards before they can be acquired for the highway.
4. Property owners, forced to sell, victimized by speculators.
5. Insurance not available or only at excessive rates.
6. Mortgage loans, including VA and FHA, not available.
7. Higher security expenses for remaining businesses.
8. Remaining residences in worse condition and with more deferred maintenance than those in surrounding areas.
9. Owners responsible for mortgages in excess of realizable market value.
10. Lower occupancy rates and rental values than apartments in surrounding areas.

In these situations it is often necessary for State or local government agencies to step in to relieve hardship cases. The FHWA assists in this effort to a limited extent by providing a portion of the funds needed to acquire properties in those situations where strict conditions (23 CFR 712.204(d)) can be met. The criteria for hardship acquisitions have been narrowed considerably as a result of recent Federal court decisions. (See 42 FR 26651, May 25, 1977.) Under current FHWA procedures, each request for hardship acquisition must show that an individual property owner has been placed in an extraordinary or emergency situation

V 43 / 198 0 OCT 12 78

beyond that of other property owners remaining on the project, and that this situation is a result of delay in the completion of the project and a resulting inability to sell the property in question. During calendar year 1977, only 36 requests met these requirements for Federal approval.

The FHWA believes that it has a responsibility to consider additional ways to assist State and local governments in relieving adverse social and economic effects caused by projects which are delayed or halted after right-of-way acquisition has begun.

Additional information on the nature and extent of problems caused by such delays and suggestions for possible corrective action are requested from all interested parties. All responses to this notice will be available for examination by any interested person at the above address both before and after the closing date for comments.

Copies of this notice are being sent direcly to the following organizations: The Advisory Commission on Intergovernmental Relations, the American Association of State Highway and Transportation Officials, the Center for Auto Safety, the Insurance Institute for Highway Safety, the National Association of County Officials, the National Association of Regional Councils, the United States Conference of Mayors, the National League of Cities, the National Urban League, the National Wildlife Federation, and all State highway agencies.

Issued on: October 4, 1978.

KARL S. BOWERS,
Federal Highway Administrator.

National Highway Traffic Safety Administration

[Docket 75-29; Notice 3]

SAFETY ASPECTS OF MOTORIZED BICYCLES

Proposed Agency Recommendations

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Notice of proposed agency recommendations.

SUMMARY: This notice announces proposed agency recommendations concerning regulation by the States of the operational safety of motorized bicycles (mopeds). This action is taken to allow the public an opportunity to review and comment on the recommendations before they are completed.

PROPOSED EFFECTIVE DATE: November 13, 1978.

ADDRESS: Comments should refer to the docket number and be submitted to: Room 5108, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis Buchanan, Driver and Pedestrian Safety Division, Traffic Safety Programs, National Highway Traffic Safety Administration, Washington, D.C. 20590, 202-426-2180.

On November 28, 1975, the National Highway Traffic Safety Administration (NHTSA) published a request for comments concerning the operational safety of motorized bicycles (40 FR 55375).

Since that time, the NHTSA has analyzed the comments received in response to this notice as well as an increasing volume of safety data which has become available as the number of mopeds has increased. Based on this analysis, and in response to requests for NHTSA's views in this area, the agency has reached a number of conclusions concerning the operational safety of mopeds and has formulated recommendations for moped regulations which it intends to make available to the States and other interested parties. Before issuing these recommendations in final form, the agency has decided to make them available to the public for 30 days to obtain the benefit of any new information that may be supplied.

These recommendations represent the agency's opinion at this time concerning the operational safety of mopeds. They are merely recommendations, however, and are intended to be modified as additional data becomes available. Consequently, Docket 75-29; Notice 3 will remain open as a depository for information concerning mopeds and moped safety.

It is important to note that these recommendations do not represent highway safety standards. If the NHTSA decides to enter into formal rulemaking, the public will be notified and given the opportunity to comment.

PROPOSED RECOMMENDATIONS FOR MOPED REGULATION

DEFINITION

"Moped" means a motor-driven cycle with mechanical linkage to permit muscular propulsion and a power source that provides a maximum of 2 brake horsepower. The power source shall not be capable of propelling the vehicle unassisted at a speed in excess of 30 mph (48.28 kilometers per hour) on a level road.

VEHICLE REGISTRATION AND LICENSING

Each moped should be registered and its operation licensed in such a way that it can be identified as a motorized bicycle.

ACCIDENT RECORDS

Reporting of all accidents, in conformance with American National Standards Institute Standard D-20, Model Motorist Data Base, should be required. Accident reporting data should be complied in such a way that moped accident data can be clearly identified. Moped accident data should be separated from bicycle and motorcycle accident data.

VEHICLE EQUIPMENT

At the time of manufacture mopeds must meet applicable Federal Motor Vehicle Safety Standards. Vehicle Equipment Safety Commission Regulation VESC-17, Minimum Requirements for Construction and Equipment of Mopeds should be used as a guide for registration eligibility.

INSURANCE—FINANCIAL RESPONSIBILITY

Liability insurance or financial responsibility requirements should be applicable to moped operators.

OPERATOR'S LICENSE, MINIMUM AGE, AND TEST REQUIREMENTS

A motorcycle operator's license or endorsement, or a special moped operator's license or endorsement should be required for moped operation.

The minimum age for moped operator licensing should be the same as for automobile operator licensing.

Moped operators should be required to pass skill and knowledge tests designed for motorcycle operation or skill and knowledge tests designed especially for moped operation.

MOPED OPERATOR'S HANDBOOK

A moped operator's handbook should be prepared. This publication should contain information on all legal requirements for moped operation as well as information on recommended safe driving practices.

TRAFFIC LAW ENFORCEMENT

Moped operators should be required to obey all applicable traffic laws and regulations. Police agencies should establish which will insure that enforcement personnel are well informed about moped regulations and that traffic regulations pertaining to mopeds are equitably enforced.

MOPED OPERATOR EDUCATION

Motorcycle safety education programs should include appropriate information on moped operation. Persons wishing to operate a moped should be encouraged to enroll in these motorcycle safety education courses.

Additionally, information on moped regulations and safe driving practices should be incorporated into high school and adult driver education courses for automobile operators, so that they are knowledgeable concerning moped operators rights and duties.

PUBLIC INFORMATION AND EDUCATION

Information on moped regulations and safe driving practices should be incorporated into highway safety public information and education programs. These programs should also inform other drivers of the legal rights and restrictions for moped operators. Moped operators should be encouraged to check with local police agencies when in doubt about moped regulations.

PASSENGERS

Passengers should be prohibited on mopeds unless the vehicles are specifically designed to carry passengers.

USE ON HIGH-SPEED (ABOVE 35 MPH) ROADWAYS

Differences in speed between mopeds and other motor vehicles on high-speed roads can be as much as 45 mph. Speed differences that large can greatly increase the likelihood of accidents. However, safer low-speed alternative routes are often available. Priority should be given to finding and designating these low-speed alternative routes. Where alternative routes are not available, consideration should be given to designating bicycle lanes on the roadways and permitting mopeds to use them. Consideration should also be given to allowing mopeds to use the improved shoulders on designated roadways when alternative low-speed routes are not available. However, mopeds should not be permitted under any circumstances to operate on high-speed limited access highways.

Implementation of this recommendation will require extensive analyses of high-speed roads and alternative routes by traffic engineering specialists. In some cases it may be impractical to provide direct access by moped to all places a moped rider might wish to go. However, these analyses should be made with the goal of providing the greatest degree of access and mobility for moped users that adherence to traffic engineering and highway safety principles will permit.

USE OF ON-ROAD BICYCLE FACILITIES

on heavily congested roads it may be desirable to separate mopeds from other motor vehicle traffic. The use of on-road bicycle lanes by mopeds offers a practical means of achieving the needed separation. All on-road bicycle lanes should be examined to determine those on which moped use could be permitted with little increase in risk to other bicycle lane users. Those facilities where joint use appears to be compatible should then be designated for use by mopeds as well as bicycles.

USE OF BICYCLE PATHS

A need exists to determine the characteristics of the interaction between pedestrians, bicycles, and mopeds on off-road facilities. If adequate control exists, the State may wish to consider permitting, on an experimental basis, the use of motor and/or pedal powered mopeds on bicycle paths in order to determine the safety of this type of interaction. Such experimentation shall not be allowed on facilities funded under 23 U.S.C. 217(d) which prohibits motorized vehicles on "trails and walkways authorized under this section."

USE OF SAFETY HELMETS

The use of either a bicycle safety helmet or a motorcycle safety helmet should be required.

VISIBILITY

Moped operators should be encouraged to make themselves as visible as possible to other drivers. This can be accomplished by the use of brightly colored clothing and helmets, the use of the moped's headlight during the day, the use of a bicycle flag, and at night, by the use of retro-reflective materials on the vehicle, flag, clothing and helmet.

The principal author of this notice was Frederic W. Schwartz, Jr. of the office of Chief Counsel.

(Pub. L. 89-564, 80 Stat. 731; (23 U.S.C. 401, et seq.), delegations at 49 CFR 1.50 and 49 CFR 501.8(d)).

Issued: October 4, 1978.

CHARLES F. LIVINGSTON,
Acting Associate Administrator, Traffic Safety Programs.

Saint Lawrence Seaway Development Corporation

ADVISORY BOARD

Meeting

Pursuant to section 10(A)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Advisory Board of the St. Lawrence Seaway Development Corp., to be held at 10 a.m., December 1, 1978, in the Seaway offices of the Seaway Corp., 800 Independence Avenue SW., Washington, D.C. The agenda for this meeting is as follows: Opening Remarks; Approval of Minutes; Administrator's Report; Review of Programs and Operations; and Closing Remarks.

Attendance is open to the interested public but limited to the space available. With the approval of the Administrator, members of the pubic may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than November 29, 1978, and information may be obtained from Robert D. Kraft, Deputy General Counsel, St. Lawrence Seaway Development Corp., 800 Independence Avenue SW., Washington, D.C. 20591; 202-426-3574.

Any member of the public may present a written statement to the Advisory Board at any time.

Issued in Washington, D.C. on October 2, 1978.

D. W. OBERLIN,
Administrator.

DEPARTMENT OF THE TREASURY

Office of the Secretary

CARBON STEEL BARS, CARBON STEEL STRIP, CARBON STEEL PLATES, AND CERTAIN STRUCTURAL CARBON STEEL SHAPES FROM THE UNITED KINGDOM

Termination of Antidumping Investigations

AGENCY: U.S. Treasury Department.

ACTION: Termination of antidumping investigations.

SUMMARY: This notice is to advise the public that the antidumping investigations concerning carbon steel bars, carbon steel strip, carbon steel plates, and certain structural carbon steel shapes from the United Kingdom are being terminated. The terminations are based on the withdrawal of the original antidumping petitions, as detailed in the body of this notice and the appendix hereto.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Linda F. Potts, Assistant to the Director, Office of Tariff Affairs, U.S. Treasury Department, 15th and Pennsylvania Avenue NW., Washington, D.C. 20220, telephone 202-566-2951.

SUPPLEMENTARY INFORMATION: On December 5, 1977, information was received in proper form pursuant to §§ 153.26 and 153.27. Customs regulations (19 CFR 153.26, 153.27) from

V 43/198 OCT 78

Counsel on behalf of Armco Steel Corp. (now Armco, Inc.) alleging that certain steel products from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of he Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

This information was the subject of four "Antidumping Proceeding Notices" involving carbon steel bars, carbon steel strip, carbon steel plates, and certain structural carbon steel shapes from the United Kingdom, which were published in the FEDERAL REGISTER of January 23, 1978 (43 FR 3231-33). A notice extending the antidumping investigatory period for the four investigations was published in the FEDERAL REGISTER on July 26, 1978 (43 FR 32343).

Armco, Inc. submitted a letter dated September 29, 1978, formally withdrawing its petition. This letter is reproduced as an appendix to this notice.

Treasury has been monitoring and will continue carefully to monitor entries of carbon steel bars, carbon steel strip, carbon steel plates, and certain structural carbon steel shapes under the the trigger price mechanism and to take appropriate action to insure the effective enforcement of the Antidumping Act with respect to these products. In this connection, it should be noted, as indicated in the notice of proposed rulemaking regarding the special summary steel invoice (42 FR 65214), that Treasury views its authority to withhold appraisement retroactively in appropriate cases as an important tool for providing effective enforcement of the Antidumping Act.

Accordingly, I hereby conclude that based upon the withdrawal of the antidumping petition and in view of the fact that the carbon steel products described above are subject to the "trigger price mechanism" administered by this Department, it is appropriate to terminate these investigations. These terminations are without prejudice to the filing of one or more subsequent antidumping petitions concerning the same products.

Dated: October 6, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SEPTEMBER 29, 1978.

Re. Armco Inc. antidumping complaint covering basic *steel mill products from the United Kingdom.*

ROBERT H. MUNDHEIM, Esq.,
General Counsel,
Department of the Treasury, Room 3000 Main Treasury Building,
Washington, D.C. 20220

DEAR MR. MUNDHEIM: On December 2, 1977, Armco Steel Corp. (now Armco Inc.) submitted to the Commissioner of Customs a petition for the institution of antidumping proceedings in regard to the following categories of carbon steel mill products imported into the United States from the United Kingdom: plates, structural shapes, cold rolled sheets and coils, wire rods and hot rolled bars and bar shapes. The petition included information which tended to establish that these steel mill products were being sold in the United States at less than their fair value within the meaning of section 201 of the Antidumping Act, 1921, as amended.

Subsequent to the submission of Armco's petition, the President approved the report and recommendations of the Under Secretary of the Treasury for Monetary Affairs, the Honorable Anthony M. Solomon, for the establishment of a Trigger-Price Mechanism to enable the Treasury to monitor imports of steel mill products as a constructive measure to elminate the then widespread practice of foreign suppliers of selling such products in the United States at less than their fair value. In the ensuing months, all factors in the steel market have cooperated with the Department of The Treasury in its commendable efforts to establish the Trigger Price Mechanism, to update it, and to make it an effective instrumentality to accomplish its intended purpose.

The Department's cognizant spokesmen have repeatedly warned of the consequences to this innovative program should its limited resources of technically qualified manpower, required for the administration of the TPM, be diverted to the mandatory deadlines attaching to major antidumping investigations of steel mill products. Responsive to these warnings, other complainants in antidumping proceedings involving steel mill products from Japan, the U.K., and other E.E.C. countries, initiated prior to Armco's case, have withdrawn their several complaints, the most recent being the action of National Steel Corp. on August 14, 1978.

Armco's consideration of similar action has been prolonged by the surge of imports of steel mill products in July and August, 1978, and by the anxiety which is felt throughout the domestic steel mill products industry that the structural characteristics of the TPM may make it an effective instrument for achievement of the President's purpose, and those of The Department. We are reassured by the President's public statements this week and by our understanding of the intention of the Under Secretary and yourself to continue the Department's efforts to update and improve the TPM and its administration more effectively to achieve its intended purpose.

Armco does not desire to handicap these constructive efforts. It appears that the continued pendency of the Antidumping Investigations concerning steel mill products from the United Kingdom, initiated upon Armco's petition of December 2, 1977, may indeed have this unintended, and unfortunate effect. Accordingly, with the hope and expectation that the TPM (demonstrably inadequate in 1978) will be revised so that it will effectively and promptly reduce the unprecedented volume of steel imports into the U.S., Armco hereby withdraws it petition of December 2, 1977.

If in the future it appears that the TPM as modified from time to time, and its administration, are unequal to the achievement of the declared purpose of the President and the Under Secretary, Armco will be forced to reconsider its position, and possibly to resubmit antidumping petitions against what may then appear to be the more grievous dumping practices of foreign suppliers of steel mill products to the United States market.

With assurances of our respect and esteem for your personal efforts, as well as those of the Under Secretary, and with appreciation for the President's interest in this problem and his support of the TPM, I am

Very sincerely yours,
C. WILLIAM VERITY, Jr.

OCTOBER 6, 1978.

Mr. WILLIAM C. VERITY, Jr.,
Chairman, Armco, Inc.
Middletown, OH 45043.

DEAR MR. VERITY: Thank you for your letter of September 29, 1978, in which Armco withdraws its antidumping petition involving carbon steel bars, carbon steel strip, carbon steel plates, and certain structural carbon steel shapes from the United Kingdom.

Pursuant to your request we have terminated our investigation with respect to the above-named products without prejudice. Enclosed is a copy of a termination notice which will be published in the FEDERAL REGISTER.

Sincerely,
ROBERT H. MUNDHEIM.

UNITED STATES—DENMARK TAX TREATY

Meeting

The Treasury Department announces that it will hold a public meeting on November 6, 1978, to solicit the views of interested persons regarding issues being considered during negotiations to develop a new income tax treaty between the United States and Denmark.

The public meeting will be held at the Treasury Department, at 2 p.m., in room 4121. Persons interested in attending are requested to give notice in writing by November 1, 1978, of their intention to attend. Notices should be addressed to H. David Rosenbloom, International Tax Counsel, Department of the Treasury, Washington, D.C. 20220.

Today's announcement of the November public meeting follows the recent conclusion of a further round of negotiations between representatives of the United States and Denmark to develop a new income tax treaty for the avoidance of double taxation and the prevention of tax evasion. The income tax treaty presently in effect dates from 1948.

In the course of the recent negotiations, many subjects of mutual concern were identifed and discussed. Among the issues being considered are: Taxation of dividends, including the treatment of Denmarks's imputation system; taxation of independent personal services, artists and athletes, and directors' fees; taxation of insurance companies; taxation of child support payments; relief from double taxation for U.S. citizens resident in Denmark; inclusion of the Virgin Island in treaty coverage; and treatment of contributions to pension plans.

The Treasury seeks the views of interested persons in regard to those issues, as well as other matters that may have relevance in the context of an income tax treaty between the United States and Denmark. The November 6 public meeting is being held to provide an opportunity for an exchange of views, as well as for the purpose of discussing the United States position in regard to the issues presented in the negotiations.

Dated: October 5, 1978.

DONALD C. LUBICK,
Assistant Secretary, Tax Policy.

AGRICULTURAL COOPERATIVE

Notice to the Commission of Intent To Perform Interstate Transportation for Certain Nonmembers

OCTOBER 6, 1978.

The following Notices were filed in accordance with section 203(b)(5) of the Interstate Commerce Act provided for under 49 CFR 1047.23. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interstate transportation must file the Notice, Form BOp 102, with the Commission within 30 days of its annual meetings each year. Any subsequent change, concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change. The name and address of the agricultural cooperative, the location of the records, and the name and address of the person to whom inquiries and correspondence should be addressed, are published here for interested persons. Submission of information that could have bearing upon the propriety of a filing should be directed to the Commission's Bureau of Investigations and Enforcement, Washington, D.C. 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C.

[Notice No. 728]

ASSIGNMENT OF HEARINGS

OCTOBER 6, 1978.

Cases assigned for hearings, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 121568 (Sub-10), Humbolt Express, Inc., now being assigned for continued hearing on December 12, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 11758 (Sub-45), Provisioners Frozen Express, Inc., now assigned for October 11, 1978, at Denver, CO, is canceled and application dismissed.

MC 144149, Rim Investments, Inc. d.b.a. B & C Transportation, now assigned for December 11, 1978, at San Francisco, CA, is canceled and application dismissed.

MC 135797 (Sub-93), J. B. Hunt Transport, Inc., now being assigned for continued hearing on October 26, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

[7035-01-M]

[Decisions Volume No. 37]

DECISION-NOTICE

Decided: September 29, 1978.

The following applications are governed by special rule 247 of the commission's rules of practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication (October 12, 1978).

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authrity sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board No. 1, Members Carleton, Joyce, and Jones.

H. G. HOMME, Jr.,
Acting Secretary.

MC 2202 (Sub-564F), filed July 24, 1978. Applicant: ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Boulevard, Akron, OH 44309. Representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a *common carrier*, by motor vehicle, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) serving Longview, and Marshall, TX, as intermediate points on applicant's regular route between Birmingham, AL, and Dallas, TX; (2) serving Jacksonville, TX, as an intermediate point on applicant's regular route between Denison, TX, and Houston, TX; and (3) serving Cleburne, TX, as an off-route point to applicant's regular route between Denton, TX, and Hillsboro, TX. (Hearing site: Dallas, TX or Washington, DC.)

MC 3252 (Sub-103F), filed July 27, 1978. Applicant: MERRILL TRANSPORT CO., a corporation, 1037 Forest Avenue, Portland, Me 04104. Representative: Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, MA 02043. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cullet bottles and cans, for recyling*, from points in ME to points in MA, RI, CT, NH, NY, and NJ. (Hearing site: Boston, MA.)

MC 112074 (Sub-441F), filed August 9, 1978. Applicant: DEATON, INC., a Delaware corporation, 317 Avenue W, P.O. Box 938, Birmingham, AL 35201. Representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron or steel tubing* (except commodities which because of size or weight require the use of special equipment), from the facilities of the Georgia Tubing Corp., at or near Cedar Springs, GA, to points in AL, AR, FL, KY, LA, MS, MO, NC, OK, SC, TN, and TX. (Hearing site: Jacksonville, FL or Birmingham, AL.)

MC 21866 (Sub-106F), filed July 31, 1978. Applicant: WEST MOTOR FREIGHT, INC., 740 South Reading Avenue, Boyertown, PA 19512. Representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, PA 19102. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Glass containers and plastic containers*, and (2) *materials* used in the manufacture and distribution of glass containers and plastic containers (except commodities in bulk), between the facilities of Drug Plastic & Glass Co., Inc., at or near Kittanning, PA, on the one hand, and, on the other, points in the United States (except AK, HI, and PA). (Hearing site: Washington, DC or Philadelphia, PA.)

MC 22509 (Sub-8F), filed September 6, 1978. Applicant: MISSOURI-NEBRASKA EXPRESS, INC., an Iowa corporation, 5310 St. Joseph Avenue, St. Joseph, MO 64505. Representative: Harry Ross, 58 South Main Street, Winchester, KY 40391. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal containers and container ends*, from Chicago, IL, Milwaukee, WI, and LaPorte, IN, to points in KS, NE, and OK. (Hearing site: Chicago, IL.)

MC 30844 (Sub-620F), filed August 4, 1978. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box

V 43 / 198 0 OCT 12 1978

5000, Waterloo, IA 50704. Representative: John P. Rhodes (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Toilet preparations*, from Minneapolis, MN, to points in AL, AR, CO, CT, DE, FL, GA, IL, IN, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NH, NJ, NY, NC, OH, OK, PA, RI, SC, TN, TX, VT, VA, WV, WI, and DC. (Hearing site: St. Paul, MN.)

MC 61282 (Sub-2F), filed July 5, 1978. Applicant: ASPEN TRANSPORTATION SERVICE, INC., 435 Main Street, Gardner, MA 01440. Representative: William Humphrey Tucker, One State Street, Boston, MA 02109. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in Franklin, Hampden, Hampshire, Middlesex, and Worcester Counties, MA; and (2) *furniture and pianos*, between points in MA. Condition: Issuance of this certificate is subject to prior or coincidental cancellation, at applicant's written request, of certificate of registration MC 57519 (Sub-1). (Hearing site: Boston, MA.)

NOTE.—The purpose of this application is to convert a certificate of registration to a certificate of public convenience and necessity.

MC 61788 (Sub-36F), filed August 25, 1978. Applicant: GEORGIA-FLORIDA-ALABAMA TRANSPORTATION CO., a corporation, P.O. Box 2268, Dothan, AL 36302. Representative: Maurice F. Bishop, 601-09 Frank Nelson Building, Birmingham, AL 35203. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Mobile, AL, and Gulfport, MS, (1) over U.S. Hwy 90, and (2) over Interstate Hwy 10, serving all intermediate points, and restricted in (1) and (2) above (a) that any authority granted herein shall not be severable by sale or otherwise from the irregular-route authority held by carrier between points within 75 miles of Bay Minette, AL, including Bay Minette, and (b) no irregular route operations may be conducted between Mobile, AL, and Gulfport, MS. (Hearing site: Mobile, AL or Gulfport, MS.)

MC 70083 (Sub-34F), filed August 21, 1978. Applicant: DRAKE MOTOR LINES, INC., a Delaware corporation, 20 Olney Avenue, Cherry Hill, NJ 08002. Representative: Richard Rueda, 133 North 4th Street, Philadelphia, PA 19106. To Operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Ladies apparel, and* (2) *supplies* used in the distribution of the commodities in (1) above (except commodities in bulk), from the facilities of Petrie Stores Corp., at Secaucus, NJ, to the facilities of Petrie Stores Corp., at Cleveland, OH, and Detroit, MI. Condition: The person or persons who control applicant may be engaged in common control with a freight forwarder and must submit an affidavit establishing that such control is not in violation of section 411 (a)(1) of the Interstate Commerce Act. (Hearing site: Camden, NJ or Philadelphia, PA.)

MC 70083 (Sub-35F) filed August 21, 1978. Applicant: DRAKE MOTOR LINES, INC., a Delaware corporation, 20 Olney Avenue, Cherry Hill, NJ 08002. Representative: Richard Rueda, 133 North 4th Street, Philadelphia, PA 19106. To operate as a *common carrier, by motor vehicle*, over irregular routes, transporting: (1) *Ladies apparel* and (2) *supplies* used in the distribution of the commodities in (1) above (except commodities in bulk), (a) from the facilities of the Miller-Wohl Co., Inc., at Secaucus, NJ, to the facilities used by the Miller-Wohl Co., Inc., at Cleveland, OH, and Detroit, MI, and (b) from the facilities or by the Miller-Wohl Co., Inc., at Cleveland, OH, to the facilities of the Miller-Wohl Co., Inc., at Detroit, MI. Condition: The person or persons who control applicant may be engaged in common control with a freight forwarder and must submit an affidavit establishing that such control is not in violation of section 411(a)(1) of the Interstate Commerce Act. (Hearing site: Camden, NJ or Philadelphia, PA.)

(Hearing site: Buffalo, NY.

NOTE.—Traffic is originating at points in the Provinces of Ontario and Quebec, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why no such Canadian authority is necessary. The restriction and conditions contained in the grant of authority in this proceeding are phrases in accordance with the policy statement entitled notice to interested parties of new requirements concerning applications for operating authority to handle traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 144244 (Sub-4F), filed July 31, 1978. Applicant: CRESTON TRANSPORTATION, INC., East Highway 34, Creston, IA 50801. Representative: Frank W. Davis, Jr., 2600 Ruan Center, Des Moines, IA 50309. PASSENGER AUTHORITY

MC 126624 (Sub-3F), filed July 24, 1978. Applicant: G. A. BAILEY LTD., 4 Princess Street, Leamington, ON, Canada N8H 2Y1. Representative: Wilhelmina Boersma, 1600 First Federal Building, Detroit, MI 48226. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Passengers and their baggage* in the same vehicle as passengers, in round-trip charter operations, beginning and ending at ports of entry on the international boundary line between the United States and Canada, and extending to points in the United States, including AK (except HI); and (2) *passengers and their baggage and express*, in the same vehicle as passengers, between the ports of entry on the international boundary line between the United States and Canada, at Detroit, MI, on the one hand, and, on the other, the Detroit Metropolitan Airport at or near Romulus, MI. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary.

NOTE.—Applicant states that traffic is moving to and from points in the Province of ON, Canada. The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled notice to interested parties of new requirements concerning applications for operating authority to handle traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of Canada regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no further force or effect.

MC 144602 (Sub-2F), filed July 31, 1978. Applicant: CONTINENTAL LIMOUSINE SERVICE, INC., 3123 North Washington Boulevard, Arlington, VA 22201. Representative: Thomas N. Willess, 1000 Sixteenth Street NW., Washington, DC 20036. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in special and charter operations, between the Armed Forces Testing Center, at Linthicum Heights, MD, on the one hand, and, on the other, the Armed Forces recruiting offices at Alexandria, Falls Church, Woodbridge, and points in Arlington and Fairfax Counties, VA, Hillcrest Heights, MD, and Washington, DC, restricted to the transportation of not more than 14 passengers in any one vehicle, not including the driver. (Hearing site: Washington, DC.)

MC 145167F, filed August 11, 1978. Applicant: CHECKERLLAC TRANSPORTATION, INC., 1612 Forest Avenue, Staten Island, NY 10302. Representative: Robert A. Straniere, 358 St. Mark's Place, Staten Island, NY 10301. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in round-trip special and charter operations, beginning and ending at points in Richmond County, NY, and extending to Atlantic City, NJ, restricted to the transportation of not more than fourteen (14) passengers in any one vehicle, not including the driver, and not including children under ten (10) years of age who do not occupy a seat. (Hearing site: New York, NY, or Newark, NJ.)

BROKER AUTHORITY

MC 130516F, filed July 24, 1978. Applicant: FIRST NATIONAL TRAVEL AGENCY, INC., P.O. Box 608, Hutchinson, KS 67501. Representative: Bill Cole, First National Bank Building, Hutchinson, KS 67501. To engage in operations, in interstate or foreign commerce, as a *broker*, at Hutchinson, KS, in arranging for the transportation, by motor vehicle, of: *Passengers and their baggage*, in round-trip special and charter operations, beginning and ending at points in KS, NE, IA, MO, OK, and CO, and extending to points in the United States (including AK, but excluding HI). (Hearing site: Kansas City, MO, or Omaha, NE.)

NOTE.—Applicant is cautioned that arrangements for charter parties or groups should be made in conformity with the requirements set forth in *Tauck Tours, Inc., Extension—New York, NY*, 54 MCC 291 (1952).

[Notice No. 186]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

OCTOBER 2, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 8948 (Sub-112TA), filed August 14, 1978. Applicant: WESTERN GILLETTE, INC., P.O. Box 471, Akron, OH 44309. Representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from Fredonia, AZ, and points in its commercial zone to Salt Lake City, UT, and points in its commercial zone, for 180 days. Supporting shipper: Maxwell Petroleum, Inc., 2388 Andrew Avenue, Salt Lake City, UT 84104. MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

[Notice No. 185]
OCTOBER 2, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particuar portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 21866 (Sub-108TA), filed August 21, 1978. Applicant: WEST MOTOR FREIGHT, INC., 740 South Reading Avenue, Boyertown, PA 19512. PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

PETITIONS FOR MODIFICATION, INTERPRETATION OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

OCTOBER 4, 1978.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

All pleadings and documents must clearly specify the suffix (e.g. M1 F, M2 F) numbers where the docket is so identified in this notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this notice. Such protests shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

MC 730 (Sub-272) (M1F) (notice of filing of petition to modify certificate), filed August 24, 1978. Petitioner: PACIFIC INTERMOUNTAIN EXPRESS CO., a corporation, P.O. Box 958, Oakland, CA 94604. Representative: Alfred G. Krebs (same address as petitioner). Petitioner holds a motor *common carrier* certificate in MC 730 Sub-272 issued October 27, 1966 authorizing transportation, over regular routes, as pertinent of: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commisison, commodities in bulk, and those requiring special equipment), between Chicago, IL, and Boston, MA, serving the intermediate points of Akron, OH, and those within 10 miles of Akron and Mansfield, OH, Syracuse, NY, all intermediate points in NY located east of Syracuse, all intermediate points in MA, RI, and CT, intermediate and off-route points in the Chicago, IL, commerical zone, as defined by the Commission, off-route points located within 10 miles of Akron, off-route points located within 20 miles of Boston, and the off-route points of Gloversville and Rome, NY, without restriction; and the intermediate points of South Bend, Mishawaka, Elkhart, Fort Wayne, and Warsaw, IN, the off-route point of Goshen, IN, and intermediate points in OH (except Akron and Mansfield and points within 10 miles of Akron), restricted to the pickup of eastbound traffic and the delivery of westbound traffic; and intermediate points in NY west of Syracuse, restricted to the delivery of westbound traffic. By the instant petition, petitioner seeks to modify the above authority be deleting the language of "pickup of eastbound traffic and the delivery of westbound traffic" in reference to the restriction in connection with OH points and named IN cities.

MC 10343 (MIF) (Notice of filing of petition to modify certificate), filed August 24, 1978. Petitioner: CHURCHHILL TRUCK LINES, INC., P.O. Box 250, Chillicothe, MO 64601. Representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Avenue, Kansas City, MO 64105. Petitioner holds a motor *common carrier* certificate in MC 10343 issued March 20, 1975, authorizing transportation, over regular routes, as pertinent, of (C) *General commodities* (except those of unusual value, classes A and B explosives, households as defined by the Commission, commodities in bulk, and those requiring special equipment), serving all intermediate points on U.S. Hwy 36 between St. Joseph, MO, and Cameron, MO, in connection with carrier's regular-route operations authorized in section (B) (except those points that carrier is already authorized to serve in section (B)). Between Kansas City, MO., and Chillicothe, MO, serving all intermediate points: From Kansas City over U.S. Hwy 24 to Waverly, MO, then over U.S. Hwy 65 to Chillicothe, and return over the same route. Between junction U.S. Hwys 36 and 61 and Chicago, IL, serving no intermediate points, and serving junction U.S. Hwys 24 and 66 for purposes of joinder only: From junction U.S. Hwys 36 and 61 over U.S. Hwy 36 to Springfield, IL, then over U.S. Hwy 66 via its junction with U.S. Hwy 24 to Chicago, and return over the same route. Between junction IL Hwy 96 and U.S. Hwy 24, and junction U.S. Hwys 24 and 66, serving no intermediate points and serving junction IL Hwy 96 and U.S. Hwy 24 and junction U.S. Hwys 24 and 66 for purposes of joinder only: From junction IL Hwy 96 and U.S. Hwy 24 over U.S. Hwy 24 to junction U.S. Hwy 66, and return over the same route. Between Monmouth, IL, and Good Hope, IL, serving all intermediate points: From Monmouth over U.S. Hwy 67 to Good Hope, and return over the same route. Between junction IA Hwy 22 and U.S. Hwy 61, and Dubuque, IA, serving all intermediate points: From junction IA Hwy 22 and U.S. Hwy 61 over U.S. Hwy 61 to Dubuque, and return over the same route. Between Davenport, IA, and junction U.S. Hwys 6 and 63, serving all intermediate points: From Davenport over U.S. Hwy 6 to junction U.S. Hwy 63, and return over the same route. Between junction U.S. Hwys 6 and 63 and Princeton, MO, serving no intermediate points, and serving junction U.S. Hwys 6 and 63 and Princeton for purposes of joinder only: From junction U.S. Hwys 6 and 63, over U.S. Hwy 6 to junction U.S. Hwy 65, then over U.S. Hwy 65 to Princeton, and return over the same route. Between Donnelson, IA, and Cedar Rapids, IA, serving all intermediate points: From Donnelson over U.S. Hwy 218 to Cedar Rapids, and return over the same route. Between Ottumwa, IA, and Waterloo, IA, serving all intermediate points: From Ottumwa over U.S. Hwy 63 to Waterloo, and return over the same route. Between junction U.S. Hwy 63 and IA Hwy 149 and Iowa City, IA, serving all intermediate points: From junction U.S. Hwy 63 and IA Hwy 149 over IA Hwy 149 to Sigourney, IA, then over IA Hwy 92 to junction IA Hwy 1, then over IA Hwy 1 to Iowa City, and return over the same route. Between Bloomfield, IA and Kirksville, MO, serving all intermediate points: From Bloomfield over U.S. Hwy 63 to Kirksville, and return over the same route. Between junction U.S. Hwy 63 and IA Hwy 149 and Iowa City, IA, serving all intermediate points: From junction U.S. Hwy 63 and IA Hwy 149 over IA Hwy 149 to Sigourney, IA, then over IA Hwy 92 to junction IA Hwy 1, then over IA Hwy 1 to Iowa City, and return over the same route. Between Bloomfield, IA and Kirksville, MO, serving all intermediate points: From Bloomfield over U.S. Hwy 63 to Kirksville, and return over the same route. Between St. Joseph, MO, and Kansas City, MO, serving no intermediate points and serving the termini for purposes of joinder only: From St. Joseph over Interstate Hwy 29 to Kansas City, and return over the same route. In connection with the routes described above in section (C) service is authorized to all points in that part of IA on and east of U.S. Hwy 63; those in that part of MO on and north of U.S. Hwy 40; those in that part of IL north of a line beginning at a point on U.S. Hwy 24 at the IL-MO State line and extending along U.S. Hwy 24 to junction U.S. Hwy 66, then along U.S. Hwy 66 to Chicago, IL, (including all points in the Chicago, IL, Commercial Zone as defined by the Commission, as off-route points in connection with carrier's authorized regular-route operations in section (C) above, and with carrier's otherwise authorized regular-route operations). Restriction: Said op-

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, DC 20423.

V 4 3 / 1 9 8

erations are restricted to the transportation of traffic moving between Meadville, MO, and points within 10 miles thereof, on the one hand, and, on the other, Kansas City, KS, and points in IA, MO, and IL. By the instant petition, petitioner seeks to modify the above authority by deleting the above restriction.

MC 55822 (Sub-8) (M-2F) (notice of filing of petition to modify permit), filed August 31, 1978. Petitioner: Victory Express, Inc., P.O. Box 4076, Trotwood, OH 45426. representative: Harold G. Hernly, Jr., 118 North St. Asaph Street, Alexandria, VA 22314. Petitioner holds permit in MC 55822 (sub-8), issued October 16, 1974, authorizing transportation, as here pertinent, over irregular routes, of: *General commodities* (except classes A and B explosives, articles of unusual value, household goods as defined by the Commission, commodities in bulk, and commodities which because of their size or weight require the use of special equipment), between points in the United States (except Alaska and Hawaii) restricted to the transportation of shipments originating at, or destined to, the plantsites, warehouses and branch facilities of the NCR Corp., under a continuing contract with the NCR Corp. of Dayton, OH. By the instant petition, petititoner seeks to modify the above authority by adding Appleton Papers, Ihc., as a contracting shipper.

MC 94201 (Sub-135) (M1F) (notice of filing of petition to modify certificate), filed August 30, 1978. Petitioner: BOWMAN, TRANSPORTATION, INC., P.O. Box 17744, Atlanta, GA 30316. Representative: Maurice F. Bishop, 601-09 Frank Nelson Building, Birmingham, AL 35203. Petitioner holds a motor *common carrier* certificate in MC 94210 Sub-135, issued June 2, 1977, authorizing transportation, over regular routes, of *General commodities*, (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between various points in GA, SC, FL, AL, and TN, generally, with the following restrictions: (1) Between points in AL (and points within their commercial zones) on and south of U.S. Hwy 80 and points in Lee and Chambers Counties, AL, on the one hand, and, on the other, points in GA (and points within their commercial zones) on and south of U.S. Hwy 80 and points in FL, (2) Between points in GA (and points in their commercial zones) on and south of U.S. Hwy 80, on the one hand, and, on the other, points in AL (and points in their commercial zones) on and south of U.S. Hwy 80, points in Lee and Chambers Counties, AL, and points in FL, (3) Between points in FL on and north of a line beginning at Melbourne, FL, extending over U.S. Hwy 192 to its junction with U.S Hwys 17 and 92, then over U.S. Hwys 17 and 92 to their junction with U.S. Hwy 41, then over U.S. Hwy 41 to Piney Point, FL, and points in FL east of Jefferson County, FL, on the one hand, and, on the other, points in SC, NC and the following points in VA: Chesapeake, Suffolk, Portsmouth, Virginia Beach, Norfolk, Newport News and Hampton, VA, and points within their respective commercial zones, (4) Between Memphis, TN, and Nashville, TN, and points within their respective commercial zones, on the one hand, and, on the other, Florence, AL, and points within 10 miles of Florence, AL, (5) To or from all intermediate and off-route points in the State of MS, (6) Between points in the State of FL, between points in the State of AL; and between points in the State of TN; (7) Between points in AL outside the 65-mile radius of Birmingham, AL, on the one hand, and, on the other, points in FL north of FL Hwy 44, (excepted from this restiction are points authorized to be served by Bowman in its Sub-Nos. 59 authority; and (8) restricted against the tacking or joining the authority granted in this proceeding with carrier's present authority, so as to perform service between Memphis, TN, and points in its commercial zone, on the one hand, and, on the other, Chicago, IL, and points in its commercial zone. By the instant petition, petitioner seeks to modify or eliminate the restrictions as follows: (1) To eliminate "and points in Lee and Chambers Counties, AL" in Restriction (1) which would enable Bowman to transport the authorized commodities. Between points in Lee and Chambers Counties, AL, on the one hand, and, on the other points in GA (and points within their commercial zones) on and south of U.S. Hwy 80 and points in FL without having to traverse the 5 points (Cedartown, Lindale, Mt. Berry, Rome and Summerville) or Atlanta gateway. (2) To eliminate the words "points in Lee and Chambers Counties, AL" in paragraph (2) of the Restrictions which would enable Bowman to transport the involved commodities. Between points in GA (and points within their commercial zones) on and south of U.S. Hwy 80, on the one hand, and, on the other, points in Lee and Chambers Counties, AL, without having to traverse the Atlanta or 5 points (Cedartown, Lindale, Mount Berry, Rome and Summerville) GA gateways. (3) To eliminate Restriction (3) in the Sub-135 certificate which restricts same against the movement of traffic: Between points in FL on and North of a line beginning at Melbourne, FL extending over U.S. Hwy 192 to its junction with U.S. Hwys 17 and 92, then over U.S. Hwys 17 and 92 to their junction with U.S. Hwy 41, then over U.S. Hwy 41 to Piney Point, FL, and points in FL east of Jefferson Co., Fl, on the one hand, and, on the other, points in SC, NC and the following points in VA: Chesapeake, Suffolk, Portsmouth, Virginia Beach, Norfolk, Newport News and Hampton, VA, and points within their respective commercial zones. Elimination of this restriction would enable Bowman to transport the involved traffic moving between points in Fl on and North of a line beginning at Melbourne, FL extending over U.S. Hwy 192 to its junction with U.S. Hwys 17 and 92, then over U.S. Hwys 17 and 92 to their junction with U.S. Hwy 41, then over U.S. Hwy 41 to Piney Point, FL, and points in FL east of Jefferson Co., FL, on the one hand, and, on the other, points in SC, NC and the following points in VA: Chesapeake, Suffolk, Portsmouth, Virginia Beach, Norfolk, Newport News and Hampton, VA, and points within their respective commercial zones. Direct without operating through the gateways of Atlanta or the 5 GA points (Cedartown, Lindale, Mount Berry, Rome or Summerville).

MC 133095 (Sub-152) (M1F) (notice of filing of petition to modify certificate), filed August 10, 1978. Petitioner: TEXAS CONTINENTAL EXPRESS, INC., P.O. Box 434, Euless, TX 76039. Representative: Kim G. Meyer, Suite 1200, Atlanta Gas Light Tower, 235 Peachtree Street NE., Atlanta, GA 30303. Petitioner holds a motor *common carrier* certificate in MC 133095 Sub-152, issued March 28, 1978 authorizing transportation over irregular routes, of: *Hair care toiletries and equipment*, from the facilities of Clairol, Inc., at or near Camarillo, CA, to Dallas, TX, Chicago, IL, Atlanta, GA, and Stamford, CT. Restriction: The authority granted herein is restricted to the transportation of shipments originating at the named origin and destined to the named destination points. By the instant petition, petitioner seeks to modify the above authority by Los Angeles, CA, as an additional origin point.

MC 133095 (Sub-159) (M1F) (notice of filing of petition to modify certificate), filed August 10, 1978. Petitioner: TEXAS CONTINENTAL EXPRESS, INC., P.O. Box 434, Euless, TX 76039. Representative: Kim G. Meyer, Suite 1200, Atlanta Gas Light Tower, 235 Peachtree Street NE., Atlanta, GA 30303. Petitioner holds a motor *common carrier* certificate in MC 133095 (Sub-159) issued March 26, 1978 authorizing transportation over irregular routes, of: (1) *Hair care toiletries and equipment*, from Camarillo, CA, to Portland, OR, and (2) *Materials, supplies, and ingredients* used in the packaging, manufacture, and distribution of toiletries and toiletry equipment (except in bulk), in vehicles equipped with mechanical refrigeration, from Stamford, CT, to Camarillo, CA. Restriction: The authority granted herein is restricted to the transportation of shipments originating at and destined to the facilities utilized by Clairol, Inc. By the instant petition, petitioner seeks to modify the above authority by adding Los Angeles, CA, as an origin in (1) and as a destination in (2) above.

MC 133119 (Sub-30) (M1F) (notice of filing of petition for modification of certificate) filed August 2, 1978. Petitioner: HEYL TRUCK LINES INC., P.O. Box 206, Akron, IA 51001. Representative: A. J. Swanson, P.O.Box 81849, Lincoln, NE 68501. Petitioner holds motor *common carrier* authority in MC 133119 (Sub-30), authorizing transportation over irregular routes of: Bananas and agricultural commodities, the transportation of which is exempt from economic regulation under section 203(b)(6) of the Interstate Commerce Act, when transported in mixed shipments with bananas, from the facilities of the Del Monte Banana Co., at Charleston, S.C., to points in WI, MN, and ND. By the instant petition, petitioner seeks to delete the phrase, "the facilities of the Del Monte Banana Co. at".

MC 134599 (Subs-110 and 119) (M1F) (notice of filing of petition to modify permits), filed August 16, 1978. Petitioner: INTERSTATE CONTRACT CARRIER CORP., P.O. Box 30303, Salt Lake City, UT 84125. Representative: Richard Peterson, P.O. Box 81849, Lincoln, NE 68501. Petitioner holds motor *contract carrier* permits in MC 134599 (Subs- 110 and 119) issued January 29, 1976, and April 12, 1976, respectively. MC 134599 (Sub-110) authorizes transportation, over irregular routes, of: *Crated office furniture, parts* of office furniture and *advertising, sales, and promotional materials* for office furniture, from the facilities of Steelcase, Inc., at Grand Rapids, MI, to points in VA. MO (except St. Louis, MO, and points in its commercial zone as defined by the Commission), AR, LA, KS, OK, TX, CO, and NM, under a continuing contract with Steelcase, Inc., of Grand Rapids, MI. MC 134599 (Sub-119) authorizes transportation, over irregular routes, of: (1) *Crated office furniture and parts* of office furniture (except in bulk or those which because of size or weight require the use of special equipment), from the facilities of Steelcase, Inc., in Grand Rapids, MI, to points in MT, WY, NC, SD, NE (except Omaha), IA (except Des Moines), ME, NH, VT, and WV; and (2) *equipment, materials and supplies* used in the manufacture of office equipment (except in bulk or, which because of size or weight, require special handling and special equipment), from points in MT, WY, ND, SD, NE (except Omaha), IA (except Des Moines), ME, NH, VT, and WV to the facilities of Steelcase, Inc., in Grand Rapids, MI, under a continuing contract(s) in (1) and (2) above with Steelcase, Inc. By the instant petition, petitioner seeks to modify the above authority by (1) removing the restriction (except St. Louis, MO, and points in its commercial zone) in Sub-110; and (2) removing the restrictions (except Omaha) and (except Des Moines) in its Sub-119 authority.

MC 135009 (Sub-2) (M1F) (notice of filing of petition to modify permit), filed August 22, 1978. Petitioner: PEAK TRANSFER CO., INC., 57 Hathaway Street, Wallington, NJ 07055. Representative: Ronald I. Shapss, 450 Seventh Avenue, New York, NY 10001. Petitioner holds a motor *contract carrier* permit in MC 135009 (Sub-2) issued December 30, 1977, authorizing transportation, over irregular routes, of *books, printed matter, and such commodities* as are used in the manufacture, sale, and distribution of books (except commodities in bulk, in tank vehicles), (1) Between Clifton, NJ, on the one hand, and, on the other, points in AL, AR, CA, CT, FL, GA, IL, IN, MA, MS, MO, NJ, NY, NC, OH, OR, PA, SC, TN, TX, UT, VT, WV, and WI; and (2) Between Elk Grove Village, IL, on the one hand, and, on the other, points in AL, AR, CA, CT, FL, GA, IL, MA, MS, MO, NJ, NY, NC, OR, PA (except points in Beaver, Indiana, and Westmoreland Counties, PA), SC, TN, TX, UT, VT, WV, and WI. Restriction: The service authorized herein shall be limited to a transportation service to be performed under a continuing contract, or contracts, with Holt, Rinehart & Winston. By the instant petition, petitioner seeks to modify the above be adding Bellmawr, NJ, as a base point in (1) of the territorial description.

MC 135828 (M1F) (notice of filing of petition to modify certificate), filed August 31, 1978. Petitioner: PEACE BRIDGE BROKERAGE LTD., 33 Walnut St., Fort Erie, ON, Canada. Representative: H. A. Simons, (same address as petitioner). Petitioner holds a motor *common carrier*, certificate in MC 135828 issued April 10, 1975, authorizing transportation, over irregular routes, of *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment) in express service, between points in Erie, Genesee, and Niagara Counties, NY, on the one hand, and, on the other, Buffalo, Lewiston, and Niagara Falls, NY. Restriction: The service authorized herein is subject to the following conditions: The operations authorized herein are restricted to the transportation of shipments originating at or destined to points in Canada, and (2) The operations authorized herein are restricted to the transportation of packages or articles weighing in the aggregate less than 300 pounds per shipment from any one consignor to any one consignee on any one day. By the instant petition, petitioner seeks to modify the weight limitation in the above restriction to 1,000 pounds in lieu of 300 pounds per shipment.

MC 143061 (M1F) (notice of filing of petition to modify permit), filed August 30, 1978. Petitioner: ELECTRIC TRANSPORT, INC., P.O. Box 338, Eden, NC 27288. Representative: K. Edward Wolcott, Suite 1200, Atlanta Gas Light Tower, 235 Peachtree Street NE., Atlanta, GA 30303. Petitioner holds a motor *contract carrier* permit in MC 143061 issued April 12, 1978 authorizing transportation, over irregular routes, of (1) *Electrical equipment, devices, and products*, (2) *parts* of the commodities in (1), and (3) *commodities* used by and dealt in by manufacturers of the commodities in (1) (except any commodities in bulk, commodities which because of size or weight require special equipment, and aerospace craft and aerospace craft parts); (a) between Somersworth, NH, Pittsfield, MA, and Rotterdam, NY, and (b) between the facilities of General Electric Co., at or near Somersworth, NH, Pittsfield, MA, Rotterdam, NY, Salisbury, Hickory, and East Flat Rock, NC, on the one hand, and, on the other, points in the United States on and west of the eastern State boundary line of WI, IA, MO, AR, and LA (except AK and HI); and points in the Upper Peninsula of MI, under a continuing contract with General Electric Co. By the instant petition, petitioner seeks to modify the above authority by adding Schenectady, NY, as an additional service point in (a) and as a base point in (b) of the territorial description.

Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register. An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this Federal Register notice. Such pleading shall comply with Spe-

0 C 1 2 7 8

V 4 3 / 1 9 8

cial Rule 247(e) of the Commission's general rules of practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the previse manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier, if no representative is named.

MC 114211 (Sub-329) (Republication), filed November 7, 1977, published in the FEDERAL REGISTER issue of December 30, 1977, and republished this issue. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, 324 Manhard St., Waterloo, IA 50704. Representative: Daniel Sullivan, Suite 1600, 105 South LaSalle, Chicago, IL 60604. A decision of the Commission, Review Board No. 3, decided July 31, 1978, and served August 18, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *used irrigation systems and accessories* for use with used irrigation systems, between points in the United States (except AK and HI), that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to delete the restriction.

MC 115331 (Sub-441) (republished), filed December 5, 1977, published in the FEDERAL REGISTER issue of February 2, 1978, and republished this issue. Applicant: TRUCK TRANSPORT, INC., 29 Clayton Hills Lane, St. Louis, MO 63131. Representative: J. R. Ferris, 230 St. Clair Avenue, East St. Louis, IL 62201. A decision of the Commission, Review Board No. 3, decided August 14, 1978, and served September 1, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: (1) *Pebble lime Springfield, MO, to Hawesville, KY; and (2) fly ash*, in bulk, from in bulk, from point in Pike County, IN, to points in IL, KY, MO, AR, and TN, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity description and indicate Hawesville, KY, in lieu of Wickliffe, KY, as an origin points in part (1) above.

MC 119641 (Sub-149F) (Republication), filed February 9, 1978, published in the FEDERAL REGISTER issue of March 23, 1978, and republished this issue. Applicant: RINGLE EXPRESS, INC., 450 East Ninth Street, Fowler, IN 47944. Representative: Alkie E. Scopelitis, 815 Merchants Bank Bldg., Indianapolis, IN 46404. A decision of the Commission, Review Board No. 3, decided August 21, 1978, and served September 11, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *plywood, particle board, hardboard, gypsum board, moulding, and plastic articles*, from the facilities of Weyerhaeuser Co., at Chesapeake, VA, to points in IL, IN, IA, KS, KY, MI, MN, MO, NE, ND, OH, SD, WV, and WI, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the addition of KY as a destination State.

MC 138882 (Sub-35) (Republication), filed January 10, 1978, published in the FEDERAL REGISTER issue of February 24, 1978, and republished this issue. Applicant: WILEY SANDERS, INC., P.O. Box 707, Troy, AL 36081. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. A decision of the Commission, Review Board No. 2, decided August 14, 1978, and served September 21, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicles, over irregular routes, in the transportation of *veneer and plywood*, from the facilities of Capitol Veneer Works, Inc., at or near Montgomery, AL, to points in NY, VT, MD, VA, NC, SC, GA, FL, TN, KY, OH, MS, AZ, UT, CO, CA, AR, IN, IL, MO, IA, TX, CT, ME, MA, RI, and NH, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity description, and add TX, CT, ME, MA, RI, and NH as destination points.

MC 140051 (Sub-4) (Republication), filed January 12, 1978, published in the FEDERAL REGISTER issue of March 16, 1978, and republished this issue. Applicant: DANIEL C. NEACE, d.b.a., LANCER ENTERPRISES, 3131 Crest Road, Cincinnati, OH 45247. Representative: Timothy T. Slater, 6343 Birchdale Court, Cincinnati, OH 45230. A decision of the Commission, Review Board No. 1, decided September 14, 1978, and served September 20, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of (1) *Carpet, linoleum, and tile;* and (2) *materials and supplies* used in the installation of the commodities in (1) above, from the facilities of Carson, Pirie, Scott & Co., at Cincinnati, OH, to points in Allen, Huntington, Wells, Adams, Grant, Blackford, Jay, Tipton, Madison, Delaware, Randolph, Marion, Hancock, Henry, Wayne, Johnson, Shelby, Rush, Fayette, Union, Brown, Bartholomew, Decatur, Franklin, Jackson, Jennings, Ripley, Dearborn, Ohio, Switzerland, Jefferson, Scott, Washington, Clark, Floyd, and Harrison Counties, IN, under a continuing contract or contracts with Carson, Pirie, Scott & Co., of Cincinnati, OH, will be consistent with the public interest and the national transportation policy, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the applicant's actual grant of authority.

MC 141124 (Sub-15F) (Republication), filed February 8, 1978, published in the FEDERAL REGISTER issue of March 16, 1978, and republished this issue. Applicant: EVANGELIST COMMERCIAL CORP., P.O. Box 1709, Wilmington, DE 19899. Representative: James W. Muldoon, 50 West Broad Street, Columbus, OH 43215. A decision of the Commission, Review Board No. 2, decided August 30, 1978, and served September 15, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of (1) *Paper and paper products*, from the facilities of Champion International Corp., at or near Canton, Waynesville, Asheville, and Fletcher, NC, to points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT; and (2) *equipment, materials, and supplies* used in the manufacture of paper and paper products (except commodities in bulk), from points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, to the facilities of Champion International Corp., at or near Canton, Waynesville, Asheville, and Fletcher, NC, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the applicant's actual grant of authority.

0 C 1 2 7 8

form to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate CT in lieu of CO, as a destination State.

FINANCE APPLICATIONS

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and one copy of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

MC-F-13458. (amendment) (HOLLAND MOTOR EXPRESS, INC.—Purchase (portion)—NAVAJO FREIGHT LINES, INC.), published in the December 30, 1977 issue of the FEDERAL REGISTER. Applicants have requested by letter dated August 7, 1978, that the Commission permit the amending of their application. In a decision served September 18, 1978, applicants were permitted to amend their application to include the following authority that was inadvertently omitted: *General commodities*, with exceptions, as a *common carrier* over regular routes between the junction of U.S. Hwy 27 and MI Hwy 60 and Jackson, MI, over MI Hwy 60, serving no intermediate points.

MC-F-13694F (correction) (COOPER MOTOR LINES—Purchase (portion)—CRESCENT MOTOR LINES), published in the September 13, 1978, issue of the FEDERAL REGISTER, on page 40991. Previous notice inadvertently published the notice as Docket No. MC-F-3694. The correct number is No. MC-F-13694F.

MC-F-13724F. Authority sought for purchase by DUDLEY TRUCKING, INC., P.O. Box 1651, Tacoma, WA 98402, of a portion of the operating rights and property of Dudley Boat & Trailer Transportation, Inc., 13315 8th Street East, Sumner, WA, 98390, and for acquisition by Terry L. Rucker and Chris M. Rucker, both of 1819 Olympic Street, P.O. Box 1651, Tacoma, WA 98402, of control of such rights through the transaction. Applicants' representative: Michael B. Crutcher, 2000 IBM Building, Seattle, WA, 98101. Operating rights sought to be transferred: *Iron and steel articles and pipe*, as a *common carrier* over irregular routes, between points in OR and WA. Dudley Trucking, Inc., holds no authority from this Commission. However, Dudley Trucking, Inc., is controlled by Terry L. Rucker and Chris M. Rucker. Terry L. Rucker and Chris M. Rucker are affiliated with Rucker Bros. Trucking Inc., who has authority to operate as a common carrier in the States of WA and OR. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-13726F. (correction) (LEE WAY MOTOR FREIGHT, INC.—Purchase (portion)—O.K. MOTOR SERVICE, INC.), published in the September 13, 1978, issue of the FEDERAL REGISTER, on page 40992. Previous notice should have read as follows: *General commodities*, with exceptions, as a *common carrier* over regular routes between * * *.

No. MC-F-13740F. Authority sought for purchase by FAST FREIGHT SYSTEMS, INC., 118 North Congress Street, Jackson, MS 39205, of a portion of the operating rights of DIRECT TRANSIT LINES, INC., 200 Colrain Street SW., P.O. Box 8099, Grand Rapids, MI 49508, of control of such rights through the transaction. Applicants' representative: Martin J. Leavitt, 22375 Haggerty Road, P.O. Box 400, Northville, MI 48167. Operating rights sought to be transferred: (I) MC-106603 (Sub-142) (portion), (a) *Iron and steel articles*, as a *common carrier* over irregular routes, from the plantsite and storage facilities of North Star Steel Co. located at or near Wilton, IA, to points in AL, MS, and TN, and (b) *Materials, equipment and supplies*, used in the manufacture and distribution of iron and steel articles, from points in the States named in part (a) above, to plantsite and storage facilities of North Star Steel Co., located at or near Wilton, IA. Restriction: The authority in (a) and (b) above is restricted to the transportation of traffic originating at and destined to the named origins and destinations; the authority in (b) is further restricted against transportation of commodities in bulk. (II) MC-46240 (Sub-16), *brass, bronze, copper, and aluminum products and equipment materials, and supplies* used in the manufacture of such products (except commodities in bulk), as a *common carrier* over irregular routes between Fulton, MS, on the one hand, and, on the other, points in the United States (except AK and HI). (III) MC-46240 (Sub-17) (portion), *copper, brass, bronze, and aluminum articles*, as a *common carrier* over irregular routes from Hartsville, TN, to points in OH, IN, IL, WI, PA, KY, WV, MO, IA, NY, NJ, AL, AR, CT, DE, FL, GA, LA, MA, MN, and MS, with no transportation on return except as otherwise authorized. Vendee is authorized to operate a *common carrier* in MI, WI, IA, IL, IN, OH, PA, WV, KY, and MO. Application has been filed for temporary authority under section 210a(b).

MC-F-13744E. Authority sought for purchase by WEST COAST TRUCK LINES, INC., 85647 Hwy 99 South, Eugene, OR 97405, of a portion of the operating rights of Southwest Truck Service, P.O. Box AD, Watsonville, CA 95076, and for acquisition by Edward P. Barton, and M. Dean Barton, 85647 Hwy 99 South, Eugene, OR 97405, of control of such rights through the transaction. Applicants' representative: Jerry R. Woods, Suite 1440, 200 Market Building, Portland, OR 97201. Operating rights sought to be transferred: Permit No. MC-128246 (Sub-15) issued March 31, 1978, (1) *Foodstuffs, not frozen and in containers*, and (2) *plastic and paper food service items prepackaged for individual use*, from Manteca, Spreckels, and Woodland, CA, to points in OR and WA; and (3) returned shipments of the commodities described in (1) and (2) above, from points in OR and WA to Manteca, Spreckels, and Woodland, CA, restricted to a transportation service to be performed, under continuing contract or contracts, with Spreckels Sugar Division of Amstar Corp. Vendee is authorized to operate as a *common carrier* under certificate MC-112989, in the States of OR, WA, CA, ID, UT, MT, NV, NM, AZ, CO, KS, OK, ND, SD, TX, and WY. Application has not been filed for temporary authority under section 210a(b).

MC-F-13753F. Authority sought for the transfer to PALMER TRANSPORTATION, INC., Main and Cross Streets, Chester, NY 10918, of the operating rights of L. P. TRANSPORTATION, INC., Main and Cross Streets, Chester, NY 10918. Applicants' representatives: John L. Alfano and Roy A. Jacobs, 550 Mamaroneck Avenue, Harrison, NY 10528. Operating rights sought to be transferred: *common carrier*, over irregular routes, transporting, in bulk, in tank vehicles, *liquefied petroleum gas*, from Providence, RI, Everett, MA, and Newington, NH, to points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT; *liquefied petroleum gases*, between points in NY, NJ, and PA within 150 miles of Chester, NY; *liquefied propane gas*, from Newark, NJ, to points in ME, NH, VT, MA, CT, RI, NY, NJ, PA, MD, DE, and DC; *liquefied petroleum gas*, from various pipeline outlets in PA and NY and Bath, Harford Mills, and Hudson Falls, NY, to points in CT, MA, NH, NJ, NY, PA, RI, VT, DE, MD, OH, VA, WV, and DC; *liquefied petroleum gases*, from Lyndonville, VT, to

V 43 / 198 0 C 12 78

Auburn and Brewer, ME, North Dartmouth, Sandwich, Somerville, South Deerfield, Taunton, and Topsfield, MA, and Gonic, Lakeport, Londenderry, and Wolfeboro, NH; *cement*, from Alsen, NY, to points in ME, NH, VT, CT, MA, RI, PA, and NJ; and *liquefied natural gas*, between points in CT, DE, MD, ME, MA, NH, NJ, NY, PA, RI, TN, VT, VA, and DC. Transferee is now authorized to operate as a *common carrier* of various syrups and blends, in bulk, in the States of CT, DE, ME, MD, MA, MI, NH, NJ, NY, OH, PA, VT, VA, RI, WV, and DC. (1) Common control by Andrew L. Palmer of the operating rights sought to be consolidated has been approved in Docket MC-F-8905; (2) No temporary authority is sought; (3) (Hearing site: New York, NY, or White Plains, NY).

MC-F-13755F. Authority sought for control by TRANSPORTATION CONSULTANTS, INC., P.O. Box 487, 5950 Fisher Road, East Syracuse, NY 13057, of operating authority of J. R. BUTLER, INC., P.O. Box 155, 1031 Reeves Street, Dunmore, PA 18512, through acquisition of the stock of J. R. BUTLER, INC. and control of such rights by Frederic J. Durkin and John C. Durkin, Jr., through the acquisition. Applicant's representatives: Martin Werner, Esq. and Michael R. Werner, Esq., P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006. Motor *contract carrier* operating rights sought to be controlled: Under MC-145298 (pending). Irregular routes, *Such commodities as are dealt in by mail order houses and retail chain department stores, and equipment, materials and supplies used in the conduct of such business (except commodities in bulk)*, between points in MD, NY, NJ, DE, and PA, under continuing contract(s) with Hess, Inc. of Allentown, PA. Transportation Consultants, Inc. holds no authority from this Commission. However, it is in control of the following contract carriers: Food Haul, Inc. is authorized to operate as a contract carrier in AK, FL, GA, IL, IN, KY, MD, MI, MO, NC, OH, PA, SC, TN, TX, VA, and WV; J. C. D. Transportation Corp. is authorized to operate as a contract carrier in CT, MA, NY, and PA; Fleetwood Transportation Corp. is authorized to operate as a contract carrier in PA, NY, NJ, MD, DE, DC, VA, WV, CT, MA, RI, MI, OH, KY, and IN; Fairfield Transportation Corp. is authorized to operate as a contract carrier in NY, CT, MA, NJ, and PA; Barr Transportation Corp. is authorized to operate as a contract carrier in MA, CT, NH, MD, PA, NY, RI, VT, NJ, DE, OH, WV, and DC. Application has not been filed for temporary authority under section 210a(b).

MC-F-13756F. Authority sought for purchase by SILVEY REFRIGERATED CARRIERS, INC., 7000 West Center Road, Suite 325, Omaha, NE 68106, of a portion of the operating rights of RICHARD A. CRAWFORD, d.b.a. R. A. CRAWFORD TRUCKING SERVICE, P.O. Box 722, Adelphia, MD, 20783, and for acquisition by L. R. CIMINO, 680 North 57th Street, Omaha, NE 68132, of control of such rights through the transaction. Applicants' representative: Robert M. Cimino, Suite 325, 7000 West Center Road, Omaha, NE 68106. Operating rights sought to be transferred: (1) *Foodstuffs used in the preparation and serving of foods in restaurants and commissaries*, between DC on the one hand, and, on the other, points in MD, PA, DE, NJ, NY, VA, WV, NC, SC, GA, FL, OH, IN, MI, IL, WI, MN, IA, NE, MO, KS, LA, TX, TN, AL, MS, AR, and OK, restricted to operations to be performed under a continuing contract, or contracts, with Fairfield Farm Kitchens, Washington, DC; (2) *Foodstuffs, and equipment and supplies used in the preparation and serving of food*, between DC, on the one hand, and, on the other, points in CT, KY, ME, MA, NH, RI, and VT, restricted to operations to be performed under a continuing contract, or contracts, with Fairfield Farm Kitchens, Washington, DC; (3) *Food products, related advertising materials, and equipment and supplies used in the preparation and serving of foods in restaurants or commissaries*, between DC, on the one hand, and, on the other, points in MD, PA, DE, NJ, NY, VA, WV, NC, SC, GA, FL, OH, IN, MI, IL, WI, MN, IA, NE, MO, KS, LA, TX, TN, AL, MS, AR, and OK, restricted to operations performed under a continuing contract, or contracts, with Fairfield Farm Kitchens, Division of the Marriott Corp., Washington, DC. Vendee is authorized to operate as a common carrier in the States of NE, IA, CT, DE, ME, MD, MA, NH, NJ, NY, NC, PA, RI, VT, VA, WV, and DC, and as a contract carrier in AL, AR, CT, DE, GA, IL, IN, KY, LA, MD, MA, MI, MS, MO, NJ, NY, NC, PA, RI, SC, TN, VA, WV, OH, WI, and NE. Application has been filed for temporary authority under section 210a(b).

MC-F-13757F. Authority sought for purchase by LOUIS J. KENNEDY TRUCKING CO., 342 Schuyler Avenue, Kearny, NJ 07032, of a portion of the operating rights of CALHOUN TRUCKING CORP., 319 Jacet Road, Kearny, NJ 07032, and for acquisition by Louis J. Kennedy, also of Kearny, NJ, of control of the right through the purchase. Applicant's attorney: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Operating rights sought to be purchased: *Wire mesh, over irregular routes*, from Kearny, NJ, to points in MA, RI, CT, NY, PA, DE, and MD, with no transportation for compensation on return except as otherwise authorized. From Baltimore, MD, to points in OH, RI, MA, NH, VT, ME, IN, MI, PA, NY, NJ, CT, VA, NC, WV, DE, MD, and KY, and DC, with no transportation for compensation on return except as otherwise authorized. From Atlanta, GA, to points in TN, AL, VA, GA, MD, KY, SC, and NC, and DC, with no transportation for compensation on return except as otherwise authorized. From Tampa, FL, to points in FL and GA, with no transportion for compensation on return except as otherwise authorized. *Wire*, from Jacksonville, FL, and Atlanta, GA, to Baltimore, MD, Atlanta and Savannah, GA, Tampa, FL, and Kearny, NJ, with no transportation for compensation on return except as otherwise authorized, under a continuing contract, or contracts, with National Wire Products Corp., of Baltimore, MD. Vendee is authorized to operate as a contract carrier of general and specified commodities over irregular routes in AL, AR, CT, DE, DC, FL, GA, IL, IN, IA, KY, LA, ME, MD, MA, MI, MN, MS, MO, NH, NJ, NY, OH, PA, RI, SC, TN, VT, VA, WV, and WI. Approval of the transaction will not result in (a) dual operation: (b) splitting of operating authority; or (c) duplicating authority. Application has been filed for temporary authority under section 210a(b).

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

1

[M-168, Amdt. 4; Oct. 4, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from the October 5, 1978, Agenda.

TIME AND DATE: 10 a.m., October 5, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Item 10. Dockets 31129 and 32910, Commuter Airlines' exemptions to operate large aircraft (Memo 8152-A, BPDA, OGC, BCP).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The Chairman has requested that item 10 be deleted from the October 5, 1978, agenda in order for the staff to do additional work. Accordingly, the following Members have voted that agency business requires the deletion of item 10 and that no earlier announcement of this deletion was possible.

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

All amendments to previously announced agendas are publicly posted at the Board's offices, sent to the Federal Register for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

2

[M-168, Amdt. 5; Oct. 5, 1978]

CIVIL AERONAUTICS BOARD.

Notice of change of time and deletion of items from the October 5, 1978, agenda.

TIME AND DATE: 11 a.m., October 5, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

6a. Dockets 28366 and 32710, *Denver-Alaska Service Investigation, San Francisco-Reno-Albuquerque-Texas Service Investigation*—Orders on Reconsideration (Memo 8193, OGC).

13. Increased fares proposed by American. The carrier proposes to increase most fares in its U.S.-Caribbean/Bermuda markets 5 percent (Memo 8216, BPDA, DIA).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Item 6a was deleted from the October 5, 1978, agenda in order to provide additional time for the staff to complete their work. Item 13 was not circulated to the Office of General Counsel prior to its circulation and calendaring. Upon OGC review it was concluded that further staff consultation is desirable before the Board acts on this matter. Accordingly, the following Members voted that agency business requires the deletion of items 6a and 13 and that no earlier announcement of these changes was possible:

Acting Chairman, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

All amendments to previously announced agendas are publicly posted at the Board's offices, sent to the FEDERAL REGISTER for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

CHANGE IN SUBJECT MATTER OF AGENCY MEETING

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 3 p.m. on October 5, 1978, the Corporation's Board of Directors voted, on motion of Acting Chairman John G. Heimann, seconded by Director William M. Isaac (Appointive), to withdraw the following item from consideration.

Memorandum and resolution proposing the final adoption of amendments to part 335 of the Corporation's rules and regulations, entitled "Securities of Insured State Nonmember Banks," in order to bring that part into substantial similarity with comparable regulations of the Securities and Exchange Commission.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

6

FEDERAL MARITIME COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 46417, October 6, 1978.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., October 12, 1978.

CHANGES IN THE MEETING: Addition of the following item to the closed session:

2. Enforcement claim against certain carriers.

[S-2060-78 10-10-78; 3:23 pm]

[6735-01-M]

7

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION.

TIME AND DATE: 10 a.m., October 17, 1978.

PLACE: Room 600, 1730 K Street NW., Washington, D.C. 20006.

STATUS: This meeting will be open.

MATTERS TO BE CONSIDERED: The following cases will be considered and acted upon by the Commission. Motions for the withdrawal of pending appeals have been filed in these cases.

1. Docket No. IBMA 76-31, Eastern Associated Coal Corp.
2. Docket No. IBMA 76-62, Eastern Associated Coal Corp.
3. Docket No. IBMA 76-74, Eastern Associated Coal Corp.
4. Docket No. IBMA 76-75, Affinity Mining Co.
5. Docket No. IBMA 76-76, Sterling Smokeless Coal Co.
6. Docket No. IBMA 76-89, Eastern Associated Coal Corp.
7. Docket No. IBMA 76-100, Eastern Associated Coal Corp.
8. Docket No. IBMA 76-112, Affinity Mining Co. and Eastern Associated Coal Corp.
9. Docket No. IBMA 76-115, Eastern Associated Coal Corp.

The following case will be considered and acted upon by the Commission. The sole issue concerns the timeliness of filing of the petition for discretionary review.

10. Docket Nos. PITT 78-343 and PITT 78-344, Iselin Preparation Co.

The following proceedings will be considered and acted upon by the Commission:

11. Docket No. IBMA 76-57, Pittsburgh and Midway Coal Co.
12. Docket No. IBMA 77-66, Inland Steel Coal Co.
13. Docket No. IBMA 77-7, Christopher Coal Co.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Philip Paschall, 202-632-4770.

JEROME R. WALDIE,
Chairman, Federal Mine Safety and Health Review Commission.

8

FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Wednesday, October 18, 1978. The closed portion of the meeting will commence at the conclusion of the open discussion.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Part of the meeting will be open and part will be closed.

MATTERS TO BE CONSIDERED:

Open portion:

SUMMARY AGENDA

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board requests that an item be moved to the discussion agenda.

1. Request by First Oklahoma Bancorporation, Inc., Oklahoma City, Okla., for a 6-month extension of time in which to comply with divestiture requirements imposed by a Board order.
2. Proposal to eliminate Bank Holding Company Registration Statement forms F.R. Y-5 and F.R. Y-5(a).
3. Proposed amendments to the Board's Rules of Procedure concerning handling (a) comments on applications and (b) requests for reconsideration of Board actions on applications.
4. Proposed amendment to Interpretation § 226.904 of Regulation Z (Truth in Lending) concerning disclosure of the right of rescission in connection with open end credit plans.

DISCUSSION AGENDA

1. Proposed guidelines for enforcement of Regulation Z (Truth in Lending). (Proposed earlier for public comment; Docket No. R-0122.)
2. Proposed policy statement regarding outside professional activities of Board employees.
3. Any agenda items carried forward from a previously announced meeting.

NOTE.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

Closed portion:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Federal Reserve Bank senior officers salary procedures.
3. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

Dated: October 10, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S-2056-78 Filed 10-10-78; 12:59 pm]

[7590-01-M]

9

NUCLEAR REGULATORY COMMISSION.

TIME AND DATE: Week of October 9, 1978.

PLACE: Commissioner's Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and closed (changes).

MATTERS TO BE CONSIDERED:

V 43 / 198 OC 12 78

TUESDAY, OCTOBER 10; 3 P.M. (APPROXIMATE)

1. Discussion and vote on issues remaining for Commission consideration in the Midland Proceeding (approximately one-half hour, closed—exemption 10).

NOTE.—Replaces discussion of ALAB 399 and 487 which has been postponed.

FRIDAY, OCTOBER 13; 10:30 A.M.

1. Discussion of Risk Assessment Review Group Report (tentative, approximately 1 hour, public meeting).

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202-634-1410.

Dated: October 6, 1978.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION[1]

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Energy Efficiency Improvement Targets for Five Types of Appliances

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: This rule prescribes final energy efficiency improvement targets for water heaters, home heating equipment (not including furnaces), kitchen ranges and ovens, clothes washers, and furnaces. Energy efficiency improvement targets are one element of the consumer product efficiency program required by the Energy Policy and Conservation Act.

EFFECTIVE DATE: November 13, 1978.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Consumer Products Efficiency Branch), Department of Energy, 20 Masachusetts Avenue NW., Room 2248, Washington, D.C. 20545, 202-376-4815.

William J. Dennison (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 7148, Washington, D.C. 20461, 202-566-9750.

SUPPLEMENTARY INFORMATION:

I. Background

On October 1, 1977, the Department of Energy (DOE) assumed the authority of the Federal Energy Administration (FEA) for the energy conservation program for appliances, pursuant to section 301 of the Department of Energy Organization Act (DOE Act) (Pub. L. 95-91). The energy conservation program for appliances was established by FEA pursuant to title III, part B of the Energy Policy and Conservation Act (Act) (Pub. L. 94-163). Section 325 of the Act, as amended by section 161 of the Energy Conservation and Production Act (Pub. L. 94-385), requires that energy efficiency improvement targets be prescribed for certain types of covered appliances, specifically:

(1) Refrigerators and refrigerator-freezers.
(2) Freezers.
(3) Dishwashers.
(4) Clothes dryers.
(5) Water heaters.
(6) Room air-conditioners.
(7) Home heating equipment, not including furnaces.
(8) Television sets.
(9) Kitchen ranges and ovens.
(10) Clothes washers.
(11) Humidifiers and dehumidifiers.
(12) Central air-conditioners.
(13) Furnaces.

DOE hereby amends title 10, chapter II, Part 430, Code of Federal Regulations, to prescribe energy efficiency improvement targets for water heaters, home heating equipment (not including furnaces), kitchen ranges and ovens, clothes washers, and furnaces. A target for furnaces was proposed by FEA on September 23, 1977 (42 FR 52426, September 30, 1977), and a public hearing was held on November 8, 1977. Targets for the other four product types covered by today's rulemaking were proposed by FEA on July 8, 1977 (42 FR 36648, July 15, 1977), and public hearings were held August 16-19, 1977. Final efficiency targets for all other product types listed above were previously issued on April 5, 1978 (43 FR 15138, April 11, 1978).

The targets for product types (1) through (10) above are required by section 325 to be designed so that, if met, the aggregate energy efficiency of all such products which are manufactured in 1980 will exceed the aggregate energy efficiency of all such products manufactured in 1972 by the maximum percentage improvement which DOE determines to be economically and technologically feasible, but which in any case is not less than 20 percent. Targets for products (11) through (13) are required to be designed so as to achieve the maximum improvement in energy efficiency determined by DOE to be technologically and economically feasible by 1980.

Analysis leading to the establishment of the targets was accomplished in three stages. First, potential energy efficiency improvement design options for each product type were identified and then analyzed to determine whether they were technologically feasible. The energy savings of individual design options were combined to provide a single target for each product. In the second stage, the economic feasibility of the energy efficiency targets calculated in the first stage was evaluated. In the third stage the individual product type targets for products (1) through (10) were combined to determine the aggregate energy efficiency improvement of those product types manufactured in 1980 as compared with the aggregate energy efficiency of those product types manufactured in 1972.

As described earlier, section 325 requires that the aggregate energy efficiency improvement for product types (1) through (10) be at least 20 percent above the 1972 base year efficiency. Four of the targets prescribed today fall within this category. These four targets, when combined with the other six pertinent targets prescribed on April 5, 1978, amount to a 26.4-percent energy efficiency improvement for product types (1) through (10), so that the 20-percent aggregate requirement of section 325 is met.

As envisioned by the Act, the appliance program is responsible for encouraging manufacturers to produce, and consumers to purchase, significantly more efficient appliances by 1980. The Act sets forth two interrelated strategies for accomplishing this objective.

The first is to establish voluntary efficiency improvement targets representing aggregate industry-wide levels of efficiency improvement to be achieved by 1980. As an incentive for the industry to reach these targets, a reporting and monitoring system will be established to track industry progress. In the event that achievement of any target appears unlikely, this system will require DOE to initiate an administrative proceeding to prescribe a mandatory minimum efficiency standard for the product in question.

The second strategy entails development of a labeling program to require that manufacturers label each product with energy information to allow consumer comparisons. The Federal Trade Commission, (FTC) is charged with responsibility for establishing labeling rules and administering the labeling program.

In conjunction with issuance of the labeling rules, a consumer education effort will enhance consumer awareness of the labels and create a better understanding of the information provided on the labels. This is intended to encourage comparison shopping and to enhance consumer demand for the more efficient products. As a consequence, it is anticipated that manufacturers will be influenced to expedite efficiency improvements for their various product lines to meet market demand.

In order to support these dual strategies, section 323 of the Act requires that DOE develop test procedures for each covered product for the determination of estimated annual energy costs and at least one other measure of energy consumption which will assist consumers in making purchasing decisions. The test procedures, when applied to individual manufacturers' product lines, will provide comparable data on a variety of energy characteristics of all products covered by a given test procedure. The FTC has proposed that manufacturers apply the test procedures to provide test-related data for FTC product labels and for representations regarding energy consumption. Test procedure design must be flexible enough to allow for technological variation among different product lines, yet standardized enough to assure that each manufacturer's product line will be subject to the same measurement criteria.

An outline of the provisions of subparts A, B, and C of part 430 which have so far been established, including the provisions in today's rulemaking, is as follows:

[1] Editorial Note: It is contemplated that ch. II will be renamed at a future date to reflect the fact that it contains regulations administered by the Department of Energy, including regulations of the appliance program and other regulations administered by the Office of Conservation and Solar Applications.

Subpart A—General Provisions

Sec.
430.1 Purpose and scope.
430.2 Definitions.

Subpart B—Test Procedures

430.21 Purpose and scope.
430.22 Test procedures for measures of energy consumption.
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
(e) Water heaters.
(f) Room air-conditioners.
(g) Unvented home heating equipment.
(h) Television sets.
(i) Kitchen ranges and ovens.
(j) Clothes washers.
(k) Humidifiers.
(l) Dehumidifiers.
(m) Central air-conditioners.
(n) Furnaces.
(o) Vented home heating equipment.
430.23 Units to be tested [Reserved].
430.24 Representations regarding measures of energy consumption.[2]
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
(e) Water heaters.
(f) Room air-conditioners.
(g) Unvented home heating equipment.
(h) Television sets.
(i) Kitchen ranges and ovens.
(j) Clothes washers.
(k) Humidifiers.
(l) Dehumidifiers.
(m) Central air-conditioners.
(n) Furnaces.
(o) Vented home heating equipment.

Appendix F—Uniform test method for measuring the energy consumption of room air-conditioners.
Appendix G—Uniform test method for measuring the energy consumption of unvented home heating equipment.
Appendix H—Uniform test method for measuring the energy consumption of television sets.
Appendix I—Uniform test method for measuring the energy consumption of conventional ranges, conventional cooking tops, conventional ovens, microwave ovens, and microwave/convention ranges.
Appendix J—Uniform test method for measuring the energy consumption of clothes washers.
Appendix K1—Uniform test method for measuring the energy consumption of central system humidifiers.
Appendix K2—Uniform test method for measuring the energy consumption of room humidifiers.
Appendix L—Uniform test method for measuring the energy consumption of dehumidifiers.
Appendix M—Uniform test method for measuring the energy consumption of central air-conditioners.
Appendix N—Uniform test method for measuring the energy consumption of furnaces.
Appendix O—Uniform test method for measuring the energy consumption of vented home heating equipment.

Subpart C—Energy Efficiency Improvement Targets

430.31 Purpose and scope.
430.32 Energy efficiency improvement targets.
(a) Refrigerators and refrigerator-freezers.
(b) Freezers.
(c) Dishwashers.
(d) Clothes dryers.
(e) Water heaters.
(f) Room air conditioners.
(g) Home heating equipment (not including furnaces).
(h) Television sets.
(i) Kitchen ranges and ovens.
(j) Clothes washers.
(k) Humidifiers.
(l) Dehumidifiers.
(m) Central air-conditioners.
(n) Furnaces.

II. Final Target Determinations and Discussion of Comments

After careful consideration of the oral and written comments received in response to the proposed targets, DOE is today prescribing the following targets (proposed targets which differed from the targets prescribed today are noted in parentheses):

[Figures in percent]

Water heaters	23	
Home heating equipment (not including furnaces)	11	(13)
Kitchen ranges and ovens	40	(64)
Clothes washers	35	(47)
Furnaces	20	(23)

Major comments received regarding these targets are summarized and discussed below. To avoid confusion in the discussion of comments, "DOE" is used throughout even though activities prior to October 1, 1977, regarding this rule were conducted by FEA. For a detailed explanation of the technological and economic methodologies used to arrive at the targets, refer to the FEDERAL REGISTERS of July 15, 1977 (42 FR 36648, July 15, 1977) for the first four product types listed above and September 30, 1977 (42 FR 52426, September 30, 1977) for furnaces. Revised economic and technical background papers as well as a microeconomic analysis for each product affected by today's action are available for inspection in the DOE Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

A. WATER HEATERS

DOE has determined that the proposed efficiency improvement target of 23 percent for water heaters is the maximum improvement which is technologically and economically feasible. Table 1 summarizes the final efficiency improvement target and associated energy factors.

1. *On/off switches for electric water heaters.* A comment suggested that DOE should include, in its list of design options for electric water heaters, a switch which would allow the user to turn the water heater on or off at will. Also suggested was a variation of this design option which would allow the on/off switch to be located away from the electric water heater.

NBS has investigated the energy saving potential of an on/off switch, often referred to as a "vacation switch," for water heaters. The results of that investigation show that such a switch provides no significant energy savings unless the water heater is turned off for an extended period, such as several days or more. Because such long "off" periods are not typical of national water heater usage patterns, DOE is presently unable to estimate the potential energy savings, if any, of this design option, or to draw any conclusions regarding its usefulness and feasibility.

[2] DOE is currently proposing to delete § 430.24 and to establish a new § 430.23, in order to prescribe statistical sampling provisions applicable to any testing required under the Act relating to representations respecting the energy consumption of, or cost of energy consumed by appliances and relating to the labeling of appliances (43 FR 40192, Sept. 8, 1978).

V 4 3 / 1 9 8

TABLE 1.—*Water Heater Energy Efficiency Improvement Target*

	1972 energy consumption × 10^{12} Btu	Energy savings (percent)	Energy efficiency improvement target (percent)	1972 energy factor (percent)	1980 energy factor (percent)
Water heaters	176.9	1.9	23		
Electric	49.6	15	18	80	94
Gas	125.6	20	25	44	55
Oil	1.7	17	20	46	55

2. *Oil water heater exemption from targets.* Comments from oil water heater manufacturers requested that oil water heaters be exempted from the target program on the ground that a target would result in the deterioration of the oil water heater industry. Comments cited the small-business nature of the oil water heater industry and expressed concern about the industry's ability to undertake the necessary investment to improve efficiency.

DOE is aware that many oil water heater manufacturers are small businesses which lack extensive research and development facilities and resources. DOE is also aware that some individual manufacturers may have limited access to the investment capital necessary for the implementation of the energy-saving design options. However, based on currently available information, DOE has determined that certain of the design improvements applicable to oil water heaters can be implemented by 1980, and that the oil water heater industry is able to undertake the investment necessary to implement these design changes.

3. *Improved heat transfer for oil water heaters.* Some comments stated that, in order to improve heat transfer for oil water heaters, combustion chambers and flue-ways would have to be redesigned, requiring extensive engineering and testing programs. These comments stated that the leadtime for the implementation of this design option would be at least 5 years, rather than the 1 year estimated by DOE.

In the case of oil water heaters, DOE analysis indicated that only center-flue type oil water heaters offered a potential for saving energy through improved heat transfer. DOE determined that redesign of the flue baffling of this category of oil water heaters would yield a 3.8-percent energy savings for these water heaters alone. Since only 35 percent of the oil water heaters produced in 1972 were of the center-flue type, the production-weighted energy savings for all oil water heaters attributable to improved heat transfer is 1.3 percent.

DOE, after reviewing this matter, finds that the 1.3-percent energy savings associated with the improved heat transfer design option for oil water heaters can in fact be achieved by redesigning the flue baffling of center-flue type oil water heaters alone. Further, DOE finds that the specified energy savings can be achieved without redesigning the combustion chambers of any oil water heaters. Since no information was received which would substantiate a contrary conclusion, DOE believes that this design option may feasibly be implemented by 1980.

4. *Insulation improvements or additions.* Some comments stated that water heater manufacturers are currently receiving shipments of insulation from suppliers on a fixed allotment basis and that manufacturers are unable to procure additional insulation. Comments further stated that because of these constraints, manufacturers of water heaters will be unable to achieve the 8-percent energy savings which DOE attributed to this design option and, hence, would be unable to meet the 1980 energy efficiency target.

DOE has evaluated the availability of various types of insulation materials which may be used to insulate water heaters. While water heater manufacturers have operated under some form of allocation system with regard to the purchase of insulation materials, it appears that sufficient supplies of the appropriate kinds of insulation will be available so as not to jeopardize achievement of the target in 1980. A major producer of water heater insulation has indicated to DOE that the increased demand which could result from the implementation of this design option can and will be met by insulation manufacturers. Recent analyses conducted by independent industry experts support this view. DOE concludes that sufficient supplies of the appropriate kinds of insulation materials will be available to water heater manufacturers and that no change in the energy savings associated with this design option is warranted.

One comment suggested that the increased or improved insulation design option would require a redesign of oil water heater insulation jackets. This comment stated that the implementation of this design option would constitute a major change in production, requiring a leadtime of 5 years rather than the 2 years estimated by DOE.

DOE finds that some oil water heater manufacturers would have to redesign the jackets of oil water heaters to accommodate additional insulation material if they choose to increase the amount of insulation rather than to use an improved quality of insulation to achieve the 8-percent energy savings associated with the increased or improved insulation design option. DOE does not, however, have any basis for modifying this design option for oil water heaters, especially in view of the fact that the same design option can be implemented by 1980 for gas and electric water heaters.

An additional comment expressed concern about the possible fire hazard posed by the use of foam insulation in water heaters, and about foam insulation shrinkage over time. The 8-percent energy savings which DOE associated with the increased or improved insulation design option for water heaters was not predicated on the use of foam insulation. DOE finds that this energy savings can be achieved by increasing the thickness of the insulation presently used in some water heaters or through the use of an insulation material other than foam which has a lower thermal conductivity per unit thickness than that currently used on oil water heaters. DOE does not find the possible unsuitability of foam insulation for water heater applications to be grounds for modifying this design option.

5. *Heat traps for oil water heaters.* Commenters generally agreed with DOE's estimate that the heat trap design option could yield a 1-percent production-weighted energy savings, but stated that the leadtime associated with this design option would be 5 years in order that appropriate field design evaluations could be made. DOE has determined that the adoption of the heat trap design option involves only a change in the configuration of the inlet and outlet water supply piping of oil water heaters. It does not necessitate the redesign of any aspect of oil water heaters because heat traps can be readily attached to the inlet and outlet water supply pipe connections of present models. Therefore, DOE finds that it is feasible to implement the heat trap

OCT 12 1978

feature into the design of oil water heaters by 1980.

6. *Ignition system improvement for oil water heaters.* Comments questioned DOE's estimate that 2.0 percent of the total energy consumed by an oil water heater could be saved by improving the ignition system. Upon reexamination of its technical analysis for this design option, DOE finds that a mathematical error led DOE to overestimate the energy savings associated with the design option. DOE now finds that although the design option can achieve a 38-percent savings in electrical energy consumption, it will result in only a 0.3-percent reduction in the total energy consumption of an oil water heater. The lifetime cost savings associated with this energy savings is estimated to be $9 in current dollars. The estimated increase in the retail cost of oil water heaters with this design option is zero, since the cost of the new ignition system is estimated to be the same as that of the ignition system it would replace. No new tooling costs or increases in labor costs are projected. Therefore, while DOE's claim of a 2-percent energy savings for this design option was erroneous and has been corrected to 0.3 percent, the design option will save energy and is cost-effective.

Table 1 reflects the reduction in the aggregate energy savings for oil water heaters (from 19 percent to 17 percent) attributable to reducing the energy savings associated with the ignition system improvement design option from 2.0 percent to 0.3 percent. The individual oil water heater energy efficiency improvement percentage and 1980 energy factor values which are presented in table 1 were reduced from their proposed values for the same reason; from 23 percent to 20 percent in the case of efficiency improvement, and from 56.6 percent to 55 percent in the case of the 1980 energy factor. These changes had a negligible effect on the aggregate energy savings and the final energy efficiency improvement target for water heaters because oil water heaters account for a very small share of the water heater market.

Further comments concerning this design option stated that a new ignition system would require extensive testing to insure that it would not pose a reliability problem. After analysis, DOE has determined that there is no reason to presume at this time that the improved ignition systems currently being developed for oil-fueled appliances cannot be adequately tested for reliability prior to incorporation into production units by 1980.

7. *Pilot elimination.* One commenter objected to any energy efficiency improvement design option for water heaters which would call for the elimination of the pilot in LP-gas water heaters. DOE did not identify the elimination of pilots in either LP or natural gas water heaters as an energy efficiency improvement design option, and the target for water heaters does not include the elimination of the pilot.

8. *Cost increases.* One commenter stated that the price increase associated with producing more energy-efficient gas water heaters, excluding the heat trap design, would be $25 to $35 per unit. DOE believes that a figure of $9 to $10.15 per unit is most likely. Even at the commenter's highest estimated price increase of $35 excluding the heat trap design option, the implementation of all design options for gas water heaters would be economically feasible because of the significant amount of energy savings attributable to the more efficient design options.

B. HOME HEATING EQUIPMENT, NOT INCLUDING FURNACES

DOE has determined that for home heating equipment (not including furnaces) an efficiency improvement target of 11 percent is the maximum improvement which is technologically and economically feasible. Analysis of the comments and information received in response to the proposal resulted in an increase of the possible energy savings for gas-fueled vented heaters from the proposed 12 percent to 14 percent, and thus increased the efficiency improvement percentage for all vented heaters from the proposed 13 percent to 15 percent. There were no changes made to the proposed energy savings for oil-fueled vented heaters. Unvented home heating equipment is considered 100 percent efficient at the point of use, and the maximum feasible efficiency improvement for unvented heaters is therefore 0 percent. Unvented heaters were mistakenly excluded from the calculation of the target for home heating equipment (not including furnaces) in the proposal. Recalculation of the target to include unvented heaters has resulted in a reduction of the target from 15 percent to 11 percent. Table 2 summarizes the final efficiency improvement target and the associated energy factors for home heating equipment (not including furnaces).

TABLE 2.—*Home Heating Equipment (Not Including Furnaces) Energy Efficiency Improvement Target*

	1972 energy consumption × 10^{12} Btu	Energy savings (percent)	Energy efficiency improvement target (percent)	1972 energy factor (percent)	1980 energy factor (percent)
Home heating equipment (aggregate)	38.67	10	11		
Vented home heating equipment (aggregate)	30.63	13	15		
Gas heater	22.40	14	16	53	61.3
Oil heater	8.23	11	12	41	45.8
Unvented home heating equipment	8.04	0	0	100	100

1. *Electric ignition and reduced pilot.* One comment stated that only a small number of gas-fueled vented heaters would ever be sold with electric ignition because most heaters in this category are not amenable to connection with an electrical supply. The proposal anticipated that half of the forced air gas-fueled vented heaters, or 11 percent of all gas vented heaters, could be equipped with electric ignition.

Based on data submitted by the commenter, DOE has reduced the number of gas-fueled vented heaters to be equipped with electric ignition from 11 percent to 9 percent. This represents a decrease in the estimate of the population of forced air gas-fueled vented heaters from 22 percent to 18 percent of all gas-fueled vented heaters.

This commenter also stated that the retail price increase of $45 for electric ignition cited in the proposal was too low. A $100 to $125 price increase was suggested, but no substantiation of this estimate was provided. After careful review of the retail price increase estimate and after consideration of the fact that furnaces are currently being sold with a similar electric ignition for a premium of $60, DOE has revised its retail price estimate upward to $60. A price increase of $60, which translates to a production-weighted price increase of $5.40, has been determined by DOE to be economically feasible. The payback period to the consumer for purchasing a unit with electric ignition is estimated to be 6½ years.

As an alternative to electric ignition, manufacturers might also reduce pilot input in order to eliminate some of the energy waste associated with the continuously burning pilot. Preliminary data submitted by NBS have shown energy savings from reduced pilot input to be about 5 percent for all gas-fueled vented heaters, compared to 1 percent for electric ignition in those products which are amenable to electric ignition. Data regarding this option are presently insufficient, however, to determine its feasibility for purposes of the target program.

V 4 3 / 1 9 8
0 C 1 2 7 8

2. *Improved heat transfer.* One commenter stated that the improved heat transfer design option is not feasible for gravity gas-fueled wall heaters. The reason given for this view was that forced convection, implicit in this design option, is not economically feasible in light of the cost of fitting such units for connection with an electrical supply. DOE agrees with this point and has also determined that improving heat transfer by derating the burner and rebaffling the heat exchanger also does not appear to be feasible since gravity circulation must be maintained in these units. Therefore, DOE has eliminated gravity gas-fueled wall heaters from the production-weighted energy saving for this design option. As a result, the production-weighted energy savings for improved heat transfer in all gas-fueled vented heaters has been reduced from the proposed 7.6 percent to 4.9 percent.

3. *Stack damper.* In the proposal DOE estimated that 18 percent of gas-fueled vented heaters and 15 percent of oil-fueled vented heaters would incorporate electric stack dampers in 1980 production. Comments objected to the inclusion of the stack damper design option in the target because they doubted the economic feasibility of equipping relatively inexpensive home heating equipment with costly electric stack dampers.

The final target is based on the application of less expensive thermal stack dampers for gas-fueled vented heaters. These thermal dampers, with their relatively low cost and independence from electrical supply requirements, are considered by DOE to be applicable to all gas-fueled vented heaters except those with direct vent systems. At the time of the proposal there was doubt as to the feasibility of incorporating thermal dampers in 1980 production because little work had been done on a national safety standard for thermal dampers. Since the time of the proposed rulemaking substantial progress has been made on a national standard for thermal dampers and DOE anticipates that this design option can be implemented in the 1980 production.

Because thermal dampers are typically loose fitting, compared to electric dampers, DOE's technical analysis has led to a reduction in the estimated energy savings attributed to a stack damper from the proposed 13 percent for the tighter fitting electric damper to the final 9 percent for the thermal damper. However, the final production-weighted energy savings is now 7.7 percent for gas-fueled vented heaters, rather than the proposed 3.5 percent, because it is technologically and economically feasible to apply the thermal damper to all gas-fueled vented heaters except those with direct vent systems.

NBS believes the applicability of thermal dampers to oil-fueled heaters is questionable since carbon deposits may render the damper inoperable. Therefore, the electric stack damper option remains as proposed for oil-fueled vented heaters.

4. *Baseline data.* One commenter stated that the annual usage estimates relied upon by DOE were "merely guesstimates" and that more data should be accumulated in order to refine these estimates. However, the annual usage data submitted by this same commenter is in close agreement with the NBS estimates relied upon by DOE. For this reason, DOE continues to accept the NBS figures.

5. *Low-income groups.* One commenter stated that low-income groups would not be able to purchase the more efficient but more expensive home heating appliances contemplated by the proposed target.

DOE accounted for the possible negative impact on low-income purchasers in the proposed target for home heating equipment by production-weighting the individual design options included in 1980 shipments, and believes that the production-weighting insures that low-income purchasers, who account for 42 percent of the market, will have available for purchase more efficient home heating equipment at minimal increases in price. In researching the issue of low-income consumers DOE assumed that low-income persons purchasing appliances were homeowners rather than renters, and DOE therefore used the 1976 annual housing survey, published by the Bureau of Census and the Department of Housing and Urban Development, to determine the portion of the home heating equipment market that falls into the low-income category. The 1976 Bureau of Census definition for the annual poverty level income of a family of four is $5,815. In determining low-income homeowners DOE included families who earned up to $7,000. This has been done to account for those homeowners who earn more than the poverty level income, but might still encounter financial difficulties when faced with a substantial increase in the price of an essential appliance.

6. *1980 shipment estimates.* One commenter questioned the accuracy of DOE's estimates of 1980 shipments of gas-fueled vented home heating equipment. After review of past industry shipments, both before and after 1972, DOE believes that the base year of 1972 was an unusually strong year for the home heating industry. The historical trend indicates that replacement demand in 1980 will be closer to 500,000 units, rather than the 700,000 units previously forecast by DOE. The lower shipment forecast of 500,000 units in 1980 does not affect the economic feasibility of the target for gas-fueled vented home heaters because the attendant costs and benefits were reduced commensurately as a result of this revision. The revised forecast also has a minimal effect on the negative impacts described in stage IV of the economic analysis section of the proposed target notice (42 FR 35657, July 15, 1977).

C. KITCHEN RANGES AND OVENS

DOE has determined that an efficiency improvement target of 40 percent for kitchen ranges and ovens is the maximum improvement which is technologically and economically feasible. Analysis of the comments received indicates that in the proposal DOE overestimated the energy savings of several of the design options. As a result of this analysis, the estimated aggregate energy savings has been adjusted from 39 percent to 29 percent, and the efficiency improvement target has been adjusted from the proposed 64 percent to 40 percent. Table 3 summarizes the final efficiency target and associated energy factors.

1. *Baseline data for 1972.* Several comments questioned the accuracy of the 1972 energy consumption baseline data used in arriving at the proposed target. The initial NBS target recommendations used the best available data and estimates for the 1972 base period. In February 1978, the Association of Home Appliance Manufacturers (AHAM) furnished DOE with revised 1972 base year energy consumption and efficiency data for conventional electric ovens, cooking tops, and ranges. These new data generally confirmed the estimates in the proposal. Since these data reflect the final DOE test procedure calculations, however, this new material has been used to adjust the 1972 base year energy consumption.

TABLE 3.—*Kitchen Ranges and Ovens Energy Efficiency Improvement Target*

	1972 energy consumption - 10^{12} Btu	Energy savings (percent)	Energy efficiency improvement target (percent)	1972 energy factor (percent)	1980 energy factor (percent)
Kitchens ranges and ovens	32.24	29	40		
Electric ranges/ovens	8.43	3	3		
Ranges	7.37	3	3	43.57	44.69
Cooking tops	.54	0	0	74.84	74.84
Ovens	.52	4	4	12.99	13.53
Gas ranges/ovens	23.71	38	62		
Ranges	22.01	38	62	12.43	20.12
Cooking tops	.83	42	72	21.40	36.80
Ovens	.87	35	53	3.58	5.48
Microwave ovens	.10	5	5	38.00	39.90

For gas-fueled conventional ovens, cooking tops, and ranges, the 1972 base year energy consumption and cooking efficiency data have been revised based on NBS's analysis of American Gas Association Research Report No. 1510 and additional data furnished in January 1978 by the Gas Appliance Manufacturer's Association. No change in the final target for kitchen ranges and ovens was required as a result of the baseline revisions.

2. *Energy factor.* The method of calculating the energy factor for kitchen ranges and ovens was modified in the final test procedures for kitchen ranges and ovens, 10 CFR 430.22(i)(4) (43 FR 20108, May 10, 1978). Although the target prescribed today is not affected by this modification, both the 1972 and 1980 energy factors listed in table 3 have been adjusted to reflect the changes in the final test procedures. The modifications to the energy factor, as noted above, are discussed in detail in the technical background paper for kitchen ranges and ovens available in the DOE Freedom of Information Office.

3. *Elimination of standing pilots.* One manufacturer suggested that the elimination of standing pilot lights from gas ranges would save 33 to 40 percent of the total energy consumed by these appliances, rather than the 47-percent savings estimated by DOE. Based upon its own measurements of the pilot energy consumption of typical gas ranges, and evaluation of data from the American Gas Association laboratories and other sources, NBS has determined that the previous estimate was too high, but that a 40-percent energy savings is attainable. DOE accepts this determination.

Several comments requested that the target be adjusted to permit pilot lights for those products which are fueled by propane. These comments suggested that electric ignition devices are unsafe for such products because propane, being heavier than air, will tend to collect in low places, with a risk of explosion. It was also suggested that the use of matches to light burners on those occasions in which the electric ignition is not operational, presents a safety problem.

The American Gas Association tests gas-fueled kitchen ranges and ovens, including those having electrical ignition systems, and certifies that such products comply with national safety standards as specified in the American National Standard (ANS-Z21.1-1974 and its amendment ANS-Z21.1a-1974, section 2.7). This standard makes no distinction between the safety requirements of ignition systems designed for use with propane and those designed for use with natural gas. Kitchen ranges and ovens are currently manufactured which are convertible between natural gas and propane and which also have electric ignition devices.

Several comments called attention to the possibility that elimination of the standing pilot in those ovens and ranges purchased by low-income consumers would be unduly burdensome. It was claimed that lower income groups tend to purchase lower priced ranges which require no electrical power for operation. In some cases, low-income households either have no electrical service or are located in remote areas with undependable electrical service. It was also noted that the use of electric ignition could require additional wiring in some homes to provide an electrical outlet for the range at a cost of about $150.

After review of the comments and analysis of existing market data, DOE has determined that the design option for electric ignition in natural gas and LP-gas ranges which require no electrical power for operation is not economically feasible for low-income consumers. Based on DOE estimates of the number of low-Income households, households without properly located electrical outlets, and the number of households with poor or no electrical service, DOE has found it necessary to reduce the production-weighting of the design option for the elimination of standing pilot on gas ranges and ovens by 10 percent, from 100 percent to 90 percent. This in turn, reduces the production-weighted energy saving from 40 percent to 36 percent for this design option.

4. *Reduction of excess flue gas losses.* Several comments addressed the design option to reduce excess flue gas losses. In the proposal DOE estimated that 100 percent of 1980 shipments could incorporate this design option. One manufacturer commented that it could not achieve the projected energy savings because excess flue gas losses had already been reduced on its products prior to 1972. DOE now finds that excess flue losses had already been sufficiently reduced for 16 percent of all gas ranges manufactured in 1972. As a consequence, the 1972 production-weighting for this design option has been increased from 0 to 16 percent, and thus, the production-weighted energy savings is correspondingly lower.

Comments from manufacturers also stated that this design option, which DOE estimated would result in an energy savings of 4 percent, is technologically infeasible for ovens smaller than standard size ovens and for ovens which incorporate a broiler in the main oven cavity (referred to as "dual cavity-type ovens" in the hearing comments). Manufacturers further claimed that the inclusion of "dual cavity-type ovens" as part of this target could cause their elimination from the marketplace. DOE reiterates that the efficiency improvement target for kitchen ranges and ovens is applicable not to particular units but to the aggregate energy efficiency of all units, and no adjustment to the target has been made as a result of this comment. It should be noted, however, that even if the design option had been determined to be technologically infeasible for the products in question, no change would result in the final target for kitchen ranges and ovens because these products occupy such a small percentage of the market.

In the proposal the energy savings for reducing excess flue gas losses was based on the carbon dioxide (CO_2) levels measured in the flue gases during maintenance of oven temperature. During the review and analysis process, NBS discovered this method of measurement to be in error. NBS has reexamined the conditions under which the CO_2 should be measured, and has determined that the average CO_2 content should be measured during heatup, when the burner is on continuously, rather than during temperature maintenance, when the burner is on only intermittently. This change in the method of measurement has reduced the energy savings for reduction of excess flue gas losses for gas ranges from 4 percent to 2 percent.

One commenter, the Gas Appliance Manufacturers Association, questioned DOE's initial estimate of the investment requirements needed to implement this same design option, suggesting that the true figure would be

V 4 3 / 1 9 8 0 C 1 2 7 8

$200,000 per manufacturer rather than zero, as suggested by DOE. DOE accepts the GAMA estimate of capital investment, which translates to a retail price increase of $3 per unit. This level of investment remains economically feasible in light of the investment capability of the industry, and the negligible demand impact of a $3 price increase.

5. *Improved insulation.* One consumer questioned the availability of additional insulation material in 1980. DOE has investigated this matter and has concluded that in 1980 the fiberglass industry will be able to meet all foreseeable needs of appliance manufacturers.

In the proposal, DOE estimated that insulation could be improved in 100 percent of the non-self-cleaning ovens by increasing either the quantity or the quality of insulation material. Comments indicated, and DOE now agrees, that replacement of fiberglass insulation with higher quality insulation would not be technologically feasible by 1980.

Several comments further stated that in certain instances manufacturers would be unable, without retooling, to increase the quantity of insulation in their products. NBS has reviewed these comments, as well as additional available information, and concludes that 30 percent of the non-self-cleaning ovens are amenable to greater insulation without retooling.

Comments further indicated that in certain instances where retooling was necessary, the capital investment would be economically prohibitive. According to NBS estimates, 70 percent of non-self-cleaning ovens would require retooling in order to improve insulation substantially. After reviewing the industry structure, DOE has determined that it would be economically feasible for manufacturers having 10 percent or more of the market share to retool in order to increase insulation. Firms of this size account for approximately 70 percent of the market for kitchen ranges and ovens. This 70-percent market share for large manufacturers, multiplied by the 70 percent of non-self-cleaning ovens for which retooling would be necessary in the first place, yields approximately 49 percent of non-self-cleaning ovens which could feasibly be improved if retooling were undertaken. Added to the 30 percent of non-self-cleaning ovens which can be improved without retooling, this design option is economically feasible for approximately 79 percent of the non-self-cleaning ovens manufactured in 1980, compared to the 100 percent previously proposed by DOE. The production-weighted energy savings for this design option is proportionately reduced from 6 percent to 5 percent.

6. *Adjustment of energy savings due to safety regulations.* In the proposed targets the estimated percentage of energy savings for electric kitchen ranges and ovens included a 1-percent adjustment because of design changes made by manufacturers since 1972 to meet various new safety requirements. One commenter requested that a similar adjustment be made for gas kitchen ranges and ovens. No information was provided relating to the impact of new safety requirements upon the efficiency of gas ranges and ovens since 1972, and information available to DOE indicates that the impact of new safety requirements for gas ranges and ovens is negligible in terms of the final target.

7. *Ranges and ovens in mobile homes and recreational vehicles.* One comment requested that recreational vehicle ranges and ovens be excluded from the target program, because they are not used in residences, and are subject to entirely different consumer usage patterns. The comment also requested that ranges in mobile homes be excluded because such units are subject to regulations promulgated by the Department of Housing and Urban Development (HUD).

Ranges and ovens used in recreational behicles and in mobile homes fall within the definition of "Kitchen Ranges and Ovens" in 10 CFR 430.2 (43 FR 20108, May 10, 1978) and are therefore included in the target program. Further, DOE, in prescribing an energy efficiency improvement target, does not consider it relevant that the products are regulated for purposes other than energy efficiency by another Federal agency.

D. CLOTHES WASHERS

DOE has determined that an efficiency improvement target of 35 percent for clothes washers is the maximum improvement which is technologically and economically feasible. Analysis of the comments resulted in lowering the estimate of the energy savings for one design option related to reducing the water temperature of the wash cycle. Consequently, total energy savings have been reduced from 32 percent to 26 percent, and the efficiency improvement target has been reduced from 47 percent to 35 percent. Table 4 summarizes the final energy efficiency improvement target and associated energy factors.

TABLE 4.—Clothes Washer Energy Efficiency Improvement Target

Energy efficiency improvement target (percent)	35
1972 energy factor (cubic feet/kilowatt-hour)	0.65
1980 energy factor (cubic feet/kilowatt-hour)	0.88

1. *Resubmission of baseline data.* A comment by the Association of Home Appliance Manufacturers (AHAM) stated the need to recalculate the 1972 base year energy consumption, because DOE's final test procedures for clothes washers are different from the test procedures used to establish the 1972 base year data cited by DOE. AHAM offered to supply new data to reestablish the base year energy consumption according to the final test procedures for clothes washers. The clothes washer target is based on this new data. Changes between the proposed and final test procedures also required reestablishing the 1972 base year energy factor in terms of cubic feet per kilowatt-hour, but this energy factor revision did not affect the energy efficiency improvement target.

Another industry comment suggested that the baseline energy consumption data should reflect a 100-percent efficiency for water heating. This has been the method used by DOE to calculate the baseline consumption. Details of the baseline calculation are provided in the technical background paper for clothes washers available in the DOE Freedom of Information Office.

2. *Eliminate warm rinse.* One comment stated that more motor torque would be required to agitate clothes in cold water, suggesting the need for the development of higher torque motors at increased costs, but no supporting evidence was provided to support this claim. Testing by NBS has revealed no evidence of any measurable variation of motor torque as the temperature of the rinse water is changed from warm to cold. Therefore, no revision to the energy efficiency improvement target has been made as a result of this comment.

One comment stated that some customers who are accustomed to warm water rinsing may not accept clothes washers without this feature. However, most of the comments agreed that DOE's estimate of the energy savings resulting from elimination of the warm rinse option is reasonable and achievable. There were no major concerns over any significant reduction in performance as a result of using all cold water rinses, and laboratory test data confirms that there are no significant performance differences between warm and cold rinses. Further, DOE believes that government and industry consumer education efforts will mitigate any potential negative consumer reaction to this design option.

3. *Reduce warm water wash temperature setting.* One energy saving option proposed by DOE for clothes washers was a 40/60 water mixing valve which would provide warm water by combining 40 percent hot water with 60 percent cold water. Industry representatives expressed concern that the reduced wash/water temperature would produce unsatisfactory washability performance and would reduce bacterial elimination, which is important in winter months in regions with colder climates. In addition, comments suggested that consumers might utilize a hot water wash cycle more often, because the new warm mix might appear cool to the touch.

Subsequent analysis by DOE indicated that due to the variability of cold water inlet temperatures, the 40/60 valve could produce unacceptable performance in the colder regions of the country. Therefore, DOE recommends a warm water mixture of 50 percent hot water and 50 percent cold water. DOE believes that this will provide acceptable year-round performance, and that consumer usage patterns will not be altered significantly as a result of this design option. Currently available information indicates that the inclusion of a 50/50 valve will not significantly affect a washer's ability to remove bacteria.

The energy savings attributed to this design option has been recalculated to reflect a hot/cold water mix ratio of 50 percent hot and 50 percent cold. The revised production-weighted energy savings has been reduced from 8.0 percent in the proposal to 2.3 percent for this design option. The energy savings reduction in this case is very large because many of the products produced in 1972 incorporated a 50/50 valve and there will be no savings attributable to this design option for these products in 1980.

E. FURNACES

DOE has determined that an efficiency improvement target of 20 percent for furnaces is the maximum improvement which is technologically and economically feasible. Analysis of the comments received showed that practical limitations of the implementation of the design option calling for improved heat transfer of cast iron boilers reduced the aggregate energy savings for gas and oil boilers from 5 to 1.0 percent. Further, the aggregate energy savings for the improved heat transfer and electric ignition design options was reduced by 15 percent from 9.3 to 7.9 percent to account for potential negative impacts on low-income consumers resulting from retail price increases. Consequently, the efficiency improvement target for furnaces has been reduced from the proposed 23 percent to 20 percent. Table 5 summarizes the final efficiency improvement target and the associated annual fuel utilization efficiencies.

TABLE 5.—*Furnace and Boiler Efficiency Improvement Target*

	1975 energy consumption, 10^{12} Btu	Energy savings (percent)	Energy efficiency improvement target (percent)	1975 annual fuel utilization efficiency (percent)	1980 annual fuel utilization efficiency (percent)
Furnaces and boilers	147.3	17	20		
Gas boilers and furnaces	122.7	18.0	22	61.5	75.0
Oil boilers and furnaces	24.6	9	10	74	81.4

1. *Improved heat transfer.* Some comments questioned the feasibility of improving the heat transfer characteristics of furnaces and boilers by 1980. These comments stated that such improvements might require the relocation of fan and safety controls, as well as a complete redesign of the heat exchanger. DOE agrees that a major redesign of the heat exchanger section would not be feasible by 1980. However, in the proposal DOE intended that improvement in the heat transfer of furnaces be achieved in 1980 without such redesign, by derating the burner input and baffling airflow through the heat exchanger section. DOE believes that this design option remains both technologically and economically feasible for all furnaces and boilers, except as noted in paragraph 6 below.

2. *Power burner.* In the proposal DOE estimated that 40 percent of gas furnaces could incorporate power burners in 1980 production and that the remaining production could incorporate stack dampers. Both of these design options are effective for minimizing off-cycle losses. Several commenters stated that inclusion of the power burner design option in 1980 products was not feasible. One commenter believed that power burners could be incorporated in some furnace designs by 1980 but that large-scale implementation of power burners was not practicable.

After review of the comments and further analysis of the issue, DOE has modified the production-weighting for power burners and stack dampers and now estimates that 20 percent of gas-fired furnaces could have power 80 percent could incorporate stack burners by 1980 while the remaining dampers. It should be emphasized that the exact mix of these two design options is not important because different mixes of these two design options in 1980 production will also result in achievement of the target.

3. *Stack damper.* Some comments indicated that the estimated energy savings for stack dampers contained in the proposed target was not consistent with values obtained by using the DOE furnace test procedures. DOE has evaluated industry test data developed in accordance with the DOE test procedures for furnaces and boilers, however, and has found close agreement between the industry data and the values of energy savings cited by DOE in the proposed energy efficiency improvement target.

The proposed target was based on incorporation of the electrical-type stack damper in 1980 production. Additional studies conducted by NBS conclude that thermal and mechanical stack dampers will also be available as design options for furnaces manufactured in 1980. Therefore, DOE has included in the final efficiency target a production-weighted mix of 60 percent electrical or mechanical stack dampers and 20 percent thermal stack dampers. This modification does not affect the final target for gas furnaces.

Another comment stated that the energy savings for a stack damper would vary depending on furnace location inside or outside the structure being heated. The basic premise for determining the energy savings of stack dampers for indoor furnaces is that both the heat trapped in the furnace heat exchanger, and the reduced air infiltration through the furnace/chimney system, contribute to reducing the heat load on the furnace system. If a furnace is an outdoor unit or one intended for installation in an unheated area, such as an attic or crawlspace, there is no incentive for manufacturers to install stack dampers because the DOE furnace test procedure does not credit energy savings for a stack damper installed on such a furnace. Therefore, the final target reflects application of stack dampers on indoor furnaces only.

4. *Electric ignition.* One commenter stated that the energy savings of electric ignition devices, as calculated by the proposed DOE furnace test procedures, did not agree with the estimates of such energy savings in the proposed target. Calculations of energy savings for electric ignition using the final DOE furnace test procedures published on May 10, 1978 (43 FR 20147) yield energy savings of about 6 percent, which is also the basis for the energy savings for electric ignition in today's final efficiency target.

V 4 3 / 1 9 8
0 C 1 2 7 8
UMI

5. *Base year data.* Some comments criticized the fact that the 1975 baseline annual fuel utilization efficiencies for furnaces and boilers published in the proposed energy efficiency improvement target for furnaces were only estimates, and were not based on test data. Since the publication of the proposed target, new base year data have been obtained which are based on test data using final DOE test procedures for furnaces and boilers. These data were used to revise the baseline annual fuel utilization efficiencies of furnaces and boilers. The 1975 base year figures are given in Table 5—Furnace Energy Efficiency Improvement Target. These values have been used to derive the target for 1980 annual fuel utilization efficiencies.

6. *Investment.* In the proposal DOE estimated that the investment necessary to meet the target was between $120,000 and $137,000 per manufacturer. Several comments indicated that the magnitude of the investment was much larger and would be economically prohibitive. Of major concern to manufacturers were DOE's investment estimates for improved heat transfer and power burners.

After review of the comments and analysis of additional information DOE now estimates that total investment is $157,000 for each furnace and steel boiler manufacturer and $72,000 for each cast iron boiler manufacturer. The major portion of total investment consists of the two design options mentioned above: Improved heat transfer and power burners. As noted in paragraph 1 above, DOE has made no change regarding the energy savings to be derived from improving heat transfer for furnaces and steel boilers, and the investment associated with this design option remains at $85,000 per firm. For cast iron boilers, improving heat transfer would have required an investment of between $1 million and $1.6 million per manufacturer. This level of investment has been determined to be economically infeasible for cast iron boiler manufacturers, and the production-weighting of the heat transfer design option has been lowered to reflect this determination. This change in production-weighting reduces the energy savings of the design option for gas and oil boilers from 5 to 1 percent, and contributes to the reduction in the final efficiency improvement target summarized in table 5.

In the proposal, the design option for power burners was assumed to require no new investment. After reevaluating this question, DOE now estimates that new investment of approximately $20,000 per manufacturer is likely to be necessary.

Although total investment for all design options supporting the furnace target has been revised to $157,000 per firm ($72,000 for cast iron boiler manufacturers), direct investment undertaken by furnace manufacturers could be as low as $105,000 ($20,000 for cast iron boiler manufacturers), because in many cases a portion of the investment would be incurred by manufacturers' suppliers. This level of investment for furnace manufacturers remains economically feasible.

7. *Retail price.* One comment indicated that the target for furnaces would increase prices to a level that would be burdensome for low- to moderate-income consumers. In reviewing the possible retail price increase that would result from the implementation of the design options, DOE has found that considerable burden could be placed on low-income groups. The average price increase for lower priced gas and oil furnaces could exceed 69 percent and 56 percent, respectively. DOE has found it necessary to reduce by 15 percent the production weights for the improved heat transfer design option for gas and oil furnaces, and the electric ignition design option for gas furnaces, in order to minimize the potential negative impacts on low-income consumers. The change in production weights reduces the aggregate energy savings for these two design options from 9.3 to 7.9 percent and contributes to the reduction in the final efficiency improvement target summarized in table 5.

8. *Elasticity.* One comment questioned DOE's estimate of possible 1980 demand changes resulting from more costly but more efficient boilers. Based on new information supplied by the boiler industry, DOE has revised downward the previous forecast of a demand increase resulting from achievement of the energy improvement target. The possibility of shifts in demand for boilers is constrained by the predominantly replacement-oriented market for these products, the essential nature of heating equipment, and the limited substitutability of other forms of central heating. DOE now estimates that projected demand for boilers will remain relatively constant, and that this steady demand supports the economic feasibility of the target.

9. *LP-gas furnaces.* One comment recommended that the design option for electric ignition be eliminated from the target for furnaces fueled by LP-gas. Several reasons were given for this recommendation. Some areas are not served by electricity, and in some areas where electric service does exist there are often periods of extended interruption. Under these conditions the inability of the electric ignition to function properly results in health and safety hazards. The pilot acts as a safety factor in LP-gas furnaces because, unlike gas ranges, furnaces cycle on and off by thermostatic control, and failure of the electric ignition might not be readily discoverable. This does not present a problem in natural gas furnaces because natural gas is less likely to collect around the furnace and is less energy intensive.

DOE has modified the production weights for the electric ignition design option to exclude LP-gas furnaces. Due to the very small market for these products, however, there is no resulting change in the overall energy savings for the electric ignition design option or the target for furnaces.

This rulemaking complies with DOE's interim prodecures for implementing Executive Order 12044, entitled "Improving Government Regulations."

An economic impact statement including the five targets prescribed today was prepared and is available in the DOE Freedom of Information Office.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, part 430 of chapter II of title 10, Code of Federal Regulations, is amended as set forth below to establish efficiency improvement targets for five appliance types, effective November 13, 1978.

Issued in Washington, D.C., October 5, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

§ 430.32 [Amended]

1. Section 430.32 is amended by adding paragraphs (e), (g), (i), (j), and (n), to read as follows:

* * * * *

(e) The energy efficiency improvement target for water heaters shall be a 23-percent increase in the energy efficiency of the total number of water heaters manufactured by all manufacturers in calendar year 1980 when compared with the energy efficiency of the total number of water heaters manufactured by all manufacturers in calendar year 1972.

* * * * *

(g) The energy efficiency improvement target for home heating equipment (not including furnaces) shall be an 11-percent increase in the energy efficiency of the total number of home heating equipment units (not including furnaces) manufactured by all manufacturers in calendar year 1980 when compared with the energy efficiency of the total number of home heating equipment units (not including furnaces) manufactured by all manufacturers in calendar year 1972.

* * * * *

(i) The energy efficiency improvement target for kitchen ranges and ovens shall be a 40-percent increase in the energy efficiency of the total number of kitchen ranges and ovens manufactured by all manufacturers in calendar year 1980 when compared with the energy efficiency of the total number of kitchen ranges and ovens manufactured by all manufacturers in calendar year 1972.

(j) The energy efficiency improvement target for clothes washers shall be a 35-percent increase in the energy efficiency of the total number of clothes washers manufactured by all manufacturers in calendar year 1980 when compared with the energy efficiency of the total number of clothes washers manufactured by all manufacturers in calendar year 1972.

* * * * *

(n) The energy efficiency improvement target for furnaces shall be a 20-percent increase in the energy efficiency of the total number of furnaces manufactured by all manufacturers in calendar year 1980 when compared with the energy efficiency of the total number of furnaces manufactured by all manufacturers in calendar year 1975.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER B—GRANTS

[FRL 966-8]

PART 35—STATE AND LOCAL ASSISTANTS

Grants for State Underground Water Source Protection Programs

AGENCY: Environmental Protection Agency.

ACTION: Rule.

SUMMARY: The Safe Drinking Water Act provides for the regulation of underground injection practices which may endanger underground drinking water sources. Congress intends that primary enforcement be the responsibility of the States. To assist States in carrying out this responsibility, the Act authorizes the Environmental Protection Agency (EPA)-to make grants for developing and administering a State program to protect underground drinking water sources.

The Administrator of the EPA is issuing final regulations governing grants to States which will help them to implement a program to protect underground drinking water sources. An underground water source protection program means a program for adopting and enforcing an underground injection control program.

These regulations specify the eligibility requirements for the grants. In addition, the regulations specify the applicable grant procedures; they describe the method of allocating available grant funds; they identify appropriate program elements; and they specify the criteria for evaluation of program objectives and performance.

EFFECTIVE DATE: October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Thomas Belk, Chief, Ground Water Protection Branch, Office of Drinking Water (WH-550), 401 M Street SW., Washington, D.C. 20460, telephone 202-426-3934.

SUPPLEMENTARY INFORMATION: EPA is authorized to make these grants by sections 1443(b) and 1450 of the Safe Drinking Water Act. A tentative allotment of grant funds among all States will be made on the basis of geographical area, population, and injection practices. Grant funds will be awarded only to those States determined by the Administrator to be eligible under § 35.659. The Administrator shall list States determined to be eligible in the FEDERAL REGISTER. One of the conditions of grant award to an eligible State is that the State shall implement a program which meets the requirements of section 1421 of the Act and 40 CFR part 129.

In accordance with the allotment formula described in § 35.655, the Administrator will make an initial allotment of grant funds to all States. However, actual grant awards will be made only to those States which the Administrator lists as requiring an underground injection control program. Grant funds allotted to eligible States which do not apply for grants or which will not assume primacy may be used in part, or in whole, by the Administrator, subject to the limitations contained in the Appropriations Acts, to implement a program in those States. Grant funds which had been tentatively allotted to States which are not awarded or used by the Administrator shall be reallotted to eligible States. As soon as practicable, but no later than April 1 of each year, the Administrator shall reallot all unobligated funds to eligible States.

To complement State fiscal planning, we are using "forward funding" for this program. Forward funding means using the funds appropriated in the present fiscal year for grant awards beginning the next fiscal year. For example, we will use fiscal year 1978 grant funds to fund fiscal year 1979 programs. Each year we will notify the States of the actual funds available for each State for the next fiscal year. We shall provide this information to them early in their planning cycle so that they can prepare their legislative budgets and programs.

The Administrator shall publish a notice in the FEDERAL REGISTER outlining the deadline date and procedures for States to request to be added to the list of eligible States. Those States which the Administrator adds to the list in fiscal year 1980 will be eligible to receive grants for the fiscal year 1981 program year.

For the fiscal year 1979 grant awards, a letter from the Chief Executive of the State assuring the State's intent to assume primary enforcement responsibility within 2 years from the date of the initial grant award must be submitted to EPA no later than 6 months from the date of the initial grant award. For initial grant applications submitted in subsequent years, this letter from the Chief Executive of the State must be submitted to EPA as part of the grant application. All grant applications must include the State's program plan as defined in § 35.670-4. In determining the adequacy of the public participation program element, the Regional Administrator shall be guided by 40 CFR part 105 until 40 CFR part 25 is promulgated.

In these and other regulations currently under review and revision, EPA is including the concept of a State/EPA agreement. This agreement will provide a way for EPA Regional Administrators and States to coordinate and, to the maximum extent feasible, to integrate programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act, and, possibly, other laws which EPA administers. Since this subpart governs only that part of the State/EPA agreement relating to underground water source protection grants, other programs included in the State/EPA agreement will be governed by the applicable provisions found elsewhere in this chapter. Beginning in fiscal year 1980, State programs funded under the Act will be part of the State/EPA agreement and the State/EPA agreement must be completed before grant award. EPA will issue guidelines on the development and content of the State/EPA agreement.

These regulations were propposed on August 31, 1976 (41 FR 36726). We received 34 comments on the proposed regulations. We have revised the dates and schedules in the regulations to reflect the delays in promulgating these regulations. In addition, we have modified several other items in response to the comments. The major revision to the proposed regulations relates to § 35.655, "Determination of Allotments."

The majority of commentors addressed the proposed grant allocation formula and offered suggestions for improvement. The commentors wanted to include a "need" factor which would take into account a State's fiscal capability or a State's need for a program based upon the extent of the State's ground water contamination potential. Some commentors recommended that we take into account personal income and a State's revenue effort to determine a State's fiscal capability. Personal income, however, is not a determinant of a State's fiscal capability. Similarly, State revenue is not a determinant of the actual overall tax effort made by a State. We believe that including a State's fiscal capacity would detract from the primary purpose of the program which is to prevent the contamination of underground water supplies.

A few commentors noted that the grant allocation formula in the proposed regulations did not include a factor which addressed a State's need for an underground injection control program based upon the extent of the potential ground water contamination problem in the State. The contamination of a sole source of water supply is acknowledged to pose a far more significant problem than the contamination of one of several sources. People in States which are relatively less dependent upon ground water supplies are not as affected by contaminated supplies as those in States with a relatively high dependency upon such sources. We believe the hardship inflicted by contaminated water affects each citizen similarly and that the absolute number potentially affected, rather than the percentage, is more relevant as an indicator of the potential need for the program. Therefore, we determined that equity in the formula would not be improved by including factors relating to ground water withdrawals and the State population relying on ground water.

Other commentors raised a concern that we did not include a factor for the volume of fluids injected. The reason for this omission is that data on the volume of fluids injected in each State in proportion to the total volume injected in all States is not available. However, this concern has been taken into consideration because the current weighting system accords greater importance to higher volume injected. The formula for fiscal years 1979 and 1980 provides a weight of 10 percent on area, 10 percent on population, and 80 percent on injection practices. These injection practices are included in the criteria used by EPA to designate States which, in the Administrator's judgment, require an underground injection control program. The injection practices incorporated are the number of industrial and municipal waste disposal wells, brine disposal and recovery wells, number of mining sites, number of gas storage reservoirs, and manufacturing and service establishments. For fiscal year 1981 and subsequent years, the formula may change as information becomes available.

Some commentors indicated that the grant formula was not related to the criteria used to designate States. This new formula relates the grant program to the list of States requiring an underground injection control program under section 1421.

These regulations contain reference to the underground injection control regulations to be reproposed in 40 CFR Part 129 (originally proposed as 40 CFR Part 146 in the FEDERAL REGISTER on August 31, 1976). Because of major issues raised during the comment period, EPA will repropose these regulations. We expect to repropose the program regulations within 2 months and promulgate final regulations within 8 months. We are aware that many States are anxious to receive grant awards for the underground injection control program. EPA is promulgating the grant regulations so that grants can be awarded. There are a number of activities the States will be required to undertake under the program regulations that can be initiated now. States could utilize grant funds for such activities as: Gathering data necessary to begin identifying aquifers to be protected as existing or potential sources of drinking water, initiating inventories of the practices and facilities covered by the program regulations, and initiating an assessment of shallow injection wells in the States. States wishing to make immediate application for grant awards should contact the Regional Office for guidance in developing its program and preparing an application.

Section 1443(b) of the Act states that no grant shall be made to an eligible State for any period beginning 2 years after the award of the State's initial grant, unless the State has assumed and is maintaining primary enforcement responsibility within the State. This 2-year period begins from the State's initial grant award even though the program regulations have not been promulgated.

ECONOMIC ASSESSMENTS.—The economic assessments of the underground injection control program and the grant program regulations will be discussed in the preamble to the underground injection control program regulations.

Dated: October 4, 1978.

DOUGLAS M. COSTLE,
Administrator.

40 CFR part 35 is amended as follows:

1. By adding new §§ 35.650 through 35.680 to read as follows:

STATE UNDERGROUND WATER SOURCE PROTECTION PROGRAM GRANTS

Sec.

35.680-2 Reports.

AUTHORITY: Secs. 1443, 1450 of Pub. L. 93-523, as amended by Pub. L. 95-190, 88 Stat. 1660 (42 U.S.C. 300j-2, 300j-9).

STATE UNDERGROUND WATER SOURCE PROTECTION PROGRAM GRANTS

§ 35.650 Scope and purpose.

Sections 35.650 through 35.680 of this subpart establish regulations and procedures for providing program grant funds to eligible States for the development and administration of underground water source protection programs as authorized by section 1443(b) of the Safe Drinking Water Act as amended. This subpart supplements EPA general grant regulations and procedures set forth in part 30 of this chapter.

§ 35.653 Definitions.

Other terms used herein shall have the same meaning as prescribed in the definition of terms contained in part 129 of this chapter. As used in this subpart, except as otherwise specifically provided:

(a) "Act" means the Public Health Service Act as amended by the Safe Drinking Water Act as amended (42 U.S.C. 300f et seq.).

(b) "Allotment" means the sum reserved for each State from funds appropriated by Congress. An allotment is not an absolute entitlement of funds for any State; rather, it represents the amount for which an eligible State may apply.

(c) "State" means one of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Northern Marianas.

(d) "Eligible State" means: (1) A State listed by the Administrator under section 1422(a) as requiring an underground injection control program or (2) a State that (i) requests to be included on the list within the time specified by the Administrator, (ii) declares its intent to implement a program in accordance with section 1421 of the Act, and (iii) is subsequently listed by the Administrator as requiring an underground injection control program.

(e) "Underground water source protection program" means a program for: (1) Adopting and enforcing a program which meets the requirements of section 1421 of the Act and regulations in part 129 of this chapter and (2) keeping records and making reports required by section 1422(b)(A)(ii) of the Act.

V 43 / 198 OCT 12 78 UM1

§ 35.655 Determination of allotments.

§ 35.655-1 Allotments for fiscal years 1979 and 1980.

(a) An allotment of funds among the States for fiscal years 1979 and 1980 shall be made on the basis of the following factors and weights:

(1) The population of each State in proportion to the total population of all States (weight factor: 10 percent). Population statistics are drawn from table 10 of the Statistical Abstract of the United States, 1977.

(2) The geographical area of each State in proportion to the total geographical area of all States (weight factor: 10 percent). Geographical area statistics are drawn from table 327 of the Statistical Abstract of the United States, 1977.

(3) The number of injection practices in the State in proportion to the total number of injection practices in all States (weight factor: 80 percent). Injection practices included are: Industrial and municipal waste disposal wells, brine disposal and injection for recovery, mining sites, gas storage reservoirs, and manufacturing and service establishments. Statistics on these practices may be obtained from:

(i) National Environmental Reserch Center Report, "Review and Assessment of Deep Well Injection of Hazardous Waste," 1975.

(ii) Interstate Oil Compact Commission, "Water Problems Associated With Oil Production in the United States," Oklahoma City, Okla.

(iii) U.S. Department of the Interior, Bureau of Mines, "Mineral Industry Services, Director of Company Producing Salts in U.S.," 1976.

(iv) American Gas Association 25th Annual Report, "the Underground Storage of Gas in the United States and Canada," December 31, 1975.

(v) U.S. Department of Commerce, Bureau of Census, "Statistical Abstract of the United States," 1977.

(vi) EPA staff documents, "Development of the Methodology for Listing States" (with supporting data).

(b) The allotted amounts will be rounded to the nearest $100.

§ 35.655-2 Allotments for fiscal year 1981 and subsequent fiscal years. [Reserved]

§ 35.656 Determination of reallotments.

(a) Funds allotted to eligible States shall not be available for reallotment unless so determined by the Administrator. Subject to the limitations contained in the Appropriations Act, allotments and any subsequent reallotments for any eligible State which has not applied for or which indicates it will not assume primary enforcement responsibility for the underground injection conrol program may be used in part, or in whole, by the Administrator to implement underground injection control programs in those States.

(b) As soon as possible after determination of State eligibility under § 35.659, but in no event later than April 1, the Administrator will reallot remaining unobligated funds to eligible States except as provided in § 35.656(a). The reallotment will include sums allotted to States which do not meet the eligibility criteria in § 35.659 and other funds made available by reduction of grant amounts under § 35.666. The funds will be reallotted on the basis of the factors and weights set forth in § 35.655-1(a).

(c) From the funds reallotted, the Administrator will issue advices of allowance to the Regional Administrators for reallotments to eligible States.

(d) Any funds remaining unobligated at the end of a fiscal year will be included in the reallotments for the next fiscal year.

§ 35.657 Rate of Federal assistance.

(a) The rate of Federal assistance furnished to a grantee shall not exceed 75 percent of the allowable costs of the EPA approved State's underground water source protection program as described in § 35.670, annual State program grant plan.

(b) The actual amount of each eligible State's grant shall be determined of the grant award by the Regional Administrator, but the actual amount received in any fiscal year shall not exceed the total of the State's allotment and any reallotments.

§ 35.659 Eligibility for grant award.

§ 35.659-1 Fiscal years 1979 and 1980.

For fiscal years 1979 and 1980, only States which are listed by the Administrator as requiring underground injection control programs within a specified time will be eligible for grants.

§ 35.659-2 Fiscal year 1981.

For fiscal year 1981, only those States that are listed by the Administrator during fiscal year 1980 will be eligible for grants.

§ 35.659-3 Fiscal year 1982 and subsequent fiscal years. [Reserved]

§ 35.660 Limitation on grant award.

(a) Notwithstanding any other provision of this part, the Regional Administrator may not approve an application of an eligible State for its initial grant to carry out an underground water source protection program unless the Regional Administrator determines that the eligible State: (1) Has established, or will establish, within 2 years from the date of the grant award, an underground water source protection program as defined in section 1421 of the Act, and (2) will assume within that 2-year period and maintain primary enforcement responsibility for underground water source protection within the State in accordance with part 129 of this chapter.

(b) Notwithstanding any other provision of this chapter, no grant shall be made to an eligible State for any period beginning 2 years after the award of the eligible State's initial grant, unless the eligible State has assumed and is maintaining primary enforcement responsibility within the State in accordance with part 129 of this chapter.

(c) No grant will be awarded if the Regional Administrator determines that Federal grant funds will supplant rather than supplement non-Federal funding committed to underground water source protection efforts by the eligible State.

(d) Beginning in fiscal year 1980, State programs funded under the Act will be part of the State/EPA agreement and the State/EPA agreement must be completed before grant award.

§ 35.661 A-95 clearinghouse review.

All States applying for program grants shall comply with all applicable requirements of the Office of Management and Budget (OMB) Circular A-95 in accordance with § 30.305 of this chapter.

§ 35.662 Allowable costs.

Allowable costs shall be determined in accordance with § 30.705 of this chapter by showing that the costs are reasonable and proper for carrying out an approved grant program. No funds shall be used (a) to routinely study and monitor aquifers, (b) to assist States in undertaking broad geological studies, (c) to conduct geological studies in support of sole source aquifer petitions, or (d) to support State data management activities other than those required under § 35.670-2(h).

§ 35.664 Budget period.

The budget period for the grant shall be the Federal fiscal year, except that the budget period for the fiscal year 1979 grant may be for a period less than the Federal fiscal year.

§ 35.666 Reduction of grant amount.

(a) If the Regional Administrator's annual performance evaluation reveals that the grantee will fail, or has failed, to achieve the expected outputs or to perform the activities described in the grantee's approved program, the grant amount may be reduced by the approved estimated program cost to produce such outputs under § 35.670. These funds will be available for allotment or reallotment in accordance with §§ 35.655 and 35.656.

(b) A State shall be notified prior to any reduction in the amount of Federal support. This notification shall include the reasons for reduction and, if appropriate, what steps the State must take to regain funding.

§ 35.670 Annual State program grant plan.

§ 35.670-1 General.

(a) Any State applying for a grant shall prepare and submit to the Regional Administrator for approval a program plan pursuant to § 35.670. The program plan shall address the requirements of these regulations and the narrative requirements of part IV of the grant application.

(b) The application for an initial grant shall include a letter from the Chief Executive of the State stating that the State (1) has established or intends to establish an underground water source protection program within 2 years from the award of the initial grant, and (2) has or intends to assume within such 2-year period primary enforcement responsibility in accordance with the requirements of part 129 of this chapter. For fiscal year 1979, the letter may be submitted within 6 months of the initial grant award. For subsequent fiscal years, the letter shall be included with the initial application.

(c) The Chief Executive shall designate a State agency to administer the grant and coordinate the State program with EPA. However, an eligible State may allocate funds among State agencies as it deems appropriate, as long as such allocations are generally proportional to their respective share of the approved plan for conducting the State underground water source protection program.

§ 35.670-2 State program grant preparation.

Each State applying for a grant shall prepare, in consultation with the Regional Administrator, an annual program plan as follows:

(a) The State plan shall identify and describe the underground injection control problem in the State.

(b) The State plan shall relate the utilization of available resources—both Federal and non-Federal—to the achievement of expected outputs and shall include:

(1) A summary of the current year's work program and resources.

(2) A description by program element (see § 35.670-4) of the State's proposed work program for the coming year, including:

(i) A description within each program element of the work to be performed and outputs to be achieved (with identification of estimated related costs and work years to be expended) and the relationship to the State plan;

(ii) An identification of all funds, both Federal and non-Federal, which the State anticipates receiving during the fiscal year for the work program; and

(iii) The proposed distribution of funds and output achievement responsibilities among State and sub-State entities.

(c) A plan must be included for the detailed identification and designation of aquifers or their portions as underground sources of drinking water.

(d) The initial State submission for the first grant must include a brief description of the State's existing program with associated resources.

(e) The program plan shall describe how the planned accomplishments address the underground injection problem in the State and are consistent with the objectives of the Act and EPA's annual program guidance.

(f) The State permit plan required under part 129 of this chapter.

(g) A plan for regulating any other practices which may be regulated by either rule or permit as specified in part 129 of this chapter.

(h) A plan for the completion of inventories and assessment of underground injection facilities.

§ 35.670-3 State program grant submission.

Each State applying for a grant shall submit an annual program as follows:

(a) For fiscal year 1979, each eligible State must submit an application which includes the annual State program plan as required by § 35.670 of this subpart to the Regional Administrator no later than March 1, 1979.

(b) For fiscal year 1980 and subsequent fiscal years, an eligible State must submit a draft State program plan in accordance with § 35.670 to the Regional Administrator no later than June 1.

(c) For fiscal year 1980 and subsequent fiscal years, an eligible State must submit a final application, which includes the annual State program plan submission, to the Regional Administrator no later than August 1.

§ 35.670-4 Major program elements and outputs.

(a) The following program elements are appropriate for carrying out underground water source protection programs. Other program elements may be included in the State program plan if the State can demonstrate that such other program element is appropriate for the conduct of its underground water source protection program. For an eligible State with primary enforcement responsibility, the State must include program elements satisfying the requirements of part 129 of this chapter. Information on each major program element shall be presented in summary form and shall include:

(1) *Inventories and assessment of underground injection facilities.* Plan and schedule of activities for the completion of inventories and assessment of underground injection facilities within the timeframe set forth in part 129 of this chapter. Subsequent to the initial grant, an updated summary inventory of underground injection facilities of the preceding calendar year must be provided to EPA prior to December 1 of each fiscal year.

(2) *Administration and program development.* Planning, development, and coordination of program activities for the management of an underground water source protection program including general program direction and supervision; development of staffing and budget needs; and development and evaluation of basic underground water source protection legislation, regulations, policies, and public information.

(3) *Technical assistance.* Surveys of underground injection operations on an established schedule with written survey reports to the well injection operators; technical assistance to well injection operators, water suppliers, and others regarding the plan, design, operation, maintenance, treatment, quality control, and assessment of underground injection operations.

(4) *Plan review and approval.* A plan review and approval activity for new or proposed underground injection operations, and modifications or additions to existing underground injection operations.

(5) *Permit approval.* An activity for the issuance and review of underground injection control permits and for the inspection or monitoring of permits issued.

(6) *Training.* An activity for the training of State personnel.

(7) *Enforcement.* An activity for the establishment and implementation of procedures for the administrative and judicial enforcement of State underground water source protection responsibilities.

(8) *Data management.* A data management activity for input into the centralized EPA system to maintain essential records needed to conduct the underground water source protection program and for its submission to EPA, including the maintenance of an inventory for all underground injection operations.

(9) *Surveillance and investigation.* The maintenance of a coordinated activity with State and local agencies to detect, investigate, and report suspected ground water contamination cases.

V 4 3 / 1 9 8 0 C 1 2 7 8

(b) *Public participation and information.* Each State program plan shall include a program element for public participation. This element shall include a public education and information program to encourage informed public involvement in the planning and operation of the federally assisted State underground water source protection program, provision for consultation with the public in significant decisions in program plan implementation, and a system for handling citizen complaints. The State shall prepare a summary of its responses to public comment following significant decisions in the course of program plan implementation and shall make these available to the public. The State's public participation activities shall be summarized in the State's annual report. In determining the adequacy of the public participation program element proposed by the State, the Regional Administrator shall be guided by the requirements of part 25 of this chapter.

§ 35.670–5 Regional Administrator's action on grant application.

(a) Each eligible State's final grant application shall be approved or disapproved by the Regional Administrator within 45 days of receipt.

(b) Should the Regional Administrator's review of the final grant application reveal that the planned accomplishments are not consistent with the level of funding requested, the Regional Administrator shall negotiate with the eligible State. Funds released by this procedure will be available for use in accordance with § 35.656.

§ 35.675 Assignment of personnel.

Upon written request of a State agency, the Regional Administrator may assign EPA personnel to such State agency, under section 1450(c) of the Act upon such terms and conditions as the Administrator may establish.

§ 35.680 Program evaluation and reports.

§ 35.680–1 Program evaluation.

Program evaluation is primarily a grantee responsibility and should be continuous throughout the budget period. It is EPA policy to limit EPA evaluation to that which is necessary for responsible management of regional and national efforts to control underground injecton. The Regional Administrator shall conduct at least annually a State performance evaluation which shall include a review and assessment of the State's effectiveness in meeting objectives and outputs in carrying out related activities as set forth in the grantee's approved program. An exit interview will be conducted following the program evaluation to inform the grantee of any preliminary EPA findings and recommendations.

§ 35.680–2 Reports.

The Regional Administrator shall prepare a summary of evaluation findings. The report prepared by the Regional Administrator should outline deficiencies in program performance through the time of the evaluation. When appropriate, the report shall contain recommendations for upgrading current State operations as well as provide guidance for the development of the upcoming grant application. The grantee shall be allowed 15 working days from the date of receipt to concur with or comment on the findings and recommendations.

2. By revising §§ 35.400 through 35.425 to read as follows:

Subpart B—Program Grants

Sec.
35.400 Purpose.
35.400–1 Air pollution control agency grant awards.
35.400–2 Water pollution control program grant awards.
35.400–3 Public water system supervision program grant awards.
35.400–4 Solid and hazardous waste management program support grant awards.
35.400–5 [Reserved]
35.400–6 Underground water source protection program grant awards.
35.403 Authority.
35.404 Annual guidance.
35.405 Criteria for evaluation of program objectives.
35.410 Evaluation of agency performance.
35.415 Financial status report.
35.420 Payment.
35.425 Federal and grantee program support.

AUTHORITY: Secs. 105, 301(b), Clean Air Act, as amended (42 U.S.C. 1857(c) and 1857(g)); secs. 106, 501, Federal Water Pollution Control Amendments of 1972 (33 U.S.C. 1256 and 1361); secs. 1443, 1450 of the Safe Drinking Water Act (42 U.S.C. 300j-2 and 300j-9); secs. 3011, 4007, 4008, 4009, Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6931, 6947, 6948, and 6949).

Subpart B—Program Grants

§ 35.400 Purpose.

This subpart establishes and codifies policy and procedures for air pollution, water pollution, public water system supervision, solid and hazardous waste management support, and underground water source protection program grants, and supplements the EPA general grant regulations and procedures (part 30 of this chapter). These grants are intended to aid programs for air pollution control, water pollution control, public water system supervision, solid and hazardous waste management, and underground water source protection at the State, interstate, or local level.

§ 35.400–1 Air pollution control agency grant awards.

Grants may be awarded to air pollution control agencies for the planning, development, establishment, improvement, and maintenance of programs for the prevention and control of air pollution or implementation of national primary and secondary ambient air quality standards in accordance with the applicable implementation plan.

§ 35.400–2 Water pollution control program grant awards.

Grants may be awarded to State and interstate water pollution control agencies to assist them in developing or administering programs for the prevention, reduction, and elimination of water pollution, including enforcement directly or through appropriate State law enforcement officers or agencies.

§ 35.400–3 Public water system supervision program grant awards.

Grants may be awarded to State agencies to assist them in developing or administering public water system supervision programs.

§ 35.400–4 Solid and hazardous waste management program support grant awards.

Grants may be awarded to agencies having responsibility for solid and hazardous waste management to assist them in developing and implementing solid and hazardous waste management work programs.

§ 35.400–5 [Reserved]

§ 35.400–6 Underground water source protection program grant awards.

Grants may be awarded to eligible States to assist them in developing and administering programs to protect underground sources of drinking water by adoption and enforcement of a program which meets the requirements of sections 1421 and 1422(b)(1)(A)(ii) of the Safe Drinking Water Act and regulations promulgated under these sections.

§ 35.403 Authority.

This subpart is issued under sections 105 and 301(b) of the Clean Air Act, as amended (42 U.S.C. 1857(c) and 1857(g)); sections 106 and 501 of the Federal Water Pollution Control Amendments of 1972 (33 U.S.C. 1256 and 1361); section 1443 and 1450 of the Safe Drinking Water Act (42 U.S.C. 300j-2 and 300j-9); sections 3011, 4007, 4008, and 4009 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6931, 6947, 6948, and 6949).

§ 35.404 Annual guidance.

The Environmental Protection Agency will develop and disseminate annual guidance to be used by the grantee to structure air pollution, water pollution, public water system supervision, solid and hazardous waste management, and underground water source protection programs for the coming Federal fiscal year. The guidance will contain a statement of the national strategy, including national objectives and national priorities for the year, together with planning figures for Federal program grant assistance based on the EPA budget approved by the President. The annual guidance will be disseminated each year as soon as practicable during the month of February.

§ 35.405 Criteria for evaluation of program objectives.

(a) Programs set out in the application and submitted in accordance with these regulations shall be evaluated in writing by the Regional Administrator to determine:

(1) Consistency and compatibility of objectives and expected results with EPA national and regional priorities in implementing purposes and policies of the Clean Air Act, the Federal Water Pollution Control Act, the Safe Drinking Water Act, or the Resource Conservation and Recovery Act.

(2) Feasibility of achieving objectives and expected results in relation to existing problems, past performance, program authority, organization, resources, and procedures.

(b) Approval of the program developed under § 35.526 (air) or § 35.565 (water pollution) or § 35.626 (public water system supervision) or § 35.718 (solid and hazardous waste management) or § 35.650 (underground water source protection) shall be based on the extent to which the applicant's program satisfies the above criteria.

§ 35.410 Evaluation of agency performance.

(a) A performance evaluation shall be conducted at least annually by the Regional Administrator and the grantee to provide a basis for measuring progress toward achievement of the approved objectives and outputs described in the work program. The evaluation shall be consistent with the requirements of § 35.538 for air pollution control agencies, § 35.570 for water pollution control agencies, § 35.626(d) for public water system supervision agencies, § 35.744 for solid and hazardous waste management agencies, and § 35.680 for underground water source protection agencies.

(b) The Regional Administrator shall prepare a written report of the annual evaluation. The grantee shall be allowed 15 working days from the date of receipt to concur with or comment on the findings.

§ 35.415 Financial status report.

Within 90 days after the end of each budget period, the grantee must submit to the Regional Administrator an annual report of all expenditures (Federal and non-Federal) which accrued during the budget period. Beginning in the second quarter of any succeeding budget period, grant payments may be withheld under § 30.615-3 of this chapter until this report is received.

§ 35.420 Payment.

Grant payments will be made in accordance with § 30.615 of this chapter. Notwithstanding the provisions of § 30.345 of this chapter, the first grant payment subsequent to grant award may include reimbursement of all allowable costs incurred from the beginning of the approved budget period: *Provided,* That monthly costs incurred from the beginning of the budget period to the date of grant award do not exceed the level of costs incurred in the last month of the prior budget period.

§ 35.425 Federal and grantee program support.

(a) For purposes of establishing the amount of resources which will be committed by the agency to particular budget categories or program elements under § 35.527 (air), § 35.561(a) (water), § 35.626-1 (public water system supervision), or § 35.670-2 (underground water source protection), Federal and grantee financial contributions shall be considered as combined sums, and shall not be separately identified for each budget category or program element. For purposes of this subpart, and under § 30.700(a) of this chapter, all project expenditures by the grantee shall be deemed to include the Federal share.

(b) A grantee may not unilaterally reduce the non-Federal share of project costs. In the event of a significant proposed or actual reduction in the non-Federal contribution, the Regional Administrator must consider a reduction in the Federal share or an increase to the Federal percentage.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

PART 630—PRECONSTRUCTION PROCEDURES

Traffic Safety in Highway and Street Work Zones

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule

SUMMARY: The Federal Highway Administration (FHWA) is issuing this document in order to provide guidance and establish procedures to assure that adequate consideration is given to motorists, pedestrians, and construction workers on all Federal-aid construction projects.

EFFECTIVE DATE: October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. James Daves, 202-426-4847, Office of Highway Operations; or Mrs. Kathleen S. Markman, 202-426-0790, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are Monday to Friday from 7:45 a.m. to 4:15 p.m. e.t.

SUPPLEMENTARY INFORMATION: On September 20, 1976, the FHWA issued an advance notice of proposed rulemaking requesting suggestions for increasing safety in construction zones on Federal-aid Highways, 49 FR 41712 (September 23, 1976). Comments on this advance notice were received and evaluated. On August 22, 1977, the FHWA issued a notice of proposed rulemaking which proposed to require States to prepare process management plans (PMP) assuring that adequate consideration is given to the safety of motorists, construction workers, and pedestrians in construction zones on Federal-aid highway projects, 42 FR 42877 (August 25, 1977), FHWA docket No. 76-14. Comments on this proposal were received from 35 States and State highway departments, 12 organizations and associations including the Center for Auto Safety, 3 counties, 7 cities, 6 individuals, 1 supplier, and 2 contractors. While in several instances different persons within the same State or organization replied to the notice, the consolidated comments of the State or organization were counted only once in the above summary. The principal subjects of the comments are discussed below.

Process Management Plan

FHWA proposed to require a process management plan (PMP), a developed action plan which when put into effect would detail the procedures that a State highway agency utilizes to assure that adequate provisions are made for the safety of motorists, pedestrians, and workmen on Federal-aid highway construction projects. Thirty-six comments specifically addressed this topic. Twenty-eight replies opposed the PMP approach due to the facts that it would cause a further proliferation of redtape, increase the cost of their operations and impose additional workloads as well as the fact that these entities already have in effect sufficient construction zone procedures, standards, manuals, processes, etc., already addressing this matter. Two other commenters stated that the PMP guidelines were too rigid. Two other commenters stated that the PMP guidelines need to be spelled out, or that model guidelines need to be developed. Two commenters indicated that review and approval of the PMP should be by the FHWA Division Administrator only; while two other commenters felt that review and approval of the PMP should extend to locals, including city and county representatives. The FHWA has considered these comments and has concluded that the PMP requirement may very well result in additional redtape and unnecessary paperwork (in violation of the provisions of 23 U.S.C. 101(e)) which will impede rather than further the objective of improved highway safety. However, beneficial elements of the PMP, including the traffic control plan have been retained.

Traffic Control Plan

FHWA proposed to require a traffic control plan (TCP), a detailed plan for handling traffic through a specific highway or street work zone or project. Fifty-seven comments specifically addressed this proposal. Sixteen replies were opposed to the requirement of a TCP for the various reasons that it did not provide for flexibility, would increase costs, did not provide for subcontractor involvement and would increase redtape. Nine replies supported the TCP requirement. Six replies indicate that the TCP requirement is not really needed and that current manuals suffice. Eleven commenters indicated that the TCP should be prepared by the contractor. One commenter indicated that the section stating, in part, that a "TCP should be developed" should be stricken. Five replies indicated that the TCP requirements should be decided by the States. One commenter indicated that the requirements for TCP were too restrictive. Two commenters indicated that the TCP should not be required in the plans, specifications, and estimates (P.S. & E.). Four replies suggested that a State-prepared TCP would transfer tort liability from the contractor to the State. The FHWA does not consider that there is any provision of the regulation which will inherently alter the current relationship between the States and their contractors in this regard. Furthermore, the issue of tort liability is one of local law to be determined by the courts at the State level. To the extent it can be addressed at the national level, FHWA notice 5080.76 entitled Traffic Safety in Highway and Street Work Zones,[1] published concurrently with this rule, does deal with the issue of tort liability. Two commenters indicated that the TCP requirements were too vague or not specific enough. In response to there comments, FHWA has modified the TCP requirement to indicate that the TCP is mandatory for all projects, that it be included in the P.S. & E., and that it be consistent with part VI of the manual on uniform traffic control devices (MUTCD). The final rule further provides that the TCP may range in scope from a very detailed TCP designed solely for a specific project to a reference to standard plans, a section of the MUTCD, or a standard highway agency manual. The final rule further indicates that under certain conditions the contractors may develop and use their own TCP's "if the highway agency and FHWA find that these plans are as good or better than those provided in the P.S. & E." One commenter suggested, in part, that the TCP should contain a standard list of important elements of consideration for traffic planning for each construction zone. Most of the suggested elements are those included in part VI of the MUTCD. Additional guidance has been and will continue to be provided to FHWA field offices by the Office of Highway Operations. This commenter further suggested that the FHWA "provide a synthesis of guiding principles required by the States for use in their formulation of TCP's." In this regard, FHWA intends to develop a handbook which would contain guidance on how and when to use traffic control devices in construction zones and to issue it separately in a combined package with the part of the MUTCD pertaining to construction zone safety by approximately January 1979.

Responsible Person

FHWA proposed to require the contracting agency to designate a person

[1]The FHWA notice 5080.76 entitled Traffic Safety in Highway and Street Work Zones is available for inspection and copying as prescribed in 49 CFR Part 7, App. D.

at the project level who would have the primary responsibility and sufficient authority for assuring that the TCP and other safety aspects of the contract were effectively administered. Forty-seven comments specifically addressed this proposal. Seven replies opposed the requirement that a person be specifically assigned to administer the TCP. Most of those opposed to the responsible person (RP) requirement indicated that the project engineer should be the RP. One reply opposed the concept of one-person-only responsibility. Six commenters suggested that the project engineer, and no one else, is the logical person to be the RP. Six commenters were opposed to notifying the FHWA division administrator who the RP would be. Ten commenters supported the RP concept. Five commenters suggested that the TCP section be modified so that the RP is not liable for the acts of the contractor. One reply indicated that the duties of the RP should be detailed. One reply indicated that the training qualifications of the RP should be outlined. Six commenters indicated that the FHWA division administrator should be notified of the identity of the RP prior to the beginning of construction rather than at the time when "concurrence in award" is requested. One commenter suggested that the notification of the identity of the RP should be mandatory rather than permissive. Some of those commenters supporting and some opposing the requirement of a RP indicated that the RP should be named by title only. One commenter suggested that the RP be the contractor's employee. Two indicated that the RP should be specified.

In response to the above comments, the section dealing with the RP has been slightly revised. The final rule requires that designation of a qualified person and provides that while the project engineer or resident engineer may have this responsibility, another person should be assigned at the project level to handle traffic control on a full-time basis on large complex projects. The training of RP is covered in 23 CFR 630.1010(d) of the final rule. The final rule indicates in 23 CFR 630.1010(b) that the RP will have "the primary responsibility and sufficient authority for assuring that the TCP and other safety aspects of the contract are effectively administered."

Pay Items

FHWA's proposal indicated that the P.S. & E. should include unit pay items for providing, installing, moving, replacing, maintaining, and cleaning traffic control devices required by the TCP and that the lump-sum method of payment should be used only to cover very small projects, projects of short duration, contingency, and general items. Thirty-seven comments specifically addressed this proposal. Six replies supported the requirement of unit pay items. Ten replies opposed the unit pay item provision. Those opposed to this provision indicated that it would be impossible or difficult to document, would create additional work, and would require additional people in order to comply. One commenter supported a system of unit price per day as the pay item. One commenter suggested that the unit price item provision should only be used for special devices. Eight commenters supported the lump-sum pay method. Seven commenters indicated that the pay method should be left to the discretion of the State. Two commenters opposed the entire pay item section. Two commenters opposed the lump-sum pay procedures. One of these commenters suggested, in part, that "FHWA's failure to require P.S. & E. inclusion of separable pay items for traffic control will therefore reinforce the tendency of contractors to treat traffic control as incidental to their 'real' contract work." In response to these comments, the final rule indicates that the P.S. & E. should indicate unit pay items. It also indicates that suitable force account procedures may be utilized for traffic control items. The lump-sum method of payment should be used only to cover very small projects, projects of short duration, contingency, and general items. Payment for traffic control items as incidental to other items of work is discouraged.

Training

FHWA's proposal indicated, in essence, that the State highway agency should train persons responsible for traffic control. Twenty comments specifically addressed this proposal. Fourteen replies supported the training provision. One reply indicated that the State should have this responsibility while two other replies indicated that the State should not have this responsibility. One commenter suggested that the requirement for training be mandatory rather than permissive. One commenter suggested that the training section be omitted altogether. One commenter suggested that FHWA require the States to certify to FHWA that every person whose actions affect construction zone safety has received adequate training. In response to these comments, the final rule makes mandatory the requirement that all persons "responsible for the development, design, implementation, and inspection of traffic control" be adequately trained.

Emergency Plans

FHWA's proposal indicated that each "State should develop contingency plans for each project which could be implemented in the event of emergencies, major backups, or disasters." Seventeen comments specifically addressed this proposal. Four replies indicated that standard techniques and procedures are adequate so that emergency plans are unnecessary. Eight replies opposed this provision. One commenter supported this provision for some projects only. One commenter indicated that the provision was good but that more detail was needed. One commenter indicated that this could be handled in a general manner rather than for each project. Two commenters indicated that the contractor should be involved in the emergency plan development. In response to these comments, the specific provision for the emergency plan has been omitted from the final rule. It is FHWA's view that emergency plans should be included as an element of the TCP on appropriate projects, and that a separate requirement is not necessary in this regard.

Process and Review Evaluation

FHWA's proposal indicated, in part, that "a review team consisting of State central office design and construction personnel should review randomly selected active projects throughout the State for the purpose of assessing the effectiveness of the PMP," and that accident data should be utilized to promote highway safety. Nineteen comments specifically addressed this proposal. Three replies supported the provision, while three replies opposed the provision. Three commenters supported the recommendation that a State central office member be included on the review team. One commenter suggested that the provision for random reviews be mandatory rather than permissive. Two commenters supported the utilization of accident data. Two commenters supported the concept of accident data utilization for major projects only. Three commenters opposed the accident data provision. One commenter suggested that the accident data provision should be mandatory rather than permissive. One of the above commenters suggested, in essence, that required inspection and surveillance techniques be part of every TCP. In response to the above comments, FHWA has revised this provision to make mandatory the review of randomly selected projects and the analysis and use of construction zone accident data to correct deficiencies on individual projects and to improve the content of future traffic control plans.

V 43 / 198 0 C 12 78

FHWA also received 11 miscellaneous comments regarding the proposal primarily addressing the guidance already provided by the MUTCD, the major and minor revision requirements as well as FHWA supervision. The various revisions indicated in the final rule respond to most of these comments. A General Accounting Office (GAO) report entitled, "Highway Construction Zone Safety—Not Yet Achieved," B-164497(3), dated December 23, 1977, indicated that GAO's review of construction zone safety in seven States revealed widely varying safety deficiencies at the 26 sites visited. From this and other information obtained during the review, GAO concluded that project-level officials of the State highway agencies and FHWA field offices have not been devoting enough attention to safety. The GAO believes that this has happened because these officials did not always know how to make the worksites safe, did not fully appreciate the need for safety in construction zones or placed higher priority on other matters. The GAO then recommended that the Secretary of Transportation require the Federal Highway Administrator to:

1. Revise the manual on uniform traffic control devices (MUTCD) to include specific guidance on how and when to use traffic control devices in construction zones.

2. Require training to help insure that Federal and State officials are made aware of the importance of construction zone safety and have the capability to plan, implement, and inspect these safety measures.

3. Establish field office inspection procedures to identify hazardous conditions and insure that they are corrected.

FHWA's specific comments on the GAO recommendations are as follows:

1. Because of the type and amount of guidance needed on how and when to use traffic control devices in construction zones, FHWA believes it would be inappropriate to include such detailed specifics in the MUTCD. Rather, FHWA proposes to develop a handbook that would contain such guidance and to issue it separately in a combined package with the part of the MUTCD that pertains to construction zone safety. Recognizing the lengthy process involved in developing such a handbook, issuance is not expected until January 1979.

2. FHWA has developed a number of training packages and has presented them to numerous State and Federal employees. However, it acknowledges that all personnel responsible for safety in highway work zones have not received enough of such training. Accordingly, FHWA intends to require, by the following rule, that persons responsible for development, design, implementation (particularly those persons responsible for traffic control at the project level), shall be properly trained to carry out these responsibilities. FHWA will also assure that all of its affected personnel are properly trained.

3. FHWA prefers not to mandate uniform inspection procedures for nationwide application because conditions vary so widely among the States and because FHWA considers its field offices fully capable of recognizing unique conditions and reacting to them appropriately or taking positive action on them, as necessary. It does, however, propose to take two actions on this recommendation: (a) Put still greater emphasis on safety in highway work zones by increasing the personal involvement of its top management, and (b) expand its headquarters oversight of regional office procedures for review of divisional inspection procedures.

In consideration of the foregoing, the Federal Highway Administration hereby adds a new subpart J to part 630, chapter I of title 23, Code of Federal Regulations as set forth below.

Issued on October 5, 1978.

KARL S. BOWERS,
Federal Highway Administrator.

Subpart J—Traffic Safety in Highway and Street Work Zones

Sec.
630.1002 Purpose.
630.1004 Background.
630.1006 Policy.
630.1008 Implementation.
630.1010 Contents of the agency procedures.

AUTHORITY: 23 U.S.C. 109(b), 109(d), 315, and 402(a); 23 CFR 1.48(b).

Subpart J—Traffic Safety in Highway and Street Work Zones

§ 630.1002 Purpose.

The purpose of this regulation is to provide guidance and establish procedures to assure that adequate consideration is given to motorists, pedestrians, and construction workers on all Federal-aid construction projects.

§ 630.1004 Background.

Part VI of the manual on uniform traffic control devices (MUTCD)[1] sets forth basic priniciples and prescribes standards for the design, application, installation, and maintenance of the various types of traffic control devices for highway and street construction, maintenance operation, and utility work. The manual cannot address in depth the variety of situations that occur in providing traffic control in work zones. Although agencies responsible for traffic control and work area protection have attempted to develop some guidelines, a coordinated and comprehensive effort to develop greater uniformity is desirable. National reviews have shown that more attention is needed to insure that the MUTCD is properly implemented on all highway projects.

§ 630.1006 Policy.

It is the policy of the Federal Highway Administration that each highway agency shall develop and implement procedures consonant with the requirements of this regulation that will assure the safety of motorists, pedestrians, and construction workers on Federal-aid highway construction projects. The procedures shall be consistent with the provisions of the MUTCD. Highway agencies should be encouraged to implement these procedures for non-Federal-aid projects and maintenance operations as well.

§ 630.1008 Implementation.

The FHWA Division Administrator shall review and approve the highway agency's implementation of its procedures at appropriate intervals. The FHWA shall take appropriate action to assure that the highway agency's procedures are being followed and achieve the results intended. Major revisions in established procedures shall be submitted to the FHWA Division Administrator for information.

§ 630.1010 Contents of the agency procedures.

The agency's procedures shall include, but not necessarily be limited to the following:

(a) *Traffic control plan (TCP).* (1) A traffic control plan is a plan for handling traffic through a specific highway or street work zone or project. These plans may range in scope from a very detailed TCP designed solely for a specific project, to a reference to standard plans, a section of the MUTCD, or a standard highway agency manual. The degree of detail in the TCP will depend on the project complexity and traffic interference with construction activity.

(2) Traffic control plans shall be developed for all projects and be included in plans, specifications, and estimates (P.S. & E.'s) and shall be consistent with part VI of the MUTCD.

(3) The scope of the TCP should be determined during planning and design phases of a project.

(4) Provisions may be made to permit contractors to develop their own TCP's and use them if the highway agency and FHWA find that these plans are as good as or better than those provided in the P.S. & E.

[1] The MUTCD is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. It is incorporated by reference at 23 CFR 625.3.

(b) *Responsible person.* The highway agency shall designate a qualified person at the project level who will have the primary responsibility and sufficient authority for assuring that the TCP and other safety aspects of the contract are effectively administered. While the project or resident engineer may have this responsibility, on large complex projects another person should be assigned at the project level to handle traffic control on a full-time basis.

(c) *Pay items.* The P.S. & E. should include unit pay items for providing, installing, moving, replacing, maintaining, and cleaning traffic control devices required by the TCP. Suitable force account procedures may be utilized for traffic control items. Lump-sum method of payment should be used only to cover very small projects, projects of short duration, contingency, and general items. Payment for traffic control items as incidental to other items of work should be discouraged.

(d) *Training.* All persons responsible for the development, design, implementation, and inspection of traffic control shall be adequately trained.

(e) *Process review and evaluation.* (1) A review team consisting of appropriate highway agency personnel shall annually review randomly selected projects throughout its jurisdiction for the purpose of assessing the effectiveness of its procedures. The agency may elect to include an FHWA representative as a member of the team. The results of this review are to be forwarded to the FHWA Division Administrator for his review and approval of the highway agency's annual traffic safety effort.

(2) Construction zone accidents and accident data shall be analyzed and used to continually correct deficiencies which are found to exist on individual projects, and to improve the content of future traffic control plans.

PART 563e—COMMUNITY REINVESTMENT

Community Reinvestment Act of 1977; Implementation

AGENCIES: Board of Governors of the Federal Reserve System, Comptroller of the Currency, Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board.

ACTION: Final regulations.

SUMMARY: These regulations implement the Community Reinvestment Act of 1977, and are intended to encourage regulated financial institutions to fulfill their continuing and affirmative obligation to help meet the credit needs of their communities, including low- and moderate-income neighborhoods, consistent with safe and sound operation of such institutions. The regulations provide that the Agencies will assess institutions' records in doing so, and take those records into account when evaluating certain applications by those institutions.

EFFECTIVE DATE: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerauld Kluckman, Board of Governors of the Federal Reserve system: 202-452-3401; Alan Herlands, Comptroller of the Currency: 202-447-1177; Roger Hood, Federal Deposit Insurance Corporation: 202-389-4628; Nancy Feldman, Federal Home Loan Bank Board: 202-377-6443.

SUPPLEMENTARY INFORMATION: On page 29918 of the FEDERAL REGISTER of July 11, 1978, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board (collectively referred to as "the Agencies") proposed regulations to implement the Community Reinvestment Act of 1977 ("the CRA"). It is the purpose of the CRA, which was enacted as Title VIII of the Housing and Community Development Act of 1977 (Pub. L. 95-128), to require that, in connection with their examination of institutions under their jurisdiction, the Agencies encourage each institution to help meet the credit needs of its local community. The CRA further requires the Agencies to assess each institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the institution, and to take that record into account in its evaluation of any application by the institution for a charter, deposit insurance, branch or other deposit facility, office relocation, merger, or acquisition of bank or savings institution shares or assets. The Agencies have received numerous comments regarding the proposed regulations and have revised the regulations after considering the concerns of the commenters.

The Agencies' final regulations, which are presented together for convenience, are identical in their substantive provisions, but contain technical and procedural variations. An explanation of the comments regarding each provision of the regulation, and of changes in those provisions, is set forth below.

PURPOSE: Commenters suggested that the proposed language, that a purpose of the regulation is to "require institutions to demonstrate that their offices serve the convenience and needs of their communities," was not within the scope of the CRA. While this language is contained in the findings of the CRA, this section has been revised to reflect more closely the operating language of the statute.

DELINEATION OF COMMUNITY

Most of the comments received on the delineation of entire community section indicated that the proposed section did not make the responsibilities of institutions clear. In particular, there was confusion about the relationship between an institution's "entire" community and its "local" community or communities. Both terms are used in the statute. The section has been revised to clarify the delineation process. Each institution's entire community will consist of one or more local communities, and guidelines are given on how to define the local community or communities. As suggested by commenters, the revised regulation requires, instead of encourages, the use of maps to delineate local communities to insure a clear and understandable delineation.

The regulation contains two suggested bases for delineating local communities: One takes boundaries from existing areas such as counties, and the other defines an area known as the effective lending territory. Both types of areas are subject to certain adjustments.

In general, a local community based on existing boundaries should be no larger than an SMSA or non-SMSA county, which are areas that the Agencies have used to approximate relevant markets for the purpose of evaluating the competitive effects of mergers and holding company acquisitions. If an institution has offices in more than one such area, it will have more than one local community. When an institution has an office near the boundary of an SMSA or county, it should include those portions of adjacent counties that it serves. In rural areas, a local community may encompass more than one county, but, generally, institutions should not use States or regions of States to delineate local communities. A small institution that serves an area smaller than an SMSA or county may define its community to be a part of the SMSA or county.

A local community based on the effective lending territory of an institution with one office will be a roughly circular area around that office which includes the area in which the institution makes a substantial portion of its loans. Where an institution has several offices serving the same local area, the local community should be drawn to include the areas where each office makes a substantial portion of its loans and all other areas equally close to any of the offices. Use of existing boundaries is still encouraged where practicable.

Communities defined on either basis can be adjusted for other factors such as significant geographic barriers. In addition, subsection (b)(3) permits the use of any other local area to serve as a basis for delineating a local community.

Several comments suggested that low- and moderate-income neighborhoods should be defined. The Agencies are undertaking a program, using the Department of Housing and Urban Development definition of low- and moderate-income, to assist their examiners in identifying areas that may be low- and moderate-income neighborhoods. Further guidance will be contained in the Agencies' examination procedures which will be publicly available on or about November 6, 1978. Institutions are expected to be generally aware of low- and moderate-income neighborhoods within their community, without undertaking extensive research.

The Agencies received a variety of comments regarding the inclusion of off-premises electronic depository facilities in the term "office." In general, the Agencies believe that unshared facilities should be included for purposes of delineating an institution's community. However, the revised regulation provides that an electronic deposit facility, the use of which is shared with another financial institution, need not be taken into account in delineating local communities unless the Agency determines otherwise.

COMMUNITY REINVESTMENT ACT STATEMENT

Many commenters found the requirements of the proposed Community Reinvestment act Statement ("CRA Statement") section unclear. To clarify what is required of institutions, that section has been divided into three: one provides for the adoption and availability of CRA Statements; another sets forth requirements for public files; and a third requires a public notes of the availability of the CRA Statement and files.

Revised subsection (a) of the CRA Statement section now requires that a CRA Statement be prepared for each local community which an institution serves. The same CRA Statement is to be used for every office within one local community.

Several commenters felt that the list which now appears in subsection (b)(2) of the statement section indicated an Agency preference for types of credit which were not covered by the purposes of the CRA. This list is intended by the Agencies only as an example of the degree of specificity that an institution should use to describe the types of credit which it is prepared to extend within its local community.

Subsection (c) describes the additional material the Agencies encourage each institution to include as part of its CRA Statement. A new provision encouraging each institution to describe its efforts to ascertain community credit needs, including communication with community members, has been added. New subsections (e) and (f) clarify the manner in which an institution must make its CRA Statement available to the public.

FILES OF PUBLIC COMMENTS AND RECENT CRA STATEMENTS

This new section clarifies requirements formerly contained in section (f) of the CRA Statement section in the proposed regulation. Some commenters recommended that the comment file not be made public, but the Agencies believe that it may contribute to more effective community comment. In response to other comments received by the Agencies with regard to the file requirement, the new section now provides that only signed, written comments that specifically relate to any CRA Statement or to an institution's performance in helping to meet the credit needs of its community must be retained. Materials should not be included that are harmful to any person's good name or reputation (including employees of the financial institution or its supervisory agency), or relate only to the particulars of any person's credit application. This provision does not permit the institution to exclude materials from the file merely because they are critical of the institution's CRA Statement or performance. An institution may include its own responses to public comments in the file. New subsection (c) indicates where the files must be maintained by the institution.

PUBLIC NOTICE

This new section combines in one place the materials required to be included in a public notice. To simplify preparation of the notice, this section now prescribes a standard public notice to be used by all institutions. An institution may reprint this notice as a poster or flyer to be place in its lobby. The notice requirement may also be satisfied by making the CRA Statement, which includes the notice, available as a brochure in the lobby.

The final two paragraphs of the notice embody one outcome of the Agencies' decision to review their procedures for giving notice of applications to the public. They will inform members of the public that they may request to be informed of applications covered by the CRA made by the institution or its holding company.

A major purpose of the sections on the CRA Statement, files and notice is to promote a dialogue between the institutions and their communities regarding community credit needs. Obtaining community members' views would not, as some commenters suggested, alter management's role in arriving at credit decisions.

Many commenters thought that the requirements of these sections would place an undue burden on institutions, and in response to the Agencies' request for specific comments many commenters recommended that institutions with assets of less than $10 million, or less than $25 million, or institutions in rural areas, be exempted from the CRA Statement requirements. However, the Agencies concluded that these requirements are essential to effective implementation of the CRA and are not unduly burdensome.

ASSESSING THE RECORD OF PERFORMANCE

Several commenters felt that the assessment would only be made in connection with an application. This section states that the Agencies will assess an institution's record of performance "in connection with its examination of" the institution. Although the examination may be divided into several parts, which may be conducted at different times and cover different areas of an institution's operations, the Agencies examine institutions on a regular schedule.

The proposed regulations indicated that the Agency would review an institution's "marketing and lending policies and practices to determine whether they are designed to help meet those needs and assess its record of performance." Commenters felt that this implied a recordkeeping requirement or a broad policy of interference with an instutition's business decisions. Neither was intended, and the phrase has been deleted to avoid confusion. The assessment will focus on the factors enumerated in this section and will be based on the institution's existing records in addition to the CRA Statement and files.

Some commenters believed that institutions attempting to comply with the CRA would be forced to make imprudent credit decisions. However, the Agencies will always conduct their assessments giving consideration to the safety and soundness of the institution.

Several comments suggested that the factors should be made more specific or given specific weights or developed into an explicit scoring system. The factors have been revised slightly to clarify them, but the Agencies believe that specific weights or scoring systems would not adequately address the diversity of institutions and communities amd would prevent rather than encourage thoughtful response to community needs. No weighting scheme is intended by the order in which factors are presented.

Factors (a) through (c) related to an institution's record of communication with its community and its efforts to gear its policies to community needs. Subsection (a) combines (a) and (b) from the proposed regulation. The revision makes it clear that while communication about credit services is encouraged, the institution is responsible for the establishment of its policies. An institution may find it helpful to communicate with local goverment officials, housing and community development agencies, and representatives of business groups and community organizations. Subsection (b) (former (c)) includes not only advertising but communication with real estate brokers and activities such as mortgage

V 4 3 / 1 9 8 0 C 1 2 7 8

counselling. Subsection (c) (former (e)) deals with board participation in its institution's consideration of the CRA. Commenters suggested that the regulation not specify the role of the board. The Agencies believe, however, that the CRA presents issues at a level of importance that warrant the board's attention.

Subsections (d) through (f) and, in part, (g) deal with evidence of practicies which are or may be in conflict with the purpose of the CRA. Subsection (d) has been revised to read "practices intended to discourage applications" to make clear that the Agencies wish the list of credit in the CRA Statement to be made in good faith. An institution will not be adversely assessed if general credit conditions make it temporarily impossible for the institution to offer listed credits.

Subsection (e) (former (f)) involves an assessment of an institution's lending patterns to see if the institution discriminates between geographic areas or excludes qualified borrowers from low- and moderate-income neighborhoods. It will be based on records required under Federal Reserve Board Regulations B and C and other existing data, and, in appropriate cases, Agency research. Proposed subsection (1), which addressed the issue of displacement, has been eliminated as commenters found it confusing. However, in connection with their assessments, the agencies will look favorably upon efforts by institutions to assist existing residents in neighborhoods undergoing a process of reinvestment and change.

Subsection (f) (former (j)) refers chiefly to violations of the Equal Credit Opportunity Act and the Fair Housing Act. Some commenters felt that "violations" could be determined only by a court. However, the Agencies believe evidence of violations found by examiners would be a material consideration in evaluating applications covered by the CRA. Subsection (g) (former (k)) refers in part to closing offices, and the failure to provide usual services—such as not accepting mortgage applications—at certain branches, where the effects are contrary to the purposes of the CRA.

Subsection (g), in part, and subsections (h) through (j) refer to efforts by an institution to meet the credit needs of its community. Subsection (g) refers in part to opening offices in low- and moderate-income neighborhoods and providing services, such as bilingual staff, in response to the needs of particular neighborhoods. Subsection (h) (former (g)) includes institution participation in the HUD Community Development Block Grant program and other efforts sponsored by Federal or State agencies, as well as development programs of local governments and private groups.

Subsection (i) (former (h)) lists the types of loans which the Agencies believe are most directly related to the purposes of the CRA. A record of providing these types of credit to all segments of its community consistent with safe and sound operation will be viewed favorably by the Agencies.

Several commenters were opposed to subsection (j) (former (l)). However, their comments were aimed chiefly at discriminatory policies of certain institutions in granting conventional versus Government insured mortgages. Several commenters were in favor of (j) and the Agencies believe that the programs can be used to meet the credit needs of many communities. Subsection (k) (former (m)) makes it clear that an institution's service to its community will be assessed with consideration given to its size and financial condition; legal restrictions on permissible activities, interest rates, and branches; and other factors which affect its ability to help meet community credit needs.

Several commenters suggested possible additional factors for agency consideration. Subsection (l) (former (n)) indicates that the list of factors is not exhaustive. The Agencies wish to encourage innovative responses to community needs and will be ready to consider favorably any efforts to meet community credit needs.

Several commenters suggested that State and municipal bond purchases should be included as a factor. Implementation of the CRA is not intended to discourage the purchase of these bonds, or secondary mortgage market securities, or to impair or disrupt capital flows from surplus to deficit regions, or to impose any other general priority in the use of an institution's available funds. Therefore, the Agencies will not give special consideration to the purchase of State and municipal bonds unless they further special purposes in the community, such as the construction or rehabilitation of low- and moderate-income housing or other neighborhood or community development, or are issued by municipalities or other local public financing units which do not have access to the capital markets.

Effect on Applications

This section is somewhat different from Agency to Agency to allow for procedural variations. However, each of the Agencies has added a statement that an institution's record of performance may be the basis for denying an application. When that record has been considered to be a material factor in evaluating an application, the Agencies will discuss the institution's record of performance in its statement announcing its decision.

Several commenters felt that the Agencies should make their examination of institutions' records public on a regular basis. However, the Agencies believe that this would impair the objective appraisal of an institution's performance required in the examination process.

Related Regulations

Elsewhere in this issue of the Federal Register each Agency is publishing separately revised regulations regarding notice of applications to the public and other procedural matters. These are in addition to the provisions of the final paragraph of the required Public Notice.

The Federal Reserve Board, Comptroller of the Currency and the Federal Deposit Insurance Corporation have also published in this issue of the Federal Register an interpretation of the regulation which exempts institutions which conduct only correspondent banking, trust company, or clearing agency business. Further, the FDIC has published an interpretation which clarifies the regulation with respect to insured branches of foreign banks.

The Agencies find that publication of the amendments for the full 30-day period specified in 5 U.S.C. 553(d) would not be in the public interest because the regulations are required by statute to take effect on November 6, 1978.

Accordingly, the Agencies hereby amend 12 CFR parts 25, 228, 345, 563e to read as set forth below.

Interpretations

25.101 National banks performing limited services.

Authority: Community Reinvestment Act of 1977 (Title VIII, Pub. L. 95-128, 91 Stat. 1147 (12 U.S.C. 2901 et seq.)); 12 U.S.C. 21, 22, 26, 27, 30, 36, 161, 215, 215a, 481, 1814, 1816, 1828(c).

§ 25.1 Authority.

The Comptroller of the Currency ("Comptroller") issues this part under the authority of the Community Reinvestment Act of 1977 (title VIII of Pub. L. 95-128), and under provisions of title 12 of the United States Code authorizing the Comptroller to charter national banks (secs. 21, 22, 26, and 27), to issue certificates to national banks to commence or resume the business of banking (secs. 1814, 1816), to consider applications from national banks to relocate a main office (sec. 30) or to establish or relocate a branch office (sec. 36), to consider applications for a merger, consolidation, acquisition of assets, or assumption of liabilities where the acquiring, assuming, or resulting bank is a national bank (secs. 215, 215a, 1828(c)), to require reports of condition (sec. 161), and to conduct examinations of national banks (sec. 481).

§ 25.2 Purposes.

The purposes of this regulation are to encourage national banks to help meet the credit needs of their local community or communities; to provide guidance to national banks as to how the Comptroller will assess the records of national banks in satisfying their continuing and affirmative obligations to help meet the credit needs of their local communities, including low- and moderate-in come neighborhoods, consistent with the safe and sound operation of those banks; and to provide for taking into account those records in connection with certain applications.

§ 25.3 Delineation of community.

(a) Each national bank shall prepare, and at least annually review a delineation of the local community or communities that comprise its entire community, without excluding low- and moderate-income neighborhoods. Maps shall be used to portray community delineations. The reasonableness of the delineations will be reviewed by national bank examiners.

(b) A local community consists of the contiguous areas surrounding each office or group of offices, including any low- and moderate-income neighborhoods in those areas. More than one office of a national bank may be included in the same local community. Unless the Comptroller determines otherwise, a community delineation need not take account of an off-premises electronic facility that receives deposits for more than one depository institution. In preparing its delineation, a national bank may use any one of the three bases set forth below.

(1) Existing boundaries such as those of standard metropolitan statistical areas (SMSA's) or counties in which the bank's office or offices are located may be used to delineate a local community. Where appropriate, portions of adjacent areas should be included. The bank may make adjustments in the case of areas divided by State borders or significant geographic barriers, or areas that are extremely large or of unusual configuration. In addition, a small bank may delineate those portions of SMSA's or counties it reasonably may be expected to serve.

(2) A national bank may use its effective lending territory, which is defined as that local area or areas around each office or group of offices where it makes a substantial portion of its loans and all other areas equidistant from its offices as those areas. Adjustments such as those indicated in paragraph (b)(1) of this section may be made.

(3) A national bank may use any other reasonably delineated local area that meets the purposes of the Community Reinvestment Act (CRA) and does not exclude low- and moderate-income neighborhoods.

§ 25.4 Community Reinvestment Act statement.

(a) Within 90 days after the effective date of this part, the board of directors of each national bank shall adopt a Community Reinvestment Act (CRA) statement for each delineated community.

(b) Each CRA statement shall include at least the following:

(1) The delineation of the local community;

(2) A list of specific types of credit within certain categories, such as residential loans for one to four dwelling units, residential loans for five dwelling units and over, housing rehabilitation loans, home improvement loans, small business loans, farm loans, community development loans, commercial loans, and consumer loans, that the bank is prepared to extend within the local community; and

(3) A copy of the Community Reinvestment Act notice provided for in § 25.6.

(c) Each national bank is encouraged to include the following in each CRA statement:

(1) A description of how its current efforts, including special credit-related programs, help to meet community credit needs;

(2) A periodic report regarding its record of helping to meet community credit needs; and

(3) A description of its efforts to ascertain the credit needs of its community, including efforts to communicate with members of its community regarding credit services.

(d) Each national bank's board of directors shall review each CRA statement at least annually and shall act upon any material change made in the interim at its first regular meeting after the change. Such actions shall be noted in its minutes.

(e) Each current CRA statement shall be readily available for public inspection:

(1) At the head office of the bank; and

(2) At each office of the bank in the local community delineated in the statement, except off-premises electronic deposit facilities.

(f) Copies of each current CRA statement shall be provided to the public upon request. A national bank may charge a fee not to exceed the cost of reproduction.

§ 25.5 Files of public comments and recent CRA statements.

(a) Each national bank shall maintain files that are readily available for public inspection consisting of:

(1) Any signed, written comments received from the public within the past 2 years that specifically relate to any CRA statement or to the bank's performance in helping to meet the credit needs of its community or communities;

(2) Any responses to the comments that the bank wishes to make; and

(3) Any CRA statements in effect during the past 2 years.

(b) These files shall not contain any comments or responses that reflect adversely upon the good name or reputation of any person other than the bank or publication of which would violate specific provisions of law.

(c) These files shall be maintained by each national bank as follows:

(1) All materials at the head office; and

(2) Those materials relating to each local community at a designated office in that community.

§ 25.6 Public notice.

Within 90 days after the effective date of this part, each national bank shall provide, in the public lobby of each of its offices other than off-premises electronic deposit facilities, the public notice set forth below. Bracketed material shall be used only by banks having more than one local community. The last item shall be included only if the bank is a subsidiary of a holding company that is not prevented by statute from acquiring additional banks.

Community Reinvestment Act Notice

The Federal Community Reinvestment Act (CRA) requires the Comptroller of the Currency to evaluate our performance in helping to meet the credit needs of this community, and to take this evaluation into account when the Comptroller decides on certain applications submitted by us. Your involvement is encouraged.

You should know that:

● You may obtain our current CRA statement for this community in this office.

V 4 3 / 1 9 8 0 OCT 12 1978 UM

[Current CRA statements for other communities served by us are available at our head office, located at ————.]

● You may send signed, written comments about our CRA statement[s] or our performance in helping to meet community credit needs to (title and address of bank official) and to the Regional Administrator of National Banks (address). Your letter, together with any response by us, may be made public.

● You may look at a file of all signed, written comments received by us within the past 2 years, any responses we have made to the comments, and all CRA statements in effect during the past 2 years at our office located at (address). [You also may look at the file about this community at (name and address of designated office).]

● You may ask to look at any comments received by the Regional Administrator of National Banks.

● You also may request from the Regional Administrator of National Banks an announcement of applications covered by the CRA filed with the Comptroller.

● We are a subsidiary of (name of holding company), a bank holding company. You may request from the Federal Reserve Bank of (city, address) an announcement of applications covered by the CRA filed by bank holding companies.

§ 25.7 Assessing the record of performance.

In connection with its examination of a national bank, the Comptroller shall assess the record of performance of the bank in helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the bank. The Comptroller will review the bank's CRA statement(s) and any signed, written comments retained by the bank or the Comptroller. In addition, the Comptroller will consider the following factors in assessing a bank's record of performance:

(a) Activities conducted by the bank to ascertain the credit needs of its community, including the extent of the bank's efforts to communicate with members of its community regarding the credit services being provided by the bank;

(b) The extent of the bank's marketing and special credit-related programs to make members of the community aware of the credit services offered by the bank;

(c) The extent of participation by the bank's board of directors in formulating the bank's policies and reviewing its performance with respect to the purposes of the Community Reinvestment Act;

(d) Any practices intended to discourage applications for types of credit set forth in the bank's CRA statement(s);

(e) The geographic distribution of the bank's credit extensions, credit applications, and credit denials;

(f) Evidence of prohibited discriminatory or other illegal credit practices;

(g) The bank's record of opening and closing offices and providing services at offices;

(h) The bank's participation, including investments, in local community development and redevelopment projects or programs;

(i) The bank's origination of residential mortgage loans, housing rehabilitation loans, home improvement loans, and small business or small farm loans within its community, or the purchase of such loans originated in its community;

(j) The bank's participation in governmentally insured, guaranteed, or subsidized loan programs for housing, small businesses, or small farms;

(k) The bank's ability to meet various community credit needs based on its financial condition and size, and legal impediments, local economic conditions, and other factors; and

(l) Other factors that, in the Comptroller's judgment reasonably bear upon the extent to which a national bank is helping to meet the credit needs of its entire community.

§ 25.8 Effect on applications.

(a) In considering an application for: (1) The establishment of a domestic branch or other facility with the ability to accept deposits; (2) the relocation of the main office or a branch office; or (3) a merger or consolidation with or the acquisition of assets or assumption of liabilities of a federally insured bank, the Comptroller will take into account, among other factors, the applicant's record of performance.

(b) In considering an application for conversion from a State bank charter to a national bank charter, the Comptroller will assess the applicant's record of performance, and will take into account, among other factors, that record.

(c) Applicants for a national bank charter other than a State bank shall submit a proposed CRA statement when the application is made. In considering the application, the Comptroller will take into account, among other factors, the proposed CRA statement.

(d) In considering an application described in paragraph (a), (b), or (c) of this section, the Comptroller will take into account, among other factors, any views expressed by State or other Federal supervisors of depository institutions or other interested parties, which are submitted in accordance with the Comptroller's procedures set forth in 12 CFR part 5.

(e) A bank's record of performance may be the basis for the denial of an application described in paragraph (a) or (b) of this section. The proposed CRA statement of an applicant for a national bank charter may be the basis for the denial of the application.

INTERPRETATIONS

§ 25.101 National banks performing limited services.

In response to its proposed regulation, 12 CFR 25, to implement the Community Reinvestment Act ("CRA"), the Comptroller of the Currency received several inquiries from institutions that, although they are chartered as banks, do not perform commercial or retail banking services. These institutions serve solely as correspondent banks, or as trust companies, or as clearing agents, and they do not extend credit to the public for their own account. The Comptroller concludes that the CRA is not intended to cover these institutions. It is the purpose of the CRA to require the Comptroller to encourage national banks to meet the credit needs of their local communities. To this end, the Comptroller must assess banks' records of performance and take those records into account in acting on certain applications affecting the banks. The Comptroller believes that these provisions were intended to cover all banks that are in the business of extending credit to the public, including both "wholesale" and "retail" banks. The lending activities of these banks affect the economic health of the communities in which they are chartered. However, the Comptroller believes it would be pointless to encourage or to assess the credit granting record of institutions that are not organized to grant credit to the public in the ordinary course of business, other than as an incident to their specialized operations. Accordingly the term "national bank" as used in the Comptroller's regulation, part 25 (12 CFR Part 25), does not include banks that engage solely in correspondent banking business, trust company business, or acting as a clearing agent.

Dated: October 5, 1978.

JOHN G. HEIMANN,
Comptroller of the Currency.

[6210-01-M]

[Docket No. R-0139; R-0181; Regulation BB]

PART 228—COMMUNITY REINVESTMENT

Sec.
228.1 Authority.
228.2 Purposes.
228.3 Delineation of community.
228.4 Community Reinvestment Act statement.
228.5 Files of public comments and recent CRA statements.
228.6 Public notice.
228.7 Assessing the record of performance.
228.8 Effect on applications.

Sec.
228.100 Applicability of the Community Reinvestment Act to certain special purpose banks.

AUTHORITY: Community Reinvestment Act of 1977 (title VIII, Pub. L. 95-128, 91 Stat. 1147 (12 U.S.C. 2901 et seq.)); 12 U.S.C. 321, 325, 1814, 1816, 1828, 1842.

§ 228.1 Authority.

The Board of Governors of the Federal Reserve System issues this part to implement the Community Reinvestment Act (12 U.S.C. 2901 et seq.). The regulations comprising this part are issued under the authority of the Community Reinvestment Act and under the provisions of the United States Code authorizing the Board to conduct examinations of State-chartered banks that are members of the Federal Reserve System (12 U.S.C. 325), to conduct examinations of bank holding companies and their subsidiaries (12 U.S.C. 1844), and to consider applications for domestic branches by State member banks (12 U.S.C. 321), for Federal deposit insurance in connection with applications for membership in the Federal Reserve System by State banks (12 U.S.C. 321, 1814, 1816), for merger in which the resulting bank would be a State member bank (12 U.S.C. 1828), and for formation of, acquisitions of banks by, and mergers of, bank holding companies (12 U.S.C. 1842).

§ 228.2 Purposes.

The purposes of this regulation are to encourage State member banks to help meet the credit needs of their local community or communities; to provide guidance to State member banks as to how the Board will assess the records of State member banks in satisfying their continuing and affirmative obligations to help meet the credit needs of their local communities, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of those banks; and to provide for taking into account those records in connection with certain applications.

§ 228.3 Delineation of community.

(a) Each State member bank shall prepare, and at least annually review, a delineation of the local community or communities that comprise its entire community, without excluding low- and moderate-income neighborhoods. Maps shall be used to portray community delineations. The reasonableness of the delineations will be reviewed by Federal Reserve System examiners.

(b) A local community consists of the contiguous areas surrounding each office or group of offices, including any low- and moderate-income neighborhoods in those areas. More than one office of a State member bank may be included in the same local community. Unless the Board determines otherwise, a community delineation need not take account of an off-premises electronic facility that receives deposits for more than one depository institution. In preparing its delineation, a bank may use any one of the three bases set forth below.

(1) Existing boundaries such as those of standard metropolitan statistical areas (SMSA's) or counties in which the bank's office or offices are located may be used to delineate a local community. Where appropriate, portions of adjacent areas should be included. The bank may make adjustments in the case of areas divided by State borders or significant geographic barriers, or areas that are extremely large or of unusual configuration. In addition, a small bank may delineate those portions of SMSA's or counties it reasonably may be expected to serve.

(2) A bank may use its effective lending territory, which is defined as that local area or areas around each office or group of offices where it makes a substantial portion of its loans and all other areas equidistant from its offices as those areas. Adjustments such as those indicated in paragraph (b)(1) of this section may be made.

(3) A bank may use any other reasonably delineated local area that meets the purposes of the Community Reinvestment Act (CRA) and does not exclude low- and moderate-income neighborhoods.

§ 228.4 Community Reinvestment Act statement.

(a) Within 90 days after the effective date of this subpart, the board of directors of each State member bank shall adopt a Community Reinvestment Act (CRA) statement for each delineated local community.

(b) Each CRA statement shall include at least the following:

(1) The delineation of the local community;

(2) A list of specific types of credit within certain categories, such as residential loans for 1- to 4-dwelling units, residential loans for 5 dwelling units and over, housing rehabilitation loans, home improvement loans, small business loans, farm loans, community development loans, commerical loans, and consumer loans, that the bank is prepared to extend within the local community; and

(3) A copy of the Community Reinvestment Act notice provided for in § 228.6.

(c) Each State member bank is encouraged to include the following in each CRA statement:

(1) A description of how its current efforts, including special credit-related programs, help to meet community credit needs;

(2) A periodic report regarding its record of helping to meet community credit needs; and

(3) A description of its efforts to ascertain the credit needs of its community, including efforts to communicate with members of its community regarding credit services.

(d) Each State member bank's board of directors shall review each CRA statement at least annually and shall act upon any material change made in the interim at its first regular meeting after the change. Such actions shall be noted in its minutes.

(e) Each current CRA statement shall be readily available for public inspection:

(1) At the head office of the bank; and

(2) At each office of the bank in the local community delineated in the statement, except off-premises electronic deposit facilities.

(f) Copies of each current CRA statement shall be provided to the public upon request. A State member bank may charge a fee not to exceed the cost of reproduction.

§ 228.5 Files of public comments and recent CRA statements.

(a) Each State member bank shall maintain files that are readily available for public inspection consisting of:

(1) Any signed, written comments received from the public within the past 2 years that specifically relate to any CRA statement or to the bank's performance in helping to meet the credit needs of its community or communities;

(2) Any responses to the comments that the bank wishes to make; and

(3) Any CRA statements in effect during the past 2 years.

(b) These files shall not contain any comments or responses that reflect adversely upon the good name or reputation of any person other than the bank, or publication of which would violate specific provisions of law.

(c) These files shall be maintained by each State member bank as follows:

(1) All materials at the head office; and

(2) Materials relating to each local community, at a designated office in that community.

§ 228.6 Public notice.

Within 90 days after the effective date of this part, each State member bank shall provide, in the public lobby of each if its offices other than off-premises electronic deposit facilities, the public notice set forth below. Bracketed material shall be used only by banks having more than one local community. The last item in this notice shall be included only if the

V 4 3 / 1 9 8 0 C 1 2 7 8

bank is a subsidiary of a holding company that is not prevented by statute from acquiring additional banks.

COMMUNITY REINVESTMENT ACT NOTICE

The Federal Community Reinvestment Act (CRA) requires the Federal Reserve Board to evaluate our performance in helping to meet the credit needs of this community, and to take this evaluation into account when the Board decides on certain applications submitted by us. Your involvement is encouraged.

●You should know that:

●You may obtain our current CRA statement for this community in this office. [Current CRA statements for other communities served by us are available at our head office, located at (address).]

You may send signed, written comments about our CRA statement[s] or our performance in helping to meet community credit needs to (title and address of State member bank official) and to Community Reinvestment Officer, Federal Reserve Bank of ——— (address). Your letter, together with any response by us, may be made public.

●You may look at a file of all signed, written comments received by us within the past 2 years, any responses we have made to the comments, and all CRA statements in effect during the past 2 years at our office located at (address). [You also may look at the file about this community at (name and address of designated office).]

●You may ask to look at any comments received by the Federal Reserve Bank of ———.

●You also may request from the Federal Reserve Bank of ——— an announcement of applications covered by the CRA filed with the Federal Reserve System.

●We are a subsidiary of (name of holding company), a bank holding company. Applications filed by bank holding companies that are covered by the CRA are included in the Federal Reserve announcement of applications referred to in the previous paragraph.

§ 228.7 Assessing the record of performance.

In connection with its examination of a State member bank, the Board shall assess the record of performance of the bank in helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the bank. The Board will review the bank's CRA statement(s) and any signed, written comments retained by the State member bank or the Federal Reserve Bank. In addition, the Board will consider the following factors in assessing a bank's record of performance:

(a) Activities conducted by the State member bank to ascertain the credit needs of its community, including the extent of the bank's efforts to communicate with members of its community regarding the credit services being provided by the bank;

(b) The extent of the State member bank's marketing and special credit-related programs to make members of the community aware of the credit services offered by the bank;

(c) The extent of participation by the State member bank's board of directors in formulating the bank's policies and reviewing its performance with respect to the purposes of the Community Reinvestment Act;

(d) Any practices intended to discourage applications for types of credit set forth in the State member bank's CRA statement(s);

(e) The geographic distribution of the State member bank's credit extensions, credit applications, and credit denials;

(f) Evidence of prohibited discriminatory or other illegal credit practices;

(g) The State member bank's record of opening and closing offices and providing services at offices;

(h) The State member bank's participation, including investments, in local community development and redevelopment projects or programs;

(i) The State member bank's origination of residential mortgage loans, housing rehabilitation loans, home improvement loans, and small business or small farm loans within its community, or the purchase of such loans originated in its community;

(j) The State member bank's participation in governmentally-insured, guaranteed, or subsidized loan programs for housing, small businesses or small farms;

(k) The State member bank's ability to meet various community credit needs based on its financial condition and size, and legal impediments, local economic conditions and other factors; and

(l) Other factors that, in the Board's judgment, reasonably bear upon the extent to which a State member bank is helping to meet the credit needs of its entire community.

§ 228.8 Effect on Applications.

(a) In considering any application

(1) For membership in the Federal Reserve System where membership would confer Federal deposit insurance on a bank,

(2) By a State member bank for the establishment of a domestic branch or other facility that would be authorized to receive deposits,

(3) By a State member bank for the relocation of a domestic branch,

(4) For merger, consolidation, acquisition of assets or assumption of liabilities if the acquiring, assuming, or resulting bank is to a State member bank,

(5) To become a bank holding company, and

(6) By a bank holding company to acquire ownership or control of shares or assets of a bank, or to merge or consolidate with any other bank holding company,

the Board will take into account, among other factors it considers, the record of performance in meeting the credit needs of its entire community of each applicant bank, each subsidiary bank of an applicant bank holding company, and each proposed subsidiary bank of an applicant under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) that has an officer, director, employee, or significant stockholder associated with the applicant. Those records of performance may be the basis for denying the application.

(b) In the case of each application for membership that would confer Federal deposit insurance, each application by a State member bank, and each application by a bank holding company with a State bank subsidiary, the Board will consider any views expressed by the respective State bank supervisors as to whether the State-chartered banks involved have been helping to meet the credit needs of their entire communities, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of those banks.

(c) At the request of an applicant, the Board will include in its consideration of an application the record of performance of nonbanking subsidiaries of bank holding companies in helping to meet the credit needs of the communities served by affiliated applicant banks or by subsidiary and proposed subsidiary banks of applicants under section 3 of the Bank Holding Company Act (12 U.S.C. 1842).

(d) At the time an application for membership that would confer Federal deposit insurance is made, the proposed State member bank shall submit to the Board a proposed CRA statement conforming to the requirements of § 228.4.

§ 228.100 Applicability of the Community Reinvestment Act to certain special purpose banks.

In response to its proposed regulation BB to implement the Community Reinvestment Act ("CRA") (12 U.S.C. 2901-05) the Board received several inquiries from institutions that, although they are chartered as banks, do not perform commercial or retail banking services. These institutions serve solely as correspondent banks, or as trust companies, or as clearing agents, and they do not extend credit to the public for their own account. The Board concludes that the CRA is not intended to cover these institutions. It is the purpose of the CRA to require the Board to encourage banks to meet the credit needs of their local communities. To this end, the Board must assess banks' records of performance and take those records into account in acting on certain applications affecting the banks. The Board believes that these provisions were intended to cover all banks that are in the business of extending credit to the public including both "wholesale" and "retail" banks. The lending activities of these banks affect the economic health of the communities in which they are chartered. However, the Board believes it would be pointless to encourage or to assess the credit-granting record of institutions that are not organized to grant credit to the public in the ordinary course of business, other than as an incident to their specialized operations. Accordingly the term "State member bank" as used in the Board's Regulation BB (12 CFR 228) does not include banks that engage solely in correspondent banking business, trust company business, or acting as a clearing agent.

By order of the Board of Governors, effective November 6, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

PART 345—COMMUNITY REINVESTMENT

REGULATIONS

Sec.
345.1 Authority.
345.2 Purposes.
345.3 Delineation of community.
345.4 Community Reinvestment Act Statement.
345.5 Files of public comments and recent CRA statements.
345.6 Public notice.
345.7 Assessing the record of performance.
345.8 Effect on applications.

INTERPRETATIONS

345.101 Special purpose banks and trust companies not engaged in lending.
345.102 Insured branches of foreign banks.

AUTHORITY: Community Reinvestment Act of 1977 (title VIII of the Housing and Community Development Act of 1977, Pub. L. 95-128; 91 Stat. 1147, et seq. (12 U.S.C. 2901 note)).

§ 345.1 Authority.

The provisions of this part 345 issued under the Community Reinvestment Act of 1977 (title VIII of the Housing and Community Development Act of 1977, Pub. L. No. 95-128; 91 Stat. 1147, et seq.).

§ 345.2 Purposes.

The purposes of this regulation are to encourage insured State nonmember banks to help meet the credit needs of their local community or communities; to provide guidance to banks as to how the FDIC will assess the records of insured State nonmember banks in satisfying their continuing and affirmative obligations to help meet the credit needs of the local communities, including low- and moderate-income neighborhoods, consistent with safe and sound operation of those banks; and to provide for taking into account those records in connection with certain applications.

§ 345.3 Delineation of community.

(a) Each insured State nonmember bank shall prepare, and at least annually review, a delineation of the local community or communities that comprise its entire community, without excluding low- and moderate-income neighborhoods. Maps shall be used to portray community delineations. The reasonableness of the delineations will be reviewed by FDIC examiners.

(b) A local community consists of the contiguous areas surrounding each office or group of offices, including any low- and moderate-income neighborhoods in those areas. More than one office of a bank may be included in the same local community. Unless the FDIC determines otherwise, a community delineation need not take account of an off-premises electronic facility that receives deposits for more than one depository institution. In preparing its delineation, a bank may use any one of the three bases set forth below:

(1) Existing boundaries such as those of standard metropolitan statistical areas (SMSA's) or counties in which the bank's office or offices are located may be used to delineate a local community. Where appropriate, portions of adjacent areas should be included. The bank may make adjustments in the case of areas divided by State borders or significant geographic barriers, or areas that are extremely large or of unusual configuration. In addition, a small bank may delineate those portions of SMSA's or counties it reasonably may be expected to serve.

(2) A bank may use its effective lending territory, which is defined as that local area or areas around each office or group of offices where it makes a substantial portion of its loans and all other areas equidistant from its offices as those areas. Adjustments such as those indicated in paragraph (b)(1) of this section may be made.

(3) A bank may use any other reasonably delineated local area that meets the purposes of the Community Reinvestment Act (CRA) and does not exclude low- and moderate-income neighborhoods.

§ 345.4 Community Reinvestment Act statement.

(a) Within 90 days after the effective date of this part, the board of directors of each insured State nonmember bank shall adopt a Community Reinvestment Act (CRA) statement for each delineated local community.

(b) Each CRA Statement shall include at least the following:

(1) The delineation of the local community;

(2) A list of specific types of credit within certain categories, such as residential loans for one to four dwelling units, residential loans for 5 dwelling units and over, housing rehabilitation loans, home improvement loans, small business loans, farm loans, community development loans, commercial loans, and consumer loans, that the bank is prepared to extend within the local community; and

(3) A copy of the Community Reinvestment Act notice provided for in § 345.6 below.

(c) Each bank is encouraged to include the following in each CRA statement:

(1) A description of how its current efforts, including special credit-related programs, help to meet community credit needs;

(2) A periodic report regarding its record of helping to meet community credit needs; and

(3) A description of its efforts to ascertain the credit needs of its community, including efforts to communicate with members of its community regarding credit services.

(d) Each bank's board of directors shall review each CRA statement at least annually and shall act upon any material change made in the interim at its first regular meeting after the change. Such actions shall be noted in its minutes.

(e) Each current CRA statement shall be readily available for public inspection:

(1) At the home office of the bank; and

(2) At each office of the bank in the local community delineated in the statement, except off-premises electronic deposit facilities.

(f) Copies of each current CRA statement shall be provided to the public upon request. A bank may charge a fee not to exceed the cost of reproduction.

§ 345.5 Files of public comments and recent CRA statements.

(a) Each insured State nonmember bank shall maintain files that are readily available for public inspection consisting of:

(1) Any signed, written comments received from the public within the past 2 years that specifically relate to any CRA statement or to the bank's performance in helping to meet the credit needs of its community or communities;

(2) Any responses to the comments that the bank wishes to make;

(3) Any CRA statements in effect during the past 2 years.

(b) These files shall not contain any comments or responses that reflect adversely upon the good name or reputa-

V 4 3 / 1 9 8 0 C 1 2 7 8

tion of any person other than the bank, or publication of which would violate specific provisions of law.

(c) These files shall be maintained by each bank as follows:

(1) All materials at the home office; and

(2) Materials relating to each local community, at a designated office in that community.

§ 345.6 Public notice.

Within 90 days after the effective date of this part, each insured State nonmember bank shall provide, in the public lobby of each of its offices other than off-premises electronic deposit facilities, the public notice set forth below. Bracketed material shall be used only by banks having more than one local community. The last item in this notice shall be included only if the bank is a subsidiary of a holding company that is not prevented by statute from acquiring additional banks.

COMMUNITY REINVESTMENT ACT NOTICE

The Federal Community Reinvestment Act (CRA) requires the FDIC to evaluate our performance in helping to meet the credit needs of this community, and to take this evaluation into account when the FDIC decides on certain applications submitted by us. Your involvement is encouraged.

You should know that:

- You may obtain our current CRA statements for this community in this office. [Current CRA statements for other communities served by us are available at our head office, located at ————.]
- You may send signed, written comments about our CRA statements[s] or our performance in helping to meet community credit needs to (title and address of bank official) and to (title and address of the FDIC's regional office). Your letter, together with any responses by us, may be made public.
- You may look at a file of all signed, written comments received by us within the past 2 years, any responses we have made to the comments, and all CRA statements in effect during the past 2 years at our office located at (address). [You also may look at the file about this community at (name and address of designated office).]
- You may ask to look at any comments received by (the FDIC's regional office) at (address).
- You also may request from the Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, D.C. 20429, an announcement of applications covered by the CRA filed with the FDIC.
- We are a subsidiary of (name of holding company), a bank holding company. You may request from the Federal Reserve bank of ———— (address) an announcement of applications covered by the CRA filed by bank holding companies.

§ 345.7 Assessing the record of performance.

In connection with its examination of a bank, the FDIC shall assess the record of performance of the bank in helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the bank. The FDIC will review the bank's CRA statement(s) and any signed, written comments retained by the bank or the FDIC. In addition, the FDIC will consider the following factors in assessing a bank's record of performance:

(a) Activities conducted by the bank to ascertain the credit needs of its community, including the extent of the bank's efforts to communicate with members of its community regarding the credit services being provided by the bank;

(b) The extent of the bank's marketing and special credit-related programs to make members of the community aware of the credit services offered by the bank;

(c) The extent of participation by the bank's board of directors in formulating the bank's policies and reviewing its performance with respect to the purposes of the Community Reinvestment Act;

(d) Any practices intended to discourage applications for types of credit set forth in the bank's CRA statement(s);

(e) The geographic distribution of the bank's credit extensions, credit applications, and credit denials;

(f) Evidence of prohibited discriminatory or other illegal credit practices;

(g) The bank's record of opening and closing offices and providing services at offices;

(h) The bank's participation, including investments, in local community development and redevelopment projects or programs;

(i) The bank's origination of residential mortgage loans, housing rehabilitation loans, home improvement loans, and small business or small farm loans within its community, or the purchase of such loans originated in its community;

(j) The bank's participation in governmentally-insured, guarantee, or subsidized loan programs for housing, small businesses, or small farms;

(k) The bank's ability to meet various community credit needs based on its financial condition and size, and legal impediments, local economic conditions and other factors; and

(l) Other factors that, in the FDIC's judgment, reasonably bear upon the extent to which a bank is helping to meet the credit needs of its entire community.

§ 345.8 Effect on applications.

(a) The assessment of the record of performance under § 345.7 shall be taken into account in connection with applications to the FDIC for: (1) Deposit insurance in connection with a newly chartered bank; (2) approval of an establishment of a domestic branch or other facility with the ability to accept deposits for which an application is required; (3) approval of a relocation of the main office or a branch office; and (4) approval of a merger, consolidation, acquisition of assets, or assumption of liabilities.

(b) The assessment of a bank's record of performance in helping to meet the credit needs of its community may be the basis for denial of an application cited in paragraph (a).

(c) Specific applications.

(1) In considering an application where a State member or national bank will convert into, merge or consolidate with, or have its assets acquired or liabilities assumed by a State nonmember bank, the FDIC will take into account any views expressed by State member or national bank's present State and Federal supervisors.

(2) In considering an application for deposit insurance, the FDIC will take into account the bank's CRA statement.

INTERPRETATIONS

§ 345.101 Special purpose banks and trust companies not engaged in lending.

In response to its proposed regulation part 345 to implement the Community Reinvestment Act ("CRA") (12 U.S.C. 2910-05), the Corporation received several inquiries from institutions that, although they are chartered as banks, do not perform commercial or retail banking services. These institutions serve solely as correspondent banks, or as trust companies, or as clearing agents, and they do not extend credit to the public for their own account. The Corporation conlcudes that the CRA is not intended to cover these institutions. It is the purpose of the CRA to require the Corporation to encourage banks to meet the credit needs of their local communities. To this end, the Corporation must assess banks' records of performance and take those records into account in acting on certain applications affecting the banks. The Corporation believes that these provisions were intended to cover all banks that are in the business of extending credit to the public including both "wholesale" and "retail" banks. The lending activities of these banks affect the economic health of the communities in which they are chartered. However, the Corporation believes it would be pointless to encourage or to assess the credit granting record of institutions that are not organized to grant credit to the public in the ordinary course of business, other than as an incident to their specialized operations. Accordingly the term "insured State nonmember bank" as used in the Corporation's regulation part 345 (12 CFR part 345) does not include banks that engage solely in correspondent banking business, trust company business, or acting as a clearing agent.

§ 345.102 Insured branches of foreign banks.

The Community Reinvestment Act, by its terms, applies to all "insured banks" as that term is defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813). The recently enacted International Banking Act, among other things, amends section 3 of the Federal Deposit Insurance Act to include within the definition of the term "insured bank" any foreign bank having a branch, any deposits in which are insured by the Federal Deposit Insurance Corporation. Accordingly, the Community Reinvestment Act requires the Corporation, in the case of an insured State branch of a foreign bank, to assess the bank's record of meeting the credit needs of its entire community, and to take that record into account in acting upon certain applications that may be filed by any such foreign bank. In light of the purposes of the Community Reinvestment Act, it would appear that the record of the foreign bank branches in the United States should be the record that should be assessed by the Corporation and taken into account in the case of applications, rather than the record of the foreign bank as a whole in meeting the credit needs of its communities abroad. In recognition of the anomaly of assessing and taking into account a foreign bank's foreign operations in meeting the needs of its foreign community, the Corporation will consider only the foreign bank's U.S. operations. Accordingly, the Corporation's regulation part 345, in the case of foreign banks that are "insured banks" within the meaning of section 3 of the Federal Deposit Insurance Act, should be construed as applying only to the insured branches of the foreign banks in the United States. Thus, where § 345.3(a) requires each insured State nonmember bank to prepare and at least annually review a delineation of its local community, in the case of a foreign bank that is an "insured bank", the community or communities delineated should relate to the insured branch or branches within the United States. Similarly, the phrase "office of group of offices" in § 345.3(b) refers to insured branches located within the United States and the phrase "effective lending territory" refers to areas or to an area geographically within the United States. Indeed, the phrase "community" as it appears throughout the regulation is intended to refer to a local geographical area within the boundaries of the United States. In the case of foreign banks that are "insured banks", the requirement in § 345.4 that a bank's board of directors adopt a CRA statement would apply to any officer or local managing board which directs the operations of the insured branch or branches rather than the board of directors itself. Similarly, the requirement in § 345.4(d) for board of directors review of CRA statements and approval of changes may, in the case of foreign banks that are "insured banks" may be satisfied by any officer or local managing board rather than the board of directors itself. In the case of a foreign bank, copies of CRA statements, signed written comments from the public, in response thereto, need not be retained in the head office of the foreign bank, nor would the public notice required by § 345.6 be provided at any office outside of the United States.

By order of the Board of Directors, October 5, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION.

ALAN R. MILLER,
Executive Secretary.

[6720-01-M]

PART 563e—COMMUNITY REINVESTMENT

Sec.
563e.1 Authority.

563e.3 Delineation of community.
563e.4 Community Reinvestment Act statement.
563e.5 Files of public comments and recent CRA statements.
563e.6 Public notice.
563e.7 Assessing the record of performance.
563e.8 Effect on applications.

AUTHORITY: Community Reinvestment Act of 1977 (title VIII of the Housing and Community Development Act of 1977, Pub. L. 95-128; 91 Stat. 1147, et seq. 12 U.S.C. 2901 et seq.); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); secs. 402, 403, 407, and 408, 48 Stat. 1256, 1257, 1260, and 1260a as amended (12 U.S.C. 1725, 1726, 1730, 1730a); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 (Comp. 1071).

§ 563e.1 Authority.

The provisions of this part 563e are issued under the Community Reinvestment Act of 1977 (title VIII of the Housing and Community Development Act of 1977, Pub. L. 95-128, 91 Stat. 1147, et seq.); and under sections 17, 47 Stat. 736, as amended (12 U.S.C. 1437); secs. 402, 403, 407, and 408, 48 Stat. 1256, 1257, 1260, and 1260a as amended (12 U.S.C. 1725, 1726, 1730, 1730a); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Com. 1071).

§ 563e.2 Purposes.

The purposes of this regulation are to encourage insured institutions to help meet the credit needs of their local community or communities; to provide guidance to institutions as to how the Board will assess the records of institutions in satisfying their continuing and affirmative obligations to help meet the credit needs of their local communities, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of those institutions; and to provide for taking into account those records in connection with certain applications.

§ 563e.3 Delineation of community.

(a) Each insured institution shall prepare, and at least annually review, a delineation of the local community or communities that comprise its entire community, without excluding low- and moderate-income neighborhoods. Maps shall be used to portray community delineations. The reasonableness of the delineations will be reviewed by the Board's examiners.

(b) A local community consists of the contiguous areas surrounding each office or group of offices, including any low- and moderate-income neighborhoods in those areas. More than one office of an institution may be included in the same local community. Unless the Board determines otherwise, a community delineation need not take account of an off-premises electronic facility that receives deposits for more than one depository institution. In preparing its delineation, an institution may use any one of the three bases set forth below.

(1) Existing boundaries such as those of standard metropolitan statistical areas (SMSA's) or counties in which the institution's office or offices are located may be used to delineate a local community. Where appropriate, portions of adjacent areas should be included. The institution may make adjustments in the case of areas divided by State borders or significant geographic barriers, or areas that are extremely large or of unusual configuration. In addition, a small institution may delineate those portions of SMSA's or counties it reasonably may be expected to serve.

(2) An institution may use its effective lending territory, which is defined as that local area or areas around each office or group of offices where it makes a substantial portion of its loans and all other areas equidistant from its offices as those areas. Adjustments such as those indicated in paragraph (b)(1) of this section may be made.

(3) An institution may use any other reasonably delineated local area that meets the purposes of the Community Reinvestment Act (CRA) and does not exclude low- and moderate-income neighborhoods.

V 4 3 / 1 9 8 0 C 1 2 7 8

§ 563e.4 Community Reinvestment Act statement.

(a) Within 90 days after the effective date of this part, the board of directors of each institution shall adopt a Community Reinvestment Act (CRA) statement for each delineated local community.

(b) Each CRA statement shall include at least the following:

(1) The delineation of the local community;

(2) A list of specific types of credit within certain categories, such as residential loans for 1- to 4-family dwelling units, residential loans for 5 dwelling units and over, housing rehabilitation loans, home improvement loans, small business loans, farm loans, community development loans, commercial loans, and consumer loans, that the institution is prepared to extend within the local community; and

(3) A copy of the Community Reinvestment Act notice provided for in § 563e.6.

(c) Each institution is encouraged to include the following in each CRA statement:

(1) A description of how its current efforts, including special credit-related programs, help to meet community credit needs;

(2) A periodic report regarding its record of helping to meet community credit needs; and

(3) A description of its efforts to ascertain the credit needs of its community, including efforts to communicate with members of its community regarding credit services.

(d) Each institution's board of directors shall review each CRA statement at least annually and shall act upon any material change made in the interim at its first regular meeting after the change. Such actions shall be noted in its minutes.

(e) Each current CRA statement shall be readily available for public inspection:

(1) At the home office of the institution; and

(2) At each office of the institution in the local community delineated in the statement, except off-premises electronic deposit facilities.

(f) Copies of each current CRA statement shall be provided to the public upon request. An institution may charge a fee not to exceed the cost of reproduction.

§ 563e.5 Files of public comments and recent CRA statements.

(a) Each institution shall maintain files that are readily available for public inspection consisting of:

(1) Any signed, written comments received from the public within the past 2 years that specifically relate to any CRA statement or to the institution's performance in helping to meet the credit needs of its community or communities;

(2) Any response to the comments that the institution wishes to make; and

(3) Any CRA statements in effect during the past 2 years.

(b) These files shall not contain any comments or responses that reflect adversely upon the good name or reputation of any persons other than the institution, or publication of which would violate specific provisions of law.

(c) These files shall be maintained by each institution as follows:

(1) All materials at the home office; and

(2) Those materials relating to each local community at a designated office in that community.

§ 563e.6 Public notice.

Within 90 days after the effective date of this part, each institution shall provide, in the public lobby of each of its offices other than off-premises electronic deposit facilities, the public notice set forth below. Bracketed material shall be used only by institutions having more than one local community.

COMMUNITY REINVESTMENT ACT NOTICE

The Federal Community Reinvestment Act (CRA) requires the Federal Home Loan Bank Board to evaluate our performance in helping to meet the credit needs of this community, and to take this evaluation into account when deciding on certain applications submitted by us. Your involvement is encouraged.

You may obtain our current CRA statement for this community in this office. [Current CRA statements for other communities served by us are available at our home office, located at ————————.]

You may send signed, written comments about our CRA statement[s] or our performance in helping to meet community credit needs to (title and address of institution official) and to (title of officer), Federal Home Loan Bank of ———— (address). Your letter, together with any response by us, may be made public.

You may look at a file of all signed, written comments received by us within the past 2 years, any responses we have made to the comments, and all CRA statements in effect during the past 2 years at our office located at (address). [You also may look at the file about this community at (name and address of designated office).]

You may ask to look at any comments received by the Federal Home Loan Bank of ————.

You also may request from the Federal Home Loan Bank of ———— an announcement of applications covered by the CRA filed with the Federal Home Loan Bank Board.

§ 563e.7 Assessing the record of performance.

In connection with its examination of an institution, the Board shall assess the record of performance of the institution in helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. The Board will review the institution's CRA statement(s) and any signed, written comments retained by the institution or the agency. In addition, the Board will consider the following factors in assessing an institution's record of performance:

(a) Activities conducted by the institution to ascertain the credit needs of its community, including the extent of the institution's efforts to communicate with members of its community regarding the credit services being provided by the institution;

(b) The extent of the institution's marketing and special credit-related programs to make members of the community aware of the credit services offered by the institution;

(c) The extent of participation by the institution's board of directors in formulating the institution's policies and reviewing its performance with respect to the purposes of the Community Reinvestment Act;

(d) Any practices intended to discourage applications for types of credit set forth in the institution's CRA statement(s);

(e) The geographic distribution of the institution's credit extensions, credit applications and credit denials;

(f) Evidence of prohibited discriminatory or other illegal credit practices;

(g) The institution's record of opening and closing offices and providing services at offices;

(h) The institution's participation, including investments, in local community development and redevelopment projects or programs;

(i) The institution's origination of residential mortgage loans, housing rehabilitation loans, home improvement loans, and small business or small farm loans within its community, or the purchase of such loans originated in its community;

(j) The institution's participation in governmentally insured, guaranteed, or subsidized loan programs for housing, small businesses or small farms;

(k) The institution's ability to meet various community credit needs based on its financial condition and size, and legal impediments, local economic conditions and other factors; and

(l) Other factors that, in the Board's judgment, reasonably bear upon the extent to which an institution is helping to meet the credit needs of its entire community.

§ 563e.8 Effect on applications.

(a) Assessments under this part shall be taken into account in determining whether to grant charters, deposit insurance, branches and other deposit

facilities, relocations, mergers, consolidations, acquisitions of assets or assumptions of liabilities, and savings and loan holding company acquisitions. Assessment of an institution's record of performance may be the basis for denying an application.

(b) The Board will take into account any views expressed by State-chartered applicants' State supervisory authorities with regard to whether applicants are helping to meet the credit needs of their communities.

(c) The Board may consider the credit-granting record of any financial subsidiaries of savings and loan holding companies when such holding companies submit to the Board applications listed under paragraph (a) of this section.

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

Title 12—Banks and Banking

CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

PART 5—SUPPLEMENTAL APPLICATION PROCEDURES FOR CHARTERS, DOMESTIC BRANCHES, MERGERS, RELOCATIONS, CONVERSIONS, DOMESTIC OPERATING SUBSIDIARIES, FIDUCIARY POWERS AND TITLE CHANGES

AGENCY: Comptroller of the Currency.

ACTION: Final rule.

SUMMARY: This rule revises procedures of the Office of the Comptroller of the Currency for applications for charters, branches, mergers, and relocations. The changes are prompted by the Community Reinvestment Act of 1977 and regulations issued pursuant to the Act and by suggestions received during the comment period following publication of the proposed regulations to implement the CRA. The goal of these changes is to improve the opportunity for public participation in the decision process on the affected applications listed above.

EFFECTIVE DATE: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Alan Herlands, Director, Regulations Analysis, Office of the Comptroller of the Currency, Washington, D.C. 20219, 202-447-1177.

SUPPLEMENTARY INFORMATION: On July 11, 1978, the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board jointly published proposed regulations to implement the Community Reinvestment Act of 1977. After studying approximately 550 comments received during the comment period following the publication of the proposed regulations, the agencies are adopting final regulations.

Many of the comments on the proposed regulations also suggested amendments to the procedures under which regulated financial institutions apply to their respective regulatory authorities for the following: A charter; deposit insurance; the establishment of a domestic branch or other deposit facility; the relocation of the home office or a branch office; a merger or consolidation; or an acquisition by a holding company.

Each of the agencies is adopting changes to its regulations governing the treatment of these applications so that the agencies' procedures are substantially similar. For each agency, these changes will facilitate public involvement in the decisionmaking process and increase the level of communication between the agencies, the institutions, and the public.

The major changes in the regulations provide for more frequent public notice of a pending application and for interested persons to have greater opportunity to comment on an institution's CRA performance when the institution has an application pending. Specifically, the amendment revises the notice by publication provision of 12 CFR 5.2(b) to expand the one-time publication to publication on the same day of 2 consecutive weeks. In addition to the general requirements of § 5.2(b)(1), a paragraph (b)(2) has been adopted to specifically address applications for mergers and relocations.

There was also concern expressed in the comments to the proposed regulation that procedures be adopted to assure that interested persons have the opportunity to be informed of pending applications in order to comment for CRA purposes. The Comptroller's current regulations provide that such notice will be provided to any person who has requested notification in writing to the Regional Administrator. Currently, this provision applies to all applications other than applications for CBCT branches. The Comptroller is now adopting an identical provision, 12 CFR 5.2a(c), to cover CBCT applications.

Interested parties may also receive notification of the Comptroller's final disposition of any application by requesting such in writing to the Regional Administrator (12 CFR 5.13).

Section 5.13 has been revised to clarify that the Comptroller will issue a public opinion whenever the decision represents, in the Comptroller's judgment, a new or changed policy or presents issues of general importance to the public or the banking industry.

These amendments are being issued in final form, to take effect on November 6, 1978 and will apply to applications filed on or after that date. However, the Comptroller of the Currency and the other agencies have undertaken to review the regulations' effectiveness as they gain experience in operating under them. The agencies will also accept and consider written comments for 6 months from the effective date of the regulations. Comments may be submitted to Alan Herlands, Director, Regulations Analysis, Office of the Comptroller of the Currency, Washington, D.C. 20219.

ADOPTION OF AMENDMENTS

12 CFR Part 5 is amended by revising § 5.2(b), adding § 5.2a(c), and revising § 5.13 as follows:

§ 5.2 Notice of filing applications.

* * * * *

(b) *By publication.* (1) Except in the case of proposed transactions where notice by publication is governed by statute, the applicant shall, within 15 days after receipt of a notice in writing that an application has been accepted for filing, publish on the same day of two (2) consecutive weeks in a newspaper of general circulation in the community in which the applicant's head office is located and in a newspaper of general circulation in the community in which the applicant proposes to engage in business (or engages in business in the case of a title change) a notice containing the name of the applicant or applicants, the subject matter of the application, and the date upon which the application was accepted for filing. Immediately thereafter, the applicant shall furnish the Regional Administrator with an affidavit evidencing such publication.

(2) In addition to the requirements of paragraph (1), the following is required of applications for mergers and relocations:

(i) Mergers—In addition to statutory requirements, notice must be published on the same day of two (2) consecutive weeks in a newspaper of general circulation in the community in which the head office of each merging bank is located;

(ii) Relocations—Notice must be published on the same day of two (2) consecutive weeks in a newspaper of general circulation in the community in which the office to be relocated is located. On the date of the first notice by publication, an additional identical notice must be posted in the office to be relocated. This notice must remain posted for at least twenty-one (21) days after the notice by publication.

* * * * *

§ 5.2a Notice of filing of CBCT branch applications.

* * * * *

(c) *By the Regional Administrator.* The Regional Administrator shall give timely notice to the State official who supervises commercial banks in the State in which the applicant is or will be located, and to any other person requesting such written notification. Notice may also be given to other parties who the Regional Administrator believes, in his sole discretion, might have an interest in the pending application.

§ 5.13 Comptroller's decision.

The applicant and all persons so requesting in writing shall be notified of the final disposition of the application. The Comptroller will issue a public opinion whenever the decision represents, in the Comptroller's judgment, a new or changed policy or presents issues of general importance to the public or the banking industry.

Dated: October 5, 1978.

JOHN G. HEIMANN,
Comptroller of the Currency.

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Docket No. R-0182]

PART 262—RULES OF PROCEDURE

Applications

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This rule would revise procedures of the Board for certain applications for membership, applications for branches, mergers, or relocations, and certain applications under the Bank Holding Company Act. The goal of these changes is to improve the opportunity for public participation in the decision process on the affected applications listed above.

DATES: Effective date: November 6, 1978.

The Board will accept and consider written comments for 6 months from the effective date of this amendment. Such comments should be submitted to Theodore E. Allison, Secretary of the Board of Governors of the Federal Reserve System, Washington, D.C. 20551 and should refer to docket No. R-0182.

FOR FURTHER INFORMATION CONTACT:

Julius L. Loeser, Senior Attorney, 202-452-3236, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Section 262.3 is amended by adding the following subsection (b) and redesignating subsections (b), (c), (d), (e), (f), (g), and (h) as subsections (c), (d), (e), (f), (g), (h), and (i) respectively.

§ 262.3 Applications

* * * * *

(b) *Notice of applications.* (1) In the case of applications—

(i) For membership in the Federal Reserve System where such membership would confer Federal deposit insurance on a bank,

(ii) By a State member bank for the establishment of a domestic branch or other facility that would be authorized to receive deposits,

(iii) By a State member bank for the relocation of a domestic branch office,

(iv) For merger, consolidation, or acquisition of assets or assumption of liabilities, if the acquiring, assuming, or resulting bank is to be a State member bank,

(v) To become a bank holding company, and

(vi) By a bank holding company to acquire ownership or control of shares or assets of a bank, or to merge or consolidate with any other bank holding company,

the applicant shall, prior to filing such application, cause to be published on the same day of each of 2 consecutive weeks a notice containing the name of the applicant or applicants, the subject matter of the application, the location at which the applicant proposes to engage in business, and an invitation to the public to give written comment upon the application to the appropriate Federal Reserve Bank no later than 30 days after the date of publication of the first notice. Such notice shall be published in a newspaper of general circulation in (A) the community in which the head office of the bank is or is to be located in the case of an application for membership that would confer deposit insurance, (B) the community or communities in which the head office of the bank and the proposed branch or other facility (other than an electronic funds transfer facility) are located in the case of an application for the establishment of a domestic branch or other facility that would be authorized to receive deposits, (C) the community or communities in which the head office of the bank, the office to be closed, and the office to be opened are located in the case of an application for the relocation of a domestic branch office, (D) the community or communities in which the head office of each of the banks to be party to the merger, consolidation, or acquisition of assets or assumption of liabilities are located in the case of an application by a bank for merger, consolidation, or acquisition of assets or assumption of liabilities, or (E) the community or communities in which the head offices of the largest subsidiary bank, if any, of an applicant and of each bank, shares of which are to be directly or indirectly acquired, are located in the case of applications under section 3 of the Bank Holding Company Act.

(2) In addition to the foregoing notice, an applicant, in the case of an applicaition to relocate a domestic branch office or other facility that would be authorized to receive deposits, shall post in a conspicuous public place in the lobby of the office to be closed a notice containing the information specified in § 262.3(b)(1). Such notice should be posted on the date of the first notice required by § 262.3(b)(1).

* * * * *

Board of Governors of the Federal Reserve System, effective November 6, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

PART 303—APPLICATIONS, REQUESTS, AND SUBMITTALS

Relocation Applications Amendments

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: These amendments to § 303.14 of part 303 reflect implementation of part 345, the Community Reinvestment Act regulations. The amendments increase the number of times that notice of application filing must be published for branch, relocation, and deposit insurance applications; they also increase the number of communities in which published notice must be made for branch and relocation applications. Additionally, for relocation applications, notice must be posted in the public lobby of the office(s) to be moved to another location. The intended effect of the amendments is to provide greater public awareness of intended actions by banks to which the Community Reinvestment Act of 1977 is applicable, and improve application procedures.

EFFECTIVE DATE: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Roger A. Hood, Assistant General Counsel, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, D.C. 20429, telephone 202-389-4628.

SUPPLEMENTARY INFORMATION: On July 11, 1978, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Home Loan Bank Board, and the Federal Deposit Insurance Corporation ("the Agencies") proposed regulations to implement the Community Reinvestment Act of 1977 ("the CRA"). The proposed regulations were identical in their substantive provisions although they contained procedural variations. In the preamble to those proposed regulations, notice was given that the Agencies were considering modifications to their existing ap-

V 43/198 OCT 12 78

plication procedures concerning public notice and opportunity to be heard with respect to applications covered by the CRA. Subsequently, the Agencies agreed to amend their application procedures to provide minimum standards as to certain basic application procedures for public notice and opportunity to be heard. The amendments herein reflect these minimum application procedures and are described below.

§ 303.14(a) SCOPE OF SECTION.

The only change made is the addition of footnote 11b-1. It states that an off-premises electronic facility that receive deposits for more than one depository institution is deemed to constitute a branch only of the bank or banks which own or lease the facility.

Moreover, the CRA regulation specifically exempts shared depository facilities from inclusion in the requirement of delineating a community for an institution's offices. Due to this exemption for such facilities, an insured State nonmember bank need not apply for prior consent from the Corporation to share a facility owned or leased by another entity. Footnote 11b-1 is added to reflect these considerations.

§ 303.14(b) NOTICE OF FILING OF APPLICATION.

Subparagraph (ii) of paragraph (1) Notice by Publication has been changed to require banks to publish notice of an application twice in a newspaper of general circulation rather than only once. At a minimum, the publication must be on the same day for 2 consecutive weeks.

The published notice varies as to the number of communities in which the publication must be made depending on the type of application. For branches, publication must be made in the communities of the home office and the branch to be established. For relocations of home or branch offices, publication must be made in the communities of the home office, the office to be closed, and the office to be opened. For deposit insurance, publication must be made in the community of the home office of the applicant. Prior to its amendment the paragraph required that publication be made only in the community in which the applicant proposed to engage in business.

§ 303.14(b)(1-a) NOTICE BY POSTING.

The four agencies determined that increased notice to the public for proposed relocations is needed. Banks will now be required to post notice of an application for relocation in the public lobby of the office(s) to be moved to another location. This posted notice is in addition to the requirement of newspaper publication.

§ 303.14(b)(2) COMMENTS AND PROTEST.

The "Comments and Protests" paragraph has been changed to reflect the fact that published notice must be made twice for branch, office relocation, and deposit insurance applications. The same reason accounts for the deletion of paragraph (ii) in subparagraph (3) "Notice of Right to Comment or Protest."

§ 303.14(c) PUBLIC FILE.

The word "comments" has been included to recognize the provision for comments in paragraphs "Comments and Protests," "Notice of Right to Comment or Protest," and "Solicitation of Comments by Regional Director."

§ 303.14(f) HEARING RULES.

These rules, as amended, provide all participants the right to make closing arguments at hearings.

In adopting this amendment to FDIC's rules and regulations, FDIC's Board of Directors did not follow the requirements of sections 553 (b) and (d) of title 5 of the United States Code and §§ 302.1, 302.2, and 302.5 FDIC's rules and regulations with respect to notice, public participation, and delayed effective date, because the amendment relates to agency procedure and practice, and because the Board of Directors found that, in light of the need to adopt the amendments to take effect concurrently with the Community Reinvestment Act regulations, notice and public procedure thereon are impracticable and contrary to the public interest.

Accordingly, the following amendments to § 303.14 of part 303 of Federal Deposit Insurance Corporations regulations are adopted, to take effect November 6, 1978.

Approved October 5, 1978.

By order of the Board of Directors.

ALAN R. MILLER,
Executive Secretary.

1. § 303.14, paragraph (a) is amended by inserting the footnote designation "11b-1" after the word "branches" in numbered clause (2), and by adding the following footnote:

11b-1 .For purposes of this section, unless the Corporation determines otherwise, an off-premises electronic facility which receives deposits for more than one depository institution is deemed to constitute a branch only of the bank or banks which own or lease the facility.

2. In § 303.14, paragraphs (b), (c)(1)(ii), and (f)(1)(v) are revised to read as follows:

§ 303.14 Application procedures.

• • • • • •

(b) • • •

(1) • • •

(ii) In the case of all other applications described in paragraph (a) of this section, within 15 days after the Regional Director has notified the applicant in writing that an application has been accepted for filing, the applicant shall publish notice of the proposed transaction at least once each week on the same day for 2 consecutive weeks in a newspaper of general circulation in the community or communities referred to below:

(A) *Applications to establish a branch.*—In the communities in which the home office and the branch to be established are located;

(B) *Applications to relocate an office.*—In the communities in which the home office, office to be closed, and office to be opened are located;

(C) *Applications for deposit insurance.*—In the community in which the home office is located.

The published notice shall include the name of the applicant, the subject matter of the application, the location or locations at which the applicant proposes to engage in business, and the date upon which the application was accepted for filing.

(iii) • • •

(1-a) *Notice by posting.* In the case of applications to relocate home offices or branch offices, in addition to the notice by publication described in paragraph (b)(1) of this section, notice of the application shall be posted in the public lobby of the office(s) to be relocated.

(2) *Comments and protests.* Anyone who wishes to comment on an application may do so by filing comments in writing with the Regional Director. Anyone who wishes to protest the granting of the application has a right to do so if he or she files a written notice of his or her intent with the Regional Director within 15 days of the last publication of the notice required by paragraph (b)(1) of this section.

(3) *Notice of right to comment or protest.* In order to fully apprise the public of its rights under paragraph (b)(2) of this section, the notice described in paragraph (b)(1) of this section shall include a statement describing the right to comment upon or protest the granting of the application. This notice shall consist of the following statement:

Any person wishing to comment on this application may file his or her comments in writing with the Regional Director of the Federal Deposit Insurance Corporation at its Regional Office (address of the Regional Office). If any person desires to protest the granting of this application he or she has a right to do so if he or she files a written notice of his or her intent with the Regional Director by (the 15th day following the last date of required publication). The nonconfidential portions of the application are on file in the Regional Office as part of the public file maintained by the Corporation. This file is available for public inspection during regular business hours.

(4) • • •

(c) • • •

(1) • • •

(ii) Data, comments, and information submitted by interested persons in favor of or in opposition to such application.

• • • • • •

(f) Hearing rules.—(1) Order of presentation. The following schedule is intended to serve as a general guide to the conduct of the hearing. It is not fixed and may be varied at the discretion of the presiding officer. The presiding officer shall determine the order of opening and closing statements and presentations to be followed by all participants other than the applicant who in each instance shall have the opportunity to speak first.

(i) • • •

(ii) • • •

(iii) • • •

(iv) • • •

(v) *Summary statement.* After all the above presentations have been concluded, the applicant and each other participant may make a short concise rebuttal.

(Secs. 5, 6, 8, 9, 18, 19, Pub. L. 797, 64 Stat. 876, 879, 881, 891, 893 (12 U.S.C. 1815, 1816, 1818, 1819, 1828, 1829).)

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

[No. 78-518]

Amendments Relating to Acquisitions

OCTOBER 3, 1978.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rules.

SUMMARY: The Bank Board hereby amends its application procedures to expand public notice, protest, and hearing provisions; to incorporate certain provisions relating to the Community Reinvestment Act of 1977 ("CRA"); and to simplify the language of affected regulations.

EFFECTIVE DATE: November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy L. Feldman, Assistant General Counsel, Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. 20552, 202-377-6443.

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board, by Resolution No. 78-518-A (October 3, 1978), today issued final regulations to implement the Community Reinvestment Act of 1977 ("CRA"). The regulations, set forth at new 12 CFR Part 563e, provide for (1) assessment of an insured institution's record in helping to meet the credit needs of its entire community, including low- and moderate/income neighborhoods, consistent with the safe and sound operation of such institution, and (2) consideration of such record when evaluating certain applications made by an institution.

The Bank Board hereby amends its application procedures affected by the CRA in order to insure adequate public notice and opportunity for meaningful protest and hearing on any required application to the Bank Board for a charter; deposit insurance; branch or other deposit facility; relocation; merger; consolidation, acquisition of assets, or assumption of liabilities; or acquisition of a deposit facility by a savings and loan holding company.

Additionally, this opportunity has been taken to simplify and shorten the language of affected regulations, but they remain substantively the same with the exception of the changes noted below. In this connection, all notice forms have been removed; these may be obtained from the Supervisory Agent of the Federal Home Loan Bank in the district where the application is to be filed. In addition, public inspection procedures have been amended to exclude from public disclosure application information exempted under the Freedom of Information Act (5 U.S.C. 552); this exclusion is cited in notice forms but was not previously specified in the regulations.

Although these are final regulations, the Bank Board intends to review the expanded procedures over the next 6 months to determine if they facilitate public participation in application proceedings; public comment regarding their effectiveness is invited during this period.

CHARTER APPLICATIONS (12 CFR 543.2)

Previous § 543.2(b) listed four factors which applicants for Federal savings and loan association charters must address. A fifth factor—a description of community credit needs—is added.

Previous § 543.2(e) required applicants to publish one notice in a newspaper printed in the English language and having general circulation in the community to be served by the proposed Federal association. This requirement, now located in paragraph (d), is expanded to require publication on the same day of each of 2 consecutive weeks. In addition publication in appropriate foreign language(s) may be required if the Supervisory Agent determines that the primary language of a significant number of the adult residents of the community to be served by the proposed association is a language other than English. Further, paragraph (d) directs the Supervisory Agent to give notice to appropriate State regulators, persons who request announcements of applications under the Bank Board's CRA regulations (§ 563e.6), and other persons she/he believes might have an interest in a pending application. These notices are in addition to the legal notification (newspaper notice) required as described above.

Paragraph (e) incorporates the "substantiality" concept of protest consideration, previously used only in branch office applications, to charter applications. In determining whether a protest is substantial, the Supervisory Agent shall look to the substance and not the form of protests filed by individuals or community groups which pertain to an applicant's CRA performance.

Paragraph (f) provides flexibility in scheduling a hearing on an application to insure that the time and place of any hearing is reasonably convenient to those whose protests relate to part 563e.

REMOTE SERVICE UNITS (12 CFR 545.4-2)

Previous regulations did not contain public notice procedures because the Bank Board considers RSU's to be merely a convenience service for customers whose accounts are based at branch offices, and this view has been judicially upheld. However, because the CRA applies to applications for any "facility with the ability to accept deposits," such procedures have been adopted for RSU applications involving deposit services.

BRANCH APPLICATIONS (12 CFR 545.14, 545.14-1, 545.14-4, 545.14-5)

Procedural changes for branch office applications are substantively the same as those applicable to charters, except that: (1) Required newspaper publication of notice of application shall be made both in applicant's home office community and in the community to be served by the proposed branch; and (2) the application shall include information relating to applicant's performance in helping to meet community credit needs in its existing local communities.

Changes to the regulations for drive-in facilities (§ 545.14-1) mobile facilities (§ 545.14-4) and satellite offices (§ 545.14-5) parallel branch office regulation changes, including application procedures regarding protest. The new procedures for satellite offices adopt, in part, Board Resolution No. 77-605 (42 FR 55822-55823; October 19, 1977), in which the Bank Board proposed that a protestant could request oral argument on a satellite application only if the Supervisory Agent determines that the protest is "substantial." Most respondents favored this amendment, and it brings satellite office application procedures into conformance with procedures for all other applications.

V 43 / 198 0 OCT 12 78

CHANGE-OF-OFFICE LOCATION (12 CFR 545.16)

Previous procedures followed the requirements for branch applications except that the Supervisory Agent had broad discretion to waive notice, protest, and hearing requirements. New procedures conform to those required for the other types of applications. Additionally, an applicant for relocation is now required to publish notice in the community where the office is to be closed and to post a notice at such office. Further, the previous application exception for redesignation of a branch as a home office has been abolished.

MERGER, DISSOLUTION, REORGANIZATION, AND CONVERSION (12 CFR 546.2)

Previous regulations offered no opportunity for protest or hearing and allowed applicants either to publish notice of application or to notify all members of each merging institution. Under the new procedures, notice, protest, and hearing requirements for other applications substantially apply except that, while applicants may mail notice to voting members of each institution, they must publish notice in the community where the home office of each merging institution is located.

INSURANCE OF ACCOUNTS (12 CFR 562.4, 562.5, AND 562.6)

Previous regulations followed the procedures set forth for charter applications; new expanded procedures continue to do so. Previous § 562.6(c) exempted operating State-chartered institutions applying for deposit insurance from most of the procedural requirements of this part. This exemption has been eliminated.

MERGER, CONSOLIDATION, OR PURCHASE OF BULK ASSETS (12 CFR 563.22)

Previous regulations were the same as merger regulations under 12 CFR 546; the same changes apply.

HOLDING COMPANY ACQUISITIONS (12 CFR 584.5(g))

Previous regulations required the Federal Savings and Loan Insurance corporation to publish notice in the FEDERAL REGISTER upon receipt of an application filed under this section and to solicit public comment, but did not provide for protest and hearings.

New procedures eliminate FEDERAL REGISTER publication and, instead, require applicants to comply substantially with the procedures for charter applications, except that publication of notice of application must be made in the community in which the home offices of the largest subsidiary insured institution and any institution to be acquired are located.

The Bank Board's statement of policy describing staff handling of applications for charters and branches, set out at 12 CFR 556.5, is being revised in light of the changed procedures described above, and will be amended at a later date.

The Bank Board finds that (1) notice and public procedure are unnecessary under 5 U.S.C. 553(b) and 12 CFR 508.11 because these amendments relate to rules of agency procedure; and publication of the amendments for the full 30-day period in 5 U.S.C. 553(d) and 12 CFR 508.14 would not be in the public interest because it is important that these changes take effect concurrently with the CRA regulations.

Accordingly, the Federal Home Loan Bank Board hereby amends 12 CFR 543.2, 545.4-2, 545.14, 545.14-1, 545.14-4, 545.14-5, 545.16, 546.2, 562.4, 563.22, and 584.5, and deletes 12 CFR 562.5 and 562.6(c), to read as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 543—INCORPORATION, ORGANIZATION, AND CONVERSION

1. Section 543.2 is revised to read as follows:

§ 543.2 Application for permission to organize.

(a) *General.* Questions regarding this section shall be directed to the Board's Supervisory Agent (as defined in § 501.11 of this chapter) of the district in which the proposed association is to be located. Recommendations by Supervisory Agents and officers and employees of the Board regarding application for permission to organize a Federal association are privileged, confidential, and subject to § 505.6 of this chapter.

(b) *Form; supporting information.* Persons applying for permission to organize a Federal association shall obtain Board-approved application and notice forms and related instructions from the Supervisory Agent. An application and all required supporting information shall be executed by at least seven persons residing in the community to be served by the proposed association (the "applicants") and submitted to the Supervisory Agent. The application shall include an estimate of the annual income and expenses of the proposed association and of the annual volume of business to be transacted by it, and a statement of the personnel and office facilities to be provided for the operation of such association. The supporting information shall show: (1) Applicants are citizens of the United States of good character and responsibility; (2) there is a necessity for the proposed association in the community to be served by it; (3) the association has a reasonable probability of success; (4) it can be established without undue injury to properly conducted existing local thrift and home-financing institutions; and (5) a description of local community credit needs. An application shall be deemed filed when four copies of such materials are delivered to the Supervisory Agent; the application shall be deemed complete when the Supervisory Agent determines that all information required under this paragraph has been submitted.

(c) *Amendment of application; additional information.* An applicant may amend an application or file additional supporting information only until publication of notice under paragraph (d) of this section, unless otherwise requested to do so by the Supervisory Agent or the Board.

(d) *Public notice and inspection.* (1) After the Supervisory Agent determines that the application is complete, the applicant shall be directed in writing to publish notice within 15 days of receipt of such direction. Notice shall be published on the same day of each of 2 consecutive weeks in a newspaper printed in the English language and having a general circulation in the community in which the home office of the new association is to be located. If the Supervisory Agent determines that the primary language of a significant number of the adult residents of the community is a language other than English, she/he may require that notice also be given in the appropriate language(s).

(2) Promptly after publication, the applicant(s) shall transmit to the Supervisory Agent two copies of each notice and publisher's affidavit of publication.

(3) The Supervisory Agent shall give notice of the application to the State official who supervises savings and loan associations in the State in which the new association is to be located, and to persons whose requests for announcements under § 563e.6 of this chapter have been received in time for such notification; these notices shall be in addition to legal notification as set forth in paragraph (d) of this section. The Supervisory Agent may also give notice to any other persons she/he believes might have an interest in the application.

(4) The application and its filing shall be confidential until publication of notice. Thereafter, the application and all related communications may be inspected by any person at the Supervisory Agent's office during regular working hours, unless application information is exempted from public disclosure under § 505.5 of this chapter.

(e) *Protest.* Communications and answers to protests shall be submitted only as provided in this paragraph or as requested by the Supervisory Agent or the Board. (1) Within 10 days of the last date of publication of notice of application (or 30 days after such date if extension is requested in writing within the 10-day period), any person may file a communication in favor or protest of the application by furnishing four copies to the Supervisory Agent.

(2) Within 10 days after filing of a protest, the Principal Supervisory Agent shall advise the protestant and the applicant, in writing, whether the protest is considered "substantial."

(3) The applicant may file an answer to any protest until 15 days after the last date for filing of communications by furnishing four copies to the Supervisory Agent.

(4) A protest shall be considered "substantial" only if it is written, seasonably filed, and contains at least the following:

(i) A summary of the reasons for the protest;

(ii) The specific matters in the application to which the protestant objects, and the reasons for each objection;

(iii) Facts supporting the protest, including relevant economic or financial data; and

(iv) Any adverse effects on the protestant which may result from approval of the application.

(5) The Principal Supervisory Agent's determination whether a protest is "substantial" is final. A protest filed by an individual or community group pertaining to an applicant's performance under part 563e of this chapter (the Community Reinvestment Act regulations) shall not be considered insubstantial merely because of the form in which it is submitted.

(f) *Oral argument.*—(1) *General.* Oral argument on the merits of an application shall be heard if (i) the applicant or a person who has filed a substantial protest so requests and the request is received by the Supervisory Agent within 10 days after the time for filing communications has expired; or (ii) the Supervisory Agent, after reviewing the application and other pertinent information, considers oral argument desirable. The Supervisory Agent shall mail notice of the time (which shall be not less than 10 days after such mailing) and place of oral argument to the applicants and persons who filed communications. In the case of protests pertaining to part 563e of this chapter, the Supervisory Agent shall insure that the time and place of any oral argument is reasonably convenient to the protestants.

(2) *Procedure.* The Supervisory Agent, or any other person designated by the Board, may hear oral arguments and determine all matters relating to the conduct thereof. Arguments may be made in person or by authorized representatives and unless otherwise permitted by the Supervisory Agent, shall be based only on written information previously filed regarding the application. A reasonable time of at least 1 hour shall be allowed to each side for oral argument. A transcript of the oral argument shall be made and included in the application file.

(g) *Approval.* Decisions on all applications for permission to organize Federal associations will be made by the Board. Approvals of applications will condition issuance of any charter on the following: (1) A minimum number of subscribers to the association's capital; (2) a minimum amount of capital to be paid into the association's accounts on issuance of the charter; and (3) satisfaction of any other requirement the Board may impose. Approval of an application does not obligate the Board to issue a charter.

PART 545—OPERATIONS

2. Paragraph (p) of § 545.4-2 is amended by adding a new subparagraph (4) thereto, to read as set forth below.

§ 545.4-2 Remote service unit.

* * * * *

(p) *Applications.* * * *

(4) *Procedures.* Processing of an application for a remote service unit involving the offering of deposit services shall follow the procedures set forth in §§ 543.2 (c) and (d) and 545.14(d)(2) of this subchapter and, in the case of communications pertaining to part 563e of this chapter, § 543.2 (e) and (f) of this subchapter.

* * * * *

3. Section 545.14 is amended by revising paragraphs (c), (d), and (e), and deleting paragraphs (f), (g), and (h) thereof, as set forth below; and changing the cross-reference to paragraph (g)(3) contained in paragraph (k) to refer to paragraph (e).

§ 545.14 Branch office.

* * * * *

(c) *Application form; supporting information.* An applicant for permission to establish a branch office shall obtain Board-approved application and notice forms, and related instructions from the Supervisory Agent. Supporting information shall be furnished to show: (1) A necessity for the proposed branch in the community to be served by it at the time it is opened; (2) the branch has a reasonable probability of success; (3) the branch can be established without undue injury to properly conducted existing local thrift and home-financing institutions; and (4) applicant's performance in helping to meet the credit needs of its existing local communities.

(d) *Filing; completion; supervisory objection.* (1) An application shall be deemed filed when four copies of the materials described in paragraph (c) of this section are delivered to the Supervisory Agent; the application shall be deemed complete when the Supervisory Agent determines that all information required under paragraph (c) has been submitted. (2) No application shall be accepted for processing if, in the opinion of the Board, the association is not eligible, or its policies, condition, or operations afford a basis for supervisory objection. A determination by the Supervisory Agent that the application is complete, applicant is eligible, and that as a preliminary matter there is no basis for supervisory objection to the application, shall be made before direction is given for publication of notice.

(e) *Amendment of application; additional information; public notice and inspection; processing.* Processing of an application for a branch office shall follow the procedures set forth in § 543.2 (c), (d), (e), and (f) of this subchapter, except that (1) the required newspaper publication of notice of application shall be made both in the applicant's home office community and in the community to be served by the proposed branch office; and (2) the application and its filing shall be confidential until publication of notice, unless otherwise provided in a working understanding between the Board and a State agency which regulates State-chartered savings and loan associations, and the applicant is so informed upon filing; after publication of notice, the application file, including any communication and answers, shall be available as provided in § 543.2(d)(4).

(g) [Deleted]

(h) [Deleted]

* * * * *

4. Section 545.14-1 is amended by adding new subsection (c) to read as set forth below.

§ 545.14-1 Drive-in facility.

* * * * *

(c) *Procedures.* (1) Processing of an application for a drive-in facility under the preceding paragraph shall follow the procedures set forth in § 545.14 (d), (e), and (k). (2) The applicant must additionally submit information regarding its performance in helping to meet the credit needs of its existing local communities.

5. Section 545.14-4 is amended by deleting the last sentence of paragraph (d) and substituting a new sentence therefor; revising paragraph (e); and deleting paragraphs (f), (g), (h), and (i), thereof; to read as set forth below.

§ 545.14-4 Mobile facility.

* * * * *

(d) *Application form; supporting information.* * * * It shall also contain information relating to the applicant's performance in helping to meet the credit needs of its existing local communities.

(e) *Procedures.* Processing of an application for a mobile facility shall

follow the procedures set forth in § 545.14 (d), (e), and (k).

(g) [Deleted]
(h) [Deleted]
(i) [Deleted]

• • • • • •

6. Section 545.14-5 is amended by removing the word "and" immediately before subparagraph (2) of paragraph (d), placing it after such subparagraph, and adding a new subparagraph (3) thereto; revising paragraph (e); amending paragraph (g) by adding a new subparagraph (5) thereto; and deleting paragraphs (f) and (h) thereof; to read as set forth below.

§ 545.14-5 Satellite office.

• • • • • •

(d) *Application form; supporting information.* • • • and (3) applicant's performance in helping to meet the credit needs of its existing local communities.

(e) *Procedures.* Processing of an application for a satellite office shall follow the procedures set forth in § 545.14 (d), (e), and (k).

(f) [Deleted]

(g) *Approval by Supervisory Agent.* • • •

(5) Applicant's record of performance in helping to meet the credit needs of its existing local communities has been taken into account and, in the opinion of the Supervisory Agent, should not result in denial of the application;

• • • • • •

(h) [Deleted]

• • • • • •

7. Section 545.16 is amended by adding a sentence to the end of paragraph (b); revising paragraphs (c); deleting paragraphs (d), (e), (f), and (h) thereof, to read as set forth below; and amending paragraph (g) by deleting the words "paragraphs (d), (e), and (f) of this section," and substituting the words "paragraphs (d) and (e) of § 545.14 of this part".

§ 545.16 Change of office location.

• • • • •

(b) *Application form; supporting information.* • • • In addition, the application shall contain information, relating to the applicant's performance in helping to meet the credit needs of its existing local communities.

(c) *Processing of application.* Processing of an application for a change of office location or redesignation of a home and branch office shall follow the procedures set forth in § 545.14 (d), (e), and (k), except that (1) the required newspaper publication of notice of application shall be made in (i) applicant's home office community, (ii) the community to be served by the new office, and (iii) the community where the office is to be closed or the home office is to be redesignated as a branch; and (2) notice of application shall be posted conspicuously in the office described in subdivision (iii) of this paragraph.

PART 546—MERGER, DISSOLUTION, REORGANIZATION, AND CONVERSION

8. Section 546.2 is amended by revising subparagraph (d)(1) and deleting paragraph (e) thereof, to read as set forth below.

§ 546.2 Procedure; effective date.

• • • • •

(d) (1) Processing of an application under this part shall follow the procedures set forth in § 543.2(c), (d), (e), and (f) of this subchapter, except that (i) the required newspaper publication of notice of application shall be made in the communities in which the home offices of the merging and resulting institutions are located; and (ii) applicants may additionally mail such notice to the voting members of each such institution, within the time specified in § 543.2(d).

• • • • • •

(e) [Deleted]

• • • • •

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 562—APPLICATIONS FOR INSURANCE OF ACCOUNTS

9. Part 562 is amended by revising § 562.4, and deleting § 562.5 and paragraph (c) of § 562.6 thereof, to read as set forth below.

§ 562.4 Processing of application.

Processing of an application under this part shall follow the procedures set forth in § 543.2 (d), (e), and (f) of this chapter.

§ 562.5 [Deleted]

§ 562.6 Exceptions to the foregoing procedure.

• • • • •

(c) [Deleted]

PART 563—OPERATIONS

10. Section 563.22 is amended by revising paragraphs (b) and (d) and deleting paragraph (c) thereof, to read as set forth below.

§ 563.22 Merger, consolidation, or purchase of bulk assets.

• • • • •

(b) Processing of an application under this section shall follow the procedures set forth in § 543.2 (c), (d), (e), and (f) of this chapter, except that (i) the required newspaper publication of notice of application shall be made in the communities in which the home offices of the merging and resulting institutions are located; and (ii) applicants may additionally mail such notice to the voting members of each such institution within the time specified in § 543.2(d).

(c) [Deleted]

(d) The requirements of paragraph (b) of this section do not apply to any merger authorized by the Corporation to be instituted for supervisory reasons.

• • • • •

SUBCHAPTER F—SAVINGS AND LOAN HOLDING COMPANIES

PART 584—REGULATED ACTIVITIES

11. Section 584.4 is amended by revising paragraph (g) thereof to read as set forth below.

§ 584.4 Acquisitions

• • • • •

(g) *Procedure on applications.* (1) Processing of applications under this section shall follow the procedures set forth in § 543.2 (c), (d), (e), and (f) of this chapter, except that the required newspaper publication of notice of application shall be made in (i) the community in which the home office of any institution to be acquired is located; and (ii) the community in which the home office of the largest subsidiary insured institution of the acquiring institution is located.

(2) The provisions of subparagraph (1) do not apply to acquisitions instituted for supervisory reasons.

(Sec. 801, 91 Stat. 1147, 12 U.S.C. 2901 et seq., Pub. L. 95-128 (the Community Reinvestment Act of 1977); sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464; secs. 402, 403, 407, 408, 48 Stat. 1256, 1257, 1260, as amended, 12 U.S.C. 1725, 1726, 1730; 82 Stat. 5, Pub. HOW TO USE THE FEDERAL REGISTER WORKSHOPS

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHAT: Free public workshops (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in government actions. There will be no discussion of specific agency regulations.

ALBANY, NEW YORK

WHEN: October 27 and 28, 1978, at 1:00 p.m.
WHERE: Meeting Room No. 1, Cultural Education Center, Empire State Plaza, Albany, New York.
RESERVATIONS: Call Elizabeth Closson, 518-474-5943.

DALLAS, TEXAS

WHEN: October 30, 1978, at 9:30 a.m.
WHERE: Conference Room 7A23, Earle Cabell Federal Building, 1100 Commerce St., Dallas, Texas.
RESERVATIONS: Call Federal Information Center, 214-749-2131.

FORT WORTH, TEXAS

WHEN: October 31 1978, at 9:30 a.m.
WHERE: Auditorium, 7th Floor, Lone Star Gas Co., 908 Monroe St., Fort Worth, Texas.
RESERVATIONS: Call Federal Information Center, 817-334-3624.

AUSTIN, TEXAS

WHEN: November 2, 1978, at 2 p.m.
WHERE: Room 1008, Regan Office Building, 15th & Congress Sts., Austin, Texas.
RESERVATIONS: Call Peggy Lockhart or Bob Walton, 512-475-6725.

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

FCC—Noncommercial educational FM broadcast stations 39704; 9-6-78
HEW—Procurement regulations 39778; 9-7-78

List of Public Laws

This is a continuing listing of public bills that have become law, the text of which is not published in the FEDERAL REGISTER. Copies of the laws in individual pamphlet form (referred to as "slip laws") may be obtained from the U.S. Government Printing Office.

[Last Listing: October 12, 1978]

H.R. 12930 ..... Pub. L. 95-429
"Treasury, Postal Service, and General Government Appropriations Act, 1979". (Oct. 10, 1978; 92 Stat. 1001). Price: $1.00.

H.R. 11005 ..... Pub. L. 95-430
To provide authorization of appropriations for the United States International Trade Commission for fiscal year 1979. (Oct. 10, 1978; 92 Stat. 1020). Price: $.60.

H.R. 12934 ..... Pub. L. 95-431
"Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1979". (Oct. 10, 1978; 92 Stat. 1021). Price: $1.20.

H.R. 13349 ..... Pub. L. 95-432
To repeal certain sections of title III of the Immigration and Nationality Act, and for other purposes. (Oct. 10, 1978; 92 Stat. 1046). Price: $.60.

H.R. 10581 ..... Pub. L. 95-433
Relating to judgment funds awarded by the Indian Claims Commission to certain Indian tribes, and for other purposes. (Oct. 10, 1978; 92 Stat. 1047). Price: $.60.

H.R. 11400 ..... Pub. L. 95-434
National Science Foundation Authorization Act for fiscal year 1979. (Oct. 10, 1978; 92 Stat. 1049). Price: $.60.

H.R. 9214 ..... Pub. L. 95-435
To amend the Bretton Woods Agreements Act to authorize the United States to participate in the Supplementary Financing Facility of the International Monetary Fund. (Oct. 10, 1978; 92 Stat. 1051). Price: $.60.

S. 409 ..... Pub. L. 95-436
To designate the Meat Animal Research Center located near Clay Center, Nebraska, as the "Roman L. Hruska Meat Animal Research Center". (Oct. 10, 1978; 92 Stat. 1054). Price: $.60.

H.R. 10126 ..... Pub. L. 95-437
Federal Employees Part-Time Career Employment Act of 1978. (Oct. 10, 1978; 92 Stat. 1055). Price: $.70.

S. 425 ..... Pub. L. 95-438
To authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Lieutenant General Ira C. Eaker, United States Air Force (retired). (Oct. 10, 1978; 92 Stat. 1060). Price: $.60.

S. 286 ..... Pub. L. 95-439
To repeal certain requirements relating to notice of animal and plant quarantines, and for other purposes. (Oct. 10, 1978; 92 Stat. 1061). Price: $.60.

S. 1267 ..... Pub. L. 95-440
To amend sections 3303a and 1503 of title 44, United States Code, to require mandatory application of the General Records Schedules to all Federal agencies and to resolve conflicts between authorizations for disposal and to provide for the disposal of Federal Register documents. (Oct. 10, 1978; 92 Stat. 1062). Price: $.60.

S. 2946 ..... Pub. L. 95-441
To authorize the Secretary of Agriculture to relinquish exclusive legislative jurisdiction over lands or interests under his control. (Oct. 10, 1978; 92 Stat. 1064). Price: $.60.

S. 2951 ..... Pub. L. 95-442
To authorize the Secretary of Agriculture to accept and administer on behalf of the United States gifts or devises of real and personal property for the benefit of the Department of Agriculture or any of its programs. (Oct. 10, 1978; 92 Stat. 1065). Price: $.60.

S. 3045 ..... Pub. L. 95-443
To amend the Farm Credit Act of 1971 to extend the term for production credit association loans to producers or harvesters of aquatic products. (Oct. 10, 1978; 92 Stat. 1066). Price: $.60.

S. 3067 ..... Pub. L. 95-444
Civil Rights Commission Act of 1978. (Oct. 10, 1978; 92 Stat. 1067). Price: $.60.

S. 3092 ..... Pub. L. 95-445
Humane Methods of Slaughter Act of 1978. (Oct. 10, 1978; 92 Stat. 1069). Price: $.60.

S. 3274 ..... Pub. L. 95-446
To designate the United States Department of Agriculture's Bee Research Laboratory in Tucson, Arizona, as the "Carl Hayden Bee Research Center". (Oct. 10, 1978; 92 Stat. 1071). Price: $.60.

S. 3036 ..... Pub. L. 95-447
To amend the Coinage Act of 1965 to change the size, weight, and design of the one-dollar coin, and for other purposes. (Oct. 10, 1978; 92 Stat. 1072). Price: $.60.

H.R. 13125 ..... Pub. L. 95-448
Making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes. (Oct. 11, 1978; 92 Stat. 1073). Price: $1.10.

S.J. Res. 29 ..... Pub. L. 95-449
To authorize the President to issue a proclamation designating the week in November 1978, which includes Thanksgiving Day as "National Family Week". (Oct. 11, 1978; 92 Stat. 1094). Price: $.60.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01-M]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 180—EMPLOYEES' PERSONAL PROPERTY CLAIMS

Revision of Personal Property Claims Regulations

AGENCY: Civil Service Commission.

ACTION: Final.

SUMMARY: The Civil Service Commission is revising Part 180 of Title 5, Code of Federal Regulations. A review of claims filed under current regulations indicates a need to revise the regulations to more fully comport with the apparent intent of the governing statute—the Military Personnel and Civilian Employees' Claims Act of 1964, 31 U.S.C. § 240 to 243.

EFFECTIVE DATE: October 13, 1978

FOR FURTHER INFORMATION CONTACT:

John Murphy, Office of the General Counsel, U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C. 20415 202-632-7600.

Accordingly, 5 CFR Part 180 is revised as set forth below:

Sec.
180.101 Scope and purpose.
180.102 Claimants.
180.103 Time limitations.
180.104 Allowable claims.
180.105 Claims not allowed.
180.106 Claims involving carriers and insurers.
180.107 Claims procedure.
180.108 Settlement of claims.

AUTHORITY: Sec. 3, 78 Stat. 767, as amended; 31 U.S.C. 241.

§ 180.101 Scope and purpose.

(a) The Military Personnel and Civilian Employees' Claims Act of 1964, 31 U.S.C. 240 to 243, authorizes the Chairman of the Civil Service Commission to settle and pay (including replacement in kind) claims of officers and employees of the Commission, amounting to not more than $15,000, for damage to or loss of personal property incident to their service. Claims are payable only for such types, quantities, or amounts of tangible personal property (including money) as the approving authority shall determine to be reasonable, useful, or proper under the circumstances existing at the time and place of the loss. In determining what is reasonable, useful, or proper, the approving authority will consider the type and quantity of property involved, circumstances attending acquistion and use of the property, and whether possession or use by the claimant at the time of damage or loss was incident to service.

(b) The Government does not underwrite all personal property losses that a claimant may sustain and it does not underwrite individual tastes. While the Government does not attempt to limit possession of property by an individual, payment for damage or loss is made only to the extent that the possession of the property is determined to be reasonable, useful, or proper. If individuals possess excessive quantities of items, or expensive items, they should have such property privately insured.

§ 180.102 Claimants.

(a) The following are proper claimants:

(1) Officers and employees of the Commission;

(2) Former officers and employees of the Commission whose claims arose out of incidents which occurred before their separation;

(3) The authorized agent or legal representative of persons in §§ 180.102(a)(1) and 180.102(a)(2);

(4) Survivors of persons in §§ 180.102(a)(1) and 180.102(a)(2) in the following order of precedence:

(i) Spouse,

(ii) Children,

(iii) Father or mother, or both,

(iv) Brothers or sisters, or both.

(b) A claim may not be presented by or for the benefit of a subrogee, assignee, conditional vendor, or other third party.

§ 180.103 Time limitations.

A claim must be presented in writing within 2 years after it accrues, except during war or armed conflict. If war or armed conflict occurs within the 2-year period following accrual, when claimant shows good cause, the claim may be presented within 2 years after the cause ceases to exist but not more than 2 years after termination of the war or armed conflict. A claim accrues when loss or damage is or should have been discovered by claimant even though such loss or damage occurred at a prior time.

§ 180.104 Allowable claims.

(a) A claim may be allowed only if:

(1) The damage or loss was not caused wholly or partly by the negligent or wrongful act of the claimant, claimant's agent, a member of claimant's family, or claimant's private employee (the standard to be applied is that of reasonable care under the circumstances);

(2) The possession of the property damaged or lost and the quantity possessed is determined to have been reasonable, useful, or proper under the circumstances; and

(3) The claim is substantiated by proper and convincing evidence.

(b) Claims which are otherwise allowable under this part shall not be disallowed solely because the property was not in the possession of the claimant at the time of the damage or loss or solely because the claimant was not legal owner of the property for which the claim is made. For example, borrowed property may be the subject of a claim.

(c) Subject to the conditions in § 180.104(a) and the other provisions of this part, any claim for damage to or loss of personal property incident to service with the Commission may be considered and allowed. The following are examples of the principal types of claims which may be allowed. These examples are not exclusive and other types of claims may be allowed unless excluded by § 180.106:

(1) *Property damaged or lost in quarters.* Claims may be allowed for damage to or loss of property located at:

(i) Quarters within the 50 States and the District of Columbia that were assigned to the claimant or otherwise provided in kind by the United States;

(ii) Quarters outside the 50 States and the District of Columbia that were occupied by the claimant, whether or not they were assigned or otherwise provided in kind by the United States, except when the claimant is a local inhabitant; or

V 4 3 / 1 9 9

0 C 1 3 7 8

(iii) Any warehouse, office, working area, or other place (except quarters) authorized or apparently authorized for the reception or storage of property.

(2) *Transportation or travel losses.* Claims may be allowed for damage to or loss of property incident to transportation or storage pursuant to orders, or in connection with travel under orders, including property in custody of a carrier, an agent or agency of the Government, or the claimant.

(3) *Motor vehicles.* Claims may be allowed for automobiles and other motor vehicles damaged or lost in oversea shipments provided by the Government. "Shipments provided by the Government" means via Government vessels, charter of commercial vessels, or by Government bills of lading on commercial vessels, and includes storage, unloading, and offloading incident thereto. Other claims for damage to or loss of automobiles and other motor vehicles may be allowed only when use of the vehicle on a non-reimbursable basis was required by the claimant's supervisor.

(4) *Mobile homes.* Claims may be allowed for damage to or loss of mobile homes and their contents under the provisions of § 180.104(c)(2). Claims for structural damage to mobile homes, other than that caused by collision, and damage to contents of mobile homes resulting from such structural damage must contain conclusive evidence that the damage was not caused by structural deficiency of the mobile home and that it was not overloaded. Claims for damage to or loss of tires mounted on mobile homes may be allowed only in cases of collision, theft, or vandalism.

(5) *Money.* Claims for money in an amount that is determined to be reasonable for the claimant to possess at the time of the loss are payable:

(i) Where personal funds were accepted by responsible Government personnel with apparent authority to receive them for safekeeping deposit, transmittal, or other authorized disposition, but were neither applied as directed by the owner nor returned;

(ii) When lost incident to a marine or aircraft disaster;

(iii) When lost by fire, flood, hurricane, or other natural disaster;

(iv) When stolen from the quarters of the claimant where it is conclusively shown that the money was in a locked container and that the quarters themselves were locked;

(v) When taken by force from the claimant's person.

(6) *Clothing.* Claims may be allowed for clothing and accessories worn on the person which are damaged or lost:

(i) During the performance of official duties in an unusual or extraordinary-risk situation;

(ii) In cases involving emergency action required by natural disaster such as fire, flood, hurricane, or by enemy or other belligerent action;

(iii) In cases involving faulty equipment or defective furniture maintained by the Government and used by the claimant as required by the job situation; or

(iv) When using a motor vehicle.

(7) *Property used for benefit of the Government.* Claims may be allowed for damage to or loss of property (except motor vehicles) used for the benefit of the Government at the request of, or with the knowledge and consent of, superior authority or by reason of necessity.

(8) *Enemy action or public service.* Claims may be allowed for damage to or loss of property as a direct consequence of:

(i) Enemy action or threat thereof, or combat, guerilla, brigandage, or other belligerent activity, or unjust confiscation by a foreign power or its nationals;

(ii) Action by the claimant to quiet a civil disturbance or to alleviate a public disaster; or

(iii) Efforts by the claimant to save human life or Government property.

(9) *Marine or aircraft disaster.* Claims may be allowed for personal property damaged or lost as a result of marine or aircraft disaster or accident.

(10) *Government property.* Claims may be allowed for property owned by the United States only when the claimant is financially responsible to an agency of the Government other than the Commission.

(11) *Borrowed property.* Claims may be allowed for borrowed property that has been damaged or lost.

§ 180.105 Claims not allowed.

(a) A claim is not allowable if:

(1) The damage or loss was caused wholly or partly by the negligent or wrongful act of the claimant, claimant's agent, claimant's employee, or a member of claimant's family;

(2) The damage or loss occurred in quarters occupied by the claimant within the 50 States and the District of Columbia that were not assigned to the claimant or otherwise provided in kind by the United States;

(3) Possession of the property lost or damaged was not incident to service or not reasonable or proper under the circumstances.

(b) In addition to claims falling within the categories of § 180.105(a), the following are examples of claims which are not payable:

(1) *Claims not incident to service.* Claims which arose during the conduct of personal business are not payable.

(2) *Subrogation claims.* Claims based upon payment or other consideration to a proper claimant are not payable.

(3) *Assigned claims.* Claims based upon assignment of a claim by a proper claimant are not payable.

(4) *Conditional vendor claims.* Claims asserted by or on behalf of a conditional vendor are not payable.

(5) *Claims by improper claimants.* Claims by persons not designated in § 180.102(a) are not payable.

(6) *Small items of substantial value.* Claims are not payable for money or for small articles of substantial value, such as watches or expensive jewelry, when shipped with household goods or as unaccompanied baggage.

(7) *Articles of extraordinary value.* Claims are not payable for expensive articles of gold, silver, other precious metals, paintings, antiques other than bulky furnishings, relics, and other articles of extraordinary value when shipped with household goods by ordinary means or as unaccompanied baggage at normal released valuation. Claims for such articles are payable when their loss is incident to shipment by expedited mode in accordance with current joint travel regulations. This prohibition does not apply to articles in the personal custody of the claimant or articles properly checked, provided that reasonable protection or security measures have been taken by the claimant.

(8) *Articles acquired for other persons.* Claims are not payable for articles intended directly or indirectly for persons other than the claimant or members of the claimant's immediate household. This prohibition includes articles acquired at the request of others and articles for sale.

(9) *Property used for business.* Claims are not payable for property normally used for business or profit.

(10) *Unserviceable property.* Claims are not payable for wornout or unserviceable property.

(11) *Violation of law or directive.* Claims are not payable for property acquired, possessed, or transported in violation of law, regulation, or other directive. This does not apply to limitations imposed on the weight of shipments of household goods.

(12) *Intangible property.* Claims are not payable for intangible property such as bank books, checks, promissory notes, stock certificates, bonds, bills of lading, warehouse receipts, baggage checks, insurance policies, money order, and traveler's checks.

(13) *Government property.* Claims are not payable for property owned by the United States unless the claimant is financially responsible for the property to an agency of the Government other than the Commission.

(14) *Motor vehicles.* Claims for motor vehicles, except as provided for by § 180.104(c)(3), will ordinarily not be paid. However, in exceptional cases, meritorius claims for damage to or loss of motor vehicles may be recommended to the Office of the General Counsel for consideration and appproval for payment.

(15) *Enemy property.* Claims are not payable for enemy property, including war trophies.

(16) *Losses recoverable from carrier.* Claims are not payable for losses, or any portion thereof, which have been recovered or are recoverable from a carrier, except as permitted under § 180.106.

(17) *Losses recoverable from insurer.* Claims are not payable for losses, or any portion thereof, which have been recovered or are recoverable from an insurer, except as permitted under § 180.106.

(18) *Losses recoverable from contractor.* Claims are not payable for losses, or any portion thereof, which have been recovered or are recoverable under contract, except as permitted under § 180.106.

(19) *Fees for estimates.* Claims are not normally payable for fees paid to obtain estimates of repair in conjuction with submitting a claim under this part. However, where, in the opinion of the approving authority, the claimant could not obtain an estimate without paying a fee, such a claim may be considered in an amount reasonable in relation to the value or the cost of repairs of the articles involved, provided that the evidence furnished clearly indicates that the amount of the fee paid will not be deducted from the cost of repairs if the work is accomplished by the estimator.

(20) *Items fraudulently claimed.* Claims are not payable for items fraudulently claimed. When investigation discloses that a claimant, claimant's agent, claimant's employee, or member of claimant's family has intentionally misrepresented an item claimed as to cost, condition, cost to repair, etc., the item will be disallowed in its entirety even though some actual damage has been sustained. However, if the remainder of the claim is proper it will be paid. This does not preclude appropriate disciplinary action if warranted.

§ 180.106 Claims involving carriers and insurers.

(a) Claimants must comply with the following before presenting claims involving a carrier or insurer:

(1) Whenever property is damaged or lost while being shipped pursuant to authorized travel orders, the owner must file a written claim for reimbursement with the carrier according to the terms of its bill of lading or contract before submitting a claim against the Government. The claimant may present a claim to the Government immediately after making demand on the carrier.

(2) Whenever property which is damaged or lost incident to the claimant's service is insured in whole or in part, the claimant must make a written demand against the insurer for reimbursement under the terms and conditions of the insurance coverage. Such demand should be made within the time limit provided in the policy and prior to the filing of a claim against the Government. The claimant may present a claim to the Government immediately after making demand on the insurer.

(b) If the claimant fails to make the required demand on the carrier or insurer or make reasonable efforts to collect the amount recoverable, the amount payable under the provisions of these regulations shall be reduced by the maximum amount recoverable. However, no deduction will be made if the circumstances of the claimant's service were such as to preclude timely filing of the claim with the carrier or insurer and it is determined that a demand would have been impracticable or unavailing in any event.

(c) When a claim is paid by the Commission, the claimant will assign to the United States, to the extent of any payment on the claim accepted by claimant, all rights, title, and interest in any claim against any carrier, insurer, or other party arising out of the incident on which the claim against the United States is based. On request, the claimant also will furnish such evidence as may be required to enable the United States to enforce the claim.

(d) After payment of a claim by the United States, if the claimant receives any payment from a carrier, contractor, insurer, or other third party, the claimant will pay the proceeds to the United States to the extent of the payment received by the claimant from the United States.

§ 180.107 Claims procedure.

(a) *Filing a claim.* Claims not exceeding $500 shall be filed with the appropriate bureau or regional director. Claims in excess of $500 shall be filed with the Office of the General Counsel, U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C. 20415. Claims shall be in writing, using G.C. Form 33 when available, and shall contain as a minimum:

(1) Name, address, and place of employment of the claimant;

(2) Place and date of the damage or loss;

(3) A brief statement of the facts and circumstances surrounding the damage or loss;

(4) Cost, date, and place of acquisition of each piece of property damaged or lost;

(5) Two itemized repair estimates, or value estimates, whichever is applicable;

(6) Copies of police reports, if applicable;

(7) A statement from the claimant's supervisor that the loss was incident to service;

(8) A statement that the property was or was not insured;

(9) With respect to claims involving thefts or losses in quarters or other places where the property was reasonably kept, a statement as to what security precautions were taken to protect the property involved;

(10) With respect to claims involving property being used for the benefit of the Government, a statement by the claimant's supervisor that the claimant was required to provide such property or that the claimant's providing it was in the interest of the Government; and

(11) Other evidence as may be required.

(b) *Single claim.* A single claim shall be presented for all lost or damaged property resulting from the same incident. If this procedure causes a hardship, the claimant may present an initial claim with notice that it is a partial claim, an explanation of the circumstances causing the hardship, and an estimate of the balance of the claim and the date it will be submitted. Payment may be made on a partial claim if the approving authority determines that a genuine hardship exists.

(c) *Claims investigator.* When a claim is filed, the appropriate bureau or regional director, or the General Counsel, shall appoint a claims investigator to evaluate the claim and make a recommendation as to its disposition. Where the cost to repair damaged property does not exceed $100 per item and the claims investigator has inspected the damaged property, the claimant and the approving authority may agree upon a reasonable amount to be claimed for repair of an individual item in lieu of an independent estimate by a qualified repairman. In such a case, the claims investigator and the approving authority will certify that the property has been examined and that the amount claimed is a reasonable allowance for the cost of the repairs.

(d) *Loss in quarters.* Claims for property loss in quarters or other authorized places should be accompanied by a statement indicating:

(1) Geographical location;

(2) Whether the quarters were assigned or provided in kind by the Government;

V 4 3 / 1 9 9
0 C 1 3 7 8

(3) Whether the quarters are regularly occupied by the claimant;
(4) Name of the authority, if any, who designated the place of storage of the property if other than quarters;
(5) Measures taken to protect the property; and
(6) Whether the claimant is a local inhabitant.

(e) *Loss by theft or robbery.* Claims for property loss by theft or robbery should be accompanied by a statement indicating:
(1) Geographical location;
(2) Facts and circumstances surrounding the loss, including evidence of the crime such as breaking and entering, capture of the thief or robber, or recovery of part of the stolen goods; and
(3) Evidence that the claimant exercised due care in protecting the property prior to the loss, including information as to the degree of care normally exercised in the locale of the loss due to any unusual risks involved.

(f) *Transportation losses.* Claims for transportation losses should be accompanied by the following:
(1) Copies of orders authorizing the travel, transportation, or shipment or a certificate explaining the absence of orders and stating their substance;
(2) Statement in cases where property was turned over to a shipping officer, supply officer, or contract packer indicating:
(i) Name (or designation) and address of the shipping officer, supply officer, or contract packer;
(ii) Date the property was turned over;
(iii) Inventoried condition when the property was turned over;
(iv) When and where the property was packed and by whom;
(v) Date of shipment;
(vi) Copies of all bills of lading, inventories, and other applicable shipping documents;
(vii) Date and place of delivery to the claimant;
(viii) Date the property was unpacked by the carrier, claimant, or Government;
(ix) Statements of disinterested witnesses as to the condition of the property when received and delivered, or as to handling or storage;
(x) Whether the negligence of any Government employee acting within the scope of his employment caused the damage or loss;
(xi) Whether the last common carrier or local carrier was given a clear receipt, except for concealed damages;
(xii) Total gross, tare, and net weight of shipment;
(xiii) Insurance certificate or policy if losses are privately insured;
(xiv) Copy of the demand on carrier or insured, or both, when required, and the reply, if any;
(xv) Action taken by the claimant to locate missing baggage or household effects, including related correspondence.

(g) *Marine or aircraft disaster.* Claims for property losses due to marine or aircraft disaster should be accompanied by a copy of orders or other evidence to establish the claimant's right to be, or to have property, on board.

(h) *Enemy action, public disaster, or public service.* Claims for property losses due to enemy action, public disaster, or public service should be accompanied by:
(1) Copies of orders or other evidence establishing the claimant's required presence in the area involved, and
(2) A detailed statement of facts and circumstances showing an applicable case enumerated in § 180.104(c)(8).

(i) *Property used for benefit of Government.* Claims for property loss when the property was used for the benefit of the Government should be accompanied by:
(1) A statement from the proper authority that the property was supplied by the claimant in the performance of official business at the request of, or with the knowledge and consent of, superior authority or by reason of necessity; and
(2) If the property being used for the benefit of the Government was damaged or lost while not in use, evidence that the loss occurred in an authorized storage area.

(j) *Money.* Claims for loss of money deposited for safekeeping, transmittal, or other authorized disposition, should be accompanied by:
(1) Name, grade, and address of the person or persons who received the money and any others involved;
(2) Name and designation of the authority who authorized such person or persons to accept personal funds, and the disposition required; and
(3) Receipts and written sworn statements explaining the failure to account for funds or return them to the claimant.

(k) *Motor vehicles in transit.* Claims for damage to motor vehicles in transit should be accompanied by a copy of orders or other available evidence to establish the claimant's lawful right to have the property shipped and evidence to establish damage in transit.

§ 180.108 Settlement of Claims.

(a) *Authority.* Bureau Directors and Regional Directors are authorized to settle and pay any claim not exceeding $500 and arising under this part. The General Counsel is authorized to settle and pay any claim not exceeding $15,000 and arising under this part. Unless cognizable under § 180.104 (c)(3), claims for damage to or loss of motor vehicles may be settled and paid only by the General Counsel.

(b) *Redelegation.* The approving authorities may establish such procedures and make such redelegations as may be required to fulfill the objectives of this part.

(c) *Cost or value.* The amount awarded on any item of property will not exceed the cost of the item (either the price paid in cash or property) or the value at the time of acquisition if not acquired by purchase or exchange. The amount payable will be determined by applying the principles of depreciation to the adjusted dollar value or other base price of property lost or damaged beyond economical repair; by allowing the cost of repairs when an item is economically repairable, provided the cost of repairs does not exceed the depreciated value of the item; and by deducting salvage value, if appropriate.

(d) *Depreciation.* Depreciation in value of an item is determined by considering the type of article involved, its cost, condition when damaged beyond economical repair or lost, and the time elapsed between the date of acquisition and the date of damage or loss.

(e) *Appreciation.* There will be no allowance for appreciation in the value of the property except that the cost of the item may be adjusted to reflect changes in the purchasing power of the dollar before depreciation is computed. Appreciation will not be allowed solely because the loss occurred or the claimant now resides in an area remote from the place of purchase of the property.

(f) *Expensive articles.* Allowance for expensive items (including heirlooms and antiques) or for items purchased at unreasonably high prices will be based on the fair and reasonable purchase price for substitute articles of a similar nature.

(g) *Acquisition.* Allowance for articles acquired by barter will not exceed the cost of the articles tendered in barter. No reimbursement will be made for articles acquired in black market or other prohibited activities.

(h) *Replacement.* Replacement of damaged or lost property may be made in kind whenever appropriate.

(i) *Amount allowable.* Subject to the limitations of §§ 180.108(c) through 180.108(h), the amount allowable in settlement of a claim is either:
(1) The depreciated value immediately prior to damage or loss of property damaged beyond economical repair or lost, less any salvage value; or
(2) The reasonable cost of repairs when property is economically repairable, provided that the cost of repairs does not exceed the depreciated value.

(j) *Notification.* The approving authority shall notify the claimant in writing of the action taken on the claim and, if the claim is disapproved or only partially approved, the reasons therefor.

(k) *Carrier or insurer.* In the event a claim submitted against a carrier or insurer under § 180.106 had not been settled before settlement of a claim against the Government under this part, the approving authority shall notify such carrier or insurer to pay the proceeds of the claim to the Commission to the extent the Commission has made payment to the claimant.

(l) *Review.* The action of the approving authority is final; however, the decision may be reconsidered if the claimant so requests and submits a written explanation why reconsideration is appropriate.

(m) *Attorney's fees.* No more than 10 per centum of the amount paid in settlement of each individual claim submitted and settled under this subpart shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with that claim and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating this or any other provision of sections 240 to 243 of title 31, United States Code, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1000.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[6325-01-M]

PART 213—EXCEPTED SERVICE

Department of Labor

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: Schedule A 213.3115(d) is amended to change the headnote from Manpower Administration to Employment and Training Administration; change the name of the division of Indian Manpower Programs to Division of Indian and Native American Programs; change the title of the position of manpower development officer to supervisory manpower development specialist; show grade level coverage; and delete the word "manpower" from the last sentence of the authority. These changes are made to keep the authority current. This amendment also revokes Schedule B 213.3215(c) for 35 manpower development specialist positions in the Manpower Administration because the authority is no longer used.

EFFECTIVE DATE: September 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533

Accordingly, the headnote of 5 CFR 213.3115(d) and (d)(1) are amended and 5 CFR 213.3215 is revoked as follows:

§ 213.3115 Department of Labor.

• • • • • •

(d) *Employment and Training Administration.* (1) Not to exceed 10 positions of supervisory manpower development specialist and manpower development specialist, GS-7/15, in the Division of Indian and Native American Programs, when filled by the appointment of persons of one-fourth or more Indian blood. These positions require direct contact with Indian tribes and communities for the development and administration of comprehensive employment and training programs.

• • • • • •

§ 213.3215 [Revoked]

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
James C. Spry,
Executive Assistant to the Commissioners.

[6325-01-M]

PART 213—EXCEPTED SERVICE

Temporary Boards and Commissions

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment revokes the Schedule A authorities for the President's Commission on Mental Health, the American Revolution Bicentennial Administration, and the President's Commission on Military Compensation because these organizations no longer exist.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533

Accordingly, 5 CFR 213.3199 (j), (k), and (v) are revoked, as follows:

§ 213.3199 Temporary Boards and Commissions.

• • • • • •

(j) [Revoked]
(k) [Revoked]

• • • • • •

(v) [Revoked]

JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-28618 Filed 10-12-78; 8:45 am]

[6325-01-M]

PART 213—EXCEPTED SERVICE

Entire Executive Civil Service

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The schedule A authority for employment of students who need the income to stay in school is amended: (1) To permit employment of mentally retarded and severely physically handicapped students because it is impracticable to examine for such appointments; (2) to eliminate the age restriction of 22 to comply with the Age Discrimination in Employment Act; and (3) to permit all students employed under this authority to work full-time during any period (regardless of length) when their school is officially closed because such employment will not interfere with their education.

EFFECTIVE DATE: October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael D. Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3102(w) is amended as set out below:

§ 213.3102 Entire Executive Civil Service.

• • • • • •

(w) Part-time or intermittent positions the duties of which involve work of a routine nature when filled by students appointed in furtherance of the President's Youth Opportunity Stay-in-School Campaign or when filled by mentally retarded or severly physically handicapped students, provided that the following conditions are met: (1) Appointees are enrolled in or accepted in a resident secondary school (or other appropriate school for mentally retarded students) or an institution of higher learning accredited by a recognized accrediting body; (2) employment does not exceed 16 hours in

V 43 / 199 0 OCT 13 78

any calendar week, except that students may work full-time during any period in which their school is officially closed; (3) while employed, appointees continue to maintain an acceptable school standing, although they need not attend school during the summer; (4) appointees need the earnings from the employment to continue in school, except that this requirement does not apply to mentally retarded or severely physically handicapped students appointed under the authority; and (5) salaries are fixed by the agency head at a level commensurate with the duties assigned and the expected level of performance. Appointments under this authority may not extend beyond 1 year: *Provided*, that such appointments may be made for additional periods of not to exceed 1 year each if the conditions for initial appointments are still met. Persons may not be appointed under this authority unless they have reached their 16th birthday. Appointments may not be made under this authority between May 1 and August 31, inclusive.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

[6325-01-M]

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: Four positions of project officer at grades GS-14 and 15 associated with the Social Security Administration's future process project are excepted under schedule A because it is impracticable to examine for them. No one may serve under this authority after December 31, 1985, when the project will be completed.

EFFECTIVE DATE: October 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3116(d)(6) is added as set out below:

§ 213.3116 Department of Health, Education, and Welfare.

* * * * *

(d) *Social Security Administration.*

* * *

(6) Four project officers at grades GS-14 and 15 associated with the future process project. No one may serve under this authority after December 31, 1985.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-29050 Filed 10-12-78; 8:45 am]

[6325-01-M]

PART 213—EXCEPTED SERVICE

Smithsonian Institution.

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The service limit for veterinary interns with the National Zoological Park is extended from 15 to 24 months to allow enough time for interns to acquire the full knowledge and skills in exotic animal medicine needed by American zoos. Schedule B exception is still appropriate for the positions because it is still impracticable to hold a competitive examination for them.

EFFECTIVE DATE: October 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3274(a)(1) is amended as set out below:

§ 213.3274 Smithsonian Institution.

(a) *National Zoological Park.*

(1) Four positions of veterinary intern, GS-8/9. Employment under this authority is not to exceed 24 months.

* * * * *

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 78—BRUCELLOSIS

Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

BRUCELLOSIS AREAS

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final Rule.

SUMMARY: The Animal and Plant Health Inspection Service is amending its Brucellosis Regulations. These amendments update the Brucellosis regulations by providing the current status of various counties and States which have been designated Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, or Noncertified Areas for purposes of interstate movement of cattle and bison from such areas. This action is required because of the change in the Brucellosis status of the areas affected.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. A. D. Robb, U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services, Hyattsville, Md. room 805, 301-436-8713.

SUPPLEMENTARY INFORMATION: The amendments delete the following areas from the list of Certified Brucellosis-Free Areas in § 78.20 and add such areas to the list designated as Modified Certified Brucellosis Areas in § 78.21 because it has been determined that they now come within the definition of a Modified Certified Brucellosis Area in § 78.1(m): Jefferson, Jo Daviess, Knox Counties in Illinois; Garfield County in Utah.

The amendments delete the following areas from the list of Modified Certified Brucellosis Areas § 78.21 and add such areas to the list designated as Certified Brucellosis-Free Areas in §78.20 because it has been determined that they now come within the definition of Certified Brucellosis-Free Area in § 78.1(l): Mills County in Iowa.

Accordingly, §§ 78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are amended to read as follows:

§ 78.20 Certified Brucellosis-Free Areas.

The following States, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) *Entire States.*

Arizona, California, Connecticut, Delaware, Hawaii, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Virginia, Washington, West Virginia, Wisconsin, Virgin Islands.

(b) *Specific Counties Within States.*

Alabama. Dale, Geneva.

Arkansas. Baxter, Bradley, Carroll, Cleveland, Columbia, Dallas, Drew, Fulton, Garland, Jefferson, Marion, Monroe, Montgomery, Newton, Ouachita, Searcy, Sharp, Stone, Union.

Colorado. Adams, Alamosa, Arapahoe, Archuleta, Baca, Bent, Boulder, Chaffee, Cheyenne, Clear Creek, Conejos, Costilla, Crowley, Custer, Delta, Denver, Dolores, Douglas, Eagle, Elbert, El Paso, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Kiowa, Kit Carson, Lake, La Plata, Larimer, Las Animas, Lincoln, Logan, Mineral, Moffat, Montezuma, Montrose, Morgan, Otero, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Blanco, Rio Grande, Routt, Saguache, San Juan, San Miguel, Sedgwick, Summit, Teller, Washington, Weld, Yuma.

Florida. Baker, Bay, Citrus, Dixie, Escambia, Franklin, Holmes, Jackson, Leon, Liberty, Monroe, Okaloosa, Orange, Santa Rosa, Seminole, St. Johns, Taylor, Wakulla, Walton, Washington.

Georgia. Appling, Atkinson, Bacon, Banks, Brantley, Bryan, Bulloch, Burke, Butts, Camden, Candler, Charlton, Chatham, Chattahoochee, Clarke, Clayton, Cook, Crawford, De Kalb, Echols, Effingham, Evans, Fannin, Franklin, Glascock, Glynn, Greene, Habersham, Jeff Davis, Johnson, Lanier, Laurens, Liberty, Long, McIntosh, Monroe, Peach, Rabun, Richmond, Screven, Stephens, Taylor, Toombs, Treutlen, Twiggs, Upson, Ware, Wayne, Wheeler, White, Wilkinson.

Idaho. Ada, Adams, Bear Lake, Benewah, Bingham, Blaine, Boise, Bonner, Boundary, Butte, Camas, Canyon, Caribou, Clark, Clearwater, Custer, Gem, Idaho, Kootenai, Latah, Lemhi, Lewis, Minidoka, Nez Perce, Owyhee, Payette, Power, Shoshone, Valley, Washington.

Illinois. Adams, Alexander, Bond, Boone, Brown, Bureau, Calhoun, Carroll, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, De Kalb, De Witt, Douglas, Du Page, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Grundy, Hamilton, Hancock, Hardin, Henderson, Henry, Iroquois, Jackson, Jasper, Jersey, Johnson, Kane, Kankakee, Kendall, Lake, La Salle, Lawrence, Lee, Livingston, Logan, Macon, Macoupin, Madison, Marion, Marshall, Mason, McDonough, McHenry, McLean, Menard, Mercer, Monroe, Montgomery, Morgan, Moultrie, Ogle, Peoria, Perry, Piatt, Pike, Pope, Pulaski, Putnam, Randolph, Richland, Rock Island, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Stark, Stephenson, Tazewell, Union, Vermilion, Wabash, Warren, Washington, Wayne, White, Whiteside, Will, Williamson, Winnebago, Woodford.

Iowa. Adair, Allamakee, Audubon, Benton, Black Hawk, Boone, Bremer, Buchanan, Buena Vista, Butler, Calhoun, Carroll, Cass, Cedar, Cerro Gordo, Cherokee, Chickasaw, Clarke, Clay, Clayton, Clinton, Crawford, Dallas, Davis, Decatur, Delaware, Des Moines, Dickinson, Dubuque, Emmet, Fayette, Floyd, Franklin, Fremont, Greene, Grundy, Hamilton, Hancock, Hardin, Harrison, Henry, Howard, Humboldt, Ida, Iowa, Jackson, Jasper, Jefferson, Johnson, Jones, Keokuk, Kossuth, Lee, Linn, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Mills, Mitchell, Monona, Monroe, Montgomery, Muscatine, O'Brien, Osceola, Palo Alto, Pocahontas, Polk, Pottawattamie, Poweshiek, Plymouth, Sac, Scott, Shelby, Sioux, Story, Tama, Union, Van Buren, Wapello, Warren, Washington, Webster, Winnebago, Winneshiek, Woodbury, Worth, Wright.

Kansas. Anderson, Barber, Bourbon, Brown, Chase, Chautauqua, Cherokee, Cheyenne, Clark, Clay, Coffey, Comanche, Decatur, Doniphan, Douglas, Edwards, Ellsworth, Finney, Ford, Gove, Graham, Grant, Gray, Greeley, Hamilton, Haskell, Hodgeman, Jewell, Johnson, Kearny, Kingman, Kiowa, Labette, Lane, Logan, Marion, Marshall, Meade, Mitchell, Ness, Norton, Pawnee, Phillips, Pottawatomie, Pratt, Rawlins, Republic, Riley, Rooks, Rush, Saline, Scott, Shawnee, Sheridan, Sherman Smith, Stanton, Stevens, Thomas, Trego, Wallace, Washington, Wichita, Wyandotte.

Kentucky. Bell, Breathitt, Campbell, Clay, Floyd, Harlan, Johnson, Kenton, Knott, Knox, Lawrence, Lee, Leslie, Letcher, Lewis, Magoffin, Martin, McCreary, Menifee, Morgan, Owsley, Pendleton, Perry, Pike, Robertson, Trimble, Whitley, Wolfe.

Mississippi. Alcorn, Hancock, Harrison, Jackson, Stone, Tishomingo.

Missouri. Audrain, Dunklin, Gasconade, Hickory, Lewis, Moniteau, Montgomery, Perry, Platte, Pulaski, St. Louis, Schuyler, Shelby.

Nebraska. Banner, Box Butte, Cheyenne, Dakota, Deuel, Dodge, Douglas, Perkins, Thurston.

New Mexico. Catron, Colfax, De Baca, Dona Ana, Grant, Guadalupe, Harding, Hidalgo, Lincoln, Los Alamos, Luna, McKinley, Otero, Rio Arriba, Sandoval, San Juan, Santa Fe, Sierra, Socorro, Taos, Torrance, Union.

South Dakota. Aurora, Beadle, Bennett, Bon Homme, Brookings, Brown, Brule, Buffalo, Butte, Campbell, Charles Mix, Clark, Clay, Codington, Corson, Custer, Davision, Day, Deuel, Dewey, Douglas, Edmunds, Fall River, Faulk, Grant, Gregory, Haakon, Hamlin, Hand, Hanson, Harding, Hughes, Hutchinson, Hyde, Jackson, Jerauld, Kingsbury, Lake, Lawrence, Lincoln, Lyman, Marshall, McCook, McPherson, Meade, Mellette, Miner, Minnehaha, Moody, Pennington, Perkins, Potter, Roberts, Sanborn, Shannon, Spink, Sully, Todd, Tripp, Turner, Union, Walworth, Washabaugh, Yankton, Ziebach.

Tennessee. Anderson, Blount, Campbell, Carter, Clairborne, Davidson, Fentress, Grainger, Greene, Hamblen, Hancock, Jefferson, Johnson, Knox, Lake, Lewis, Meigs, Morgan, Perry, Polk, Roane, Robertson, Scott, Sequatchie, Sevier, Sullivan, Unicoi, Union, Van Buren.

Texas. Armstrong, Bandera, Borden, Brewster, Childress, Comal, Crane, Culberson, Ector, Gillespie, Glassock, Gray, Hansford, Hartley, Hemphill, Hudspeth, Hutchinson, Irion, Jeff Davis, Kendall, Kerr, Kimble, Lipscomb, Llano, Loving, Martin, Mason, Menard, Midland, Moore, Newton, Ochiltree, Peces, Presidio, Reagan, Real, Roberts, Schleicher, Sherman, Sterling, Sutton, Terrell, Val Verde, Ward, Winkler, Yoakum.

Utah. Beaver, Cache, Carbon, Daggett, Davis, Duchesne, Emery, Grand, Iron, Juab, Kane, Millard, Morgan, Piute, Rich, Salt Lake, San Juan, Sanpete, Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Washington, Wayne, Weber.

Vermont. Bennington, Caledonia, Essex, Grand Isle, Lamoille, Orange, Rutland, Washington, Windham, Windsor.

Wyoming. Albany, Big Horn, Campbell, Carbon, Converse, Crook, Fremont, Goshen, Hot Springs, Johnson, Laramie, Natrona, Niobrara, Park, Platte, Sheridan, Sublette, Sweetwater, Teton, Uinta, Washakie, Weston.

Puerto Rico. Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Canovanas (Loiza), Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Guanica, Guayama, Guaynabo, Guayanilla, Hormigueros, Humacao, Jayuya, Juana Diaz, Juncos, Lares, Las Marias, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Rincon, Rio Grande, Rio Piedras, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Vieques, Villalba, Yabucoa, Yauco.

§ 78.21 Modified Certified Brucellosis Areas.

The following States, or specified portions thereof, are hereby designated as Modified Certified Brucellosis Areas:

(a) *Entire States.*

Alaska, Louisiana, Oklahoma.

(b) *Specific Counties Within States.*

Alabama. Autauga, Baldwin, Barbour, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Chilton, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Etowah, Escambia, Fayette, Franklin, Greene, Hale, Henry, Houston, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Lee, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell St. Clair, Shelby, Sumter, Talladege, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston.

Arkansas. Texas. Anderson, Andrews, Angelina, Aransas, Archer, Atascosa, Austin, Bailey, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Bosque, Bowie, Brazoria, Brazos, Briscoe, Brooks, Brown, Burleson, Burnet, Caldwell, Calhoun, Callahan, Cameron, Camp, Carson, Cass, Castro, Chambers, Cherokee, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Colorado, Comanche, Concho, Cooke, Coryell, Cottle, Crockett, Crosby, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, De Witt, Dickens, Dimmitt, Donley, Duval, Eastland, Edwards, Ellis, El Paso, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Franklin, Freestone, Frio, Gaines, Galveston, Garza, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hardeman, Hardin, Harris, Harrison, Haskell, Hays, Henderson, Hidalgo, Hill, Heckley, Hood, Hopkins, Houston, Howard, Hunt, Jack, Jackson, Jasper, Jefferson, Jim Hogg, Jim Wells, Johnson, Jones, Karnes, Kaufman, Kenedy, Kent, King, Kinney, Kleberg, Knox, Lamar, Lamb, Lampasas, La Salle, Lavaca, Lee, Leon, Liberty, Limestone, Live Oak, Lubbock, Lynn, McCulloch, McLennan, McMullen, Madison, Marion, Matagorda, Maverick, Medina, Milam, Mills, Mitchell, Montague, Montgomery, Morris, Motley, Nacogdoches, Navarro, Nolan, Nueces, Oldham, Orange, Palo Pinto, Panola, Parker, Parmer, Polk, Potter, Rains, Randall, Red River, Reeves, Refugio, Robertson, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Scurry, Shackelford, Shelby, Smith, Somervell, Starr, Stephens, Stonewall, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Travis, Trinity, Tyler, Upshur, Upton, Uvalde, Van Zandt, Victoria, Walker, Waller, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Wise, Wood, Young, Zapata, Zavala.

Utah. Box Elder, Garfield.

Vermont. Addison, Chittenden, Franklin, Orleans.

Wyoming. Lincoln.

Puerto Rico. Arecibo, Camuy, Carolina, Gurabo, Hatillo, Isabela, Las Piedras, Naguabo, Quebradillas, San Sebastian.

§ 78.22 Noncertified Areas.

The following States, or specified portions thereof, are hereby designated as Noncertified Brucellosis Areas:

(a) *Entire States.*

Yellowstone National Park.

(b) *Specific Counties Within States.*

Florida. Okeechobee.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; sec. 2, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 129, 132, (21 U.S.C. 111–113, 114a-1, 115, 117, 120, 121, 125, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.25))

The amendments impose certain restrictions necessary to prevent the spread of brucellosis in cattle and relieve certain restrictions presently imposed. They should be made effective promptly in order to accomplish their purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 5th day of October.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator
Veterinary Services.

Title 15—Commerce and Foreign Trade

CHAPTER III—INDUSTRY AND TRADE ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 372—INDIVIDUAL VALIDATED LICENSES AND AMENDMENTS

Clarification of Requirement that an Export License Application Must Be Based on an Order

AGENCY: Office of Export Administration, Bureau of Trade Regulation, Department of Commerce.

ACTION: Final rule.

SUMMARY: This revision restates the general requirement that an export license application must be based on an export order. It highlights the fact that the order need not be in the form of an agreement that can presently be executed or that would become a binding contract upon acceptance. It notes that an order need not be an unconditional offer to buy, but it must be more than a mere business inquiry relating to a possible export. It is issued to clarify and simplify the regulations and does not change the regulations in any substantive manner.

EFFECTIVE DATE: October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4196.

Accordingly, § 372.6 of the Export Administration regulations (15 CFR 372.6) is revised to read as follows:

§ 372.6 Substantiation of facts on application.

(a) *Orders and other material facts.*—(1) *Order.* An application for an export license must be based on an order. An "order" means a communication from a person in a foreign country or his representative expressing an intent to import commodities or technical data from the applicant or order party, as defined in § 372.6(b) below. While an order must, in any case, be more than a mere business inquiry relating to a possible export, it need not be an agreement that can presently be executed or that would become a binding contract upon acceptance. Furthermore, an order need not be an unconditional offer to buy. An order, for instance, may be contingent upon certain variable conditions such as market price, time of delivery, availability of the commodities in kinds and quantities desired, and other undetermined factors. Such a contingent offer still constitutes an order within the meaning of these provisions. Similarly, a continuing or "open" order that remains at all times flexible in some respects may be acceptable. If, however, all of the terms of the order are not finally determined before an application is submitted, all negotiations toward the settlement of the terms must have been advanced sufficiently to establish the intent of the person placing the order to consummate the proposed transaction. (The Office of Export Administration may grant a waiver of this order requirement under certain circumstances. See § 372.6(c)(1)).

(2) *Documentary evidence.* Before filing an application for an export license, the applicant should have in his possession documentary evidence of the order and of the following facts relating to the purchase transaction that appear on the license application:

(i) Country of ultimate destination;

(ii) Names and addresses of the ultimate consignee, intermediate consignee (if any), purchaser (if other than ultimate consignee), and any other party to the transaction, whether principal or agent, including but not limited to brokers, representatives, or other agents through whom the order was received;

(iii) Quantity, value and description of commodity or technical data to be exported; and

(iv) End use of the export.

If the applicant does not have the documentary evidence that is required, the evidence must be in the possession of the order party involved in the transaction.

(3) *Definitions.* (i) The term "applicant" is defined as the party (or his duly authorized agent) who, as the principal party in interest in the export transaction, has the power and responsibility for determining and controlling the sending of the commodities and technical data out of the country and is thus, in reality, the exporter. The applicant must be subject to the jurisdiction of the United States. (ii) The term "order party" is defined as that person in the United States who conducted the direct negotiations or correspondence with the foreign purchaser or ultimate consignee and received the order from the foreign purchaser or ultimate consignee. (iii) The term "documentary evidence" means any document(s) from the foreign purchaser or his representative which contain the terms and conditions of an offer to buy the commodities or technical data for which the export license is requested. Such evidence may take the form of a contract signed by both parties, or of letters, telegrams, cables, confirmations, or other documents which set forth the terms of the offer of the foreign purchaser to buy or the acceptance by the foreign purchaser of the exporter's offer to sell. (iv) "Evidence of the facts relating to the purchase transaction" means any document(s) from the purchaser or ultimate consignee that contain the information required in a license application as set forth in § 372.6(a)(2) above. The printed name, address, or nature of business of the ultimate consignee or purchaser appearing on a letterhead or order form shall not constitute evidence of either his identity, country of ultimate destination, or end use of the commodities described in the application.

(4) *Order received by foreign agent.* An order received by a foreign agent of a U.S. exporter must be transmitted to the U.S. exporter before an application may be submitted. An application, however, will be accepted if it is based on an order from the foreign agent of a U.S. exporter covering commodities intended for general resale by the foreign agent to presently unknown end users.

(b) *Signature of order party.* The application must be signed by the order party, as well as by the applicant if they are different. The order party should be shown in the "Order Party's Certification" item on the application. The signature of the order party is not required, however, in cases where maintenance, repair, or operating supplies are to be exported for use and consumption by the ultimate consignee and not for resale, and where the applicant has complete records and information concerning the transaction(s), including all correspondence between the foreign consignee and the person in the United States who originally received the order (the order party).

(c) *Export transactions where no order has been received.*—(1) *Exceptions to the order requirement.* If no order has been received, or if an inquiry has been received that does not clearly meet the requirements of an order as defined in § 372.6(a)(1) above, the Office of Export Administration

V 4 3 / 1 9 9

will consider granting a waiver of the order requirement where the applicant is able to show that an exception is warranted. Some examples of reasons that, if fully substantiated, might warrant an exception are:

(i) An unusual expenditure of time, money or technical skill, in excess of ordinary sales expenses is necessary before negotiations for an order may be pursued and before a bid can be submitted or an order obtained.

(ii) The applicant is under an unusual obligation to export immediately the commodities or technical data covered because of a special trade or industry practice.

(iii) The export involves a sample, gift, relief, or charitable shipment, or other shipment where an order is not normally an element of the export transaction.

An applicant requesting such exception should submit with his application all required supporting documentation whenever possible and a statement explaining in full the reason(s) for the requested exception. If it is not possible to obtain the required documentation at the time the waiver request is submitted, these supporting documents shall be submitted as soon as they are obtainable. If the exception request is granted and the license is issued, certain conditions or limitations on the export may be imposed.

(2) *Inquiry regarding prospects of obtaining license or other authorization.* The Office of Export Administration gives a formal licensing decision only through the issuance of a license or other appropriate document. Such decisions are based upon the actual submission of a formal application or other formal request setting forth all the facts relevant to the export transaction and supported by all required documentation. However, if negotiations of the terms of an export order depend upon an indication of the prospects of obtaining an export license covering the transaction, the person proposing to export may submit an inquiry, before filing a license application. If at all possible, the Office of Export Administration will respond with a preliminary opinion on the outlook for approval. The inquiry, of course, should describe the proposed transaction in full detail and explain why an advisory opinion is needed.

(d) *Copies of documents.* Section 387.11 defines the recordkeeping requirements of the Office of Export Administration, including the types of documents that must be kept. In the course of processing an application, the Office of Export Administration may request either the originals or copies of the documents constituting evidence of an order. The time and manner of submission will be made known to the applicant at the time the request for submission is made. In accordance with § 375.5, all documents submitted in connection with a license application must be identified clearly as a part of that application. All terms and abbreviations must be explained, and an English translation of documents in a foreign language must be attached.

(e) *Changes in facts.* Answers to all items on the application shall be deemed to be continuing representations of the existing facts or circumstances. Any material or substantive change in the terms of the order, or in the facts relating to the purchase transaction or other transaction, shall be promptly reported to the Office of Export Administration, whether a license has been granted or the application is still under consideration. If a license has been granted, such changes shall be reported immediately to the Office of Export Administration, in accordance with the provisions of § 372.7(b), even though shipments against the license may be partially or wholly completed. Change in intermediate consignee must be reported on the Shipper's Export Declaration, and in certain cases an amendment to the export license is required. (See §§ 372.3(b)(3) and 372.11(e).)

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department organization order 10-3, dated December 4, 1977, 42 FR 64721(1977); and Industry and Trade Administration Organization and function order 45-1, dated December 4, 1977, 42 F.R. 64715 (1977).)

Dated: October 6, 1978.

STANLEY J. MARCUSS,
Deputy Assistant Secretary For Trade Regulation.

[3510-25-M]

PART 377—SHORT SUPPLY CONTROLS AND MONITORING

Change in Title and Addition of General Provisions: Monitoring

AGENCY: Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

ACTION: Final rule.

SUMMARY: The Export Administration Act requires the monitoring of exports and contracts for exports of nonagricultural commodities under certain actual or threatened domestic short supply or price situations. While the Department conducts no export monitoring programs at present, this rule establishes the framework under which such monitoring programs will be conducted as the need arises. Additional provisions containing detailed instructions on the monitoring of specific commodities will be issued when a monitoring program(s) for such commodities is established.

EFFECTIVE DATE: October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

SUPPLEMENTARY INFORMATION: In the past, commodities designated for monitoring under provisions of section 4(c)(1) of the Export Administration Act of 1969, as amended, have been included in part 376 with specific instructions for preparing and submitting monitoring reports. This revision establishes a new § 377.15, "General Provisions: Monitoring", which explains the purpose of and the statutory provision for monitoring. Because requirements for monitoring reports will differ for each commodity, no attempt is made in § 377.15 to explain details of reporting. No commodities are being monitored by the Office of Export Administration at this time, but sections defining specific requirements will be added as commodities are designated for monitoring.

In order to identify accurately its new contents, part 377 has been retitled "Short Supply Controls and Monitoring." Section 377.1 is renamed "General Provisions: Short Supply Controls," and §§ 377.7 through 377.14 have been reserved in order to provide ample space for additional commodities which may be subject to short supply controls in the future.

Accordingly, part 377 of the Export Administration Regulations (15 CFR Part 377) is amended as follows:

1. The title of part 377 is amended to read as follows:

PART 377 SHORT SUPPLY CONTROLS AND MONITORING

2. The title of § 377.1 is amended to read as follows:

§ 377.1 General provisions: Short supply controls.

. . . . . .

§§ 377.7-377.14 [Reserved]

3. Sections 377.7 through 377.14 are added and reserved.

. . . . . .

4. A new § 377.15 is added to read as follows:

§ 377.15 General provisions: Monitoring.

(a) *Statutory requirements.* Section 4(c)(1) of the Export Administration Act of 1969, as amended, requires the monitoring of exports and contracts for exports, of any article, material or supply (except those commodities subject to the reporting requirements of section 812 of the Agricultural Act of 1970) when the volume of such exports in relation to domestic supply contributes, or may contribute, to an increase in domestic prices or a domestic shortage, and such price increase or shortage has, or may have, a serious impact on the economy or any sector thereof. The Act further requires that such monitoring shall commence at a time adequate to insure that data sufficient to permit achievement of the policies of the Act will be available in a timely fashion. These statutory requirements are implemented primarily by the provisions contained in this part 377.

(b) *Commodities subject to monitoring.* Commodities currently subject to export monitoring are listed in supplements to this part 377.

(c) *Reporting requirements.* Reports are submitted on form DIB-661P, monitoring report. Data to be submitted, reporting periods, and details of the reporting vary according to the commodities being monitored. Form DIB-661P is a general purpose form which is modified as may be necessary for specific monitoring programs. Part 1 of the form may be used alone or in conjunction with part 2. Refer to the sections on specific commodities subject to monitoring below for details on reporting requirements and specific instructions on preparing and submitting reports.

NOTE.—As of (publication date), no commodities were subject to export monitoring pursuant to section 4(c)(1) of the Export Administration Act of 1969, as amended.

(d) *Publication of monitoring reports.* To the extent practicable, the results of this monitoring are aggregated and included in weekly reports compiled by the Office of Export Administration, setting forth with respect to each article, material, or supply monitored, actual and anticipated exports, the destination by country, and the domestic and worldwide price, supply and demand. If there is sufficient information to justify weekly reports, the Office of Export Administration may compile reports on a monthly basis. In either instance the reports are published in the FEDERAL REGISTER.

(e) *Confidentiality.* The information obtained in the monitoring programs is subject to the confidentiality provisions of section 7(c) of the Export Administration Act of 1969, as amended.

(f) *Control decisions.* The information obtained through monitoring and contained in the reports is also used by the Department of Commerce in determining whether the export of the commodities subject to monitoring should be controlled.

(g) To the extent consistent with the monitoring provisions of this part 377, the other portions of the Export Administration's regulations are applicable to such provisions, including the enforcement, recordkeeping and penalty provisions contained in parts 387 and 388 of this chapter.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department organization order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and function order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

Dated: October 6, 1978.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C-2927]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Public Service Co. of Colorado

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Denver, Colo, utility company to cease, in connection with the advertising and sale of non-utility products and services, failing to properly provide consumers with credit disclosures required by Federal Reserve Systems regulations.

DATES: Complaint and order issued Sept. 12, 1978.[1]

[1] Copies of the Complaint, and decision and Order are filed with the original document.

FOR FURTHER INFORMATION CONTACT:

Paul C. Daw, Director, 6R, Denver Regional Office, Federal Trade Commission, Suite 2900, 1405 Curtis St., Denver, Col. 80202, 303-837-2271.

SUPPLEMENTARY INFORMATION: On Wednesday, May 3, 1978, there was published in the FEDERAL REGISTER, 43 FR 19053, a proposed consent agreement with analysis In the Matter of Public Service Co. of Colorado, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, are as follows: Subpart—Advertising Falsely or Misleadingly; § 13.73 Formal regulatory and statutory requirements; § 13.73-92 Truth in Lending Act; § 13.155 Prices; § 13.155-95 Terms and conditions; § 13.155-95(a) Truth in Lending Act; § 13.205 Scientific or other relevant facts. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1623 Formal regulatory and statutory requirements; § 13.1623-95 Truth in Lending Act—Prices: § 13.1823 Terms and conditions; § 13.1823-20 Truth in Lending Act. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1852 Formal regulatory and statutory requirements: § 13.1852-75 Truth in Lending Act; § 13.1892 Sales contract, right-to-cancel provision; § 13.1892-10 Recording liens or executing judgment on same; § 13.1905 Terms and conditions; § 13.1905-60 Truth in Lending Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 82 Stat. 146, 147; 15 U.S.C. 45, 1601, et seq.)

CAROL M. THOMAS,
Secretary.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

V 4 3 / 1 9 9

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

Exemption From Labeling Requirements for Certain Writing Instruments Cartridges

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Consumer Product Safety Commission exempts certain rigid or semirigid writing instrument cartridges from the labeling requirements of the Federal Hazardous Substances Act insofar as such requirements would apply because the ink contained in the cartridge is a hazardous substance because it is "toxic" as defined by the Commission's regulations and/or because the ink contains 10 percent or more by weight of ethylene glycol or diethylene glycol. The exemption was issued because the conditions specified in the exemption are such that full compliance with the labeling requirements otherwise applicable under the Act is not necessary for the adequate protection of the public health and safety.

DATES: The effective date of the exemption is October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles M. Jacobson, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, phone 301-492-6400.

SUPPLEMENTARY INFORMATION: Under section 2(f) of the Federal Hazardous Substances Act ("the Act"), 15 U.S.C. 1261(f), the term "hazardous substance" includes any substance or mixture of substances which is "toxic" if such substance or mixture of substances may cause substantial personal injury or substantial illness during, or as a proximate result of, any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children. The term "hazardous substance" also includes any substances which the Consumer Product Safety Commission by regulation finds meet this definition. Section 2(g) of the Act defines toxic as including "any substance * * * which has the capacity to produce personal injury or illness to man through ingestion * * *." Section 2(p) of the Act provides that a hazardous substance which is intended, or packaged in a form suitable, for use in the household or by children is misbranded if it does not bear a label conspicuously stating certain specified information and warning statements. The Commission's regulations (16 CFR 1500.3(c)(2)) further define "toxic" as including any substance that produces death within 14 days in half or more of a group of white rats (each weighing between 200 or 300 grams) when a single dose of from 50 milligrams to 5 grams per kilogram of body weight is administered orally. (The dosage required to produce death in one-half of the rats in this test is referred to as the LD-50 single oral dose.)

Section 3(b) of the Act (15 U.S.C. 1262(b)) authorizes the Commission to issue regulations establishing reasonable variations or additional label requirements if it finds that the requirements of section 2(p)(1) of the Act are not adequate for the protection of the public health and safety in view of the special hazard presented by any particular hazardous substance. Pursuant to section 3(b) of the Act, the Commission's regulations (16 CFR 1500.14(b)(1, 2)) establish special labeling requirements for substances containing 10 percent or more by weight of diethylene glycol or ethylene glycol.

Section 3(c) of the Act provides that if the Commission finds that, because of the size of the package involved or because of the minor hazard presented by the substance contained therein, or for other good and sufficient reasons, full compliance with the labeling requirements of the Act is impractical or is not necessary for the adequate protection of the public health and safety, it may issue regulations exempting such substance from the requirements to the extent consistent with the adequate protection of the public health and safety.

PETITION

In a petition received January 3, 1977 (HP 77-4), the Parker Pen Co. requested an exemption to the labeling requirements of the Act. The product category for which the exemption was requested was rigid or semirigid writing instrument cartridges that have a writing point and an ink reservoir containing ink as a free liquid and that comply with the following conditions:

(a) The cartridge is constructed so that the ink will emerge only from the writing tip under any reasonably foreseeable condition of manipulation and use.

(b) When tested by the method described in 16 CFR 1500.3(c)(2)(i), the ink does not have an LD-50 single oral dose of less than 2.5 grams per kilogram of body weight of the test animal.

(c) If the ink contains ethylene glycol or diethylene glycol, the amount of such substance, either singly or in combination, will not exceed 1 gram per cartridge.

(d) The cartridge will not contain more than 3 grams of ink.

The petition requested an exemption for these products from the special labeling requirements of 16 CFR 1500.13(b) (1, 2), which would otherwise apply if the ink had 10 percent or more by weight of ethylene glycol or diethylene glycol. The petition explained the funetional advantages of using higher percentages of ethylene glycol or diethylene glycol. The petition also requested an exemption to the allowable LD-50 single oral dose limit for the unlabeled product (5.0 grams per kilogram of body weight) so that inks having an LD-50 of 2.5 grams per kilogram of body weight could be used. The petition stated that the lower LD-50 would allow additional freedom in the development of future ink formulations and provided data to support the minor hazard presented by the cartridges for which the exemption is sought, both on the basis of the requested LD-50 limit and on the basis of the use of more than 10 percent of ethylene glycol and/or diethylene glycol.

THE PROPOSAL

The Commission considered the data submitted with the petition and analyzed the degree of risk associated with ink cartridges that meet the conditions specified in the requested exemption.

The data available to the Commission showed that approximately 4,200 injuries that were associated with pens and marking pens were treated in hospital emergency rooms in the United States during calendar year 1976. Injuries caused by the ink itself would probably be included in the category of "dermatitis and poisonings," which constituted 4 percent of the reported diagnoses. No deaths in this category have been reported.

After considering the available data, the Commission found that, in view of the difficulty of extracting ink from the writing tip, and in view of the limitation of the amount of ink in each cartridge to 3 grams, the requested LD-50 single oral dose of 2.5 grams per kilogram of body weight of the test animal will provide an adequate degree of protection of the public health and safety. Similarly, the Commission found that the difficulty in extracting the ink from the tip and the limitation that the amount of ethylene glycol and/or diethylene glycol shall not exceed 1 gram per cartridge will provide an adequate degree of protection of the public health and safety where the percentage by weight of either of these substances is 10 percent or more. Accordingly, the Commission preliminarily found that full compliance with the labeling requirements otherwise applicable under the Federal Hazardous Substances Act is not necessary for the adequate protection of the public health and safety. As a result of this finding, the Commission proposed an exception for these ink cartridges, subject to the conditions described above (Nov. 14, 1977; 42 FR 58959).

0 C 1 3 7 8

COMMENT ON THE PROPOSAL

In response to its proposal to exempt these ink cartridges from the full labeling requirements of the Act, the Commission received five comments. Two of these comments indicated general opposition to the granting of the exemption, and one comment was in favor of the exemption. The remaining two comments presented substantive issues concerning the proposed exemption and are discussed below:

1. One of these comments opposes the exemption as it would apply to cartridges containing ethylene glycol. The comment cites support for the proposition that ethylene glycol is a severe exposure hazard and questions whether "any studies [have] been conducted as to the other possible hazards, such as contact with the eye or flammability." This aspect of the comment overlooks the fact that the exemption does not apply to hazards other than toxicity. The act also applies to substances that are irritants or are flammable. Substances that are shown to be eye irritants or to be flammable, as defined in the Commission's regulations at §§ 1500.42, 1500.43 must meet the labeling requirements of the Act that are applicable to these hazards, and these requirements would not be affected by the proposed exemption. (The information available to the Commission indicates that ethylene glycol is not flammable.)

This comment also states that the objection to the exemption is based on (1) the fact that if anything can go wrong with an ink cartridge, it will, and (2) that small children who can't read will undoubtedly account for the vast majority of accidents. The Commission has considered the likelihood that a defective cartridge may allow access to the ink contained therein in concluding that the full labeling requirements of the FHSA are not necessary for the protection of the public health and safety in relation to the cartridges covered by the exemption. This aspect is also addressed by the condition in the exemption that the ink will emerge only from the writing tip under any reasonably foreseeable condition of manipulation and use. The fact that the group subject to the most risk of accidental ingestion is small children who can't read would not appear to be a reason to label these cartridges with warnings the children could not read.

For the reasons discussed above, the arguments in this comment in opposition to the proposed exemption are not persuasive, and the Commission still believes that issuing the exemption is consistent with the criteria set forth in section 3(c) of the FHSA.

2. A comment on the proposal was received from the Gillette Co., which stated that although Gillette did not oppose the objective of the proposed exemption nor any of its stated conditions, Gillette believes that the exemption is unnecessarily limited in that (1) it applies only if the ink were contained in the reservoir as a free liquid and (2) it applies only to writing instrument cartridges and not to writing instruments in general.

Concerning the first of those limitations, Gillette pointed out that many writing instruments contain ink which is contained in the reservoir within an absorbent material and not as a free liquid. They argue that these absorbent materials retain significant amounts of the ink that is stored in the reservoir and that they therefore allow less ink to be available for accidental ingestion than would be the case if the ink were in the reservoir as a free liquid. They conclude that writing instruments that contain absorbent material in the reservoir are inherently safer than those that do not and that the proposed limitation of "containing ink in the reservoir as a free liquid" should be deleted from the exemption.

Concerning the second limitation, Gillette argues that there is no logical or safety-related distinction between writing instrument cartridges and writing instruments in general.

After carefully considering the comments submitted by Gillette, the Commission agrees that there is no apparent reason why the conditions in the exemption that is issued below would not protect the public health and safety as adequately for writing instruments in general as for ink cartridges containing ink in the reservoir as a free liquid. However, before broadening the scope of the exemption as requested by Gillette, the Commission believes that it should propose these changes for public comment in order to obtain the benefit of any data, views, or arguments that interested persons believe should be considered by the Commission when it makes the final decision on whether or not Gillette's request should be granted. Accordingly, the Commission is issuing the exemption requested by Parker as originally proposed and will in the near future separately propose to expand the scope of the exemption as requested by Gillette.

ADDITIONAL ISSUE

The labeling requirements from which an exemption is sought for these ink cartridges are intended to protect against the acute toxic effects that can occur soon after the ingestion of a hazardous substance. These labeling requirements are not intended to address the hazard of products that may cause cancer or other injuries a long time after the initial exposure. The test of rats provided for in § 1500.3(c)(2)(i) would not detect carcinogenic effects, because the test animals are observed for only 14 days and are given only a single oral dose of the substance.

The Commission's staff has noted that certain ink dyes are similar (but not identical) in chemical structure to dyes which are suspected of being carcinogenic. The regulation, if warranted, of any ink dyes that are ultimately determined to be carcinogenic would have to be accomplished in a separate rulemaking proceeding.

As explained above, the risks that may be associated with possibly carcinogenic substances do not relate to the categories of labeling requirements with which this exemption is concerned. In addition, the dyes could be used in presently marketed inks, regardless of whether the exemption is approved. Accordingly, the issue of the potential use of possible carcinogenic dyes is separate from the issues relating to this exemption.

CONCLUSION

After considering the petition, the comments on the proposal, and the information obtained by the Commission's staff, the Commission finds that because of the size of the package involved, the minor hazard of the substance contained therein, and for the other good and sufficient reasons discussed above, full compliance with the labeling requirements otherwise applicable under the Federal Hazardous Substances Act is impracticable and not necessary for the adequate protection of the public health and safety.

Because this rule grants an exemption, the requirement of the Administrative Procedure Act that publication shall be made not less than 30 days before the effective date (5 U.S.C. 553(d)) is not applicable, and the exemption is therefore effective immediately.

Therefore, pursuant to the Federal Hazardous Substances Act (secs. 2(f, p), 3(a-c), 74 Stat. 372, 374, 375, as amended; 15 U.S.C. 1261(f, p), 1262 (a-c)), the Commission amends title 16, chapter II, of the Code of Federal Regulations by adding to Subchapter C, Part 1500, § 1500.83, a new paragraph (a)(38) to read as follows (the text of the introductory portion of § 1500.83(a), although unchanged, is included for context):

V 43 / 199 OCT 13 78

§ 1500.83 Exemption for small packages, minor hazards, and special circumstances.

(a) The following exemptions are granted for the labeling of hazardous substances under the provisions of § 1500.82:

• • • • • •

(38) Rigid or semirigid writing instrument cartridges having a writing point and an ink reservoir and containing ink in the reservoir as a free liquid are exempt from the labeling requirements of section 2(p)(1) of the act (repeated in § 1500.3(b)(14)(i) of the regulations) and of regulations issued under section 3(b) of the act (§ 1500.14(b)(1,2)) insofar as such requirements would be necessary because the ink contained therein is a "toxic" substance as defined in § 1500.3(c)(2)(i) and/or because the ink contains 10 percent or more by weight ethylene glycol or diethylene glycol, if all the following conditions are met:

(i) The writing instrument cartridge is of such construction that the ink will, under any reasonable foreseeable condition of manipulation and use, emerge only from the writing tip.

(ii) When tested by the method described in § 1500.3(c)(2)(i), the ink does not have an LD-50 single oral dose of less than 2.5 grams per kilogram of body weight of the test animal.

(iii) If the ink contains ethylene glycol or diethylene glycol, the amount of such substance either singly or in combination does not exceed 1 gram per writing instrument cartridge.

(iv) The amount of ink in the writing instrument cartridge does not exceed 3 grams.

(Secs. 2(f, p), 3(a-c), 74 Stat. 372, 374, 375, as amended; 15 U.S.C. 1261(f, p), 1262(a-c).)

Effective date: This amendment becomes effective October 13, 1978.

Dated: October 10, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 34-15215, IA-640]

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

Applicability of the Investment Advisers Act to Certain Brokers and Dealers

AGENCY: Securities and Exchange Commission.

ACTION: Response to requests for comment.

SUMMARY: The Commission previously announced that it would allow a temporary exemption from the Investment Advisers Act of 1940 for certain brokers and dealers to expire. In addition, the Commission set forth current staff views on the meaning of the term "special compensation" and solicited public comments on those views and on the question whether brokers or dealers who have discretionary authority over customers' accounts should, per se, be considered investment advisers with respect to such accounts. The staff has decided not to modify at this time its previously expressed views concerning "special compensation" and the Commission has decided not to take any action at this time concerning brokers or dealers who have discretionary authority over customers' accounts.

FOR FURTHER INFORMATION CONTACT:

Michael Berenson, Esq., Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-755-1815.

SUPPLEMENTARY INFORMATION:

BACKGROUND

The adoption of Rule 19b-3 (17 CFR 240.19b-3)[1] under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) ("Exchange Act"), if followed by the "unbundling" of brokerage commission charges and charges for research and other investment advice, could have caused those brokers or dealers who unbundled to become investment advisers as that term is defined in the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.) ("Advisers Act"). To allow time for adjustment, the Commission adopted a series of temporary exemptions from the Advisers Act, in the form of Rule 206A-1(T) (17 CFR 275.206A-1(T)) under the Advisers Act, for certain brokers and dealers who had been registered pursuant to Section 15 of the Exchange Act (15 U.S.C. 78o) prior to the May 1, 1975 effective date of Rule 19b-3 and who were not then registered as investment advisers.

On April 27, 1978, the Commission issued a release[2] in which it announced the final extension of Rule 206A-1(T), until October 31, 1978. A current staff interpretation of the term "special compensation" as used in section 202(a)(11)(C) of the Advisers Act[3] (15 U.S.C. 80b-2(a)(11)(C)) was also set forth and public comments were solicited on those views and on the question whether brokers or dealers who have discretionary authority over customers' accounts should, per se, be considered investment advisers with respect to such accounts. The Commission has considered the comments received and has determined not to take any action at this time with respect to brokers or dealers who exercise discretionary authority over their customers' accounts. Further, the Division of Investment Management ("Division") has reviewed the comments which discussed the term "special compensation" and intends for the present to continue to interpret that term in the manner described in Advisers Act Release No. 626. The Commission also notes that the temporary exemption will expire on October 31, 1978, as previously announced and that the staff will consider other rule changes suggested by commentators.

COMMENTS RECEIVED

As was stated in that release, the Division, as a general principle, regards special compensation as existing only where there is a clearly definable charge for investment advice. The release then set forth certain applications of this principle to specific situations.

Two public commentators addressed themselves to this issue. One expressly agreed with, and the other did not appear to object to, the controlling interpretative principle. They did disagree, in differing respects, as to the application of the principle to certain situations.

The Division believes the best approach for now is to continue to interpret this term as described in Advisers Act Release No. 626, believing that if experience is gained with concrete situations, a better basis would exist for making any interpretative change. In that connection, the Division will be mindful of the desirability of price competition between brokers who unbundle services and those who do not unbundle, to the extent compatible with adequate protection of users of advisory services.

Several commentators addressed the Commission's statement that it was considering whether to take action so that the exclusion in section 202(a)(11)(C) would not be available to a broker-dealer who manages his customers' accounts on a discretionary basis. The commentators questioned the Commission's statutory authority to limit the scope of the exclusion in section 202(a)(11)(C). In addition, the commentators asserted that there were policy reasons which mitigate against this approach. The Commission has determined not to take such action at this time. The Commission's staff will continue to examine the applicability of the Federal securities laws to discretionary accounts. For the present, the Division will continue to take the position that brokers or dealers who exercise discretionary authority over a limited number of their customers' accounts, but do not receive special compensation for such services, can rely on the exclusion in section 202(a)(11)(C). However, if the business of a broker or dealer consists almost exclusively of managing accounts on a discretionary basis, the Division would not regard such broker or dealer as providing investment advice solely incidental to his business as a broker or dealer and therefore the broker or dealer would not be eligible for the exclusion in section 202(a)(11)(C).

Three commentators suggested that the temporary rule be further extended to allow for further study. While the Commission will continue to give attention to these matters, it does not appear at present that statutory standards (set forth in section 206A of the Advisers Act (15 U.S.C. 80b-6A)) are met for granting an exemption to broker-dealers broader than that which the Advisers Act already provides.

Two commentators suggested (a) a modification of Rule 206(3)-2 (17 CFR 275.206(3)-2),[4] relating to certain agency transactions and (b) the adoption of a similar rule under section 206 (15 U.S.C. 80b-6) relating to principal transactions, to ease burdens on dual registrants. The staff will give active attention to these suggestions.

[1] Rule 19b-3 prohibits any national securities exchange from adopting or retaining any rule that requires, or from otherwise requiring, its members to charge fixed rates of commission for transactions executed on, or by the use of the facilities of, such exchange.

[2] Advisers Act Release No. 626, Securities Exchange Act Release No. 14714, 43 FR 19224 (May 4, 1978).

[3] Section 202(a)(11)(C) excludes from the definition of an investment adviser "any broker or dealer whose performance of such (advisory) services is solely incidental to the conduct of his business as a broker or dealer and who receives no special compensation therefor."

[4] Rule 206(3)-2 under the Advisers Act was adopted on June 1, 1977, Advisers Act Release No. 589, 42 FR 29300, June 8, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

OCTOBER 5, 1978.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 75P-0361]

PART 136—BAKERY PRODUCTS

Amendment of Standards of Identity

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the standards of identity for bread, rolls, and buns by removing the limit on the use of mono- and diglycerides of fat-forming fatty acids, diacetyl tartaric acid esters of mono- and diglycerides of fat-forming fatty acids, propylene glycol mono- and diesters of fat-forming fatty acids, and other ingredients that perform a similar function. The Commissioner for Food and Drugs has determined that it is appropriate to remove these limitations from the standards because technical considerations make it unlikely that excessive amounts of these ingredients would be used.

DATES: Effective November 14, 1978; objections by November 13, 1978.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fisher Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Harold Salwin, Bureau of Foods (HFF-416), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St., SW., Washington, DC 20204, 202-245-8531.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of May 26, 1978 (43 FR 22728), the Food and Drug Administration published a proposal to amend the standards of identity for bread, rolls, and buns as set forth in § 136.110 (21 CFR 136.110) of the regulations by removing the limit on the use of mono- and diglycerides of fat-forming fatty acids, diacetyl tartaric acid esters of mono- and diglycerides of fat-forming fatty acids, propylene glycol mono- and diesters of fat-forming fatty acids, and other ingredients that perform a similar function. These ingredients are frequently used in breadmaking as antistaling agents to delay the firming of bread. Provision for the optional use of these ingredients was included in a revision of the standards for bread published in the FEDERAL REGISTER of February 12, 1976 (41 FR 6242). Section 136.110(c)(5)(ii) limited the total quantity to not more than 0.5 part for each 100 parts by weight of flour used, but the provision was stayed by objections to the effect that the limit is unnecessarily restrictive. The May 26, 1978 proposal to remove the limit was made because information became available to the Commissioner of Food and Drugs demonstrating that more than 0.5 part of mono- and diglyceride mixtures per 100 parts of flour is frequently required, and that technical considerations make it unlikely that excessive amounts of these or other bread softeners would be used. The Commissioner also proposed certain editorial changes in § 136.110(c)(15) and (18). Interested persons were invited to submit comments by July 25, 1978. No comments were received.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 136 is amended by revising paragraph (c)(5)(ii), (15), and (18) to read as follows:

§ 136.110 Bread, rolls, and buns.

• • • • • •

(c) • • •

(5) • • •

(ii) Mono- and diglycerides of fat-forming fatty acids, diacetyl tartaric acid esters of mono- and diglycerides of fat-forming fatty acids, propylene glycol mono- and diesters of fat-forming fatty acids, and other ingredients that perform a similar function.

• • • • • •

(15) Dough strengtheners and other dough conditioners not listed or referred to in this paragraph, if the total quantities of such ingredients or combination is not more than 0.5 part for each 100 parts by weight of flour used.

• • • • • •

(18) Other ingredients that do not change the basic identity or adversely affect the physical and nutritional characteristics of the food.

• • • • • •

V 4 3 / 1 9 9 0 C 1 3 7 8

Any person who will be adversely affected by the foregoing regulation may at any time on or before November 13, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective November 14, 1978, except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be given by publication in the FEDERAL REGISTER.

(Secs. 401, 701(e), 52 Stat. 1046, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e)).)

Dated: October 4, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[4110-03-M]

SUBCHAPTER C—DRUGS FOR HUMAN USE

[Docket No. 77N-0149]

PART 310—NEW DRUGS

Requirements for Patent Labeling for Progestational Drug Products

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The agency is issuing a final regulation to require patient labeling for progestational drug products. The new labeling requirements will provide consumers with written information concerning the risks of use of progestational drug products during the early stages of pregnancy. The regulation specifies the kind of information and warnings to be contained in the patient labeling and states how the labeling is to be made available to the patient.

EFFECTIVE DATE: December 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Steven Unger, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-5220.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of July 22, 1977 (42 FR 37643), the Food and Drug Administration (FDA) proposed a new requirement for patient labeling of progestational drug products. The agency proposed requiring that written information describing the risks of birth defects associated with drug use during the first 4 months of pregnancy be distributed to patients taking progestational drugs. Interested persons were given until September 20, 1977 to submit written comments. More than 200 individuals, physicians, manufacturers, and professional and trade organizations commented on the proposal. The following discussion summarizes and responds to the most substantial issues raised by the comments:

1. *Statutory authority.* Several comments challenged the agency's statutory authority under the Federal Food, Drug, and Cosmetic Act to require patient labeling. The comments suggested that the sections of the act cited as authority do not provide such authority.

The Commissioner of Food and Drugs has concluded that the Federal Food, Drug, and Cosmetic Act authorizes the promulgation of patient labeling requirements. This issue was discussed in detail in paragraph 4 of the preamble to the proposed regulation on the content and format of prescribed drug labeling, published in the FEDERAL REGISTER of April 7, 1975 (40 FR 15392). It has been similarly discussed in the final regulations requiring patient labeling for estrogenic drug products, published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37636), and revising the requirements for patient labeling for oral contraceptives, published in the FEDERAL REGISTER of January 31, 1978 (43 FR 4214). The Commissioner advises that the statement of the authority to issue patient labeling requirements stated in those FEDERAL REGISTER documents applies equally to the requirements issued herein.

2. *Progesterone and hydroxyprogesterone.* A number of comments objected to the inclusion of certain drug products in the class of progestational drugs requiring patient labeling. In particular, the comments noted certain characteristics of progesterone and hydroxyprogesterone that distinguish these drugs from the other progestational drug products and warrant excluding progesterone and hydroxyprogesterone from the warning about teratogenic risk. Progesterone, the comments argued, is a physiologically occurring hormone that is present during normal pregnancy in blood levels considerably higher than can be produced in therapeutic dosages by exogenous administration. The comments pointed out, moreover, that the references cited in physician labeling upon which the inclusion of hydroxyprogesterone is based implicate the drug in only one instance of congenital anomaly, although the drug is probably the most widely used progestational agent.

The Commissioner concludes that differences that would warrant a distinction in the labeling between progesterone, hydroxyprogesterone, and other progestational drug products have not been adequately demonstrated. A recent article appearing in the literature on the subject of sex hormones used in pregnancy and congenital anomalies notes that in the group of patients who received progestogens only, cardiovascular malformations occurred at a rate of 16.4 per 1,000, while a rate of 7.8 per 1,000 was recorded in offspring of patients who did not receive female sex hormones during pregnancy (Heinonen et al., "Cardiovascular Birth Defects and Antenatal Exposure to Female Sex Hormones," *New England Journal of Medicine* 296:67, 1977). (A copy of this article is on file in the office of the Hearing Clerk, Food and Drug Administration.) Of particular interest, the Commissioner notes that in the group receiving only progestogens, of 7 cases reported with cardiovascular malformations, 2 were exposed to progesterone alone while a third case was given progesterone along with norethindrone. Three other cases received a progesterone derivative exclusively.

Although these data do not confirm a cause and effect relationship with progesterone, they do raise an element of suspicion which could require a considerably larger study to rule out a positive relationship. It is true that in several published studies progesterone per se was not specifically implicated, but it is also true that in many cases the route of administration mentioned suggests that the exact hormone given, although not known, could very well have been progesterone.

Furthermore, in view of the large number of orally active progestational drugs available and the limited number of studies conducted, the Commissioner would expect to find that in some studies no cases were associated with the use of injectable products such as progesterone or hydroxyprogesterone. Finally, in no study did any one specific hormone stand out, but rather sex hormones—both estrogens and progestogens—have been implicated as a class.

The Commissioner does not agree that the safety of exogenous progesterone is demonstrated by the high rate of endogenous secretion of progesterone during pregnancy. In pregnancy, there is also a high rate of secretion of estrogens, yet the exogenous use of all estrogens is contraindicated during pregnancy because of reported adverse fetal effects. Furthermore, the use of exogenous progesterone could produce a progesterone level in patients that would be in excess of the normal range for a particular phase of pregnancy and that could conceivably have an adverse fetal effect.

In summary, the Commissioner believes that there is not sufficient evidence to permit the exclusion of any of the progestational drug products from the patient labeling requirements. If more information becomes available that can be relied upon to distinguish within the class, certain progestational drug products may be exempted from the patient labeling requirements.

3. *Consistency with previously announced policies.* One comment recommended that the implementation of a patient labeling regulation for progestational drug products be delayed until an overall policy on patient prescription drug labeling is published. The comment argued that such a course of action would be consistent with FDA's previously announced policy, published in the FEDERAL REGISTER of November 7, 1975 (40 FR 52075). The comment urged, moreover, that intensive, scientifically controlled analysis of all the benefits and risks associated with patient labeling be undertaken and the cumulative results of such analysis utilized before implementation of a patient labeling program for particular prescription drugs, including progestational drugs.

The Commissioner does not believe that promulgation of this final regulation represents a departure from previously announced policies. As noted in paragraph 5 of the preamble to the July 22, 1977 final regulation requiring patient labeling of estrogenic drug products, the Commissioner did not intend the November 7, 1975 notice to suggest that FDA would defer the adoption of requirements for patient labeling for specific drugs when the need for such labeling was clearly demonstrated. In the case of progestational drug products, the Commissioner believes that such a need has been demonstrated and that it is necessary to supplement and reinforce the physician's discussion of the risks of progestational drug products with a written warning to the patient concerning the teratogenic risks associated with use of the drug during the early stages of pregnancy.

The Commissioner is committed to a systematic evaluation and analysis of the effectiveness of patient labeling to assist in preparing and designing a better patient labeling program. This commitment, however, does not necessitate a delay in implementing patient labeling for particular drugs, especially where patient labeling will perform the limited function of communicating a specific warning regarding the risks of drug use.

4. *Interference in practice of medicine.* Several comments contended that implementation of the regulations would result in significant Federal interference in the practice of medicine and infringement on the physician/patient relationship. The comments suggested that this result was contrary to past expressions of congressional policy.

The Commissioner rejects this contention. This issue was fully discussed in paragraph 3 of the preamble to the July 22, 1977 final regulation requiring patient labeling of estrogenic drug products, and the Commissioner reaffirms the conclusions stated in that publication. Patient labeling is not intended to preempt the physician's responsibility, nor will it have that effect. Rather, in situations where physicians are conscientious in discussing the relative benefits and risks of progestational drugs with their patients, the patient labeling will simply reinforce what the physician has explained to the patient and serve as a written reminder that can be referred to by the patient during the course of therapy. Even in those situations in which information regarding the benefits and risks of drug use is not fully provided by the physician, the labeling is not intended to supersede the role of the physician in informing the patient or to interfere in any way with communications between physician and patient.

5. *Requests for delay in implementation.* Two comments noted that litigation is pending in several Federal courts challenging FDA's authority under the act to require patient labeling for prescription drug products. The comments requested that FDA not issue this regulation until a final decision that FDA does have such authority is made. The Commissioner has determined that deferral of a final regulation requiring patient labeling for progestational drug products would not be in the public interest. The Commissioner believes that to assure the safe and effective use of progestational drug products, women should be provided with written information telling them of the risks of using such drug products during pregnancy. A deferral of this regulation until a final judicial determination of the agency's statutory authority would deprive many women of the benefit of that written information and would increase the likelihood that some women to whom the drug is prescribed would take the drug, ignorant of its risks. The Commissioner notes that the authority to require patient labeling of prescription drugs has been preliminarily upheld by the one court that has reviewed the matter (*Pharmaceutical Manufacturers Association v. FDA*, No. 77-291 (D. Delaware, October 5, 1977) (order denying preliminary injunction)).

6. *Distribution of labeling in health-care institutions.* One comment noted that it is impractical to provide patient labeling each time a dose is dispensed to inpatients in health-care institutions. The comment recommended that the proposed distribution requirements be revised by permitting health-care institutions to provide patient labeling to patients before the first dose is administered or, if it is a long-term care facility, before the first administration and every 30 days thereafter.

As indicated in paragraph 11 of the preamble to the July 22, 1977 final regulation requiring patient labeling for estrogen drug products, the Commissioner agrees that hospitals and other health-care institutions should have some flexibility in meeting requirements regarding distribution of patient labeling. The Commissioner concludes that it would be impractical and unnecessary to require that patient labeling be made available to the hospitalized or institutionalized patient every time a drug is administered. The final regulation has, therefore, been revised by providing in § 310.516(e) (21 CFR 310.516(e)) that in acute-care hospitals and long-term care facilities, the requirements of § 310.516 are met if patient labeling is provided to the patient before first administration of the drug, and every 30 days thereafter, as long as the therapy continues. This revision in the proposed regulation answers the objection raised by the comment, but avoids the somewhat complicated procedure that would result from having different requirements for acute-care and long-term care facilities.

V 4 3 / 1 9 9 0 C 1 3 7 8

7. *Directions for use.* One comment recommended that § 310.516(b) be amended by adding a requirement for a statement regarding the need to take the drug only as directed and to follow precisely instructions for use of the drug.

The Commissioner recognizes the importance of such information and believes that in the usual case patient labeling can perform a useful role in conveying warnings of the kind recommended by the comment. The Commissioner does not believe, however, that progestational drug product patient labeling is the most appropriate vehicle for conveying information which pertains to the use of all drugs, because progestational drug product labeling is intended to convey a very specific and relatively brief message about the risks of birth defects. The Commissioner is, in this case, particularly convinced of the need to avoid burdening the text of the labeling with the kind of additional statements recommended by the comment. Therefore this comment is rejected.

8. *Inflationary impact of intended action.* One comment objected to the statement in the preamble to the proposed regulation that FDA had determined that the document did not contain a major proposal requiring preparation of an inflation impact statement. The comment argued that a substantial increase in drug prices would result from implementation of a patient labeling requirement, reflecting costs incurred by disruption of presently utilized methods of packaging, labeling, storing, and dispensing progestational drug products.

The Commissioner believes that the figures quoted in the economic impact assessment placed on file with the Hearing Clerk when the proposal was published accurately approximate the direct impact the proposed requirement will have on the costs of progestational drug products. Possible indirect costs resulting from the patient labeling requirement are not reflected in the assessment, but the Commissioner notes the hypothetical nature of such costs and the difficulty of quantifying these costs in specific dollar amounts. In this regard, the Commissioner regrets that the comment submitted on this matter does not more specifically describe the nature or estimate the magnitude of the potential cost increases involved.

The comment also appears to misunderstand the basis upon which FDA determines whether a document requires preparation of an impact statement. Not all proposed actions with some potential economic impact require preparation of an economic impact statement (currently identified as a regulatory analysis). What is required, and what has been done in this case, is the preparation of an economic impact assessment setting forth the criteria and the threshold amounts for determining whether an action will have a major inflation impact. Only if the action will have a major impact is an impact statement required. Here, assuming that all potential cost increases referred to in the comment are realized, it is clear that these costs, added to the costs already reflected in the economic impact assessment, do not meet the criteria or reach the threshold amounts described in the assessment. Therefore, measured against the standards as set forth in the assessment, the progestational drug patient labeling requirement is not an action that will have a major economic impact and does not require the preparation of an economic impact statement. The economic impact assessment for this action is on file with the Hearing Clerk, FDA.

9. *Effective date provisions.* A manufacturer with extensive warehouse and distribution facilities objected to the schedule for implementing the patient labeling requirements. The comment noted that the effective date provisions as outlined in proposed § 310.516(e)(4) would, if finalized, require the burdensome and costly retrieval and relabeling, by the effective date, of drug products packaged before the effective date. The comment urged that the "catch-up" provisions be deleted so that the new patient labeling requirements would apply only to products packaged after the effective date.

Another comment suggested that, in light of the importance of progestational patient labeling, the regulation be made effective immediately upon publication in the FEDERAL REGISTER.

The Commissioner does not believe that it would be in the best interest of patients to limit the applicability of the regulation to those drug products packaged after the effective date. A limitation of that kind would clearly delay the time by which the labeling will be available to all patients. It could also result, because of differences in manufacturing inventories, in variations in the time when products with patient labeling would begin to be furnished to patients. The effective date provision as proposed and as adopted herein is intended to prevent any further distribution of progestational drugs without patient labeling on or after the effective date, without necessitating the recall of stock in the possession of persons who are not responsible for the content of the labeling.

At the same time, the Commissioner rejects the comment that urged that the regulation be effective immediately upon publication. That policy would increase the likelihood of disruption and delays in the supply of progestational drugs. The Commissioner believes that the 60 days allowed for manufacturers to comply with the patient labeling requirements will provide patient labeling at an early date, insure a steady supply of the drug product to patients, and not unduly burden manufacturers.

10. *Ongoing distribution of patient labeling.* The Commissioner is also revising § 310.516(e)(2) to provide that in the case of progestational drug products in bulk package intended for multiple dispensing, a sufficient number of patient-labeling pieces "shall be included in or shall accompany each bulk package" to assure that the labeling can be furnished with each package dispensed to the patient. This revision is intended to clarify that patient labeling must physically accompany the drug product but need not be actually placed inside the immediate bulk package container.

The Commissioner anticipates that manufacturers and labelers will employ a reliable statistical method to determine how many patient-labeling pieces must be included in or with each bulk package, but recognizes that in some cases additional pieces may, for a variety of reasons, be required. The Commissioner is therefore adding a sentence to § 310.516(e)(2) to indicate that the manufacturer or labeler may also employ a supplementary distribution system to supply additional patient labeling to the dispenser. That system shall not, however, act as a substitute for the requirement that patient labeling be supplied in or with each bulk package.

11. *Use of uniform labeling.* The final regulation adopts without change the proposed requirements that the labeling identify both the name of the drug product and the name and place of business of the manufacturer, packer, or distributor. These provisions are intended to assure that the labeling can be satisfactorily related to and dispensed with a specific manufacturer's drug products. However, the Commissioner is aware that similar provisions in the final regulation requiring patient labeling for estrogenic drug products have elicited objections from a number of prescription drug dispensers who point out that these provisions preclude the use of uniform or "generic" labeling and require the storage, collation, and distribution of large numbers of individualized patient-labeling leaflets. In response to these objections, the Commissioner has tentatively concluded that certain revisions are appropriate to facilitate the use of uniform labeling. Published elsewhere in this issue of the FEDERAL REGISTER is a proposal which, if finalized, will enable dispensers to use class

labeling suitable for all drugs subject to the patient labeling regulations for estrogenic, oral contraceptive, and progestational drug products. Pending the receipt of comments and the final decision on the use of "generic" labeling, the Commissioner advises that he will not object to the use by dispensers of uniform labeling consistent with the provisions outlined in the accompanying proposal.

Section 310.516(f) requires that FDA make available progestational drug product patient labeling that is responsive to all items that are specified in § 310.516(b). A Drug Efficacy Study Implementation (DESI) notice containing both a guideline patient labeling text and revised physician labeling was published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37646). Comments received in response to that notice have been carefully reviewed and the Commissioner has determined that no changes in the texts of either physician labeling or patient labeling are required. (An agency report responding to the most significant issues raised by the comments has been provided directly to a number of persons commenting on the notice. A copy of this report has been placed on file in the office of the Hearing Clerk, FDA.) The Commissioner advises that the text of the patient labeling as set forth in the July 22, 1977 notice is a guideline (see § 10.90 (21 CFR 10.90)) which, if followed, will enable any person to comply with the requirements of § 310.516(b) as finalized herein.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 701(a), 52 Stat. 1050–1053 as amended, 1055 (21 U.S.C. 352, 355, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 310 is amended by adding new § 310.516 to Subpart E, to read as follows:

§ 310.516 Progestational drug products; labeling directed to the patient.

(a) The Commissioner of Food and Drugs concludes that the safe and effective use of any progestational drug product requires that patients be informed that there is an increased risk of birth defects in children whose mothers have taken this drug during the first 4 months of pregnancy. Accordingly, except as provided by paragraph (d) of this section, any progestational drug product that is the subject of a new drug application approved either before or after October 9, 1962 and all identical, related, or similar drug products as defined in § 310.6, whether or not the subject of an approved new drug application, shall be dispensed to patients with labeling in lay language containing such a warning. The patient labeling shall be provided as a separate printed leaflet independent of any additional materials.

(b) The patient labeling shall specifically include the following:

(1) Name of the drug.

(2) Name and place of business of the manufacturer, packer, or distributor.

(3) A warning that there is an increased risk of birth defects in children whose mothers take this drug during the first 4 months of pregnancy.

(4) A brief discussion of the nature of the risks of birth defects resulting from the use of these drugs during the first 4 months of pregnancy.

(5) A brief statement that these drugs are no longer considered safe as a test for pregnancy.

(6) A statement that the patient should inform her physician as soon as possible if she discovers that she was pregnant when she took the drug.

(c) The patient labeling shall be printed in accordance with the following specifications:

(1) The minimum letter size shall be one-sixteenth of an inch in height.

(2) Letter heights pertain to the lower-case letter "o" or its equivalent that shall meet the minumim height standard.

(3) Type used shall conform to the minimum letter height. The body copy shall contain 1-point leading, noncondensed type, and shall not contain any light-face type or small capital letters.

(d) This section does not apply to a progestogen-containing product intended for contraception, which shall be labeled according to the requirements of § 310.501.

(e)(1) Patient labeling for each progestational drug product shall be provided in or with each package intended to be dispensed to the patient. Patient labeling for drug products dispensed in acute-care hospitals or long-term care facilities will be considered to have been provided in accordance with this section if provided to the patient before first administration of the drug and every 30 days thereafter, as long as the therapy continues.

(2) In the case of progestational drug products in bulk packages intended for multiple dispensing, a sufficient number of patient-labeling pieces shall be included in or shall accompany each bulk package to assure that one can be included with each package dispensed to every patient. Each bulk package shall be labeled with instructions to the dispenser to include one patient-labeling piece with each package dispensed to the patient. This section does not preclude the manufacturer or labeler from distributing additional patient-labeling pieces to the dispenser.

(3) In the case of progestational drug products for injection, each package shall include a sufficient number of patient-labeling pieces for the volume of the vial, and instructions to the practitioner administering the drug to give one patient-labeling piece to each premenopausal woman, except those in whom childbearing is impossible, receiving the drug.

(4) Any progestational drug product, except as noted in paragraph (d) of this section, that is not labeled as required by this section and is either introduced or delivered for introduction into interstate commerce, or held for sale after shipment in interstate commerce, is misbranded pursuant to section 502 of the Federal Food, Drug, and Cosmetic Act. However, a progestational drug product in the possession of a wholesaler or retailer before December 12, 1978, is not misbranded if adequate numbers of copies of the patient labeling are furnished to the wholesaler or retailer to permit any retail purchaser after that date to obtain such labeling with the product. The requirement that any progestational drug product be dispensed with patient labeling, as applied to physicians who dispense or administer the drug, will not be effective for supplies in their possession on the effective date, but will apply only to supplies received thereafter.

(f) The Food and Drug Administration has available patient labeling for progestational drug products that includes information responsive to all items specified in paragraph (b) of this section. The labeling has been published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37646) as part of a drug efficacy study implementation (DESI) notice. Any person may rely on this labeling as complying with paragraph (b) of this section after the effective date of this section.

(g) Holders of new drug applications for progestational drug products that are subject to this section shall submit supplements under § 314.8 of this chapter to provide for the labeling required by paragraph (a) of this section on or before December 12, 1978. The labeling may be put into use without advance approval by the Food and Drug Administration.

Effective date. This regulation shall be effective December 12, 1978.

(Secs. 502, 505, 701(a), 52 Stat. 1050–1053 as amended, 1055 (21 U.S.C. 352, 355, 371(a)))

Dated: October 3, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

SUBCHAPTER F—BIOLOGICS

[Docket No. 78N-0119]

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

Sterility; Membrane Filtration; Amendment

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: This document amends a section of the biologics regulations by revising the reference to the United States Pharmacopeia (U.S.P.). This change is being made to ensure consistency with improvements in the sterility test by membrane filtration as prescribed in the U.S.P.

EFFECTIVE DATE: October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Iris Hyman, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, MD 20014, 301-443-1306.

SUPPLEMENTARY INFORMATION: The Bureau of Biologics is conducting a continuing review of the existing regulations governing biological products to assure that the criteria of safety, purity, potency, and effectiveness established by such regulations are updated to reflect current requirements for licensed products, consistent with the review, the Commissioner is amending § 610.12(f) (21 CFR 610.12(f)) to change the reference to the membrane filtration test from the 18th Revision of the U.S.P., to the 19th Revision, in order to update a procedure which manufacturers are in fact already using.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702, as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner (21 CFR 5.1), § 610.12 is amended in paragraph (f) by revising the first sentence, to read as follows:

§ 610.12 Sterility.

• • • • • •

(f) *Membrane filtration.* Bulk and final container material or products containing oil or products in water insoluble ointments shall be tested for sterility using the membrane filtration procedure set forth in the United States Pharmacopeia (19th Revision, 1975), section entitled "Membrane Filtration," pages 594-595, except that (1) the test samples shall conform with paragraph (d) of this section; (2) the temperature of incubation for the test using Fluid Thioglycollate Medium shall be 30° to 32° C; and (3) in addition, for products containing a mercurial preservative, the product shall be tested in a second test using Fluid Thioglycollate Medium incubated at 20° to 25° C in lieu of the test in Soybean-Casein digest Medium. • • •

• • • • • •

Under the Adminsitrative Prodedure Act (5 U.S.C. 553(b) and (d)), the Commissioner concludes that notice, public procedure, and delayed effective date are unnecessary for the amendment of § 610.12(f) because it does not impose an additional duty or burden on any person, but rather relieves unnecessary requirements.

Effective date. October 13, 1978,

(Sec. 351, 58 stat. 702, as amended (42 U.S.C. 262))

Dated: October 3, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

[Docket No. S-102]

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION

Ground-Fault Protection; Supplemental Statement of Reasons

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Final rule; supplemental statement of reasons.

SUMMARY: This notice announces OSHA's decision to reaffirm the ground-fault protection standard (29 CFR 1910.309(c) and 1926.400(h)) as promulgated on December 21, 1976 (41 FR 55696). This decision is made after consultation with the Advisory Committee on Construction Safety and Health pursuant to remand by the U.S. Court of Appeals for the District of Columbia Circuit. No change is made in the ground-fault protection standard as promulgated on December 21, 1976.

FOR FURTHER INFORMATION CONTACT:

Mr. Gail Brinkerhoff, Office of Compliance Programs, OSHA, Third Street and Constitution Avenue, NW., Room N-3112, Washington, D.C. 20210, telephone 202-523-8034.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 21, 1976, OSHA promulgated a rule, to be effective February 22, 1977, requiring employers to provide either: (a) Ground-fault circuit interrupters on construction sites, or (b) a scheduled and recorded, assured equipment grounding conductor program (29 CFR 1910.309(c) and 1926.400(h); 41 FR 55696). This rule was promulgated after lengthy proceedings which are described in detail in the FEDERAL REGISTER document of December 21, 1976.

On February 17, 1977, the National Constructors Association petitioned the U.S. Court of Appeals for the District of Columbia Circuit, to review and set aside the rules OSHA had promulgated on ground-fault protection.

The court issued its decision on June 28, 1978 (*National Constructors Association* v. *Marshall*, C.A.D.C. No.77-1197). The court found that the Assistant Secretary had not completely followed OSHA's rulemaking procedures in promulgating the ground-fault protection standard. Although the Advisory Committee on Construction Safety and Health had been consulted with regard to ground-fault circuit interrupters, the court found that no such consultation occurred specifically with regard to the alternative assured grounding conductor program. The court held that such consultation was required by OSHA's procedural rule found in 29 CFR 1911.10(a).

Accordingly, the court remanded the record to the Assistant Secretary with specific instructions to consult with the Committee. After discussing several possible results of the consultation with the Committee, and the appropriate action to be taken based on these results, the court concluded with the following:

• • • once the Assistant Secretary has convinced himself of the wisdom of a chosen course of action after he has had the benefit of the Committee's recommendations, and once he is convinced that further public comment would shed no new light on the matter, he may return the record to this court for entry of an appropriate order. (Page 27.)

Inasmuch as the court did not find any "glaring deficiencies" in the evidence supporting the standard nor any other procedural or legal deficiencies, the court ordered that the regulation remain in effect during the time period necessary for consultation with the Advisory Committee and evaluation of its recommendations.

AGENCY ACTION AFTER COURT REMAND AND SUPPLEMENTAL STATEMENT OF REASONS

On July 20, 1978, at a previously scheduled meeting of the Advisory Committee on Construction Safety and Health, OSHA preliminarily notified the Committee of the court's decision. A brief oral summary of the decision was presented to the Committee. The Committee was then advised that a special meeting would be held on August 15, 16, and 17, 1978, in compliance with the court's instructions, to discuss the substantive issues of the ground-fault protection standard, and to solicit the Committee's recommendations. To assist the Advisory Committee in its review of the standard in preparation for the August meeting, OSHA provided each member with copies of the following documents:

1. A copy of the court decision.
2. An index of the rulemaking record on ground-fault protection.
3. FEDERAL REGISTER notice, vol. 40, No. 67, April 7, 1975, Ground-Fault Circuit Protection—Proposed Revocation of Standard (40 FR 15390).
4. FEDERAL REGISTER notice, vol. 40, No. 170, September 2, 1975, Notice of Hearing on Ground-Fault Circuit Protection.
5. The Ground-Fault Protection Standard, FEDERAL REGISTER, vol. 41, No. 246, December 21, 1976.

In addition, OSHA staff advised the Advisory Committee that other specific items in the record would be made available upon request.

Accordingly, on July 28, 1978, OSHA published a notice in the FEDERAL REGISTER (43 FR 32884) announcing that a meeting of the Advisory Committee on Construction Safety and Health was to be held on August 15, 16, and 17, 1978. The notice explained that the meeting was in response to the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *National Constructors Association* v. *Marshall, supra*, regarding OSHA's ground-fault circuit protection standard (29 CFR 1910.309(c) and 29 CFR 1926.400(h)). At the meeting, the Advisory Committee would review said standard, and make such recommendations as appropriate.

Additionally the public was invited to submit written data, views, or arguments and anyone wishing to make an oral presentation was instructed to notify OSHA's Division of Consumer Affairs.

On August 15, 1978, the Advisory Committee meeting was convened in Washington, D.C. The legal framework of the Committee's deliberations was discussed by a member of the Solicitor's Office, and a complete technical presentation of the ground-fault protection standard was made by OSHA staff to the Advisory Committee. The technical presentation provided the data and rationale which led OSHA to promulgate the standard requiring the use on construction sites of either ground-fault circuit interrupters or an assured equipment grounding conductor program. This presentation included a review of the data in the official record and included the following subjects:

1. Low voltage electrical fatalities on construction sites;
2. Ground-fault protection requirements in OSHA regulations;
3. Need to supplement these requirements;
4. Method of supplementing the requirement for the utilization of an equipment grounding conductor;
5. Data available on efficacy of GFCI's;
6. Data available on viability of an assured equipment grounding conductor program;
7. Operating principle of GFCI's; and
8. Review of the entire ground-fault protection standard as promulgated on December 21, 1976.

Upon completion of OSHA's technical presentation, two scheduled oral presentations were given by public participants. Both proposed the use of a new device, presently under development, which would continuously monitor the presence of the equipment grounding conductor from the receptacle back to the electric supply. Neither device, in their present configuration, would monitor the equipment grounding conductor in tools. Testing and records of tests would still be manually accomplished for tools whenever an employer chose to use the assured equipment grounding conductor program. Both public participants acknowledged this limitation on their devices and agreed that although the test for tools would still be a manual one, the continuous monitoring of extension cords and receptacles would still result in benefits in both added safety and simpler implementation of the testing and recording of the equipment grounding conductor. Both participants noted that the devices they demonstrated were prototype models and not yet available on the open market. At the conclusion of their presentation, a member of the audience expressed his views on these devices. He indicated that these particular units might not be reliable enough, and, under certain conditions, could give false indications as to the presence of the equipment grounding conductor.

Three additional public participants gave their oral views on the ground-fault circuit protection standard. All three endorsed the standard as promulgated, including the assured equipment grounding conductor program. The Advisory Committee received six written comments on the standard and all strongly requested that the committee recommend the retention of the assured equipment grounding conductor program.

After examining the record, evaluating OSHA's presentation, and considering relevant public comment the Advisory Committee concluded that no change, modification, or amendment was warranted with respect to the final rule on ground-fault protection as promulgated in the FEDERAL REGISTER on December 21, 1976. The Advisory Committee accordingly concurred in the judgment of the Assistant Secretary regarding the standards now in effect for ground-fault circuit protection in 29 CFR 1910.309(c) and 29 CFR 1926.400(h) which require either the use of GFCI's or the implementation of an assured equipment grounding conductor program on construction sites.

Since the Advisory Committee on Construction Safety and Health recommended no change in the standard as promulgated by OSHA, and in the

V 43 / 199 0 OCT 13 78

absence of any indication that further public comment would shed any new light on the matter, OSHA concludes that no change in the standard is warranted. Accordingly, the ground-fault protection standard at 29 CFR 1910.309(c) and 29 CFR 1926.400(h), as promulgated on December 21, 1976, is hereby reaffirmed.

(Secs. 6(b) and 8(c), Pub. L. 91-596, 84 Stat. 1593, 1599 (29 U.S.C. 655, 657); sec. 107, Pub. L. 91 54, 83 Stat. 96 (40 U.S.C. 333); Secretary of Labor's Order No. 8-76 (41 FR 25059); 29 CFR Part 1911.)

Signed at Washington, D.C., this 3d day of October 1978.

EULA BINGHAM,
Assistant Secretary of Labor.

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

[ER 1110-2-241]

PART 208—FLOOD CONTROL REGULATIONS

Use of Storage Allocated for Flood Control and Navigation Purposes

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: This revision of 33 CFR 208.11 regulations prescribes the policy and procedure for regulating reservoir projects capable of regulation for flood control or navigation and the use of storage allocated for such purposes and provided on the basis of flood control and navigation. The revised regulations are applicable to dam and reservoir projects licensed, maintained, and operated under provisions of the Federal Power Act (41 Stat. 1063 (16 U.S.C. 791(A))), Pub. L. 83-436, and other similar authorizing legislation; as well as to reservoir projects constructed wholly or in part with Federal funds as directed by section 7 of the Flood Control Act of 1944. These regulations are intended to establish an understanding between project owners, operating agencies and the Corps of Engineers with regard to certain activities and responsibilities concerning water control management throughout the Nation in the interest of flood control and navigation. Interested persons were given until November 2, 1977 (42 FR 57141) to submit comments. No written comments were received.

DATES: This regulation is effective on October 15, 1978.

ADDRESSES: HQDA (DAEN-CWE-HY) Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT:

Mr. Edgar P. Story, Engineering Division, Civil Works Directorate, Office of the Chief of Engineers, Washington, D.C. 20314 202-693-7330.

SUPPLEMENTARY INFORMATION: This final regulation is essentially the same as the proposed rule (42 FR 53637), however, certain reordering has been done of the reference material presented in § 208.11(b). Specifically, excerpts from sections 4(e), 10(a), and 10(c) of the Federal Power Act have been added for improved clarity. Also Federal Power Commission order No. 540 issued October 31, 1975, and published November 7, 1975 (40 FR 51998), amending § 2.9 of the Commission's general policy and interpretations which prescribed standardized conditions (Forms) for inclusion in preliminary permits and licenses issued under part I of the Federal Power Act has been cited and appropriately excerpted. Reference to and citation from article 33 of Federal Power Commission license No. 2009 have been deleted in lieu thereof.

In addition to the proposed action, certain project names and pertinent data are added to and deleted from the list of projects shown in § 208.11(e), list of projects (42 FR 53637). The following projects are added to the list of projects:

(a) U.S. Army Corps of Engineers, Missouri River Division area: Webster Dam and Lake.

(b) U.S. Army Corps of Engineers, New England Division area:

(i) Bear Swamp Pumped Storage Project.

(ii) Turners Falls Reservoir.

(c) U.S. Army Corps of Engineers, North Pacific Division area:

(i) American Falls Dam and Reservoir.

(ii) Anderson Ranch Dam and Reservoir.

(iii) Arrowrock Dam and Reservoir.

(iv) Brownlee Dam and Reservoir.

(v) Grand Coulee Dam and Franklin D. Roosevelt Lake.

(vi) Hells Canyon Dam and Reservoir.

(vii) Kerr Dam and Flathead Lake.

(viii) Mayfield Dam and Reservoir.

(ix) Mossyrock Dam and Davisson Lake.

(x) Oxbow Dam and Reservoir.

(xi) Priest Rapids Dam and Reservoir.

(xii) Ririe Dam and Reservoir.

(xiii) Rocky Reach Dam and Lake Entiat.

(xiv) Ross Dam and Reservoir.

(xv) Upper Baker Dam and Baker Lake.

(xvi) Wanapum Dam and Reservoir.

(xvii) Wells Dam and Lake Pateros.

(d) U.S. Army Corps of Engineers, South Atlantic Division area: Lewis M. Smith Dam and Reservoir.

(e) U.S. Army Corps of Engineers, South Pacific Division area:

(i) Indian Valley Dam and Reservoir.

(ii) Lemon Dam and Reservoir.

(iii) Navajo Dam and Reservoir.

(iv) Paoina Dam and Reservoir.

(v) Vallecito Dam and Reservoir.

The following projects are deleted from the list of projects:

(a) U.S. Army Corps of Engineers, South Altantic Division area: H. Neely Henry Dam and Reservoir.

(b) U.S. Army Corps of Engineers, South Pacific Division area:

(i) Causey Dam and Reservoir.

(ii) Devil Creek Dam and Reservoir.

NOTE.—The Chief of Engineers has determined that this rule does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107 (Statutory Authority Pub. L. 90-483).

Dated: October 10, 1978.

CHARLES I. MCGINNIS,
Major General, USA,
Director of Civil Works.

Section 208.11 is revised to read as follows:

§ 208.11 Regulations for use of storage allocated for flood control or navigation and/or project operation at reservoirs subject to prescription of rules and regulations by the Secretary of the Army in the interest of flood control and navigation.

(a) *Purpose.* This regulation prescribes the responsibilities and general procedures for regulating reservoir projects capable of regulation for flood control or navigation and the use of storage allocated for such purposes and provided on the basis of flood control and navigation, except projects owned and operated by the Corps of Engineers; the International Boundary and Water Commission, United States and Mexico; and those under the jurisdiction of the International Joint Commission, United States, and Canada, and the Columbia River Treaty. The intent of this regulation is to establish an understanding between project owners, operating agencies, and the Corps of Engineers.

(b) *Responsibilities.* The basic responsibilities of the Corps of Engineers regarding project operation are set out in the cited authority and described in the following paragraphs:

(1) Section 7 of the Flood Control Act of 1944 (58 Stat. 890, 33 U.S.C. 709) directs the Secretary of the Army to prescribe regulations for flood control and navigation in the following manner:

Hereafter, it shall be the duty of the Secretary of War to prescribe regulations for the use of storage allocated for flood control or navigation at all reservoirs constructed wholly or in part with Federal funds provided on the basis of such purposes, and the operation of any such project shall be in accordance with such regulations: *Provided,* That this section shall not apply to the Tennessee Valley Authority, except that in case of danger from floods on the lower Ohio and Mississippi Rivers the Tennessee Valley Authority is directed to regulate the release of water from the Tennessee River into the Ohio River in accordance with such instructions as may be issued by the War Department.

(2) Federal Energy Regulatory Commission (formerly Federal Power Commission (FPC)) licenses.

(i) Responsibilities of the Secretary of the Army and/or the Chief of Engineers in Federal Energy Regulatory Commission (FERC) licensing actions are set out in the Federal Power Act. Pertinent sections of that Act are cited herein. The Commission may also stipulate, as part of license conditions, that the licensee enter into an agreement with the Department of the Army providing for operation of the project during flood times, in accordance with rules and regulations prescribed by the Secretary of the Army.

(A) Section 4(e) of the Federal Power Act requires approval by the Chief of Engineers and the Secretary of the Army of plans of dams or other structures affecting the navigable capacity of any navigable waters of the United States, prior to issuance of a license by the Commission as follows:

The Commission is hereby authorized and empowered to issue licenses to citizens • • • for the purpose of constructing, operating, and maintaining dams, water conduits, reservoirs, powerhouses, transmission lines, or other project works necessary or convenient for the development and improvement of navigation and for the development, transmission, and utilization of power across, along, from or in any of the streams or other bodies of water over which Congress has jurisdiction • • • *Provided further,* That no license affecting the navigable capacity of any navigable waters of the United States shall be issued until the plans of the dam or other structures affecting navigation have been approved by the Chief of Engineers and the Secretary of the Army.

(B) Sections 10(a) and 10(c) of the Federal Power Act specify conditions of project licenses including the following:

(1) Section 10(a). That the project adopted • • • shall be such as in the judgment of the Commission will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use of benefit of interstate or foreign commerce, for the improvement and utilization of waterpower development, and for other beneficial public use • • •.

(2) Section 10(c). That the licensee shall • • • so maintain and operate said works as not to impair navigation, and shall conform to such rules and regulations as the Commisssion may from time to time prescribe for the protection of life, health, and property. • • •

(C) Section 18 of the Federal Power Act directs the operation of any navigation facilities built under the provision of that act, be controlled by rules and regulations prescribed by the Secretary of the Army as follows:

The operation of any navigation facilities which may be constructed as part of or in connection with any dam or diversion structure built under the provisions of this Act, whether at the expense of a licensee hereunder or of the United States, shall at all times be controlled by such reasonable rules and regulations in the interest of navigation; including the control of the pool caused by such dam or diversion structure as may be made from time to time by the Secretary of the Army. • • •

(ii) Federal Power Commission order No. 540 issued October 31, 1975, and published November 7,1975 (40 FR 51998), amending section 2.9 of the Commission's general policy and interpretations prescribed standardized conditions (forms) for inclusion in preliminary permits and licenses issued under part I of the Federal Power Act. As an example, article 12 of standard form L-3, titled: "Terms and Conditions of License for Constructed Major Projects Affecting Navigable Waters of the United States," sets out the Commission's interpretation of appropriate sections of the Act, which deal with navigation aspects, and attendant responsibilities of the Secretary of the Army in licensing actions as follows:

The United States specifically retains and safeguards the right to use water in such amount, to be determined by the Secretary of the Army, as may be necessary for the purposes of navigation on the navigable waterway affected; and the operation of the Licensee, so far as they affect the use, storage and discharge from storage of waters affected by the license, shall at all times be controlled by such reasonable rules and regulations as the Secretary of the Army may prescribe in the interest of navigation, and as the Commission may prescribe for the protection of life, health, and property, • • •, and the Licensee shall release water from the project reservoir at such rate • • •, as the Secretary of the Army may prescribe in the interest of navigation, or as the Commission may prescribe for the other purposes hereinbefore mentioned.

(3) Section 9 of Public Law 436, 83d Congress (68 Stat. 303) provides for the development of the Coosa River, Ala. and Ga., and directs the Secretary of the Army to prescribe rules and regulations for project operation in the interest of flood control and navigation as follows:

The operation and maintenance of the dams shall be subject to reasonable rules and regulations of the Secretary of the Army in the interest of flood control and navigation.

NOTE.—This Regulation will also be applicable to dam and reservoir projects operated under provisions of future legislative acts wherein the Secretary of the Army is directed to prescribe rules and regulations in the interest of flood control and navigation. The Chief of Engineers, U.S. Army Corps of Engineers, is designated the duly authorized representative of the Secretary of the Army to exercise the authority set out in the congressional acts. This regulation will normally be implemented by letters of understanding between the Corps of Engineers and project owner and will incorporate the provisions of such letters of understanding prior to the time construction renders the project capable of significant impoundment of water. A water control agreement signed by both parties will follow when deliberate impoundment first begins or at such time as the responsibilities of any corps-owned projects may be transferred to another entity. Promulgation of this regulation for a given project will occur at such time as the name of the project appears in the FEDERAL REGISTER in accordance with the requirements of § 208.11(d)(11). When agreement on a water control plan cannot be reached between the corps and the project owner after coordination with all interested parties, the project name will be entered in the FEDERAL REGISTER and the Corps of Engineers plan will be the officials water control plan until such time as differences can be resolved.

(c) *Scope and terminology.* This regulation applies to Federal authorized flood control and/or navigation storage projects, and to non-Federal projects which require the Secretary of the Army to prescribe regulations as a condition of the license, permit or legislation, during the planning, design and construction phases, and throughout the life of the project. In compliance with the authority cited above, this regulation defines certain activities and responsibilities concerning water control management throughout the Nation in the interest of flood control and navigation. In carrying out the conditions of this regulation, the owner and/or operating agency will comply with applicable provisions of Pub. L. 85-624, the Fish and Wildlife Coordination Act of 1958, and Pub. L. 92-500, the Federal Water Pollution Control Act Amendments of 1972. This regulation does not apply to local flood protection works governed by § 208.10, or to navigation facilities and associated structures which are otherwise covered by part 207 (Navigation Regulations) of title 33 of the code. Small reservoirs, containing less than 12,500 acre-feet of flood control or navigation storage, may be excluded from this regulation and covered under § 208.10, unless specifically required by law or conditions of the license or permit.

(1) The terms "reservoir" and "project" as used herein include all water resource impoundment projects constructed or modified, including natural lakes, that are subject to this regulation.

V 4 3 / 1 9 9
0 C 1 3
7 8
UMI

(2) The term "project owner" refers to the entity responsible for maintenance, physical operation, and safety of the project, and for carrying out the water control plan in the interest of flood control and/or navigation as prescribed by the Corps of Engineers. Special arrangements may be made by the project owner for "operating agencies" to perform these tasks.

(3) The term "letter of understanding" as used herein includes statements which consummate this regulation for any given project and define the general provisions or conditions of the local sponsor, or owner, cooperation agreed to in the authorizing legislative document, and the requirements for compliance with section 7 of the 1944 Flood Control Act, the Federal Power Act or other special congressional act. This information will be specified in the water control plan and manual. The letter of understanding will be signed by a duly authorized representative of the Chief of Engineers and the project owner. A "field working agreement" may be substituted for a letter of understanding, provided that the specified minimum requirements of the latter, as stated above, are met.

(4) The term "water control agreement" refers to a compliation of water control criteria, guidelines, diagrams, release schedules, rule curves and specifications that basically govern the use of reservoir storage space allocated for flood control or navigation and/or release functions of a water control project for these purposes. In general, they indicate controlling or limiting rates of discharge and storage space required for flood control and/or navigation, based on the runoff potential during various seasons of the year.

(5) For the purpose of this regulation, the term "water control plan" is limited to the plan of regulation for a water resources project in the interest of flood control and/or navigation. The water control plan must conform with proposed allocations of storage capacity and downstream conditions or other requirements to meet all functional objectives of the particular project, acting separately or in combination with other projects in a system.

(6) The term "real-time" denotes the processing of current information or data in a sufficiently timely manner to influence a physicial response in the system being monitored and controlled. As used herein the term connotes * * * the analyses for and execution of water control decisions for both minor and major flood events and for navigation, based on prevailing hydrometeorological and other conditions and constraints, to achieve efficient management of water resource systems.

(d) *Procedures.* (1) *Conditions during project formulation.* During the planning and design phases, the project owner should consult with the Corps of Engineers regarding the quantity and value of space to reserve in the reservoir for flood control and/or navigation purposes, and for utilization of the space, and other requirements of the license, permit or conditions of the law. Relevant matters that bear upon flood control and navigation accomplishment include: runoff potential, reservoir discharge capability, downstream channel characteristics, hydrometeorological data collection, flood hazard, flood damage charateristics, real estate acquisition for flowage requirements (fee and easement), and resources required to carry out the water control plan. Advice may also be sought on determination of and regulation for the probable maximum or other design flood under consideration by the project owner to establish the quantity of surcharge storage space, and freeboard elevation of top of dam or embankment for safety of the project.

(2) *Corps of Engineers involvement.* If the project owner is responsible for real-time implemenetation of the water control plan, consultation and assistance will be provided by the Corps of Engineers when appropriate and to the extent possible. During any emergency that affects flood control and/or navigation, the Corps of Engineers may temporarily prescribe regulation of flood control or navigation storage space on a day-to-day (real-time) basis without request of the project owner. Appropriate consideration will be given for other authorized project functions. Upon refusal of the project owner to comply with regulations prescribed by the Corps of Engineers, a letter will be sent to the project owner by the Chief of Engineers or his duly authorized representative describing the reason for the regulations prescribed, events that have transpired, and notification that the project owner is in violation of the Code of Federal Regulations. Should an impasse arise, in that the project owner or the designated operating entity persists in noncompliance with regulations prescribed by the Corps of Engineers, measures may be taken to assure compliance.

(3) *Corps of Engineers implementation of real-time water control decisions.* The Corps of Engineers may prescribe the continuing regulation of flood control storage space for any project subject to this regulation on a day-to-day (real-time) basis. When this is the case, consultation and assistance from the project owner to the extent possible will be expected. Special requests by the project owner, or appropriate operating entity, are preferred before the Corps of Engineers offers advice on real-time regulation during surcharge storage utilization.

(4) *Water control plan and manual.* Prior to project completion, water control managers from the Corps of Engineers will visit the project and the area served by the project to become familiar with the water control facilities, and to insure sound formulation of the water control plan. The formal plan of regulation for flood control and/or navigation, referred to herein as the water control plan, will be developed and documented in a water control manual prepared by the Corps of Engineers. Development of the manual will be coordinated with the project owner to obtain the necessary pertinent information, and to insure compatibility with other project purposes and with surcharge regulation. Major topics in the manual will include: Authorization and description of the project, hydrometeorology, data collection and communication networks, hydrologic forecasting, the water control plan, and water resource management functions, including responsibilities and coordination for water control decisionmaking. Special instructions to the dam tender or reservoir manager on data collection, reporting to higher Federal authority, and on procedures to be followed in the event of a communication outage under emergency conditions, will be prepared as an exhibit in the manual. Other exhibits will include copies of this regulation, letters of understanding consummating this regulation, and the water control agreements. After approval by the Chief of Engineers or his duly authorized representative, the manual will be furnished the project owner.

(5) *Water control agreement.* (i) A water control diagram (graphical) will be prepared by the Corps of Engineers for each project having variable space reservation for flood control and/or navigation during the year; e.g., variable seasonal storage, joint-use space, or other rule curve designation. Reservoir inflow parameters will be included on the diagrams when appropriate. Concise notes will be included on the diagrams prescribing the use of storage space in terms of release schedules, runoff, nondamaging or other controlling flow rates downstream of the damsite, and other major factors as appropriate. A water control release schedule will be prepared in tabular form for projects that do not have variable space reservation for flood control and/or navigation. The water control diagram or release schedule will be signed by a duly authorized representative of the Chief of Engineers, the project owner, and the designated operating agency, and will be used as the basis for carrying out this regulation. Each diagram or schedule will contain a reference to this regulation.

(ii) When deemed necessary by the Corps of Engineers, information given on the water control diagram or release schedule will be supplemented by appropriate text to assure mutual understanding on certain details or other important aspects of the water control plan not covered in this regulation, on the water control diagram or in the release schedule. This material will include clarification of any aspects that might otherwise result in unsatisfactory project performance in the interest of flood contol and/or navigation. Supplementation of the agreement will be necessary for each project where the Corps of Engineers exercises the discretionary authority to prescribe the flood control regulation on a day-to-day (real-time) basis. The agreement will include delegation of the responsibility. The document should also cite, as appropriate, section 7 of the 1944 Flood Control Act, the Federal Power Act and/or other congressional legislation authorizing construction an/or directing operation of the project.

(iii) All flood control regulations published in the FEDERAL REGISTER under this section (part 208) of the code prior to the date of this publication which are listed in paragraph 208.11(e) are hereby superseded.

(iv) Nothing in this regulation prohibits the promulgation of specific regulations for a project in compliance with the authorizing acts, when agreement on acceptable regulations cannot be reached between the Corps of Engineers and the owner.

(6) *Hydrometeorological instrumentation.* The project owner will provide instrumentation in the vicinity of the damsite and will provide communication equipment necessary to record and transmit hydrometeorological and reservoir data to all appropriate Federal authorities on a real-time basis unless there are extenuating circumstances or are otherwise provided for as a condition of the license or permit. For those projects where the owner retains responsibility for real-time implementation of the water control plan, the owner will also provide or arrange for the measurement and reporting of hydrometeorological parameters required within and adjacent to the watershed and downstream of the damsite, sufficient to regulate the project for flood control and/or navigation in an efficient manner. When data collection stations outside the immediate vicinity of the damsite are required, and funds for installation, observation, and maintenance are not available from other sources, the Corps of Engineers may agree to share the costs for such stations with the project owner. Availability of funds and urgency of data needs are factors which will be considered in reaching decisions on cost sharing.

(7) *Project safety.* The project owner is responsible for the safety of the dam and appurtenant facilities and for regulation of the project during surcharge storage utilization. Emphasis upon the safety of the dam is especially important in the event surcharge storage is utilized, which results when the total storage space reserved for flood control is exceeded. Any assistance provided by the Corps of Engineers concerning surcharge regulation is to be utilized at the discretion of the project owner, and does not relieve the owner of the responsibility for safety of the project.

(8) *Notification of the general public.* The Corps of Engineers and other interested Federal and State agencies, and the project owner will jointly sponsor public involvement activities, as appropriate, to fully apprise the general public of the water control plan. Public meetings or other effective means of notification and involvement will be held, with the initial meeting being conducted as early as practicable but not later than the time the project first becomes operational. Notice of the initial public meeting shall be published once a week for 3 consecutive weeks in one or more newspapers of general circulation published in each county covered by the water control plan. Such notice shall also be used when appropriate to inform the public of modifications in the water control plan. If no newspaper is published in a county, the notice shall be published in one or more newspapers of general circulation within that county. For the purposes of this section a newspaper is one qualified to publish public notices under applicable State law. Notice shall be given in the event significant problems are anticipated or experienced that will prevent carrying out the approved water control plan or in the event that an extreme water condition is expected that could produce severe damage to property or loss of life. The means for conveying this information shall be commensurate with the urgency of the situation. The water control manual will be made available for examination by the general public upon request at the appropriate office of the Corps of Engineers, project owner or designated operating agency.

(9) *Other generalized requirements for flood control and navigation.* (i) Storage space in the reservoirs allocated for flood control and navigation purposes shall be kept available for those purposes in accordance with the water control agreement, and the plan of regulation in the water control manual.

(ii) Any water impounded in the flood control space defined by the water control agreement shall be evacuated as rapidly as can be safely accomplished without causing downstream flows to exceed the controlling rates; i.e., releases from reservoirs shall be restricted insofar as practicable to quantities which, in conjunction with uncontrolled runoff downstream of the dam, will not cause water levels to exceed the controlling stages currently in force. Although conflicts may arise with other purposes, such as hydropower, the plan or regulation may require releases to be completely curtailed in the interest of flood control or safety of the project.

(iii) Nothing in the plan of regulation for flood control shall be construed to require or allow dangerously rapid changes in magnitudes of releases. Releases will be made in a manner consistent with requirements for protecting the dam and reservoir from major damage during passage of the maximum design flood for the project.

(iv) The project owner shall monitor current reservoir and hydro- meteorological conditions in and adjacent to the watershed and downstream of the damsite, as necessary. This and any other pertinent information shall be reported to the Corps of Engineers on a timely basis, in accordance with standing instructions to the dam-tender or other means requested by the Corps of Engineers.

(v) In all cases where the project owner retains responsibility for real-time implementation of the water control plan, he shall make current determinations of: Reservoir inflow, flood control storage utilized, and scheduled releases. He shall also determine storage space and releases required to comply with the water control plan prescribed by the Corps of Engineers. The owner shall report this information on a timely basis as requested by the Corps of Engineers.

(vi) The water control plan is subject to temporary modification by the Corps of Engineers if found necessary in time of emergency. Requests for and action on such modifications may be made by the fastest means of communication available. The action taken shall be confirmed in writing the same day to the project owner and shall include justification for the action.

(vii) The project owner may temporarily deviate from the water control plan in the event an immediate short-term departure is deemed necessary for emergency reasons to protect the safety of the dam, or to avoid other serious hazards. Such actions shall be immediately reported by the fastest

V 43 \ 199 0 OCT 13 78

means of communication available. Actions shall be confirmed in writing the same day to the Corps of Engineers and shall include justification for the action. Continuation of the deviation will require the express approval of the Chief of Engineers, or his duly authorized representative.

(viii) Advance approval of the Chief of Engineers, or his duly authorized representative, is required prior to any deviation from the plan of regulation prescribed or approved by the Corps of Engineers in the interest of flood control and/or navigation, except in emergency situations provided for in paragraph (d)(9)(vii) of this section. When conditions appear to warrant a prolonged deviation from the approved plan, the project owner and the Corps of Engineers will jointly investigate and evaluate the proposed deviation to insure that the overall integrity of the plan would not be unduly compromised. Approval of prolonged deviations will not be granted unless such investigations and evaluations have been conducted to the extent deemed necessary by the Chief of Engineers, or his designated representatives, to fully substantiate the deviation.

(10) *Revisions.* The water control plan and all associated documents will be revised by the Corps of Engineers, as necessary, to reflect changed conditions that come to bear upon flood control and navigation, e.g., reallocation of reservoir storage space due to sedimentation or transfer of storage space to a neighboring project. Revision of the water control plan, water control agreement, water control diagram, or release schedule requires approval of the Chief of Engineers or his duly authorized representative. Each such revision shall be effective upon the date specified in the approval. The original (signed document) water control agreement shall be kept on file in the Office, Chief of Engineers, Department of the Army, Washington, D.C. Copies of the agreement shall be kept on file and may be obtained from the office of the project owner, or from the office of the appropriate Division Engineer, Corps of Engineers.

(11) *Federal Register.* The following information for each project subject to section 7 of the 1944 Flood Control Act and other applicable congressional acts shall be published in the FEDERAL REGISTER prior to the time the projects becomes operational and prior to any significant impoundment before project completion or * * * at such time as the responsibility for physical operation and maintenance of the Corps of Engineers owned projects is transferred to another entity: (i) Reservoir, dam, and lake names, (ii) stream, county, and State corresponding to the damsite location, (iii) the maximum current storage space in acre-feet to be reserved exclusively for flood control and/or navigation purposes, or any multiple-use space (intermingled) when flood control or navigation is one of the purposes, with corresponding elevations in feet above mean sea level, and area in acres at the upper and lower limits of said space, (iv) the name of the project owner, and (v) congressional legislation authorizing the project for Federal participation.

(e) *List of projects.* The following tables, "Pertinent Project Data—Section 208.11 Regulation," show the pertinent data for projects which are subject to this regulation.

(Sec. 7, Pub. L. 78-534, 58 Stat. 890 (33 U.S.C. 709); the Federal Power Act, 41 Stat. 1063 (16 U.S.C. 791(A)); and Sec. 9, Pub. L. 83-436, 68 Stat. 303.)

Title 45—Public Welfare

CHAPTER XVII—NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

PART 1705—PRIVACY REGULATIONS

Implementation

AGENCY: National Commission on Libraries and Information Science.

ACTION: Final rule.

SUMMARY: The Commission adopts regulations implementing the Privacy Act of 1974. The regulations set forth the procedures under which the public may determine what systems of records are maintained by the Commission and procedures on how access may be gained for purpose of review, amendment and/or correction of those records.

DATES: Effective October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Alphonse F. Trezza, Executive Director, National Commission on Libraries and Information Science, 1717 K Street NW., Suite 601, Washington, D.C. 20036, 202-653-6252.

SUPPLEMENTARY INFORMATION: On August 7, 1978 (45 FR 34805) the Commission published its proposed regulations implementing the Privacy Act of 1974. No comments were received. The Commission adopts the proposed regulations as published.

ALPHONSE F. TREZZA,
Executive Director.

Part 1705 is added to Title 45 of the Code of Federal Regulations.

Sec.
1705.1 Purpose and scope.
1705.2 Definitions.
1705.3 Procedures for requests pertaining to individual records in the D/AC File.
1705.4 Times, places, and requirements for identification of individuals making requests.
1705.5 Disclosure of requested information to individuals.
1705.6 Request for correction or amendment to the record.
1705.7 Agency review of request for correction or amendment of the record.
1705.8 Appeal of an initial adverse agency determination on correction or amendment of the record.
1705.9 Disclosure of record to a person other than the individual to whom the record pertains.
1705.10 Fees.
1705.11 Penalties.
1705.12 Exemptions.

AUTHORITY: 5 U.S.C. 552a.

§ 1705.1 Purpose and scope.

These procedures provide the means by which individuals may safeguard their privacy by obtaining access to, and requesting amendments or corrections in, information, if any, about these individuals which is contained in the White House Conference Delegate/Alternate Certification File (D/AC File), which is under the control of the National Commission on Libraries and Information Science (hereafter, the Commission).

§ 1705.2 Definitions.

For the purpose of these procedures:

(a) The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(b) The term "maintain" includes maintain, collect, use or disseminate;

(c) The term "record" means any item or set of items about an individual that is maintained by the Commission in either hard copy or computerized form, including name, residence and other information obtained from the form, "Certification of State/Territorial Delegates/Alternates to the White House Conference on Library and Information Services."

(d) The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

§ 1705.3 Procedures for requests pertaining to individual records in the D/AC File.

(a) An individual who wishes to know whether the D/AC File contains a record pertaining to him or her shall submit a written request to that effect to the System Manager at the Commission. The System Manager shall, within 10 days of receipt of such submission, inform the individual whether the D/AC File contains such a record.

(b) An individual who desires access to any identified record shall file a request therefor addressed to the System Manager indicating whether such individual intends to appear in person at the Commission's offices or whether he or she desires to receive a copy of any identified record through the mail.

§ 1705.4 Times, places, and requirements for identification of individuals making requests.

(a) An individual who, in accord with § 1705.3(b) indicated that he or she would appear personally shall do so at the Commission's offices, 1717 K Street NW., Suite 601, Washington, D.C., between the hours of 8:30 a.m. and 4 p.m. Monday through Friday (legal holidays excluded) and present either: (1) The response from the System Manager indicating that such a record exists; or (2) a copy of the executed certification form, as well as another suitable form of identification, such as a valid drivers license or equivalent.

(b) In response to a request for mail delivery, the Commission will mail only to the home address appearing in the D/AC File a copy of the record for that individual within 10 working days.

§ 1705.5 Disclosure of requested information to individuals.

Upon verification of identity, the System Manager shall disclose to the individual (a) the information contained in the record which pertains to that individual; and (b) the accounting of disclosures of the record, if any, required by 5 U.S.C. 552a(c).

§ 1705.6 Request for correction or amendment to the record.

If a person wishes a change to be made in the record, he or she should follow the procedures for making changes which are included in the instructions accompanying the certification form by which the information was obtained. Copies of these instructions will be mailed to any delegate/alternate upon request.

§ 1705.7 Agency review of request for correction or amendment of the record.

Within 10 days of the receipt of the request to correct or to amend the record, the System Manager will acknowledge in writing such receipt and promptly either: (a) Make any correction or amendment of any portion thereof which the individual believes is not accurate, relevant, timely, or complete and inform the individual of same: or (b) inform the individual of his or her refusal to correct or amend the record in accordance with the request, the reason for the refusal, and the procedures established by the Commission for the individual to request a review of that refusal.

§ 1705.8 Appeal of an initial adverse agency determination on correction or amendment of the record.

An individual who disagrees with the refusal of the System Manager to correct or to amend his or her record may submit a request for review of such refusal to the Chairman of the Commission, 1717 K Street NW., Suite 601, Washington, D.C. 20036. The Chairman will, not later than 30 days from the date on which the individual requests such review, complete such review and make a final determination

V 43/199 OC 13 78

unless, for good cause shown, the Chairman extends such 30-day period. If, after his or her review, the Chairman also refuses to correct or to amend the record in accordance with the request, the individual may file with the Commission a concise statement setting forth the reasons for his or her disagreement with the refusal of the Commission and may seek judicial review of the Chairman's determination under 5 U.S.C. 552a(g)(1)(A).

§ 1705.9 Disclosure of record to a person other than the individual to whom the record pertains.

An individual to whom a record is to be disclosed in person may have a person of his or her own choosing accompany the individual when the record is disclosed.

§ 1705.10 Fees.

(a) The Commission will not charge an individual for the costs of making a search for a record or the costs of reviewing the record. When the Commission makes a copy of a record as a necessary part of the process of disclosing the record to an individual, the Commission will not charge the individual for the cost of making that copy.

(b) If an individual requests the Commission to furnish him or her with a copy of the record (when a copy has not otherwise been made as a necessary part of the process of disclosing the record to the individual) the Commission will charge a fee of $0.25 per page (maximum per page dimension of 8½ by 13 inches) to the extent that the request exceeds $5 in cost to the Commission. Requests not exceeding $5 in cost to the Commission will be met without cost to the requester.

§ 1705.11 Penalties.

Title 18 U.S.C. 1001, Crimes and Criminal Procedures, makes it a criminal offense, subject to a maximum fine of $10,000 or imprisonment for not more than 5 years or both to knowingly and willfully make or cause to be made any false or fraudulent statements or representations in any matter within the jurisdiction of any agency of the United States. Section 552a(i)(3) of the Privacy Act (5 U.S.C. 552a(i)(3)), makes it a misdemeanor, subject to a maximum fine of $5,000, to knowingly and willfully request or obtain any record concerning an individual under false pretenses. Section 552a(i) (1) and (2) of the Privacy Act (5 U.S.C. 552a(i) (1) and (2)) provide penalties for violations by agency employees of the Privacy Act or regulations established thereunder.

§ 1705.12 Exemptions.

No Commission records system is exempted from the provisions of 5 U.S.C. 552a as permitted under certain conditions by 5 U.S.C. 552a (j) and (k).

Title 50—Wildlife and Fisheries

CHAPTER 1—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Muscatatuck National Wildlife Refuge, Ind., to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Muscatatuck National Wildlife Refuge to rabbit and quail hunting is compatible with the objectives for which the area was established, will utilize a renewable national resource, and will provide additional recreational opportunity to the public.

DATES: November 10, 1978, through January 31, 1979, for rabbit; November 10, 1978, through December 25, 1978, for quail.

FOR FURTHER INFORMATION CONTACT:

Charles E. Scheffe, refuge manager, Muscatatuck National Wildlife Refuge, P.O. Box 631, Seymour, Ind. 47274, telephone; 812-522-4352.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of rabbit and quail is permitted on the Muscatatuck National Wildlife Refuge, Ind. only on refuge lands lying south of Myers Road, designated by signs as open to hunting. This area comprising 1,320 acres is delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Hunting of rabbits and quail shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: October 4, 1978.

CHARLES E. SCHEFFE,
Refuge Manager.

FEDERAL TRADE COMMISSION

[16 CFR Part 444]

CREDIT PRACTICES

Publication of Presiding Officer's Report Regarding Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Publication of presiding officer's report.

SUMMARY: This document gives notice that the presiding officer's report concerning the proposed trade regulation rule on credit practices has been made public. The report is required by the Commission's rules of practice for rulemaking and consists of the presiding officer's summary, findings, and conclusions with regard to the proposed rule.

DATE: The 60-day period which the rules of practice for rulemaking (16 CFR 1.13(g)) provide for public comment on both the report by the presiding officer and the report of the staff will not commence until the staff's report has been made public and placed on the public record. Therefore, comment on the presiding officer's report alone would be considered premature at this time.

FOR FURTHER INFORMATION CONTACT:

Henry B. Cabell, Presiding Officer, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, 202-724-1045.

SUPPLEMENTARY INFORMATION: On June 24, 1977, the presiding officer published in the FEDERAL REGISTER (42 FR 32259) final notice of the proposed trade regulation rulemaking proceeding. The presiding officer's report, required by the Commission's rules of practice for rulemaking (16 CFR 1.13(f)) consisting of his summary, findings, and conclusions with regard to the proposed rule and to those issues designated by him, has been made public and placed on Public Record 215-42. A limited number of copies of the presiding officer's report have been printed for distribution; to obtain a copy, address a request to the Federal Trade Commission/SSD, Washington, D.C. 20580. When completed, the staff's report on the rulemaking record and its recommendations to the Commission also will be made public and notice thereof published in the FEDERAL REGISTER. The presiding officer's report has not been reviewed or adopted by either the Bureau of Consumer Protection or the Commission itself and its publication should not be interpreted as reflecting the present views of the Commission or any individual Commissioner.

Issued: October 6, 1978.

HENRY B. CABELL,
Presiding Officer.

[6355-01-M]

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1307]

CONSUMER PRODUCTS CONTAINING BENZENE

Extension of Time for Rulemaking

AGENCY: Consumer Product Safety Commission.

ACTION: Extension of time for promulgation of rule.

SUMMARY: The Commission extends the time from October 16, 1978 to April 16, 1979 in which it must issue a consumer product safety rule to declare that certain benzene-containing consumer products are banned hazardous products under section 8 of the Consumer Product Safety Act (CPSA) or to withdraw the rule proposed on May 19, 1978. This extension is necessary to enable Commission staff to analyze the technical data submitted by commenters as well as to address complicated scientific issues raised by comenters.

DATES: The Commission extends the time from October 16, 1978 to April 16, 1979.

FOR FURTHER INFORMATION CONTACT:

Francine Shacter, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, phone 301-492-6453.

SUPPLEMENTARY INFORMATION: On May 19, 1978, the Commission proposed a ban under section 8 of the Consumer Product Safety Act (CPSA) of all consumer products, except gasoline and solvents or reagents for laboratory use, containing benzene as an intentional ingredient or as a contaminant at a level of 0.1 percent or greater by volume. (see 43 FR 21838). Based on information discussed in the proposal, the Commission preliminarily concluded that benzene-containing consumer products present an unreasonable risk of injury to the public because benzene inhalation can cause blood disorders, chromosomal abnormalities, and leukemia. The Commission also concluded that no feasible standard could adequately protect the public from these risks. The proposed ban specified that written comments should be submitted on or before June 30, 1978. The proposal also invited interested persons to make an oral presentation at a proceeding that was conducted on June 14, 1978.

On June 27, 1978, the Commission, at the request of several interested parties, extended the comment period on issues relating specifically and solely to the proposed ban on benzene as a contaminant until August 31, 1978. (see 43 FR 27852). At that time the Commission indicated that the splitting of the comment period might mean that the Commission would take final action on the proposed ban on benzene as an intentional ingredient before taking final action on the proposed contaminant ban. The Commission noted that the issues surrounding the contaminant portion of the ban appeared to be more comlex and the hazards presented less urgent because of the smaller amounts of benzene in products containing the chemical as a contaminant.

The Commission has received a total of 42 comments as well as 6 oral presentations concerning both portions of the proposed ban. Many of the comments and oral presentations criticize the proposal and raise complex scientific and technical issues, including the

V 4 3 / 1 9 9 0 C 1 3 7 8

claim that there is no evidence that low levels of exposure to benzene constitute a health hazard, the contention that a safe threshold level for exposure to benzene exists, the assertion that the Commission's risk assessment is inadequate, and the claim that the proposed contamination level is neither justified nor commercially feasible. The data the Commission must analyze in order to address there comments and presentations are voluminous.

In addition, a review of the comments and presentations has indicated that it may not be appropriate to take final action on the intentional ingredient ban separately and in advance of any action on the contaminant ban. It is difficult to distinguish those parts of the submissions which are comments on benzene as an intentional ingredient from those parts which are comments on benzene as a contaminant and in fact, many of the comments received at the Commission on August 31, 1978 actually raise issues relevant to the intentional ingredient ban. Since the scientific basis for both portions of the ban is the same, the Commission has decided that the comments received by June 30, 1978 as well as the comments received by August 31, 1978 should be reviewed and analyzed together. While such an analysis now will require more time than analysis directed solely at frist issuing a final regulation concerning benzene as an intentional ingredient, the Commission points out that the need for immediate action on the intentional use of benzene in consumer has recently diminished. Information available to the Commission indicates that by the end of the year not a single manufacturer will be making consumer products containing intentionally added benzene.

Therefore, in view of the complexity of the issues raised in the comments on the proposal, the desirability of reviewing all the comments submitted as a total body of information, and the need to analyze and respond to each substantive comment in any final regulation, the Commission, in accordance with section 9(2) of the Consumer Product Safety Act (15 U.S.C. 2058(a)), finds that good cause exists to extend the period within which it must promulgate a consumer product safety rule or withdraw the proposal for 6 months, until April 16, 1979. This period may be further extended for good cause by notice published in the FEDERAL REGISTER.

Dated: October 10, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR PART 310]

[Docket No. 78N-0274]

ESTROGENIC, ORAL CONTRACEPTIVE, AND PROGESTATIONAL DRUG PRODUCTS

Proposed Requirements for Patient Labeling

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend patient-labeling requirements for estrogenic, oral contraceaptive, and progestational drug products to permit dispensers to use uniform or "generic" labeling. The agency is also proposing amendments to the patient-labeling regulations to clarify dispensers' responsibilities when drug products subject to the regulations are dispensed to legally incompetent patients. The proposed amendments are made in response to the requests of a number of-dispensers of prescription drugs.

DATE: Comments by December 12, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Steven Unger, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-5220.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) is proposing to amend the regulations requiring patient labeling for estrogenic, oral contraceptive, and progestational drug products to provide for the use by drug dispensers of uniform or "generic" labeling for all members of the class of drug products subject to each patient-labeling regulation. This action is taken in response to the requests of several dispensers of prescription drugs who claim that current requirements entail the excessively burdensome and costly storage, collation, and distribution of a large volume of product-specific patient-labeling leaflets.

Under current regulations the use of a slightly modified kind of uniform labeling is already possible. With each of the patient-labeling regulations published to date, the agency has made available a guideline patient-labeling text and advised that any person could rely on the text to comply with the requirements of the regulation. This policy is compatible with the use of uniform labeling, i.e., labeling which could be used interchangeably for all drugs in a patient-labeling class. However, regulations arguably prevent the use of completely uniform labeling by requiring that the labeling identify the name of the particular drug being dispensed to the patient and the name and place of business of the manufacturer, packer, relabeler, or distributor of the drug. These provisions, which were intended to require the labeling to identify the particular product being dispensed, do not clearly authorize attempts to use completely uniform labeling.

In response to the final rule requiring patient labeling for estrogenic drug products published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37636), FDA received a number of requests from dispensers of prescription drugs urging the agency to amend the regulation to permit the use of uniform labeling. The requests noted the difficulties posed for dispensers in storing, collating, and distributing the large number of individualized patient-labeling leaflets. Several requests suggested that a revision of the patient-labeling regulation to facilitate the use of uniform labeling would significantly reduce the dispenser's burden without seriously detracting from the major purposes and benefits of patient-labeling. Copies of the requests have been placed on file in the office of the Hearing Clerk, FDA (address above).

The Commissioner of Food and Drugs has tentatively concluded and is proposing that the patient-labeling regulations should permit the use of uniform labeling. This proposal, if adopted, would permit the substitution of the class name of the drug product (i.e., "oral contraceptives," "estrogens for general use," "progestational drug product") for the required name of the particular drug product (brand name and generic name). The proposal would also permit the identification of the name and place of business of the dispenser in place of the presently required name and place of business of the manufacturer, packer, relabeler, or distributor. These changes would enable dispensers to meet the requirements of the patient-labeling regulations by employing one of the following distribution methods:

1. The dispenser of the drug may continue to use the patient labeling which is supplied with each shipment of the drug product; or

2. The dispenser may replace the patient labeling received from the channels of distribution with uniform patient labeling prepared for or by the dispenser. The dispenser would then assume responsibility for assuring that the labeling complied with all current regulatory requirements.

The Commissioner does not intend this proposal to permit dispensers to substitute their own patient labeling for the labeling contained in unit-of-use packages (e.g., oral contraceptive monthly "compacts") prepared by the manufacturer, packer, labeler, or distributor and intended to be dispensed to the patient as initially packaged.

Section 201.150 of the drug labeling regulations (21 CFR 201.150) currently permits drugs which are, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than the one where originally processed or packed, to be shipped in interstate commerce under certain circumstances without meeting specified labeling requirements. One such circumstance is under a labeling "agreement," wherein the person who will process, label, or repack the drugs agrees in writing to abide by conditions which insure that the drugs will not be misbranded or adulterated upon completion of the processing, labeling, or repacking.

Although the proposed requirements (in §§ 310.501(a)(7), 310.515(d)(4), and 310.516(e)(5)) would permit dispensers or retailers to prepare and dispense patient labeling in the absence of an agreement, the use of uniform patient labeling by pharmacies and other dispensers presents a situation in which labeling agreements may be useful. Manufacturer-prepared labeling becomes superfluous and is likely to be discarded before use when the dispenser prepares its own generic labeling. Accordingly, the Commissioner proposes to permit dispensers and manufacturers, repackers, and distributors to enter into labeling agreements under which the dispenser would agree to meet applicable patient-labeling requirements. Under such an agreement the manufacturer, packer, relabeler, or distributor would be relieved of the obligation to ship patient labeling with the drug product. Persons entering into such agreements would assume responsibility to comply with the requirements pertaining to written agreements as set forth in § 201.150 of the regulations. Additionally, the proposal would require that the labeling agreement include: (1) A copy of the patient labeling to be used by the dispenser and (2) a statement that the dispenser will prepare and distribute labeling that meets the requirements of the patient-labeling regulation.

The use of dispenser-prepared uniform labeling would not subject dispensers to the registration and drug listing requirements as set forth in section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360) and Part 207 of the regulations (21 CFR Part 207). The Commissioner considers the use of dispenser-prepared uniform labeling to be within the terms of § 207.65 of the regulations (21 CFR 207.65), which exempts certain domestic drug establishments, including pharmacies, hospitals, and clinics, from registration and drug listing.

The Commissioner acknowledges that there are some advantages to retaining those requirements that assure the use of product-specific labeling. Product-specific labeling, in identifying the name and the source of particular drug products, may enhance the possibility that manufacturers can assist dispensers in updating and, if necessary, recalling labeling, because the labeling can be correlated to the various products' lot numbering systems. Moreover, such labeling does provide some assurance that a specific manufacturer's patient labeling will be dispensed with the manufacturer's product, a consideration of some importance to dispensers in terms of their legal responsibility. However, the Commissioner notes that the amendments proposed by this document are permissive in nature—this proposal would not prohibit the use of product-specific labeling, but rather would make possible the alternative use of uniform patient labeling. To the extent that the advantages of product-specific patient labeling are plainly demonstrated, the Commissioner believes that such labeling will continue to be widely used.

In response to the requests asking that the agency permit the use of uniform labeling, the Bureau of Drugs has advised a number of dispensers that, as a matter of compliance policy, the Bureau does not object to dispensers assuming responsibility for complying with the requirements of the patient labeling regulation through the use of dispenser-prepared uniform labeling. Copies of the Bureau's written responses announcing this policy have been placed on file in the office of the Hearing Clerk, FDA (address above). Pending the receipt of comments on the proposal and the Commissioner's final decision on the matter, this compliance policy will remain in effect. If the Commissioner determines not to adopt this proposal as a final rule, a notice announcing that decision will be published in the FEDERAL REGISTER. A decision not to adopt this proposal would, of course, require the agency to reconsider the present compliance policy, and perhaps to modify any dispenser-initiated patient-labeling programs that have been undertaken.

LABELING FOR LEGALLY INCOMPETENT PATIENTS

The Commissioner is also proposing to amend the patient-labeling regulations for oral contraceptives, estrogens, and progestational drug products to permit dispensers to distribute patient labeling to the parent or legal guardian of a legally incompetent patient. This action is taken in response to inquiries asking the agency to clarify and address explicitly the obligations of dispensers when drug products subject to the regulation are dispensed to mentally disabled adults or to children who are not legally competent to consent to medical treatment with the drug product. Although the Commissioner hopes that in appropriate circumstances the dispenser will provide the labeling to the parent or legal guardian of the patient, the Commissioner understands that circumstances frequently do not enable the dispenser to determine the legal capacity of the patient. Therefore this proposal would not require distribution of labeling to the parent or legal guardian of the patient, but rather would permit such distribution in lieu of providing the labeling directly to the patient.

The patient labeling regulations currently require that labeling for drug products dispensed in acute-care hospitals or long-term-care facilities be provided to the patient before administration of the first dose and then at 30-day intervals for as long as the therapy continues. Because this proposed amendment would apply to inpatients as well as outpatients, its adoption would permit labeling to be provided to the legal representative of the legally incompetent inpatient at the stated 30-day intervals. However, the Commissioner recognizes that in acute-care and long-term-care facilities the provision of labeling to a parent or legal guardian of the patient poses significant difficulties because the parent or legal guardian is frequently unavailable. Therefore this document proposes to amend the regulation to provide that in the case of a legally incompetent institutionalized patient, patient labeling may be provided to the parent or legal guardian of the patient before first administration of the drug and subsequently each time the patient's drug therapy is reevaluated with the parent or legal guardian. This revision should insure that the labeling is distributed to the parent or legal guardian of the patient at the most critical junctures in the course of the patient's therapy.

Section 310.501(a)(6) of the oral contraceptive patient-labeling regulation (21 CFR 310.501(a)(6)) requires that

V 43 / 199 OCT 13 78

the manufacturer, packer, relabeler, or distributor provide patient labeling to the "retailer" of the drug product. As used in this context, "retailer" is synonymous with "dispenser." This document proposes to amend § 310.501(a)(6) to indicate clearly that the two words are synonymous.

The Commissioner has determined that this document does not contain an agency action covered by § 25.1(b) and therefore, consideration by the agency of the need for preparing an environmental impact statement is not required.

Accordingly, under the Federal Food, Drug and Cosmetic Act (secs. 201, 502(a), 503(a), 505, 701(a), 52 Stat. 1040–1042 as amended, 1050–1053 as amended, 1055 (21 U.S.C. 321, 352(a), 353(a), 355, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend part 310 of chapter I of title 21 of the Code of Federal Regulations as follows:

1. In § 310.501, by revising paragraphs (a)(1), (a)(3) (i) and (ii), and the introductory text of paragraph (a)(6); by redesignating existing paragraphs (a)(7), (a)(8), and (a)(9) as (a)(9), (a)(10), and (a)(11), respectively, and adding new paragraphs (a)(7) and (a)(8); and by revising newly designated paragraph (a)(11), to read as follows:

§ 310.501 Preparations for contraception; labeling directed to the patient.

(a) *Oral contraceptives.* (1) The Commissioner of Food and Drugs concludes that the safe and effective use of oral contraceptive drug products requires that patients be fully informed of the benefits and risks involved in the use of these drugs. Information in lay language concerning effectiveness, contraindication, warnings, precautions, and adverse reactions shall be furnished to each patient receiving oral contraceptives. This information shall be given to the patient in the form of a brief summary of certain essential information included in each package dispensed to each patient, and in a longer, detailed labeling piece in or accompanying each package dispensed to each patient.

• • • • • •

(3) • • •

(i) Name of the drug product (brand name and generic name) or class name of the drug ("Oral Contraceptives").

(ii) Name and place of business of the manufacturer, packer, relabeler, distributor, or dispenser.

• • • • • •

(6) Patient labeling for each oral contraceptive drug product shall be provided to the retailer or dispenser by the manufacturer, packer, relabeler, or distributor as follows:

• • • • • •

(7) A manufacturer, packer, relabeler, or distributor may, with the retailer or dispenser of the drug product, enter into a labeling agreement under which the retailer or dispenser assumes responsibility to prepare and distribute oral contraceptive patient labeling in full compliance with this section. Nothing in this paragraph shall preclude a retailer or dispenser from preparing and dispensing patient labeling that complies with this section in the absence of a written agreement. Persons who enter into labeling agreements shall comply with the requirements of § 201.150 of this chapter pertaining to the use of written agreements. Under a valid labeling agreement, a manufacturer, packer, relabeler, or distributor is exempt from the requirements of this paragraph with respect to the oral contraceptive drug product that are subject to such agreement. In addition to the requirement of § 201.150 of this chapter, a labeling agreement shall contain the following:

(i) A copy of the patient labeling that complies with this section and that will be provided to the patient.

(ii) A statement that the dispenser will prepare and distribute patient labeling that fully complies with all requirements of this section.

(8) Patient labeling for each oral contraceptive drug product shall be provided by the retailer or dispenser to the patient as follows:

(i) The brief summary patient labeling shall be included in each package dispensed or administered to the patient.

(ii) The detailed patient labeling shall be included in or shall accompany each package dispensed or administered to the patient.

(iii) In the case of oral contraceptive drug products dispensed or administered to patients who are legally incompetent under applicable State and local law, the labeling (brief summary and detailed patient labeling) may be provided to the parent or legal guardian of the patient.

(iv) Patient labeling for drug poducts dispensed in acute-care hospitals or long-term-care institutions will be considered to have been provided in accordance with this section if that labeling is provided to the patient before administration of the first dose of estrogen and every 30 days thereafter, as long as the therapy continues. However, in the case of patients in acute-care hospitals or long-term-care institutions who are not legally competent, the patient labeling will be considered to have been provided in accordance with this paragraph if that labeling is provided to the parent or legal guardian before first administration of the oral contraceptive and each subsequent time the patient's drug therapy is reevaluated with the parent or legal guardian.

• • • • • •

(11) Holders of new drug applications for oral contraceptive drug products that are subject to paragrah (a) of this section shall submit supplements under § 314.8(d) of his chapter to provide for the labeling required by paragraph (a)(2) and (3) of this section. The labeling may be put into use without advance approval by the Food and Drug Administration.

• • • • • •

2. In § 310.515, by revising paragraphs (b)(1), (b)(2), and (d)(1), and by adding new paragraph (d)(4), to read as follows:

§ 310.515 Estrogens; labeling directed to the patient.

• • • • • •

(b) • • •

(1) Name of the drug product (brand name and generic name) or class name of the drug ("Estrogens for general use").

(2) Name and place of business of the manufacturer, packer, relabeler, distributor, or dispenser.

• • • • • •

(d)(1) Patient labeling for each estrogen drug product shall be provided in or with each package of the drug product intended to be dispensed or administered to the patient.

(i) In the case of estrogen drug products dispensed or administered to patients who are legally incompetent under applicable State and local law, patient labeling may be provided to the parent or legal guardian of the patient.

(ii) Patient labeling for drug products dispensed in acute-care hospitals or long-term-care institutions will be considered to have been provided in accordance with this section if that labeling is provided to the patient before administration of the first dose of estrogen and every 30 days thereafter, as long as the therapy continues. However, in the case of patients in acute-care hospitals or long-term-care institutions who are not legally competent, the patient labeling will be considered to have been provided in accordance with this paragraph if that labeling is provided to the parent or legal guardian of the patient before first administration of the estrogen and each subsequent time the patient's drug therapy is reevaluated with the parent or legal guardian.

• • • • • •

(4) A manufacturer, packer, relabeler, or distributor may, with the dispenser of the drug product, enter into a labeling agreement under which the dispenser assumes responsibility to prepare and distribute estrogen drug product patient labeling in full compliance with the requirements of this section. Nothing in this paragraph shall preclude a retailer or dispenser from preparing and dispensing patient labeling that complies with this section in the absence of a written agreement. Persons who enter into labeling agreements shall comply with the requirements of § 201.150 of this chapter pertaining to the use of written agreements. Under a valid labeling agreement, a manufacturer, packer, relabeler, or distributor is exempt from the requirements of this section with respect to the estrogenic drug products that are subject to such agreement. In addition to the requirements of § 201.150 of this chapter, a labeling agreement shall contain the following:

(i) A copy of the patient labeling that complies with this section and that will be provided to the patient.

(ii) A statement that the dispenser will prepare and distribute patient labeling that fully complies will all requirements of this section.

• • • • • •

3. In § 310.516, by revising paragraphs (b)(1), (b)(2), and (e)(1); by adding a new paragraph (e)(5); and by revising paragraph (g), to read as follows:

§ 310.516 Progestational drug products; labeling directed to the patient.

• • • • • •

(b) • • •

(1) Name of the drug product (brand name and generic name) or class name of the drug ("Progestational drug product").

(2) Name and place of business of the manufacturer, packer, relabeler, distributor, or dispenser.

• • • • • •

(e)(1) Patient labeling for each progestational drug product shall be provided in or with each package intended to be dispensed to the patient.

(i) In the case of progestational drug products dispensed or administered to patients who are legally incompetent under applicable State and local law, patient labeling may be provided to the parent or legal guardian of the patient.

(ii) Patient labeling for progestational drug products dispensed in acute-care hospitals or long-term-care institutions will be considered to have been provided in accordance with this section if that labeling is provided to the patient before administration of the first dose of the drug and every 30 days thereafter, as long as the therapy continues. However, in the case of patients in acute-care hospitals or long-term-care institutions who are not legally competent, the patient labeling will be considered to have been provided in accordance with this paragraph if that labeling is provided to the parent or legal guardian of the patient before first administration of the drug and each subsequent time the patient's drug therapy is reevaluated with the parent or legal guardian.

• • • • • •

(5) A manufacturer, packer, relabeler, or distributor may, with the dispenser of the drug product, enter into a labeling agreement under which the dispenser assumes responsibility to prepare and distribute progestational drug product patient labeling in full compliance with the requirements of this section. Nothing in this paragraph shall preclude a retailer or dispenser from preparing and dispensing patient labeling that complies with this section in the absence of a written agreement. Persons who enter into labeling agreements shall comply with the requirements of § 201.150 of this chapter pertaining to the use of written agreements. Under a valid labeling agreement, a manufacturer, packer, relabeler, or distributor is exempt from the requirements of this section with respect to the progestational drug products that are subject to such agreements. In addition to the requirements of § 201.150 of this chapter, a labeling agreement shall contain the following:

(i) A copy of the patient labeling that complies with this section and that will be provided to the patient.

(ii) A statement that the dispenser will prepare and distribute patient labeling that fully complies with all requirements of this section.

• • • • • •

(g) Holders of new drug applications for progestational drug products that are subject to this section shall submit supplements under § 314.8 of this chapter to provide for the labeling required by paragraph (a) of this section. The labeling may be put into use without advance approval by the Food and Drug Administration.

Interested persons may, on or before December 12, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: October 3, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4600]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Decatur, Morgan County, Ala.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Decatur, Morgan County, Ala. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at North Cen-

V 43 / 199 OCT 13 78

tral Alabama Regional Council of Governments, 5th Floor, Decatur City Hall, P.O. Box 488, Decatur, Ala. 35602. Send comments to: Mayor Bill Dukes or Mr. Gary Voketz, Executive Director, North Central Alabama Regional Council of Governments, 5th Floor, Decatur City Hall, P.O. Box 488 Decatur, Ala. 35602.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, room 5270, 451 Seventh Street SW., Washington, D.C. 10410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Decatur, Morgan County, Ala., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation, in feet, national geodetic vertical datum
Tennessee River....	Just upstream U.S. Highways 31 and 72.	560
	Confluence of Flint Creek.	561
Betty Rye Branch.	Western corporate limits.	566
	Just downstream 2d St...	578
Dry Branch.....	Just downstream Washington St.	561
	Just upstream Moulton St.	564
	2d Ave.....	576
	Just downstream of 19th Ave.	601
Flint Creek.....	Just upstream of State Highway 67.	562
	Southern Corporate limits.	565
Brush Creek.....	Flint Rd.....	565
	Chenault Dr.....	569
Clark Spring Branch.	Stanley St.....	572
	Just upstream of Sandlin Rd.	586
	Confluence of No. 3 Tributary to Clark Spring Branch.	601
No. 3 Tributary to Clark Spring Branch.	Just downstream Danville Rd.	608
	Just upstream Danville Rd.	610
Sheet Flow area	Intersection of Fairway Circle and Fairway Dr.	569

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 43 FR 7719.)

Issued September 15, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Guin, Marion County, Ala.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Guin, Marion County, Ala. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, P.O. Box 249, Guin, Ala. Send comments to: Mayor C. P. Guin, City Hall, P.O. Box 249, Guin, Ala. 35563.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Guin, Marion County, Ala., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Purgatory Creek ...	Just upstream of Alabama Highway 118.	415
	Just downstream of U.S. 278.	427
	Just downstream RR. Spur to 3M Co.	439
Reedy Branch.....	Just upstream of U.S. Highway 78/43.	452
Little Creek.....	Just upstream of 10th Ave.	433
	Just upstream of 15th Ave.	447
Tributary 1.....	Approximately 100 feet downstream Alabama Highway 118.	426

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 43 FR 7719.)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Dermott, Chicot County, Ark.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Dermott, Chicot County, Ark. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Dermott, Ark. 71638. Send Comments to: Mayor Ben Bynum or Mr. Ed Hanum, Community Development Director, City Hall, P.O. Box 375, Dermott, Ark. 71638.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Dermott, Chicot County, Ark., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Big Bayou Slough.	Intersection of East Hickory Street and Deer Street.	138
	Intersection of East Broadway and South Donard Street.	137

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Maitland, Orange County, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Maitland, Orange County, Fla. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, P.O. Box 66, Maitland, Fla. 32751. Send comments to: Mayor James Houser, City Hall, P.O. Box 66, Maitland, Fla. 32751.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Maitland, Orange County, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lake Sybelia	Intersection of Lake Sybelia Dr. and Jackson St.	78
Lake Jackson	Just north of Brook Dr.	84
Lake Destiny	Just west of Lake Destiny Dr.	93
Lake Lucien	At Maitland Cemetery	94
Lake Hungerford	Intersection of Calver Ave. and Bethune Dr.	97
Lake Charity	Approximately 400 ft north of Maitland Blvd.	73
Lake Hope	Lake Hope at the northern corporate limits.	74
Lake Faith	Just northwest of the intersection of Maitland Ave. and Greenwood Rd.	73
Park Lake	Just north of Gem Lake Dr.	73
Lake Maitland	Intersection of Whitecaps Circle and Adams Dr.	68
Lake Minnehaha	At Minnehaha Lane	68
Lake Catherine	Lake Catherine Dr	71
Howell Creek	Just downstream of Horatio Ave.	68
Stream A	Chippewa Trail (extended).	68
Lake Gem	Just north of the intersection of Monroe Ave. and Lewis Dr.	73

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

[Docket No. FI-4606]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Pompano Beach, Broward County, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Pompano Beach, Broward County, Fla. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Pompano Beach, Fla. Send comments to: Hon. William Alsdorf, Mayor, City of Pompano Beach, P.O. Drawer 1300, Pompano Beach, Fla. 33061.

FOR FURTHER INFORMATION CONTACT:

V 43 / 199 0 C 13 7 8

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Pompano Beach, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Atlantic Ocean	Intersection of Andrews Ave. and SW. Eighth St.	8
	Intersection of South Cypress Rd. and SE. 11th St.	8
	Intersection of North Riverside Dr. and North Ocean Blvd.	8
Shallow Ponding	Intersection of NW. 15th St. and NW. 14th Ave.	13
	Intersection of NW. Fourth Ave. and NW. 10th St.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 14, 1978

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for The City of Aberdeen, Bingham County, Idaho

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Aberdeen, Bingham County, Idaho. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Aberdeen, Idaho. Send comments to: Hon. Cliff Wrides, Mayor, City of Aberdeen, P.O. Box 190, Aberdeen, Idaho 83210.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Aberdeen, Idaho, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National geodetic vertical datum
Aberdeen Wasteway.	Central Avenue road.—50 ft*.	4,387
	Bingham Ave.—40 ft*	4,390
	Main St.—50 ft*	4,392
	County road 2800 west—50 ft**.	4,393

* Upstream of centerline.
** Downstream of centerline.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Rumford, Oxford County, Maine

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Rumford, Oxford County, Maine. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Town Office, Rumford, Maine. Send comments to: Mr. Howard Waite, Chairman, Board of Selectmen, Town of Rumford, Town Office, Rumford, Maine 04276.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Rumford, Maine, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of North Attleboro, Bristol County, Mass.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of North Attleboro, Bristol County, Mass. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Clerk's Office, Town Office Building, North Attleboro, Mass. Send comments to: The Honorable Susan Nelson, Chairwoman, Board of Selectmen, Town of North Attleboro, 43 South Washington Street, North Attleboro, Mass.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of North Attleboro, Mass., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Ten Mile River.....	Downstream corporate limits.	137
	Just upstream of Cedar Rd.	139
	Just upstream of Freeman St.	144
	Just upstream of Sturdy Lane.	146
	Just upstream of Towne St.	148

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Township of Cedarville, Menominee County, Mich.; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 35060 of the FEDERAL REGISTER of August 8, 1978.

EFFECTIVE DATE: August 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

The following correction are made:

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Cedarville Township Hall, Cedar River, Mich.

Send comments to: Mr. Peter Bardowski, Township Supervisor, Cedarville Township Hall, Cedar River, Mich. 49813.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 26, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

[LR-100-78]

INCOME TAX

Regulations Project Relating to the Requirements for Creditable Foreign Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Extension of time for comments.

SUMMARY: This document provides notice of an extension of time for submitting comments concerning the invitation for public comments with respect to the requirements for creditable foreign taxes. The extended deadline for submission of comments is November 27, 1978.

DATE: Written comments must be delivered or mailed by November 27, 1978.

ADDRESS: Send comments to Commissioner of Internal Revenue, Attention: CC:LR:T (LR-100-78), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

David Dolan of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, CC:LR:T, 202-566-3287, not a toll-free call.

SUPPLEMENTARY INFORMATION: By an invitation for public comments published in the FEDERAL REGISTER for Monday, August 28, 1978 (43 FR 38429), comments with respect to the invitation were to be delivered or mailed to the Commissioner of Internal Revenue, Attention: CC:LR:T (LR-100-78), Washington, D.C. 20224, by October 27, 1978. The date by which such comments must be delivered or mailed is hereby extended to November 27, 1978.

V 43 / 199 OCT 13 78

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury Directive appearing in the FEDERAL REGISTER for Wednesday, May 24, 1978.

DAVID E. DICKINSON,
Assistant Director, Legislation and Regulations Division.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[30 CFR Part 11]

RESPIRATORY PROTECTIVE APPARATUS

Use of Approved Devices

AGENCIES: Mine Safety and Health Administration (MSHA), Department of Labor, and National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, Public Health Service, Department of Health, Education, and Welfare.

ACTION: Proposed rule.

SUMMARY: This document proposes to extend the cutoff dates for use of certain self-contained breathing apparatus approved under the former Bureau of Mines approval program. Mine operators and others have requested that continued use of this equipment be permitted and have indicated that economic hardship would result in order to replace a major portion of their equipment by the cut-off date now established.

DATES: Comments must be received on or before November 13, 1978.

ADDRESSES: Comments and inquiries may be submitted to: Ms. Mary Flint, Regulations Specialist, National Institute for Occupational Safety and Health, 5600 Fishers Ln., Room 8-11, Rockville, Maryland 20857. Comments will be available for public inspection at this address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Ms. Mary Flint, phone 301-443-3745.

SUPPLEMENTARY INFORMATION: On March 25, 1972, (37 FR 6244), the Department of Health, Education, and Welfare (HEW) and the Department of Interior jointly adopted Part 11 of Title 30, Code of Federal Regulations, to implement sections 202(h) and 204 of the Federal Coal Mine Health and Safety Act of 1969. Part 11 provides for the testing of occupational respirators and the issuance of joint approvals for those meeting certain requirements for performance and respiratory protection. Until recently, the joint approval program was conducted by the National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, Public Health Service, HEW, and the Mining Enforcement and Safety Administration (MESA), Department of the Interior. On November 9, 1977, Congress enacted the Federal Mine and Safety and Health Act of 1977 (Pub. L. 95-164). This Act repealed the Federal Metal and Nonmetallic Mine Safety Act and established a single law for all mining operations under an amended Coal Mine Health and Safety Act of 1969. Under the new legislation, the functions of MESA were transferred to the Department of Labor as the Mine Safety Health Administration (MSHA). Except for the transfer of functions, the provisions for joint approval of respirators remain the same.

Prior to the promulgation of part 11 in 1972, respirator approvals were issued by the Bureau of Mines (BOM) of the Department of the Interior. When the new respirator approval regulations were issued in 1972, dates were established which were designed to eliminate older BOM-approved respriators from workplaces in an orderly and reasonable manner, to be replaced with respirators approved under Part 11. At that time, March 31, 1979, was established as the cut-off date for use of self-contained breathing appartus (SCBA) approved under BOM Approval Schedules 13-13E, inclusive. On November 22, 1974, (39 FR 40950), the regulations were amended to establish June 30, 1975, as a cut-off date for purchase of Schedule 13-13E devices which would continue to be approved for use until March 31, 1979. All SCBA purchased after June 30, 1975, must be approved under Part 11 approval requirements. SCBA approved under Part 11 are superior to many of the earlier apparatus because they have low pressure warning devices (remaining service life indicators), higher airflow, and better low temperature operation. However, Schedule 13E approvals and some Schedule 13D approvals are equipped with low pressure warning. This became a requirement in 1968 (Schedule 13E approvals) as a matter of added safety, particularly for firefighters.

Since establishment of the March 31, 1979, cut-off date in 1972, experience has shown that the older BOM-approved devices, when properly maintained, can remain functional for several years. In fact, large numbers of this equipment are still in use by the fire service and in mine rescue operations. If this equipment is maintained in an approved condition so that it will not jeopardize the safety of the wearer and if it is equipped with the added safety feature of a low pressure warning device when used for other than mine rescue operations, NIOSH and MSHA believe there is little risk in permitting its continued use.

Many mine operators and fire service personnel, their representatives, and their programs, have requested that continued use of this equipment be permitted. They have indicated that it would be an economic hardship for them to have to replace by March 1979 a major portion of their equipment which they contend is still functioning properly and safely.

Since there are insufficient data available to justify that continued use of certain BOM-approved SCBA would jeopardize the safety of the respirator user, NIOSH and MSHA have agreed to extend the approved use date. Schedule 13D and 13E devices that are equipped with a remaining service life indicator (low pressure warning) that does not require preadjustment by the wearer would continue to be approved for use until March 31, 1982. In addition, certain Schedule 13 approved devices would continue to be approved for use in mine rescue operations until further notice. Low pressure warning devices would not be required on mine rescue SCBA because the apparatus is examined by the MSHA contends that it has adequate administrative control over the condition of mine rescue apparatus and its continued use for this purpose is justified. The cut-off dates for use of the various respiratory protective equipment are being combined in tabular form in Part 11 for easier reference by the users.

Therefore, it is proposed to amend 30 CFR Part 11 as set forth below.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order No. 11949, and OMB Circular A-107.

Dated: August 5, 1978.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

Dated: October 3, 1978.

ROBERT B. LAGATHER,
Assistant Secretary of Labor for Mine Safety and Health Administration.

1. Section 11.2 is revised to read as follows:

§ 11.2 Approved respirators and gas masks.

(a) Respirators, combinations of respirators, and gas masks shall be approved for use in hazardous atomospheres, provided that they are maintained in an approved condition and are the same in all respects as those devices for which a certificate of approval has been issued under this part.

(b) Self-contained breathing apparatus, supplied-air respirators and gas masks approved under the former Bureau of Mines approval program shall continue to be accepted for use in hazardous atmospheres according to the schedule set forth below: *Provided* they (1) were fabricated, assembled or built under an approval or any modification thereof issued by the U.S. Bureau of Mines, Department of the Interior; and (2) were purchased on or before the date specified therein; and (3) are maintained in an approved condition according to this part.

Type of device	Use	Bureau of Mines approved devices	Purchased on or before—	Approved for use until—
Self-contained breathing apparatus	All uses as permitted or required by regulation.	Schedule 13-13E inclusive	June 30, 1975	Mar. 31, 1979
	Use in mine rescue efforts only.	Approval Nos. 1303, 1303S, 1307, 13D-14, 13D-15, 13D-16, 13E-25, and 13E-26.	do	(1)
	For uses other than mine rescue as permitted or required by regulation.	Schedule 13D and 13E devices that are equipped with a remaining service life indicator which operates without preadjustment by the wearer.	do	Mar. 31, 1982
Supplied air respirators	All uses as permitted or required by regulation.	Schedule 19B (dated Apr. 19, 1955)	do	Mar. 31, 1980
Gas masks	do	Schedule 14F (dated Apr. 23, 1955)	Date to be established.	(2)

[1] Further notice.
[2] Date to be established.

2. Section 11.2-1 is deleted from the Code of Federal Regulations and § 11.2-2 is redesignated as § 11.2-1.

§ 11.2-1 [Redesignated from § 11.2-2]

[FR Doc. 78-28702 Filed 10-11-78; 8:45 am]

[30 CFR Parts 55, 56, and 57]

METAL AND NONMETAL MINES

Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Extension of time for comments.

SUMMARY: On Tuesday, September 12, 1978 (43 FR 40766-40799), proposed rules were published as part VIII in the FEDERAL REGISTER under section 301(b)(2) of the Federal Mine Safety and Health Amendments Act of 1977. These proposed rules would revoke or revise and make mandatory existing safety and health advisory standards applicable to metal and nonmetal mines. Interested persons were originally given until October 9, 1978, to submit comments and data and the comment period was extended to October 17, 1978, by a notice in the FEDERAL REGISTER of Tuesday, September 26, 1978 (43 FR 43475). The comment period is further extended to November 3, 1978.

DATES: Comments must be received on or before November 3, 1978.

ADDRESS: Comments should be sent to Frank A. White, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 631, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-1910.

SUPPLEMENTARY INFORMATION: The public comment period on the proposed rule is extended until November 3, 1978, because of additional delays in mailing copies of the proposed regulations to mine operators and other interested persons and organizations, and to provide the public an adequate opportunity to submit any and all comments on these regulations, which are of great importance to the metal and nonmetal mining industries.

The effort made by many persons and organizations to submit written comments by October 17, 1978, is greatly appreciated and they may submit additional comments within the extended time.

Dated: October 5, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

[6560-01-M]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 988-2]

[40 CFR Parts 6, 122, 123, 124, 125, 151]

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

AGENCY: Environmental Protection Agency.

ACTION: Notice of extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA) is extending the comment period for the national pollutant discharge elimination system (NPDES) proposed rules (43 FR 37078-37134, Aug. 21, 1978) for 30 days until November 20, 1978. EPA is also extending the comment periods for the spill prevention control and countermeasure proposed rules (43 FR 39276-39280, Sept. 1, 1978) and the best management practices proposed rules (43 FR 39282-39284, Sept. 1, 1978) until November 20, 1978.

DATE: Comment period ends November 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Edward A. Kramer, Office of Water Enforcement (EN-336), Environmental Protection Agency, Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION: On August 21, 1978, the Environmental Protection Agency (EPA) proposed a rule (43 FR 37078-37134) which would extensively revise existing regulations governing the national pollutant discharge elimination system (NPDES) program. The revisions were proposed as 40 CFR, Parts 122-125 with a 60-day comment period ending October 20, 1978.

On September 19 and 21, 1978, EPA held public meetings to discuss the proposed NPDES rule. At these public

V 43 / 199 OCT 13 78

meetings and in letters submitted to EPA commenting on the proposed rules, many commenters indicated that more time was needed to properly assess and comment on the rules. Many commenters indicated that a 30-day extension of the comment period woud be sufficient.

EPA recognizes the complexity and sheer volume of changes to the NPDES program included in the NPDES proposed rule, and is sensitive to commenters' concerns that additional time is necessary to analyze the proposed rules. EPA, therefore, is extending the comment period for 30 days—until November 20, 1978—which will meet both the public's concerns and, at the same time, assure that issuance of the final rule will not be unduly delayed.

EPA is also extending the comment period for two other proposed rules which are integrally related to the proposed NPDES rule. They are:

(a) Proposed requirements for spill prevention control and countermeasure plans to prevent discharges of hazardous substances from certain facilities (43 FR 39276-39280, Sept. 1, 1978); and

(b) Criteria and standards for imposing best management practices for ancillary industrial activities (43 FR 39282-39284, Sept. 1, 1978).

The comment periods for these two proposed rules are both presently scheduled to close on October 31, 1978. This date is now extended to November 20, 1978, to coincide with the new closing date for the proposed NPDES rules.

THOMAS C. JORLING,
Assistant Administrator for Water and Waste Materials.

JEFFREY G. MILLER,
Acting Assistant Administrator for Enforcement.

OCTOBER 10, 1978.

[FRL 986-4]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Notice of Proposed Approval of an Administrative Order Issued by the Virginia State Air Pollution Control Board to Jewell Coal & Coke Co., Plant No. 2

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Virginia State Air Pollution Control Board to Jewell Coal & Coke Co. The order requires the company to bring air emissions from its plant No. 2 coke ovens in Vansant, Va. into compliance with certain regulations contained in the federally approved Virginia State implementation plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on whether EPA should approve the order as a delayed compliance order.

DATE: Written comments must be received on or before November 13, 1978.

ADDRESSEES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, 6th and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT.

Mr. Gary Gross at the address above or telephone 215-597-8907.

SUPPLEMENTARY INFORMATION: Jewell Coal & Coke Co. operates a nonrecovery coke oven plant at Vansant, Va. The order under consideration addresses emisions from the 45 sole flue ovens known as plant No. 2 at the facility, which are subject to §§ 4.02.01 and 4.04.01 of the Virginia regulations for the control and abatement of air pollution as approved in the Virginia SIP. The regulations limit the emissions of particulate and visible emissions, and are part of the Federally approved Virginia State implementation plan. The order required final compliance with the regulation during charging, pushing, and quenching portions of the cycle by June 30, 1979 through installation of common tunnel afterburners, split sole flues, a state-of-the-art quench tower using clean water make-up, and a pushing emission control device. This order does not apply to coking offgas emissions from plant No. 2.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. Based on information presently available, EPA believes all statutory requirements have been satisfied. Section 13 of the State order states, "The Board may modify this order for good cause shown by Jewell, or on its own motion after notice to Jewell and an opportunity for a hearing". In accordance with section 113(d)(2) of the Act, no such modification shall take effect until such time as the Administrator determines that such modification satisfies the requirements of the Act.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 [1] will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. (A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, replaced by a notice promulgating these new regulations.)

(42 U.S.C. 7413, 7601.)

Dated: October 2, 1978.

JACK J. SCHRAMM,
Regional Administrator, Region III.

[40 CFR Part 162]

[FRL 971-7; OPP—30007]

PESTICIDE PROGRAMS

Exemption of Pesticides That Are Also New Drugs From Requirements of the Federal Insecticide, Fungicide, and Rodenticide Act

AGENCY: Office of Pesticide Programs, EPA.

ACTION: Proposed rulemaking.

SUMMARY: The intent of this proposed rulemaking is to exempt those pesticides offered solely for use on humans that are also new drugs within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act from the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972 and 1975. (Pub. L. 92-516, 86 Stat. 973; Pub. L. 94-140, 89 Stat. 751; 7 U.S.C. 136 et seq.) (FIFRA.) The proposed rulemaking also clarifies the policy of EPA relative to the registration of pesticide products that are not new drugs or new animal drugs. This action is taken because of the similarities of the registration processes that are used for registering new human drugs by the EPA and the FDA. The elimination of review of these new drug product applications by EPA is intended to lessen the duplication of time and resources by both agencies and the sponsors of these products.

DATES: Proposed effective date: Thirty (30) days from the date of publication of the final regulation.

Comments must be received on or before sixty (60) days from date of publication.

ADDRESS: Interested persons are invited to submit written comments with reference to this notice to the Federal Register section, Technical Services division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20406. The comments should bear the identifying notation OPP—30007. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Herbert Harrison, Registration Division (WH-567), Office of Pesticide Programs, EPA, 202-426-4110.

SUPLEMENTARY INFORMATION: The intent of pesticide regulation under the amended FIFRA is to insure that pesticides are safe and effective for their intended uses and to prevent unreasonable adverse effects to man, other animals, and the environment from pesticide usage. To effect this protection, a pesticide product must be registered with EPA in accordance with the provisions of FIFRA. The applicant must show that his product will meet the registration requirements by producing appropriate toxicity, chemical, and efficacy data. Based on these data and the provisions of the FIFRA, labeling must appear on the pesticide product in a manner that will assure proper use and minimize any hazards associated with the use of the product.

There are certain pesticide products that also fall within the statutory definition of "drug" in the Federal Food, Drug and Cosmetic Act (FFDCA) and, as such, are also subject to the jurisdiction of the Food and Drug Administration (FDA), U.S. Department of Health, Education, and Welfare (DHEW). In fulfilling its responsibilities, FDA protects the public health of the Nation by assuring that drug products intended for use in man or other animals are safe, effective, and properly labeled and that residues of drugs in edible products derived from animals treated with such drugs are safe for consumption.

For products that are new drugs for use on humans (hereinafter "new drugs for human use") or new animal drugs, the manufacturer of the product is required to submit an application to FDA for review and approval prior to the marketing of the product. The purpose of the application is to provide safety and effectiveness data and other information necessary to satisfy the requirements of the FFDCA (21 U.S.C. 355 and 360b) as set forth in 21 CFR Part 314 of the human drug regulations and in 21 CFR Part 514 of the animal drug regulations.

A new drug, as defined by section 201(p), and a new animal drug, as defined by section 201(w) of the FFDCA, must be approved by FDA before it can be marketed. Any drug that does not fall within the definition of a new drug or new animal drug does not require approval from FDA prior to marketing, but the product must, among other things, be safe and effective for its intended use and not be adulterated or misbranded within the meaning of the FFDCA.

INTERAGENCY AGREEMENTS BETWEEN EPA AND FDA

For those products that fall within the applicable statutory definitions of both "pesticide" and "drug" and therefore come under the jurisdiction of both EPA and FDA, the two agencies entered into an agreement describing the procedures to be followed in the joint review and approval of these products. These procedures were published in the FEDERAL REGISTER of December 22, 1971 (36 FR 24234). Item 3 of the interagency agreement was intended to revolve the jurisdictional overlap which resulted from the two agencies' possessing authority and responsibility for regulating the same products.

The agreement informed manufacturers seeking approval of these products: (1) Which Agency has primary jurisdiction; (2) that the product will be referred to the other Agency for a decision under its law; and (3) that approval for marketing the product will not be granted unless both Agencies approve the product under their respective authorities.

Subsequently, other jurisdictional problems were identified with respect to the review and approval of products that are intended to be used as animal drugs and pesticides. These problems, in part, identified the need for further elaboration of the interagency procedures; thus, an amendment to item 3 of the 1971 interagency agreement was developed and published in the FEDERAL REGISTER of September 6, 1973 (38 FR 24233). The amendment provided more information on each Agency's responsibilities.

Since publication of the agreement, many of the problems that were associated with the dual jurisdiction of pesticide products have been resolved. However, instances of confusion and delays in the interagency processing of applications for approval of products continue to occur. It is for this reason that FDA and EPA decided to jointly reevaluate the procedures in item 3 of the interagency agreement and its amendment.

NEW DRUGS FOR HUMAN USE

The reevaluation indicated that in most, if not all respects, the requirements for obtaining registration of a pesticide under FIFRA parallel those for approval of a new drug for human use under the FFDCA. An applicant seeking approval of a new drug under the FFDCA [21 U.S.C. 355(b)] must submit to FDA:

(1) Full reports of investigations which have been made to show whether or not the drug is safe for use and whether it is effective in use;

(2) A full list of the articles used as components of the drug;

(3) A full statement of its composition;

(4) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing and packaging of the drug;

(5) Samples of the drug and of the articles used as components thereof as FDA may require; and

V 4 3 / 1 9 9

0 C 1 3 7 8

(6) Specimens of the labeling proposed to be used for the drug.

Similar information must be submitted to FDA for approval of new animal drugs.

The reevaluation further indicated that the criteria followed by FDA in the approval (or disapproval) of the new drug application are generally comparable to those of EPA for pesticide registration. These include consideration by FDA of the environmental effects that may result from the use of the drug in accordance with the National Environmental Policy Act of 1969 as set forth in 21 CFR Part 6.

On the basis of the above, EPA and FDA have concluded that the dual review of pesticide/new drug products offered solely for human use represents an expensive duplication of time and resources for both the Agencies and the sponsors of these products without any significant increase in benefits to public health and/or to the environment. It is further concluded that regulation of these products solely by FDA under the FFDCA would adequately serve the intent of FIFRA.

Therefore, pursuant to section 25(b)(1) of the amended FIFRA, the Administrator proposes to exempt from the requirements of FIFRA any pesticide that is offered solely for use on humans that is also a new drug as defined by section 201(p) of the FFDCA. Accordingly, 40 CFR 162.5(b) will be amended to include this proposed exemption. This will give FDA the sole authority to regulate those products previously regulated jointly by EPA and FDA which are considered to be both new drugs offered solely for human use and pesticides. Such products will therefore be submitted to FDA for review and approval under the new drug procedures of section 505 of the Federal Food, Drug, and Cosmetic Act.

Drugs for Human Use for Which an Approved New Drug Application (NDA) is not Required

Drugs for human use which are not new drugs within the meaning of section 201(p) of the FFDCA that are also pesticides will not be exempt from EPA registration, except when the Secretary of DHEW has established by regulation the conditions whereby the drugs are generally recognized as safe and effective and not misbranded. Since these drug products do not require FDA approval prior to marketing, they will continue to be subject to EPA regulation until such time as FDA issues specific final regulations for these drug products. No such regulations exist at this time. Therefore, in the interim, registration with EPA under FIFRA will provide for premarketing clearance and control of these products.

Pesticides Offered Concurrently for Use on Both Humans and Inanimate Objects

The proposed exemption does not apply to those pesticide/human drug products that are offered concurrently, for both human and nonanimal use, e.g., a disinfectant solution offered concurrently for use both on humans and on inanimate objects. Because registration under FIFRA provides premarketing clearance and control of the product, FDA and EPA agree that these products should continue to be subject to EPA regulation. However, any such product submitted to EPA will still be referred to FDA prior to EPA registration. FDA will then review the labeling and formulation accompanying the submission and determine if the pesticide/drug requires an approved new drug application. FDA will notify EPA of those products that do have an approved NDA and EPA will then make its decision regarding registration. FDA will also notify EPA of those products that require an NDA but do not have approval. EPA will withhold its registration of such unapproved pesticide/new drug products until an approved NDA has been obtained.

As a matter of policy, EPA will not grant registration if the product does not comply with FDA requirements under the FFDCA. Accordingly, 40 CFR 161.7(d)(1)(vi) is also proposed to be amended to further clarify EPA's handling of applications for the registration of pesticides that are drugs, but are not "new drugs."

Pending a final regulation on the proposed exemption, EPA and FDA will continue to follow the procedure set forth in the interagency agreement in the reviewing and approving of products that are both pesticides and human drugs. When a final rule is issued, the interagency agreement will be amended accordingly.

Animal Drugs

In June 1975, a committee within the House of Representatives held a hearing concerning EPA pesticide regulation. This hearing dealt in part with the problems that EPA and FDA were experiencing concerning the joint regulation of pesticides that are also new animal drugs. As a result of that hearing, Pub. L. 94-140, an amendment to FIFRA, was enacted which among other things exempts new animal drugs from the definition of "pesticides" under FIFRA. This amendment gives FDA sole authority to regulate those products previously regulated jointly by EPA and FDA which are considered to be both a new animal drug and a pesticide. Such products must therefore now be submitted only to FDA for review and approval as new animal drug applications (NADA's).

Products which are not new animal drugs that are also pesticides will not be exempt from the definition of "pesticides" under this amendment, except for products that have been determined by the Secretary of DHEW not to be a new animal drug by a regulation establishing conditions for use of the product. Since these "not new animal drugs" do not require FDA approval prior to marketing, they will continue to be subject to EPA regulation until such time as FDA issues specific regulations for these products. In the interim, registration with EPA under FIFRA will provide for premarketing clearance and control of these products.

In any case, however, any pesticide product with animal drug claims that is submitted to EPA will be referred to FDA prior to EPA registration. FDA will than review the labeling and formula accompanying the submission and determine the status of the animal drug (new or not new). FDA will notify EPA of those products that are determined to be new animal drugs, and EPA will exempt these drugs from its registration requirements. For not new animal drugs, FDA will send its comments to EPA on the acceptability of the products as formulated and labeled. EPA will then make its decision regarding registration. As a matter of policy, EPA will not grant registration if the product does not comply with FDA requirements under the FFDCA. As discussed above, EPA proposes to amend section 162.7(d)(1)(vi) to clarify this policy.

Scientific Advisory Panel and USDA Review

On May 19, 1977, a copy of this proposed rule was transmitted to the FIFRA Scientific Advisory Panel (SAP) as required by section 25(d). On July 26, 1977, the SAP waived scientific review and comment on the proposed rule.

On June 9, 1977, a copy of this proposed rule was sent to the Secretary of Agriculture for comment as required by section 25(a)(2)(B). On July 6, 1977, the Secretary's designee replied that USDA had reviewed the document and had no objection to its publication in the Federal Register for comment.

Pursuant to section 25(a)(3) of the FIFRA, a copy of the proposed rule was forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture and Forestry of the Senate on June 14, 1977.

Executive Order 12044

This rule is a "minor" regulation under EPA's proposal for implementing Executive Order 12044, "Improving Government Regulations" (43 FR 29891).

Dated: October 6, 1978.

Douglas M. Costler,
Administrator.

Authority: Sections 3 and 25(b) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (Pub. L. 92-516, 86 Stat. 973; Pub. L. 94-140, 89 Stat. 751; 7 U.S.C. 136 et seq.).

The Administrator proposes to amend 40 CFR 162 by redesignating § 162.5(b)(6) as new § 162.5(b)(7), and by adding a new § 162.5(b)(6), to read:

. . . . . .

§ 162.5 Pesticides that are also new drugs for human use.

. . . . . .

(b) * * *

(6) a pesticide product that is offered solely for human use and is also (i) a new drug within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act, or (ii) an article that has been determined by the Secretary of Health, Education, and Welfare not to be a new drug by a regulation establishing conditions of use for the article, is exempt from the requirements of the FIFRA. Such products are subject solely to regulation by the Food and Drug Administration in accordance with the Federal Food, Drug, and Cosmetic Act and implementing regulations set forth in Title 21 of the Code of Federal Regulations.

. . . . . .

§ 162.7 [Amended]

The Administrator also proposes to amend 40 CFR part 162 by revising § 162.7(d)(1)(vi) to read:

. . . . . .

EPA has been notified by FDA that the product complies with the requirements of the Food and Drug Administration if the product, in addition to being a pesticide, is a "drug" within the meaning of section 201(g) of that Act, but is not a "new drug" or "new animal drug" under sections 201(p) and 201(w) respectively of the Federal Food, Drug, and Cosmetic Act.

. . . . . .

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

[41 CFR Parts 3-7 and 3-57]

WITHHOLDING OF CONTRACT PAYMENTS

AGENCY: Department of Health, Education, and Welfare.

ACTION: Proposed rule.

SUMMARY: The Office of the Secretary, Department of Health Education, and Welfare is proposing to establish policy regarding the withholding of contract payments if a contractor fails to comply with contract delivery terms and conditions. The proposed amendments have been developed as a result of the Secretary's memorandum of May 18, 1977, entitled "Actions Required to Correct Major Deficiencies in the Contracting and Grant Processes." In the memorandum, the Secretary cited the failure of the contracting officer to insure that contracts are properly performed. In some instances, it was found that the contractor was remiss in complying with the contract delivery terms and conditions, and the Department was not initiating remedial action. Therefore, the Department is proposing the amendments to insure that supplies, products, or services that are contracted for are received, and that contracts requiring the submission of progress or other reports are submitted when required by the contract.

DATE: Comments must be received on or before November 27, 1978.

ADDRESS: Any person or organization wishing to submit data, views, or comments pertaining to the proposed amendments may do so by filing them, in duplicate, with E. S. Lanham, Division of Procurement Policy and Regulations Development, OGP-OASMB-OS, room 539H, Hubert H. Humphrey Building, Department of Health, Education, and Welfare, Washington, D.C. 20201.

FOR FURTHER INFORMATION, CONTACT:

E. S. Lanham, phone 202-245-6347.

SUPPLEMENTARY INFORMATION: The policy is to be established under a new Subpart 3-57.1, Contract Monitoring, under a new Part 3-57, Contract Administration.

Appropriate contract clauses have been developed for use with the withholding of contract payments policy and are proposed to be added under Part 3-7, Contract Clauses.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

It is therefore proposes to amend 41 CFR Chapter 3 in the manner set forth below.

Dated: October 5, 1978.

E. T. Rhodes,
Deputy Assistant Secretary for Grants and Procurement.

1. Part 3-7, Contract Clauses, Subpart 3-7.50, Special Contract Clauses, is amended to add the following:

. . . . . .

§ 3-7.5023 Withholding of contract payments.

The following clause is to be included in all solicitations, resultant contracts, and contract modifications effecting supplemental agreements as specified in § 3-57.104-3(a):

Withholding of Contract Payments

Notwithstanding any other payment provisions of this contract, failure of the contractor to submit required reports when due, or failure to perform or deliver required work, supplies, or services, will result in the withholding of payments under this contract unless such failure arises out of causes beyond the control, and without the fault or negligence of the contractor as defined by the clause entitled "Excusable Delays," "Default," "Termination," or "Termination for Default," as applicable. The Government shall promptly notify the contractor of its intention to withhold payment of any invoice or voucher submitted.

§ 3-7.5024 Excusable delays.

The following clause is to be included in solicitations and contracts (and contract modifications effecting supplemental agreements) as specified in § 3-57.104-3(b)(3):

Excusable Delays

Except with respect to failures of subcontractors, the contractor shall not be considered to have failed in performance of this contract if such failure arises out of causes beyond the control and without the fault or negligence of the contractor.

Such causes may include, but are not restricted to, acts of God or of the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather, but in every case the failure to perform must be beyond the control and without the fault or negligence of the contractor. If the failure to perform is caused by the failure of a subcontractor to perform, and if such failure arises out of causes beyond the control of both the contractor and subcontractor, and without the fault or negligence of either or them, the contractor shall not be deemed to have failed in performance of this contract, unless (a) the supplies or services to be furnished by the subcontractor were obtainable from other

V 4 3 / 1 9 9

sources, (b) the contracting officer shall have ordered the contractor in writing to procure such supplies or services from such other sources, and (c) the contractor shall have failed to comply reasonably with such order. Upon request of the contractor, the contracting officer shall ascertain the facts and extent of such failure and, if he shall determine that any failure to perform was occasioned by any one or more of the said causes, the delivery schedule shall be revised accordingly, subject to the rights of the Government under the termination clause hereof. (As used in this clause, the terms "subcontractor" and "subcontractors" mean subcontractor(s) at any tier.)

2. Part 3-57, Contract Administration, is hereby established. Under Part 3-57, the table of contents, scope of part, and Subpart 3-57.1, Contract Monitoring, are also established.

3-57—CONTRACT ADMINISTRATION

Sec.
3-57.000 Scope of part.

Subpart 3-57.1—Contract Monitoring

3-57.104 Withholding of contract payments.
3-57.104-1 Policy.
3-57.104-2 Applicability.
3-57.104-3 Contract clauses.

§ 3-57.000 Scope of part.

This part sets forth responsibilities, policies, and procedures to be followed by Departmental personnel in the administration of contracts.

Subpart 3-57.1—Contract Monitoring

§ 3-57.104 Withholding of contract payments.

§ 3-57.104-1 Policy.

It is the Department's policy that:
(a) All solicitations and resultant contracts contain:
(1) A withholding of contract payments clause, and
(2) An excusable delays clause or a clause which incorporates the definition of excusable delays.
(b) A separate notice to the contractor highlighting its agreement with the withholding of contract payments clause be included in the transmittal or cover letter of the contract.
(c) No contract payment is to be made as long as:
(1) Any report required to be submitted by the contractor is overdue, or
(2) The contractor fails to perform or deliver work or services required by the contract.
(d) A 10-day notice is to be issued, or appropriate termination action is to be initiated, for any failure in the contractor's performance stated under the preceding paragraph (c).

§ 3-57.104-2 Applicability.

The foregoing policy applies to all solicitations and resultant contracts. The policy is to be applied to all contract modifications effecting supplemental agreements which did not contain the policy requirements in the basic contract.

§ 3-57.104-3 Contract clauses.

(a) The contracting officer is to include the withholding of contract payments clause in § 3-7.5023 in the special provisions of all solicitations and resultant contracts, and in contract modifications effecting supplemental agreements when the basic contract did not contain the clause.
(b) The contracting officer is to ensure that all solicitations and resultant contracts, including contract modifications effecting supplemental agreements, contain a contract clause which defines the term excusable delays.
(1) If the term is defined in another clause which is to be included in the solicitation and resultant contract, as, for example, in article 5 of Standard Form 23-A, General Provisions (Construction Contract), or article 11 of Standard Form 32, General Provisions (Supply Contract), the contracting officer need not take further action.
(2) If the solicitation and resultant contract are to contain a termination for default clause where the term excusable delays is not defined, the contracting officer is to include the excusable delays clause cited in § 1-8.708.
(3) If the solicitation and resultant contract are to contain neither a termination for default clause nor a definition of the term excusable delays, the contracting officer is to include the clause in § 3-7.5024 in both the solicitation and resultant contract.

Office of Human Development Services

[45 CFR Part 1370]

STATE VOCATIONAL REHABILITATION PROGRAMS

Evaluation Standards

AGENCY: Office of Human Development Services, DHEW.

ACTION: Notice of decision to revise regulations.

SUMMARY: The proposed Rehabilitation Services Administration regulations would revise, simplify, and recodify evaluation standards used to evaluate State vocational rehabilitation programs. Compliance with these standards is determined annually by the Secretary in order to renew or supplement financial assistance authorized under the Rehabilitation Act.
The proposed revisions will be based upon use and experience with the present regulations. They will:
Clarify ambiguities regarding various terms,
Eliminate errors in the present standards,
Remove confusion regarding the purpose and use of the standards,
Eliminate unnecessary standards, data elements and performance levels.
The proposed regulations will follow Operation Common Sense principles, the HEW initiative to revise, simplify, and recodify regulations to promote better public understanding of regulations.

FOR FURTHER INFORMATION CONTACT:

Rodney Pelton, Ph. D., Director, Division of Evaluation, Rehabilitation Services Administration, Room 2324, Mary E. Switzer Building, 330 C Street SW., Washington, D.C. 20201, 202-245-0688.

Dated: October 6, 1978.

ARABELLA MARTINEZ,
Assistant Secretary for Human Development Services.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2 and 87]

[Gen. Docket No. 78-323; RM-3058; FCC 78-699]

USE OF AERONAUTICAL ADVISORY FREQUENCIES BY AERONAUTICAL UTILITY MOBILE STATIONS LOCATED AT CERTAIN LANDING AREAS WHICH DO NOT HAVE A CONTROL TOWER OR FAA FLIGHT SERVICE STATION

Proposed Authorization

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Federal Communications Commission proposes to amend the rules to permit aeronautical advisory frequencies to be utilized by certain ground vehicles at landing areas which are served by an aeronautical advisory station (unicom), but which do not have a control tower or FAA flight service station in operation. The FAA requested that this proposed rule change be considered. The additional communications capability of the eligible vehicles is intended to improve aviation safety at the many airports affected.

DATES: Comments must be received on or before November 15, 1978, and Reply Comments must be received on or before November 27, 1978.

ADDRESSES: Federal Communication, Commission, Washington, D.C. 20554.

OCT 13 1978

FOR FURTHER INFORMATION CONTACT:

Robert H. McNamara, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of parts 2 and 87 of the rules to authorize the use of aeronautical advisory frequencies by aeronautical utility mobile stations located at certain landing areas which do not have a control tower or FAA flight service station, Gen. docket No. 78-323, RM 3058.

Adopted: September 26, 1978.

Released: October 12, 1978.

SUMMARY

1. In this notice we are proposing to amend the Commission's rules to permit certain ground vehicles which routinely operate on airports that have no functioning control tower or FAA flight service station, but which are served by an aeronautical advisory station, to utilize aeronautical advisory frequencies for safety related communications.

BACKGROUND

2. The Commission has received a letter from the Federal Aviation Administration (FAA) requesting that the rules be amended to allow FAA vehicles and certain other ground vehicles to utilize aeronautical advisory frequencies while operating on landing areas not served by a control tower or FAA flight service station. FAA feels that safety and operating efficiency would be enhanced at these airports by permitting vehicles used for inspecions, maintenance, emergencies and the like, to communicate with the local aeronautical advisory station (unicom) when operating on the airfield. Primarily, these vehicles would be expected to monitor the appropriate frequency and only transmit or acknowledge relevant safety information. FAA recommends that communications by such vehicles, if authorized, be subject to the supervision of the advisory station operator. Also it is recommended that nonsafety communications, such as dispatching, not be permitted. We note that from time to time the Commission has received, and in appropriate cases granted, requests for waivers to provide similar communications capabilities for certain ground vehicles operating on nontower airfields.

DISCUSSION

3. Presently, aeronautical advisory frequencies are limited to the necessities of safe and expeditious operation of private aircraft, such as runway conditions, types of fuel available, wind conditions, weather information and dispatching. Further, only one aeronautical advisory station is permitted on a landing area.[1] Due to congestion problems on the then one available aeronautical advisory frequency at uncontrolled airports, the Commission amended the rules to provide two additional frequencies for advisory purposes at these landing areas.[2] In view of the nature of this radio service and the potential that increased traffic would negate the beneficial effects of the two additional frequencies recently provided, we are cautious regarding the grant of broader access to the advisory frequencies.

4. However, it appears that with appropriate safeguards, as discussed below, the FAA recommended rule change would provide an added safety feature at many uncontrolled airports without appreciably increasing message traffic on the advisory frequencies. Therefore, we propose to amend the rules substantially as requested by FAA, to permit FAA vehicles and aeronautical utility mobile stations to utilize aeronautical advisory frequencies on a noninterference basis, at airports which have an aeronautical advisory station but no control tower or FAA flight service station (FSS). Also, at landing areas which have a part-time control tower and/or part-time FSS, utility mobile stations will be permitted to use advisory frequencies during the hours that neither the control tower nor FSS is in operation, on the same basis as utility mobile stations at nontower, non-FSS airfields. Communications by utility mobile stations on advisory frequencies will be limited to the necessities of safety (such as runway conditions and hazards on the landing area). Further, these stations will be required to discontinue transmission when so requested by the advisory station operator.

5. Eligibility for authority to operate utility mobile stations will be limited to those applicants able to demonstrate a legitimate need and authority to operate a ground vehicle on the particular airport movement area. An airport movement area is defined as the runways, taxiways and other areas which are utilized for taxiing, takeoff and landing of aircraft, exclusive of loading ramps and parking areas. For example, the use of ground vehicles for inspection of airport movement areas by airport operators and state and local governmental organizations, and the various emergency and support vehicles, such as crash trucks and snowplows, customarily used on an airfield, would satisfy the proposed eligibility requirements. On the other hand, fuel trucks which normally operate only on ramp and parking areas, serve as an example of the type of vehicle not contemplated to be eligible. Our intention in proposing this rule amendment is to provide a means for vehicles which routinely operate on a nontower, non-FSS landing area to monitor the advisory frequency and communicate when safety considerations so dictate.

[1] This restriction has been retained in the rules since the inception of the aeronautical advisory service. As indicated in a report prepared by Special Committee 113 of the Radio Technical Commission for Aeronautics (Document No. DO-129, November 23, 1965) such a limitation is necessary for safety, legal and technical considerations.

[2] Report and order, docket No. 20123, FCC 77-253, adopted April, 1977; 42 FR 20469, 64 FCC 2d 573.

PROPOSAL

6. Accordingly, we propose to amend §§ 2.106, 87.257 and subpart J of part 87 of the Commission's rules to permit aeronautical advisory frequencies to be utilized on a noninterference basis by FAA vehicles and aeronautical utility mobile stations authorized to operate at landing areas having an aeronautical advisory station and either a part-time or no control tower or FAA flight service station.

7. The proposed amendments to the Commission's rules, as set forth below, are issued pursuant to the authority contained in sections 4(i) and 303(b), (c), (d) and (r) of the Communications Act of 1934, as amended.

COMMENTS

8. Pursuant to the applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before November 15, 1978, and reply comments on or before November 27, 1978. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

9. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to this notice of proposed rulemaking, will be available for public inspection in the docket reference room in the Commission's Offices in Washington, D.C.

10. Regarding questions on matters covered in this document contact Robert McNamara, 202-632-7107.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Parts 2 and 87 of chapter I of title 47 of the Code of Federal Regulations are amended as follows:

V 43 / 199

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

In Section 2.106 footnote US31 is amended to read as follows:

§ 2.106 Table of Frequency Allocations.

* * * * *

U.S. FOOTNOTES

* * * * *

US31 Except as provided below the band 121.9375-123.0875 MHz is for use by private aircraft stations.

The frequencies 122.700, 122.725, 122.750, 122.800, 122.950, 122.975, 123.000, 123.050 and 123.075 MHz may be assigned to aeronautical advisory stations. In addition, at landing areas having a part-time or no airdrome control tower or FAA flight service station, these frequencies may be assigned on a secondary noninterference basis to aeronautical utility mobile stations, and may be used by FAA ground vehicles for safety related communications during inspections conducted at such landing areas. * * *

* * * * *

PART 87—AVIATION SERVICES

1. In § 87.257, paragraph (d)(5) is added to read as follows:

§ 87.257 Scope of service.

* * * * *

(d) * * *

(5) Aeronautical advisory stations may communicate with aeronautical utility mobile stations and FAA ground vehicles, concerning runway conditions and safety hazards on the landing area when neither an airdrome control tower nor FAA flight service station is in operation. (Transmissions by aeronautical utility mobile stations are subject to the control of the aeronautical advisory station to the extent that communications by ground vehicles must be discontinued when so requested by the aeronautical advisory station).

* * * * *

2. Section 87.431 is amended to read as follows:

§ 87.431 Frequencies available.

(a) At landing areas having an airdrome control tower or an FAA flight service station, the frequencies 121.600 through 121.925 MHz listed in § 87.410(a) are available to aeronautical utility mobile stations. The other frequencies listed in § 87.401(a) may be assigned to utility mobile stations on such landing areas only after FCC coordination with FAA. The frequency that will be assigned to the utility mobile station at an airport served by a control tower or flight service station, is the frequency that is used by the control tower for ground traffic control or the flight service station to communicate with ground vehicles.

(b) In addition to the frequencies described in paragraph (a) of this section, at landing areas which have a part-time airdrome control tower or part-time FAA flight service station and an aeronautical advisory station, the frequency assigned to the advisory station is available on a noninterference basis to aeronautical utility mobile stations. However, utility mobile stations may transmit on the advisory frequency only when the control tower or flight service station has ceased operations.

(c) At landing areas which have an aeronautical advisory station but, no airdrome control tower or FAA flight service station, the frequency assigned to the advisory station is available on a noninterference basis to aeronautical utility mobile stations. (The frequencies available for assignment to aeronautical advisory stations are described in § 87.253.)

3. Section 87.432 is amended to read as follows:

§ 87.432 Eligibility.

(a) Authorization to operate an aeronautical utility mobile station on the frequencies described in § 87.431(a) will be issued only for operation at landing areas having an airdrome control tower or FAA flight service station.

(b) Authorization to operate an aeronautical utility mobile station on an aeronautical advisory frequency will be issued only for operation at landing areas having an aeronautical advisory station and either a part-time or no airdrome control tower or FAA flight service station. In addition, an applicant must: (1) Demonstrate a need to routinely operate a ground vehicle on the airport movement area (the airport movement area is defined as the runways, taxiways and other areas which are utilized for taxiing, takeoff and landing of aircraft, exclusive of loading ramp and parking areas); (2) identify the vehicle in which the station is to be located; and (3) either attach a statement that the applicant is the airport owner or operator, or a state or local governmental aeronautical agency; or attach a statement from the airport owner of operator granting permission to operate the subject vehicle(s) on the specified airport movement area.

4. Section 87.433 is amended to read as follows:

§ 87.433 Scope of service.

(a) Communications by an aeronautical utility mobile station at a landing area which has an airdrome control tower or FAA flight service station in operation, are limited to the management of ground traffic at the airport.

(b) Aeronautical utility mobile stations which operate on the aeronautical advisory station frequency are authorized only to transmit and acknowledge information relating to safety, such as runway conditions and hazards on the airfield. (Such stations are expected to be employed primarily for monitoring advisory communications.)

5. Section 87.437, including the heading, is amended to read as follows:

§ 87.437 Supervision by operator of airdrome control tower, FAA flight service station or aeronautical advisory station.

(a) Transmissions by an aeronautical utility mobile station are subject to the control of the airdrome control tower, the FAA flight service station or the aeronautical advisory station, as appropriate at the particular landing area. When so requested by the control tower, the flight service station or advisory station, a utility mobile station must discontinue transmitting immediately.

(b) An aeronautical utility mobile station must guard its assigned frequency during periods of operation.

(c) Aeronautical utility mobile stations operating on the frequency assigned to an airdome control tower or FAA flight service station must cease to transmit on that frequency when neither of these stations are in operation.

6. Section 87.439 is amended to read as follows:

§ 87.439 Frequency change.

In the event that the utility frequency is changed by the Federal Aviation Administration (to a frequency in the band 121.600-121.925 MHz) or by the Federal Communications Commission, an aeronautical utility mobile station licensee has temporary authority for a period of 90 days to use the new frequency in place of the one listed on the license. An application for modification of the station license to specify the new frequency must be submitted within ten days from the date that the station commences operation on the new frequency.

[47 CFR Part 73]

[BC Docket No. 78-321; RM-3124]

TELEVISION BROADCAST STATION IN GARDEN CITY, LINCOLN CENTER, AND RANDALL, KANS.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of noncommercial eductional television channels to Garden City and Randall, Kans., and the deletion of the noncommercial educational assignment at Lincoln Center, Kans. The proposed reserved assignments would enable noncommercial educational service to be extended to large areas now unserved.

DATES: Comments must be received on or before November 27, 1978. Reply comments must be received on or before December 18, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 28, 1978.

Released: October 4, 1978.

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Garden City, Randall, and Lincoln Center, Kans.), BC docket No. 78-321, RM-3124.

1. The Commission has before it a petition for rule making,[1] filed by Garden City Community College ("petitioner"), requesting the assignment of noncommercial educational television channel *9 to Garden City, Kans. Petitioner states that in order to utilize channel *9 at Garden City, channel *9 (unoccupied and unapplied for) assigned to Lincoln Center, Kans., should be deleted and reassigned to Randall, Kans. Petitioner states it will apply for the proposed channel at Garden City, if assigned. No responses to the proposal have been received.

2. Garden City (pop. 14,790), seat of Finney County (pop. 19,029),[2] is located in southwest Kansas, approximately 305 kilometers (190 miles) west of Wichita, Kans. It is assigned channel 11 (KGLD) and channel 13 (KUPK-TV). Randall (pop. 195), in Jewell County (pop. 6,099), is located in north-central Kansas, approximately 65 kilometers (40 miles) north of Lincoln Center, Kans. It presently has no television assignments. Lincoln Center (pop. 1,582), seat of Lincoln County (pop. 4,582), is located in north-central Kansas, approximately 50 kilometers (30 miles) northwest of Salinas, Kans. Channel *9 (unoccupied and unapplied for) is the only television channel assigned to Lincoln Center.

3. Petitioner states that it is a part of the educational system of the State of Kansas and as such has been designated by the Kansas Public television Board ("KPTB") to implement KPTB's proposal to establish and educational television station in Garden City, thereby fulfilling KPTB's objectives of providing educational television to southwestern Kansas. It claims that the proposed facility in Garden City would provide coverage to approximately 120,700 persons and would make educational programing available to a substantial population currently lacking such service. Petitioner asserts that reassigning channel *9 for Lincoln Center to Randall would be consistent with KPTB's network plan for the State which is designed to serve many rural constituencies presently unserved by public television. Petitioner further states that KPTB proposes to activate a station on the proposed Randall channel *9 assignment if these changes are adopted.

4. The proposed assignments meet the Commission's distance separation requirements. The channel deletion at Lincoln Center represents the only change in any existing assignment in the table of assignments required by petitioner's proposal. No interest has been shown for use of the Lincoln Center channel since its assignment to that community in 1966. Because the proposed assignments could be used to bring noncommercial educational television service to areas now unserved, we believe it is in the public interest to consider this proposal in a rulemaking proceeding.

5. Accordingly, it is proposed to amend the television table of assignment, § 73.606(b) of the Commission's rules, with respect to the cities listed below, as follows:

City	Channel No.	
	Present	Proposed
Garden City, Kans.	11+, 13–	*9, 11+, 13–
Lincoln Center, Kans.	*9	
Randall, Kans.		*9–

6. The Commission's authority to institute ruemaking proceedings, showings required, cutoff procedures, and filing requirements are contained in the attached appendix below and are incorporated by reference herein.

NOTE.—A showing of continuing interest with respect to each proposed assignment is required by par. 2 of the appendix before a channel will be assigned.

7. Interested parties may file comments on or before November 27, 1978, and reply comments on or before December 18, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM table of assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cutoff procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission rules.)

[1] Public notice of the petition was given on June 7, 1978, Report No. 1125.

[2] Population figures are taken from the 1970 U.S. Census.

V 4 3 / 1 9 9 0 C 1 3 7 8

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filing made in this proceeding will be available for examination by interested parties during regular business hour in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[FR Doc. 78-29057 Filed 10-12-78; 8:45 am]

[BC Docket No. 78-239]

MULTIPLE OWNERSHIP OF AM, FM AND TELEVISION STATIONS AND CATV SYSTEMS

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing comments in a proceeding concerning the amendment of Commission rules relating to multiple ownership of AM, FM and television stations and CATV systems. Petitioner, Citizens Communications Center, states the additional time is necessary so that it can respond to the issues involved.

DATES: Comments must be filed on or before November 27, 1978, and reply comments on or before December 29, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Bonnie H. Lea, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:
Adopted: October 4, 1978.
Released: October 6, 1978.

In the matter of amendment of §§ 73.35, 73.240, 73.636, and 76.501 of the Commission's rules relating to Multiple ownership of AM, FM and Television stations and CATV systems, BC Docket No. 78-239.

1. On August 16, 1978, the Commission issued a Notice of Inquiry and notice of proposed rulemaking, 43 FR 36978, (August 21, 1978) concerning the above-entitled proceeding. The comment and reply comment dates for that notice are October 12, and November 13, 1978, respectively.

2. On September 27, 1978, a request was filed by the Citizens Communications Center ("Citizens"), seeking an extension of time for filing comments to and including December 12, 1978. Citizens states that because of the numerous complex issues raised by the Commission in its notice, which involve interrelated questions of law, economics and basic public policy, Citizens intends to assemble for the Commission data and analysis analogous to that recently presented in the "Top-50" (Docket 78-101) proceeding. It contends that preparation of comments encompassing such a project will entail far more time than that which has been originally envisioned by the Commission. Citizens states further that it anticipates petitioning the Commission for financial assistance in obtaining the expert consultants necessary to insure that the Commission obtains the best possible sources of detailed, accurate and relevant information upon which to rely in the instant proceeding.[1]

3. While we are persuaded that some additional time is warranted, we believe an extension of time for filing comments and reply comments to and including November 27, and December 29, 1978, is sufficient to respond to the issues involved.

4. *Accordingly, it is ordered,* That the request for extension of time filed by the Citizens Communications Center is granted to the extent that the dates for filing comments and reply comments are extended to and including November 27, and December 29, 1978, respectively, and is denied in all other respects.

5. This action is taken pursuant to sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 611 and 672]

PACIFIC COD

Limitation on the Foreign Harvest

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Proposed amendment to proposed regulations; approval of fishery management plan amendment.

SUMMARY: An amendment to the fishery management plan (FMP) for groundfish in the Gulf of Alaska, submitted by the North Pacific Fishery Management Council (Council), is approved. The amendment permits foreign longline fishermen to take the entire Chirikof total allowable level of foreign fishing (TALFF) (and any allocated reserves) for Pacific cod in that portion of the Chirikof subarea west of 157° W. longitude. The proposed regulations are proposed to implement the FMP amendment.

DATE: Comments are invited until November 20, 1978.

ADDRESS: Comments may be submitted to Mr. Harry Rietze, Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99801, telephone 907-586-7221.

FOR FURTHER INFORMATION CONTACT:

Person and address mentioned above.

SUPPLEMENTARY INFORMATION: The FMP for the groundfish fishery of the Gulf of Alaska (43 FR 17242), published on April 21, 1978, would limit the total foreign longline harvest of Pacific cod in the area west of 157° W. longitude, an area which includes 40 percent of the Chirikof statistical area. The FMP established an optimum yield (OY), reserve, and TALFF for all of the Chirikof area, and would limit tne foreign longline catch of Pacific cod in the area west 157° W. longitude to 40 percent of that reserve and TALFF. On June 29, 1978, the Council submitted an amendment to the FMP which would allow foreign longline vessels to harvest the reserves and TALFF of the entire Chirikof area in the directed longline fishery west of 157° W. longitude. That amendment was approved on September 8, 1978.

The Assistant Administrator for Fisheries has found that this amendment is consistent with the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq. (Act), the national standards of the Act, and other applicable law. Under the FMP, Pacific cod in the Chirikof statistical area are considered a single stock. Therefore, the amendment will not lead to overfishing of local stocks. The OY's and TALFF's established in the FMP are unchanged. Incidental catch of halibut will not be increased, and may be reduced if longliners (instead of trawl vessels) harvest a higher proportion of the Pacific cod TALFF.

The Assistant Administrator for Fisheries has determined that this is not a significant action requiring the preparation of a regulatory impact analysis under Executive Order 12044. The Assistant Administrator, having reviewed the Act and the available information relating to this action, has determined that there would be no significant environmental impact resulting from this action. This determination was made on July 26, 1978.

Commenters should be aware that two additional amendments to this FMP, and proposed implementing regulations, have been published. The first (43 FR 34825) extends the OY's, TALFF's, reserves and assessments of domestic capacity for this FMP until October 31, 1979. The second amendment, published on October 6, 1978, proposes establishment of a "special joint venture" reserve and lowers the initial TALFF's for all species regulated by the FMP. Therefore, the TALFF's reserves and domestic capacity assessments stated in this amendment may be reduced in the final amendment and regulations to be consistent with other FMP amendments.

Signed in Washington, D.C., this 6th day of October 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

The FMP is amended as follows:

Part 611—FOREIGN FISHING

§ 611.92 [Amended]

1. It is proposed to amend 50 CFR 611.92(b)(1) (43 FR 17015) as follows: In table I, footnote 1, strike "20 percent." Strike "6,233" and substitute "7,600."

2. It is proposed to amend § 611.92(b)(3)(i)(c) (43 FR 17016) as follows: Strike each occurrence of "4,000" and substitute "4,860." Strike "6,233" and substitute "7,600."

PART 672—GROUNDFISH OF THE GULF OF ALASKA

3. In table 62 (43 FR 17315), footnote 2, strike "20 percent." Also strike "6,233" and substitute "7,600" so that the last footnote reads:

[2]The maximum allowable foreign catch (including the reserve) for the area would be 7,600 mt.

4. In table 63 (43 FR 17315), footnote 1, add at the end of the sentence a second sentence:

[1] * * * Because all of the Pacific cod in the Chirikof statistical area are considered one stock, the TALFF for longliners may include all of the TAC (and the reserve if later apportioned to the foreign fishery) available in that statistical area.

5. In table 64 (43 FR 17316), footnote 3, strike "only" after "total." Strike "6,233" and substitute "7,600" so that the sentence reads:

[3] * * * (including the reserve) 7,600 mt can be taken west of 157° W. longitude.

[FR Doc. 78-28877 Filed 10-12-78; 8:45 am]

[1] Citizens is hereby advised that no funds are presently available for this purpose.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

AGRICULTURAL CONSERVATION PROGRAM

Intent for Decisionmaking on the 1979 program and Opportunity For Public Comment.

SUMMARY

The Administrator of the Agricultural Stabilization and Conservation Service hereby gives advance notice of forthcoming decisions to be made on certain aspects of the Agricultural Conservation Program (ACP).

The pending Agriculture, Rural Development, and Related Agencies Appropriations Act for fiscal year 1979, provides specific direction concerning the ACP. Among other things, the act provides that assistance will not be used for carrying out measures and practices that are primarily production oriented or that have little or no conservation or pollution abatement benefits. Due to a general lack of information with respect to specific impacts of conservation and pollution abatement practices, it would be difficult to implement this direction by way of binding regulations without risking significant adverse social and environmental impacts. Consequently, the agency proposes to implement the directive contained in the 1979 Appropriations Act by means of guidelines, criteria and procedures so as to allow flexibility to quickly accommodate new information as it becomes available. However, the public participation aspects of rulemaking procedures will be followed as a means of helping to provide an provide an adequate basis for decisions.

On or about November 1, 1978, proposed guidelines, criteria, and procedures by which to select soil and water conservation and environmental protection practices to be eligible for Federal financial assistance under the ACP will be issued for publication in the FEDERAL REGISTER together with a preliminary list of practices thought to meet the proposed criteria.

PUBLIC COMMENTS

The ASCS invites and requests suggestion, comments, or other inputs from the public concerning the development of the criteria, guidelines, and procedures to govern the ACP. All suggestions, comments and other inputs received by October 30, 1978, will be considered in the development of the proposed guidelines, criteria, and procedures. Suggestions, comments and other inputs may be delivered by mail or in person to:

Alan Durick, Acting Director, Conservation and Environmental Protection Division, Agricultural Stabilization and Conservation Service, Room number 3096, South Building, U.S. Department of Agriculture, Washington, D.C. 20013.

In addition, suggestions, comments and other inputs may be delivered at the following public meetings:

General Public Meeting, October 25, 1978, 1:30-4:30 p.m., room number 4960, South Building, U.S. Department of Agriculture, Washington, D.C. 20013.

National Program Development Meeting October 27, 1978, 1:30-4:30 p.m., room number 4960, South Building, U.S. Department of Agriculture, Washington, D.C. 20013.

GENERAL INFORMATION

Public comment on the proposed guidelines, criteria, and procedures will be solicited for 60 days following their publication. Comments may be delivered by mail or in person to an address to be published with the proposal.

Final decisions on the guidelines, criteria, and procedures to be used to govern the ACP will be published on or about January 1, 1979. A list of conservation and environmental protection practices which are determined, at that time, to be eligible for Federal financial assistance will also be published. The Administrator recognizes, however, that conditions may warrant revising the list of practices eligible for financial assistance. Accordingly, procedures will be established to provide for a periodic (or continuous) review and updating of the list of practices which are eligible for financial assistance.

FOR FURTHER INFORMATION CONTACT:

Gardner P. Smith, Deputy Director, Conservation and Environmental Protection Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20013, 202-447-5295.

Signed at Washington, D.C., on October 5, 1978.

S. N. SMITH,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[6335-01-M]

CIVIL RIGHTS COMMISSION

HEARING

Notice is hereby given pursuant to the provisions of the Civil Rights Act of 1957, 71 Stat. 634, as amended, that a public hearing of the U.S. Commission on Civil Rights will commence on November 14, 1978, in Washington, D.C. More specific information on the location on the hearing will be published in the FEDERAL REGISTER on or about November 1, 1978, and may also be obtained by calling the Office of the General Counsel, 202-254-6671, after that date. An executive session, if appropriate, may be convened at any time before or during the hearing.

The purpose of the hearing is to collect information concerning legal developments constituting a denial of equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin, or in the administration of justice, particularly concerning the administration and enforcement of the immigration and nationality laws of the United States; to appraise the laws and policies of the Federal Government with respect to denials of equal protection of the laws under the Constitution because of race, color, religion, sex or national origin, or in the administration of justice, particularly concerning the administration and enforcement of the immigration and nationality laws of the United States; and to disseminate information with respect to denials of equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin, or in the administration of justice, particularly concerning the administration and enforcement of the immigration and nationality laws of the United States.

Dated at Washington, D.C., October 11, 1978.

ARTHUR S. FLEMMING,
Chairman.

CIVIL SERVICE COMMISSION

ESTABLISHMENT OF PRESCRIBED MINIMUM EDUCATIONAL REQUIREMENTS

Ecology Series, GS-408

AGENCY: U.S. Civil Service Commission.

ACTION: Notice.

SUMMARY: The Civil Service Commission has revised the prescribed minimum educational requirement of ecologists employed within the Federal service. Ecology is a professional occupation whose minimum educational requirement was intially established in May 1977. The changes will facilitate the procurement of qualified candidates at grade levels GS-5 through GS-15 for ecologists employed within the Federal service.

EFFECTIVE DATE: October 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald G. Brauer, Chief, Science and Engineering Occupations Section, Standards Division, Bureau of Policies and Standards, U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C. 20415, 202-632-5612.

SUPPLEMENTARY INFORMATION: In accordance with Section 3308 of title 5, United States Code, the Civil Service Commission in May 1977 established a prescribed minimum educational requirement for ecologists employed within the Federal service. The subsequent revised requirement reduces the required course work in the biological, physical, and mathematical sciences, and in ecology.

THE ECOLOGY SERIES, GS-408 GS-5 THROUGH GS-15

Mininim Educational Requirements. Candidates must have successfully completed a course of study in an accredited college or university leading to a bachelor's or higher degree in biology or a related field of science underlying ecological research. This total course of study must have included at least 30 semester hours in basic and applied biological sciences, including a total of at least 9 semester hours in ecology. In addition, candidates' total course of study also must include at least 12 semester hours in the physical or mathematical sciences. The nature and quality of this required course work must have been such that it would serve as a prerequisite for more advanced study in ecology.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m., in room 6886C of the Deparment of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00303. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 North Forbes Boulevard, Suite 100, Tucson, Ariz. 85705. Article: Klystron, Model VRB2113A30. Manufacturer: Varian Associates of Canada Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver which is used in conjunction with a microwave antenna to measure the intensity, polarization, frequency, and direction of cosmic radiation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No intrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a frequency in the range between 105-111 gigahertz. The National Bureau of Standards (NBS) advises in its memorandum dated August 31, 1978, that: (1) The capability of the article described above is pertinent to the applicant's research purposes, and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

RICHARD B. RUSSELL AGRICULTURAL RESEARCH CENTER

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m., in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 76-00453. Applicant: Richard B. Russell Agricultural Center, Agricultural Research Service/USDA, P.O. Box 5677, Athens, Ga. 30604. Article: NMR Spectrometer System, Model JNM-PS/PFT 100. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in experiments in which the following objectives will be pursued:

(a) Determination of the structural features of the polymeric compounds which are the cell wall constituents affecting digestibility,

(b) Structural elucidation of beneficial and/or deleterious biologically active constituents in forages and feeds,

(c) Determination of sites of silica deposition in plants and elucidation of the process of silica deposition,

(d) Identification and determination of pesticide residues and metabolites in forages, feeds, and animals ingesting forages and feeds,

(e) Elucidation of protein structure and conformation, and

(f) Evaluation of the nature of polymer cross-linking in cell wall constituents.

Comments: Comments dated August 6, 1976 were received from Varian Associates (Varian) which allege inter alia that the model XL 100-15 is of equivalent scientific value to the foreign article.

Decision: Application denied. An instrument or appartus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (May 23, 1972).

Reasons: This application is a resubmission of docket Nos. 73-00008-33-77030 and 74-00228-33-77030 which were denied without prejudice to resubmission on August 27, 1973 and January 19, 1976, respectively, for informational deficiencies.

The applicant's response to question 8 is essentially the same as the response to that question in the second submission (docket No. 74-00226-33-77030). However, the applicant's letter of June 17, 1976, expands the response

V 43/199 0 OCT 13 78

to question 8. The applicant alleges that the foreign article provides certain features which are pertinent to the intended use of the article that are unmatched in comparable domestic instruments. In reviewing these claims, the Department of Health, Education, and Welfare (HEW) advises in its memoranda dated January 17, 1977 and November 28, 1977 (which reaffirms its findings on the applicant's prior submissions), that these features are either not pertinent within the meaning of § 301.2(n) of the regulations or were matched by a comparable domestic instrument which was available at the time of order. (Varian's XL 100-15 nuclear magnetic resonance spectrometer (NMR) equipped with pulsed Fourier Transform (PFT), external lock and variable temperature control.)

HEW indicated that this Varian instrument is scientifically equivalent to the foreign article for its intended purposes.

A discussion of the applicant's allegations relative to pertinency and domestic availability follows.

High Pulse Power

Power in a PFT instrument is needed to acheve a short intense pulse. The actual power in watts needed to achieve such a pulse is not a true indication of pulse power since some systems are more efficient than others. Thus, both the foreign and the domestic manufacturers specify pulse power in terms of pulse width. And, to provde an even more meaningful measure of power, manufacturers define this capability as the pulse width that can impart a specific pulse angle (e.g., 90°) to a particular nucleus (e.g., ^{13}C). In comparing instruments with respect to pulse power, comparable specifications should be used. The pulse width of the foreign article is described in several ways. First, there is the description provided in the applicant's request for quote (RFQ). Although the applicant claims a need for a 90° pulse in the vicinity of 20 microseconds (μ-sec) for the performance of the purposes described in response to question 7, it is noted that RFQ 61-RN-ARS-72, incorporating these same purposes (as the intended use of the article), indicated that a pulse width of up to 150 μ-sec would be satisfactory. Next, there are the specifications provided in the foreign manufacturer's literature on the article wherein pulse power amplifier output is given as sufficient to give a 20 μ-sec width of 90° pulse. Finally, there is the quotation of the foreign manufacturer which states, more precisely, that the ^{13}C, 90° pulse width is 30 μ-sec in a 10 mm tube. Almost 2 months before the foreign article was ordered, Varian shipped an XL-100-15 system providing a ^{13}C, 90° pulse width of 40 μ-sec in a 12 mm tube. The foreign manufacturer has printed a supplement to the brochure describing the foreign article indicating that the article provides a ^{13}C, 90° pulse width of 20 μ-sec in an 8 mm tube and 30 μ-sec in a 10 mm tube. Thus, at best, the foreign article has but a slightly superior pulse width.

The applicant cited both pulse power and pulse width as pertinent specifications and claimed that Varian's pulse width at the time the article was ordered was 150 μ-sec. After review of the initial application HEW advised that the applicant had not demonstrated a clear relation between planned experiments and specific instrumental characteristics claimed to be lacking in the domestic instrument. HEW further advised that Varian had furnished proof that it could deliver and XL 100-15 NMR system with 40 μ-sec pulse power at the time of order, well within the specifications in the applicant's RFQ. HEW's advice was conveyed to the applicant via the Department's denial without prejudice to resubmission.

In the second submission (docket No. 74-00226-33-77030), the applicant's response to question 8 was similar to that of the intitial submission. The requirement for pulse power and width was described as follows:

1. Available pulse power limits the chemical shift range over which accurate T_1 values can be measured. In the Varian system, the strength of the pulsed field is too low to permit accurate measurements on ^{13}C; this would eliminate some of the studies mentioned in section 7.a.(3) (a) and (e). ("Section 7.a.(3) (a) and (e)" refer to specific portions of the applicant's response to question 7.)

2. Pulse widths must be small compared to the relaxation times to be studied. Varian's pulse widths are about (150) μ-sec for 0 90 (90° pulse width) and 300 μ-sec for 0 180, at least a factor of seven greater than those of (the foreign article). Since crystalline samples often have T_2 100μ-sec and 19 F in gas samples are known to have T_1 of the order, of 100 μ-sec, the utility of Varian's instrument is again questionable in the studies of section 7a.(3) (a) and (e).

In section 7.a.(3)(a) the ^{13}C and ^{1}H spectra of certain relatively insoluble polysaccharides are to be measured at or near the glass transition temperature where, according to the applicant, T_1 and T_2 values can be 1 millisecond (msec) or less. In this connection, HEW provided the following advice:

1. Repeated references are given to measurements of T_2 yet neither the Varian system nor the foreign article is equipped to carry out such measurements in the manner indicated.

2. * * * it is implied that the samples will be dissolved, but a "glass transition temperature" is referred to, where a T_1 of 1 msec is expected. It is not clear whether this number is intended to refer to protons or ^{13}C. Unless * * * (certain) * * * species are present (which are not discussed), it is almost certain that a ^{13}C T_1 as short as 1 msec would not be obtained, and it is doubtful that a proton T_1 that short at 100 MHz would be found in what is evidently a more or less fluid sample. The values of pulse width which the 1 msec T_1 is compared refer to ^{13}C, not protons, for which much shorter pulse widths would be obtained with the Varian spectrometer.

Section 7a.(3)(e) involves ^{13}C, T_1 and T_2 measurements on very low concentrations of proteins and model protein systems requiring (among other things) long data accumulations with minimum drift over a 24-hour period. HEW advises that this experiment can be performed equally well with the Varian system or the foreign articles. (In this connection, the Department notes that 7.a.(3)(e) bears a similarity to an experiment on lignin described in the applicant's third submission with respect to long data accumulations. The lignin experiment, as can be seen in the discussion under the heading "Short Receiver Dead Time and Pulse Width" below, provided no grounds for duty-free entry.) HEW's advice on the second submission was conveyed to the applicant in the denial without prejudice to resubmission.

Except for corrections of typographical errors the applicant's response to question 8 in this, the third submission, is identical to that of the second. However, the applicant, in a letter attached to the application dated June 17, 1976, did attempt to correct the deficiencies pointed out by HEW in its recommendation relating to docket No. 74-00226-33-77030.

In connection with pulse power, the applicant described an experiment of 100,000 or more pulses in which "the combination of higher pulse power, short receiver dead time * * * and consequently shorter pulse width" was stated to provide an advantage. The applicant also discussed the possibility (not yet attained) of obtaining accurate T_1's below 1 msec. This additional material as shown in separate treatments under the headings "Short Receiver Dead Time and Pulse Width" and "T_1, for ^{13}C in the Range of a Millisecond" below, provides no justification for duty-free entry. In view of the foregoing, HEW advises that the article's specified pulse power provides no scientifically significant advantage over that of the domestic instrument for any of the applicant's planned work. The Department concurs.

Short Receiver Dead Time

No documentation is provided to support the applicant's statement that the receiver dead time of the foreign article is 12 μ-sec. In RFQ 61-RN-ARS-72 the applicant requested a recovery time of 150 μ-sec. In both the foreign manufacturer's quotation to the applicant (dated Apr. 12, 1972), and the article's specifications, recovery time is given simply as less than 20 μ-sec. In any case, the applicant states in this third submission (docket No. 76-00453) that this feature is connected with pulse width. As will be shown below the combination of pulse power, short receiver dead time and pulse width of the articles provides no scientifically significant advantage with respect to the applicant's intended experiments.

Thus, HEW advises, and we concur, that short receiver dead time is not pertinent.

Short Receiver Dead Time and Short Pulse Width

The applicant alleges that the combination of higher pulse power, and shorter receiver dead time (and consequently shorter pulse widths than the domestic instrument) would save time on long experiments (upwards of 100,000 pulses) such as ^{13}C studies on lignin. The applicant also states that this time-saving feature combined with the article's "single scan"* ^{13}C sensitivity makes the article superior to any comparable equipped 100 megahertz (MHz) instrument on the market today. The article's "single scan" ^{13}C sensitivity, measured in the applicant's laboratory, is alleged to be 470:1 on the largest peak of a 90 percent ethylbenzene sample in a 10 mm tube at ambient temperature with 5,000 Hertz (Hz) spectral width. The applicant further alleges that as of May 3, 1976 Varian's stated maximum sensitivity under these conditions was 200:1.

Regarding the saving of time, HEW advises that for the sample cited a saving of only 11 seconds in a total experiment time of close to 24 hours would accrue. Thus HEW finds, and the Department concurs, that the differences in receiver pulse power, receiver dead time and pulse width between the article and Varian's XL 100-15 is not pertinent for the planned work.

Regarding sensitivity, the following is noted:

1. The procedure of denial without prejudice to resubmission affors the applicant an opportunity to correct deficiencies in an application which are pointed out in writing. (Sensitivity was not alleged to be pertinent and unmatched by domestic instruments in either of the two prior applications for duty-free entry of the article although eight other features were repeatedly discussed in reply to question 8). Although the question of single scan ^{13}C sensitivity is being raised for the first time in this third submission, the denial without prejudice to resubmission procedure is not intended to be a route for the introduction of wholely unexpected or previously unexplored issues ad infinitum.

2. 470:1 value for sensitivity provided by the applicant is not the guaranteed sensitivity of the article (which according to the foreign manufacturer's quotation is 140:1 under the conditions described by the applicant) but rather one stated to have been measured in the applicant's laboratory. Subsection 301.11(a) of the regulations stipulates that in our comparison of the foreign article with domestic instruments guaranteed specifications are to be considered. The applicant's RFQ does not specify a single pulse sensitivity but does specify a continuous wave ^{13}C sensitivity of 30:1 in an 8 mm tube. Varian's letter of april 12, 1972 listing exceptions to the applicant's RFQ did not take exception to any of the applicant's sensitivity specifications. Varian, in its comments, states a belief that its guaranteed ^{13}C signal to noise sensitivity specifications have always been equal to or greater than those guaranteed by the manufacturer of the foreign article.

Thus, the 470:1 figure provided by the applicant cannot be a factor in our deliberations. The applicant, in the above-cited letter of June 17, 1976 (item A1.), acknowledges that where guaranteed sensitivity of the article and the Varian system can be compared (i.e., for continuous wave ^{1}H), the two instruments are equivalent.

Accurate Digital Pulse Programming

The applicant alleged in response to question 8 in all three applications for duty-free entry of the foreign article that this feature is required in DEFT (driven equilibrium Fourier transform) and Carr-Purcell experiments.

DEFT and a form of the Carr-Purcell method known as SEFT (spin echo Fourier transform) are of interest for enhancing signals above those attainable by ordinary Fourier transform techniques when certain conditions prevail, i.e., the spin-lattice relaxation time, T_1, is very long and T_1 is approximately equal to the spin-spin relaxation time, T_2. The Carr-Purcell sequence is also used for finding T_2. In its recommendation relating to the applicant's initial submission (docket No. 73-00008-33-77030), HEW advised that there was no indication that Carr-Purcell is in any way related to experiments that the applicant intends to perform and, after review of the applicant's second submission (docket No. 74-00226-33-77030), HEW advised that in the applicant's description of experiments to be conducted there are repeated references to the measurement of T_2, yet neither the Varian instrument nor the foreign article is equipped to carry out such experiments in the manner indicated. In this third submission, the applicant did not provide any new information on the requirement for Carr-Purcell but did expand on the requirement for DEFT. The applicant "visualized" that DEFT could be useful on lignin, lignin-carbohydrate complexes, and polysaccharides of forage plant cell walls to attain better signal-to-noise ratios (S/N) than attainable with a normal single pulse sequence without a significant increase in the total time required for an experiment. In connection with the requirement for DEFT HEW advises that DEFT is useful in improving the efficiency of ^{13}C NMR only in cases where T_1 is long and T_2 is approximately equal to T_1. HEW further advises that because of spin coupling between ^{13}C and protons, T_2 in polysaccharides and other compounds cited by the applicant is expected to be appreciably shorter than T_1 (HEW references Shoup, Becker and Farrar, J. Magnetic Resonance 8, 298 (1972) as well as references given therein for further detail). Finally, in connection with the use of Carr-Purcell for measurement of T_2, the Department notes that T_2 can be measured in other ways. For example, T_2 can be derived from the width of a spectral line in many samples (such as polysaccharides) where the line width is much greater than magnetic field in homogeneity. HEW further advises that at the time of order no manufacturer, domestic or foreign, offered Carr-Purcell measurements on a high resolution Fourier transform NMR spectrometer.

Capability of Operating in Either International or External-Locked Mode

Although HEW advises that an external lock is pertinent to the applicant's work, the Department of Commerce has established, and HEW con-

*It is clear from material attached to the application that the applicant is referring to single pulse.

V 43 / 199 0 OCT 13 78

curs, that the XL-100-15 system could be provided with internal and external locks at the time the foreign article was ordered to match the pertinent specification of the article. In this connection, it is noted that Varian shipped an XL-100-15 system with internal and external locks more than one year before the article was ordered.

Capability of Running Wide Sweeps in a Locked Mode

The Department notes that the applicant refers to his response in question 7.a.(3) (a) and (e) to establish the pertinency of this feature of the article. This work cited by the applicant will require the Fourier Transform capabilities of the article. The Department is cognizant that the wide sweeps in a locked mode provided by the article are used only in continuous wave (cw) nuclear magnetic resonance spectrometry and are not used in the Fourier Transform mode. Generally, cw work is not done when PFT is available. Several texts point out that the spectral range or sweep width in the Fourier Transform mode is determined by the amount of power applied to the sample and the rate at which the computer digitizes the data (e.g., T. C. Farrar and E. D. Becker, Pulsed and Fourier Transform NMR. Introduction to Theory and Methods, pp. 67, 69-71, Academic Press, New York (1971)). HEW advises that this feature is not pertinent for the work described by the applicant. The Department concurs.

Sufficiently Wide Temperature Range

Although HEW advises that the need for a variable temperature capability is pertinent to the applicant's work, the Dpeartment of Commerce has established, and HEW concurs, that the XL-100-15 system could be provided with variable termperature capability in the range required by the applicant (−150° to +200° centigrade) for the size tube required by the applicant (a sample tube of 10 mm or greater) at the time the foreign article was ordered. (These features were offered with the domestic instrument introduced in 1969 and continued to be offered with the XL-100-15 PFT.) Thus, this feature is matched in the XL-100-15 system.

In addition, the applicant in his response to question 8.(c)3 alleged, "• • • In addition to having a wider temperature range available, [the article's] variable termperature system is better in that it provides a calibrated readout of the temperature at the sampel, which Varian's system does not." In his letter of June 17, 1976 the applicant states, "• • • JEOL on the other hand offered a 10 mm VT probe with direct temperature readout • • •." We note the applicant's RFQ specified VT for an 8 mm tube and a 5 mm tube but not a 10 mm tube. Further, it provided no instructions relative to calibrated readout of temperature at the sample. Moreover, this feature is not described in the specifications of the article or the foreign manufacturer's quotation. However, technical literature permitted comparison of the instruments in question with respect to "readout". Both the variable temperature accessory of the article and XL-100-15 provide dials and/or meters for indication of temperature in the vicinity of the sample tube (for 10 mm or larger tubes), once temperature has been calibrated by an acceptable method. The foreign article provides a temperature meter on the magnet whereas Varian provides a temperature setting dial plus a temperature variation meter on the console. Precise temperature work in both systems, however, would require exacting calibration techniques which provide the actual temperature inside the sample tube. One such technique utilizes compounds with temperature sensitive lines which can be added directly to the sample or placed in a capillary inserted therein. Another very precise technique utilizes a special thermometer which can be placed in the sample tube cavity (or even sample tube). Since similar variable temperature experiments can be caried out in both the foreign and the domestic system, we find these systems to be scientifically equivalent with respect to temperature identification for the applicant's intended use. In any event, HEW did not find "calibrated readout of temperature at the sample" to be pertinent.

Water Cooling of Probe

Varian claims that the proble of the XL-100-15 system can be operated without water cooling because the electrical shim coils are mounted on the pole caps and therefore do not transmit any heat to the NMR sample area. In our denial without projudice to resubmission of the applicant's initial submission, the applicant was informed that Varian claimed its proble was designed to eliminate transmission of heat to the sample area. The applicant in two subsequent submission provided no new information on the issue of the cooled probe. In any case, HEW advises that this design feature is not pertinent to the applicant's work.

T_1 for ^{13}C in the Range of a Millisecond

In the applicant's letter of June 17, 1976, the applicant states that although accurate T_1's below 1 msec (millisecond) have not been obtained, such values are not inconceivable for glycerol backbone carbons in the very viscous natural states in the plant seed. However, HEW advises that, with regard to possible T_1's for ^{13}C in the range of a msec, it is known that dipolar relaxation cannot give ^{13}C T_1's of less than 20 msec. HEW further advises that contrary to the applicant's statement, increase in viscosity of the sample will cause T_1 to go through a minimum of about 20 msec and then increase, while T_2 continues to decrease. Thus, HEW advises that this feature is not pertinent to the planned work.

Available Domestic Instrument

Applicant's allegations.—Although the XL-100-15 was discussed the applicant alleged that the Department should base its determination on a comparison of the foreign article with the XL-100-12. In a letter, dated November 16, 1973 attached to the second application (docket No. 74-00226-33-77030), the applicant stated, "• • • the government can only accept prototype equipment when it is the only source. Our solicitation was for an advertised system. Varian did not bid the XL-100-15 and took several exceptions for the XL-100-12 • • •". In this submission (docket No. 76-00453), the applicant's letter of June 17, 1976 stated, "• • • Comments concerning the Varian XL-100-15 may be irrelevant to the discussion since Varian Associates did not bid that instrument • • •". Consideration of these allegations by the Department involved criteria for determining domestic availability, Varian's comments, Varian's quote in response to the applicant's RFQ, less formal contact of the applicant with Varian and factual information in the public domain.

Criteria for determining domestic availability.—Although it is not conceded that the XL-100-15 was an unadvertised prototype, it must be pointed out that the specific purchasing policies of the applicant are not standards of domestic availability for purposes of duty-free entry. According to § 301.11(b) of the regulations a domestic instrument or apparatus is considered available (whether produced for stock, produced on order or custom made) if the U.S. manufacturer is able and willing to produce it and have it available without unreasonable delay. The subsection also indicates that normal commercial practices applicable to the production and delivery of the instrument in question is to be considered in the determination of domestic availability. As will be shown below, the XL-100-15 system meets the criteria of § 301.11(b).

Varian's comments.—Varian stated that (1) its records show that both the XL-100-12 and the XL-100-15 were

freely available at the time the XL-100-12 was quoted [April 12, 1972], (2) the XL-100-15 was, and is, the higher volume product [i.e., Variance manufactures and sells more XL-100-15's than XL-100-12's], (3) the decision to formally bid the XL 100-12 in response to the applicant's RFA was based on factors other than technical specifications, and (4) Varian would have been pleased to quote the XL-100-15 had it been specifically requested to do so.

Varian's quotation.—The Department notes that it lacks information on the nature of Varian's response to the applicant's solicitation (No. 61-RN-ARS-72). A letter dated April 12, 1972, which was attached to Varian's response, indicated that an XL 100-12 without external lock, DEFT, or variable temperature was quoted. But this letter was all that was supplied by the applicant and practically all the detail of Varian's quote (No. 54-472-3) is not available to us because neither the applicant not Varian could supply us with a copy of Varian's quotation. Thus, we cannot verify the specifications actually offered, price, alternatives, etc.

Other contacts between the applicant and Varian.—The applicant indicated that contact with Varian (with salesmen and Dr. Leroy F. Johnson) took place from June 1971 to February 1972. However, little detail is given on the nature of these contacts and when the Department, in its denial without prejudice to resubmission of docket No. 74-00226-33-77030 (the second submission), asked when (between June 1971 and February 1972) a particular conversation (on pulse power) with Dr. Johnson took place the applicant, on resubmission, responded, "• • • It was, to the best of my recollection between November 1972 and February 1973 • • •". The response to question 9 which covers the applicant's contact with domestic manufacturers does not appear to cover the relatively informal contacts with Varian cited above. However, the Department notes a significant omission in the applicant's response to question 9.a.(3). In response to this question the applicant indicated that Varian was requested to bid, but the balance of the question, which asked whether cost limitations were involved in this request, was not answered. It is also significant that, in the Solicitation Instructions and Conditions attached to the applicant's RFQ, item 10. (Award of Contract) reads in pertinent part, "(a) the contract will be awarded to that responsible offeror whose offer conforming to the solicitation will be most advantageous to the Government, *price*, and other factors considered." (emphasis added). This is significant because the price of an XL 100-15 system matching the article would be higher than that of either the article of the XL 100-12 and the applicant purchased the article from the lowest acceptable bidder. In accordance with § 301.2(n), difference in cost between the article and the most closely comparable domestic instrument is not considered a basis for duty-free entry.

Information in public domain.—Varian's willingness and ability to supply the XL 100-15 was clearly a matter of public record at the time the foreign article was ordered. The instrument was first introduced in 1969. At that time PFT for proton was offered as an option. The basic instrument and its improvement with time has been advertised in the trade literature, demonstrated at exhibits and at Varian's applications laboratory, discussed at owner's conferences, described in catalogs, ordered, shipped, discussed in application for duty-free entry etc. from 1969 to 1972 (and thereafter). Further, the publicity on the XL 100 series clearly indicated that the XL 100-15 had significantly higher capability than the XL 100-12. Thus, Varian demonstrated its willingness to supply the XL 100-15 by offering it in quotations, timely advertisements etc. and Varian demonstrated its ability to supply the XL 100-15 by manufacturing it (to a greater extent than the XL 100-12) and shipping it. The Department has documentation to support the statement that Varian shipped and offered units of its XL 100-15 PFT NMR spectrometer system comparable to the foreign article. Varian shipped such a unit to Harvard University on March 30, 1972 (i.e., before the article was ordered) and quoted similar units to Pennsylvania State University and Albert Einstein College of Medicine on February 24, 1972 and July 22, 1971 respectively. Both Pennsylvania State University and Albert Einstein College of Medicine applied for and obtained duty-free entry of instruments essentially identical to the foreign article (dockets No. 72-00504-01-77030 and 73-00136-01-77030 respectively). In the second submission (docket No. 74-00226-33-77030) the applicant cited these two cases as precedents and stated that the XL 100-15 was "unavailable" (citation of these precedents was not repeated on resubmission). The Department's approval of these applications, however, were not based on the nonavailability of a comparable XL 100-15 system but the inability of that system to perform certain specific experiments within the capability of its foreigh counterpart. Such specific experiments are not described in any of the applications that are the subject of this decision.

In view of the above, the Department finds that Varian was both willing and able to provide an XL 100-15 PFT NMR spectrometer with all necessary accessories for the applicant's intended uses at the time the foreign article was ordered. The Department further finds that difference in cost between the foreign article and this domestic instrument and Varian's knowledge that this difference would be critical in the award of the purchase contract is a reasonable explanation of Varian's bid of an XL 100-12.

Based on the foregoing considerations, HEW advice, our own review of the application as well as other factual information in our possession (specifications, textbooks etc.) we find that the model XL 100-15 NMR system was of equivalent scientific value to the foreign article for such purposes as this article is intended to be used at the time the foreign article was ordered.

UNIVERSITY OF ILLINOIS—URBANA

Decision on Applicotion for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00284. Applicant: University of Illinois Purchasing Division, 223 Administration Building, Urbana, Ill. 61801. Article: Reflection-Transmission Unit for Beckman-RIIC FS-720 Fourier infrared spectrometer. Manufacturer: Beckman-RIIC Ltd., United Kingdom. Intended use of article: The article is intended to be used for reflectance and transmission studies of metals such as TaSe, and V_3Si which have interactions between vibrations of the atoms and the electrons responsible for electrical conductivity. The frequency range of interest is the far infrared.

Comments: No comments have been received with respect to this application.

V 43/199

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to accessories for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The National Bureau of Standards (NBS) advises in its memorandum dated August 30, 1978 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses.

The Department of Commerce knows of no other similar accessories being manufactured in the United States, which are interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

UNIVERSITY OF WISCONSIN—MADISON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00256. Applicant: University of Wisconsin—Madison Plasma Physics, 1150 University Avenue, Madison, Wis. 53706. Article: 35 GHz, 15 W extended interaction oscillator, type VKQ 2420E. Manufacturer: Varian Associates of Canada, Canada. Intended use of article: The article is intended to be usd in a microwave scattering experiment in which density fluctuations in the plasma will be probed revealing their characteristic frequencies and wavelengths. The density fluctuations to be studied are common to octupoles, tokamaks, and many other devices.

Comments: No comments hve been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a high power source (75 watts) required to generate microwave radiation in the 35 gigahertz range. The National Bureau of Standards (NBS) advises in its memorandum dated September 5, 1978 that (1) the specification described above is pertinent to the applicant's intended use and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF CALIFORNIA, DAVIS SCHOOL OF VETERINARY MEDICINE ET AL

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before November 2, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00422. Applicant: University of California, Davis, School of Veterinary Medicine, Davis, Calif. 95616. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended used of article: The article is intended to be used for ultrastructural studies of animal tissues and morphological investigations of animal virus structures. The most important projects for which the article is to be used as an essential investigative tool are:

I. Pulmonary effects of environmental oxidant pollutants.
II. Ultrastructural characterization of animal viruses.
III. Ultrastructural pathology of the musculoskeletal system.
IV. Trypanosomiasis.
V. Abortion in cattle and sheep.
VI. Procedures for rapid viral diagnosis.
VII. Special post mortem diagnostic procedures.
VIII. Effects of beta/lysins and cationic proteins on morphology of bacteria.

Undergraduate, graduate and professional (veterinary) students in the following courses will use the article during laboratory exercises and for examining specimens.

1. Anatomy 205—Ultramicroscopic Anatomy.
2. Pathology 282—Tumor Pathology.
3. Pathology 299—Research in Veterinary Pathology.
4. Veterinary Microbiology 128—Biology of Animal Viruses.
5. Veterinary Microbiology 130—Animal Virology Laboratory.
6. Veterinary Microbiology 299—Research.
7. Veterinary Medicine 150B—Agents of Disease and Host Responses.

Application received by Commissioner of Customs: September 13, 1978.

Docket No. 78-00426. Applicant: Medical College of Ohio, Department of Pathology, C.S. 10008, Toledo, Ohio 43699. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section biological materials (human and animal tissues) which have been embedded in hardened epoxy resins for sectioning. Experiments to be conducted will include cyto and histochemical studies of enzyme and subcellular organelle localization in cells and tissues and subcellular changes in cells induced by changes due to infectious agents, biochemical and/or physical environments. In addition, the article will be used in the course diagnostic electron microscopy to introduce students to the principles and techniques of electron microscopy in order to apply gained knowledge to diagnostic pathology. Application received by Commissioner of Customs: September 14, 1978.

OCT 13 1978

Docket No. 78-00427. Applicant: Yale University, Biology Department, Kline Biology Tower, New Haven, Conn. 06520. Article: LKB 2088 Ultrotome V Ultramicrotome with LKB 14800-3 Cryokit and accessories. Manufacturer: LKB Produkter AB, Sweden Intended use of article: The article is intended to be used for studies of cell ultrastructure and intracellular localization of elements in: (a) Plant cells that undergo large rhythmic and light-regulated changes in turgor: (b) protoplasts isolated from cereals and regenerating new walls; (c) cells of plants subjected to gravitational stimulation; (d) cells of plants subjected to environmental pollutants; (e) pathological and normal tissue from animals and plants. The article will also be used in the course Cell Biology by advanced students who are learning cryoultramicrotomy. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00428. Applicant: Veterans' Adminstration Hospital, 1400 V.F.W. Parkway, West Roxbury, Mass. 02132. Article: LKB 2088 Ultrotome V Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden Intended use of article: The article is intended to be used to section biological materials for ultrastructural studies on normal and pathologic tissues, developmental studies on fungal and bacterial systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at cell-cell interfaces, and subcellular changes in cells induced by changes in their biochemcial and physical enviroments. The objective pursued in the course of these investigations is to understand early pathological alterations in tissues (as induced in amimal models) and to correlate these changes in clinical alterations seen in human diseased tissues. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00429. Applicant: Purdue University, ADMS Building, West Lafayette, Ind. 47907. Article: Electron Microscope, Model JEM 100CX and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to do diagnostic virology. The research is directed toward three main areas: Nervous system, skeletal system, and the heart. The main direction of the research involving the nervous system consists of the prenatal development of neuroblasts and their processes and a study of a gangliosidosis in the dog. The second main area of research involving the nervous system is directed to the characterization of a gangliosidosis of dogs as a model for better understanding of a similar disease of man. A continuing study of the skeletal system of animals, particularly the portion directed toward the understanding of the development of secondary centers of ossification will be conducted. The article will also be used for the study of the response of heart muscle to deficiency disease. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00430. Applicant: University of Florida, Institute of Food and Agricultural Sciences, McCarty Hall, Department of Microbiology, Gainesville, Fla. 32611. Article: Electron Microscope, Model JEM-100CX with standard side entry and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to examine and analyze biological materials ranging from naked DNA to viruses to bacteria to single-celled eucaryotes to whole organisms. Ultrastructure of the development and subcellular organelles in the above-listed biological materials will be done. In addition, the article will be used in the courses MCS 653, Electron Microscope Techniques and MCS 655 EM Cytochemistry to give students thorough training in EM techniques so that they may use the article in their dissertation research. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00431. Applicant: New York University Medical School, 550 First Avenue, New York, N.Y. 10016. Article: Electron Microscope, Model JEM-100S and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of cultured cells of the animal nervous system including clonal lines with neuronal properties. Various types of cells from animal tumors will be studied as well as biopsy specimens from the human and animal nervous system. The experiments to be conducted will involve studying the organization of subcellular fibrous organelles and their alterations during the development and aging process as well as the changes which they might undergo in neoplastic transformation. Attempts will be made to experimentally alter the distributions and connections of these organelles. Other studies will be done to monitor the subcellular fractionation and purification of both fibrous organelles and membranes from tissues as a correlate to biochemical studies. In addition, the article will be used to instruct graduate students, students in the M.D.-Ph. D. program and postdoctoral fellows in the basic techniques of electron microscopy and their application to the study of drug mechanisms of actons and drug effects on living systems. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00432. Applicant: Northwestern University, Chemistry Department, Evanston, Ill. 60201. Article: Rare Gas Halide Laser Kit and Accessories. Manufacturer: Lumonics Research, Canada. Intended use of article: The article is intended to be used to create large quantities of molecular fragments which will be studied with respect to measuring the initial energy distribution of these fragments. This will allow for the testing and formulation of theories of chemical dynamics and the reactivity of excited molecules. In another set of experiments the article will be used as a HF laser to pump energy into overtone vibrations of molecules. The reactivity of these excited molecules will then be studied. In a third set of experiments, the output of this laser will be used in the 300—nm region of the spectrum to pump a dye laser which will then be used to probe excited state molecular fragment energy distributions. The article will also be used in nonlinear optics experiments in which high peak power is very important. Application received by Commissioner of Customs: September 18, 1978.

Docket No. 78-00433. Applicant: Wayne State University, 540 East Canfield Avenue, Detroit, Mich. 48201. Article: LKB 2088 Ultrotome V Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of a variety of mammalian tissues, organs, and glands in addition to isolated cells, membrane fragments, and other cellular components. Investigations will include ultrastructural studies of the effects of a variety of drugs on whole mammalian exocrine glands, and dispersed glandular cell preparations, toxicological studies of agents affecting the liver cytochemical localization of enzymes in inner mitochondria membrane preparations and in isolated vas deferens membranes and ultrastructural changes induced by drugs or ionic shifts in cardiac muscle fibers. A workshop entitled "Basic Techniques in Electron Microscopy" is the instructional course in which this instrument will be used. The workshop is intended as an introduction to the techniques of specimen preparation and to the use of the electron microscope as a tool for studying biological fine structure and various subcellular organelles. Application received by Commissioner of Customs: September 22, 1978.

Docket No. 78-00435. Applicant: Harvard Medical School, 25 Shattuck Street, Boston, Mass. 02115. Article: LKB 2258 PMV Cryo-Microtome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological materials, specifically tissue from animal spe-

V 43/199 OCT 13 78 (USA)

cials, such as monkey, cat, and rodents. Whole unfixed frozen animals' brains will be mounted in matrix of carboxylmethyl cellulose frozen in metal frames and then sectioned at a relatively low temperature. The investigation includes measuring the rates of glucose consumption in the central nervous system by using the (C^{14}) 2-deoxyglucose method and the autoradiography technique, followed by histoiogical examination of the cells' morphology. The objectives of this research are to demonstrate the anatomical system and the function of the visual cortex's two independent systems: The ocular dominance columns and the orientation columns. Application received by Commissioner of Customs: September 22, 1978.

Docket No. 78-00437. Applicant: Northwest Community Hospital, 800 West Central Road, Arlington Heights, Ill. 60008. Article: LKB 2128-010 Ultrotome IV Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological materials, especially human tissues from surgically excised specimens, autopsy tissue, body fluids, and blood cells, bacteria and fungi. Many tumor specimens, as well as kidney and liver biopsies, will be sectioned. Ultrastructural studies on human tissues, cells, or by-products will be performed for the purposes of diagnosis of disease and elucidation of disease mechanisms. This will probably include ultramicroscopic, histochemical, and immunologic techniques. Application received by Commissioner of Customs: September 22, 1978.

Docket No. 78-00438. Applicant: University of Colorado, Purchasing Services Department, Willard Administrative Center, No. 160, Boulder, Colo. 80309. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section biological materials (cells and tissues). The experiments to be conducted will consist of ultrastructure of normal and transformed cells and tissues with special emphasis on three-dimensional organization visualized through use of thick sections in a high-voltage electron microscope. Ultimately experiments will concentrate on such visualization in frozen materials. In addition, the article will be used in the courses MCDB-132 Cell and Tissue Biology and MCDB-513 Advanced Topics in Electron Microscopy in hopes of increasing expertise in various research areas handled by electron microscopy and specimen sectioning. Application received by Commissioner of Customs: September 22, 1978.

Docket No. 78-00439. Applicant: Louisiana State University Center for Agricultural Sciences and Rural Development, Department of Plant Pathology and Crop Physiology, Life Sciences Building, Baton Rouge, La. 70803. Article: LKB 2088 Ultrotome V Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section plant material which is infected, healthy plant materials used as controls and insects which are involved in the infections process. These sections will be viewed with the electron microscope to determine what the pathogen is, where it is located and what effect it has on the plant's ultrastructure. These studies will be constructed to identify the pathogens involved in these plant diseases and to learn more about these pathogens. In addition, the article will be used in the courses Plant Virology and Methods in Plant Pathology to furnish graduate level training in plant pathology. Application received by Commissioner of Customs: September 22, 1978.

Docket No. 78-00440. Applicant: The Regents of the University of California, Irvine, Calif., California College of Medicine, Irvine, Calif. 92717. Article: Electron Microscope, Model EM-400 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used to examine tissues at low, intermediate, and high magnification, to examine freeze-etch replicas of biological membranes and tissue sections at various magnifications, for various applications of histochemical procedures from low to high magnification, to examine thick specimens, to examine stereo pairs of membranes and various tissues with both freeze-etch and thin section preparations, and to apply analytical electron microscopy to various tissue systems. Examples of the research projects include:

(1) Diabetic angiopathy and neovascularization.
(2) Identity of nascent capillaries.
(3) Investigation of localization of ^{125}I-insulin on purified plasma membrane preparations.
(4) Investigation of stereo pairs of biological materials.
(5) Studies of the endocrine pancreas in streptozotocin-induced diabetic mice.

The article will also be used in an electron microscope course being designed for graduate students and research fellows. In this course, the techniques and applications of EM will be heavily emphasized, and an independent EM project will be expected. Application received by Commissioner of Customs: September 22, 1978.

UNIVERSITY OF FLORIDA, DEPARTMENT OF CHEMISTRY, ET AL

Consolidated Decision on Applications for Duty Free Entry of Nuclear Magnetic Resonance Spectrometers

The following is a consolidated decision on applications for duty-free entry of nuclear magnetic resonance spectrometers pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 78-00103. Applicant: University of Florida, Department of Chemistry, 109 Leigh Hall, Gainesville, Fla. 32611. Article: JNM/FX-100 High Resolution Fourier Transform Multi-Nuclear Magnetic Resonance System, with accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the following research involving standard proton and carbon spectra for structure determination:

(1) Investigation of whether certain carbonium ions are static bridged species or occur as an equilibrating mixture of two or more forms.
(2) Investigation of the kinetics of the isoindene photoisomerization and thermal reversion.
(3) Relaxation time measurements, particularly $T_{1\rho}$, to distinguish these mechanisms and to measure the mobility of the reporter molecules. $T_1/T_{1\rho}$ studies to investigate molecular motions over a longer time scale than those affecting T_1. Similarly the binding of anthracycline antitumor drugs to DNA is under investigation; kinetic studies of drug/DNA complexing and dissociation will be facilitated by the auto-stacking capability of the article.
(4) Determination of the stereochemistry of polymer end groups and inter-conversion rates of carbanion rotamers will be investigated using the auto-stacking and $T_{1\rho}$ features.
(5) $T_{1\rho}$ measurements to determine the locations of the metal atom in the exchanging species and the effects of UV irradiation in situ on various metal complexes will be tested.

(6) The study of osmotic membranes using relaxation time measurements to follow the behavior of water molecules at the membrane.
(7) The study of the kinetics of the sulfite ion cleavage of thiamine in the presence of other nucleophiles using the auto-stacking feature and to search for a sulfite ion adduct by proton and carbon $T_{1\rho}$ measurements at the ring sites.
(8) Synthesis of polymers by use of novel organic reactions, a study of the mechanisms of the polymerization reactions, and determination of the fundamental physical properties of the polymers.
(9) Research devoted to the synthesis and synthetic use of novel heterocyclic systems.
(10) The study of reversible and irreversible rearrangement processes in organometallic σ-complexes at low concentrations.
(11) Use of relaxation times of proton and carbon resonance as a probe of the transport of paramagnetic and quadrupolar ions.
(12) Relaxation time measurements on substances related to cell wall materials.

Application received by Commissioner of Customs: January 23, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 20, 1978. Article ordered: September 16, 1977.

Docket No. 78-00207. Applicant: University of Oklahoma, 1000 Asp Avenue, Room 314, Norman, Okla. 73019. Article: Nuclear Magnetic Resonance Pulse Spectrometer, Model CPS-2 and Accessories. Manufacturer: Spin-Lock Ltd., Canada. Intended use of article: The article is intended to be used for the study of the motional behavior of water and sodium ions in muscle, collagen and other body tissues in laboratory animals in the aging process. The two techniques which will be used in this project are the study of spin-spin relaxation time in the rotating framework (T_1) and self-diffussion coefficient by applying pulse magnetic field gradient. Continued studies of the effect of cross-linking of collagen on interaction between ATP and collagen molecules, will also be conducted. Application received by Commissioner or Customs: April 13, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 13, 1978. Article ordered: March 22, 1978.

Docket No. 78-00252. Applicant: Vanderbilt University (Chemistry Department), Nashville, Tenn. 37235. Article: JNM/FX-90Q High Resolution Fourier Transformation Multi-Nuclear Magnetic Resonance Spectrometer System and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in a wide range of different experiments in the areas of organic chemistry, inorganic chemistry, analytical chemistry, biochemistry, pharmacology and related biomedical sciences. Categories of the principal research projects which will use the article are:

(i) Characterization of newly synthesized organic compounds including (1) alkaloids, (2) polyketides, (3) terpenes, (4) prospective drugs, (5) nonbenzenoid polycyclic aromatic compounds, (6) novel chelating agents, (7) novel amino acids and (8) intermediates in their synthesis.

Docket No. 78-00109. Applicant: University of California, 1156 High Street, Santa Cruz, Calif. 95064. Article: JNM/FM-100R Nuclear Magnetic Resonance Spectrometer and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for a large variety of research studies of molecular structure, molecular association, and molecular dynamics for biochemical, organic chemical, biological, and marine studies problems. These research applications will consist of the following:

1. The Structure and Dynamics of Lipids in Biological Membranes.
2. NMR Characterization of Enzyme-Substrate Intermediate Trapped at Subzero Temperatures.
3. Mechanisms of RNA Protein Interactions.
4. Natural Products Chemistry of Marine Organisms.
5. New Synthetic Methods and Their Use in Natural Product Total Synthesis.

The article will also be used for educational purposes in the following chemistry courses:

Chemistry 135. Biophysical Chemistry.
Chemistry 140. Advanced Organic Laboratory.
Chemistry 164. Physical Chemistry Laboratory.
Chemistry 180A-B-C. Senior Research.
Chemistry 199. Tutorial.
Chemistry 243. Physical Properties and Molecular Structure.
Chemistry 299. Thesis Research.

Application Received by Commissioner of Customs: January 26, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 21, 1978. Article order: October 12, 1977.

(ii) *Characterization of novel organic compounds obtained from natural sources* including terpenes, alkaloids, polyketides and compounds of uncertain classification.
(iii) *Metabolic studies of natural products in the organism from which they originate.* Biosynthesis of terpenes, polyketides, alkaloids and aromatic amino acids; studies of the further transformations of these natural products by the organisms.
(iv) *Metabolism of natural products in organisms other than those from which they originate.* Metabolic activation of relatively harmless natural substances to form toxic compounds.
(v) *Metabolism of synthetic compounds.* In particular, the metabolic fate of drugs in mammalian systems. Example: metabolism of barbiturates and hydantoins.
(vi) *Characterization of the products of enzyme-mediated reactions.* On example would be the characterization of products of enzymic hydrolysis of N-acyl derivatives of complex amino acids as a method for determining absolute configurations.
(vii) *Structural studies of novel organometallic compounds and inorganic complexes.* (1) Transition metal carbene complexes, (2) chelates of metalloacetylacetonates, (3) coordination compounds of the antitumor agent cyclophosphamide.
(viii) *Dynamic studies.* (1) Mechanism of antibiotic action of the ristocetin-group antibiotics—a study of the association of aliphatic peptides with the antibiotics to determine the site of binding, (2) studies of the molecular basis of toxicity of compounds such as moniliformin which appear to owe their toxicity to reversible binding processes, (3) identification of active coordination sites for heavy metals in multidentate chelating agents containing several polarizable sites, (4) studies of isomer-conformer equilibra in chiral compounds such as clozapine which derive asymmetry from ring distortions.

In addition, the article will be used for teaching purposes in several courses, the most important being Chemistry 221, Laboratory Techniques in Organic Chemistry and Chemistry 222, Advanced Organic Chemistry. Application received by Commissioner of Customs: May 30, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 22, 1978. Article ordered: March 13, 1978.

Comments: No comments have been received in regard to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, was being manufactured in the United States at the time the articles were ordered.

Reasons: Each foreign article provides the capability for making T_{1rho} measurements. The Department of Health, Education, and Welfare (HEW) advises in its respectively cited memoranda that the specification of each article described above is pertinent to the purposes for which each of the foreign articles to which the foregoing applications relate is intended to be used. HEW also advises that it knows of no domestic instrument which provided the pertinent specification at the time the articles were ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States at the time the articles were ordered.

National Oceanic and Atmospheric Administration

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL; GROUNDFISH ADVISORY SUBPANEL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council was established by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and the Council has established an Advisory Subpanel on Groundfish. This panel will meet to review a draft fishery management plan.

DATES: The meeting will convene on Monday, October 30, 1978 at 10 a.m. and adjourn at 5 p.m.; and Tuesday, October 31, 1978, at 8 a.m. and adjourn at 3 p.m. The meeting is open to the public.

ADDRESS: The meeting will take place in the Capri Room of the International American Motor Inn, 2601 Severn Avenue, Metairie, La.

FOR FURTHER INFORMATION CONTACT:

Wayne Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Fla. 33609, telephone 813-228-2815.

Dated: October 6, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

NORTH PACIFIC FISHERY MANAGEMENT COUNCIL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Amended meeting notice.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., appendix I, notice is hereby given of a change in the agenda, dates, and location for the separate and joint meetings of the North Pacific Fishery Management Council and its SSC and AP (FR Vol. 43, No. 189, p. 44562, dated Sept. 28, 1978).

DATES: The SSC will meet separately on Wednesday, October 25, 1978, and on Thursday, October 26, 1978, (instead of November 1, 1978) convening at 10 a.m. and adjourning at approximately 5 p.m. on both days. The meeting may be extended depending upon progress of the agenda.

ADDRESS: The SSC on Wednesday, October 25, 1978, and on Thursday, October 26, 1978, will meet at the Northwest and Alaska Fisheries Center, 2725 Montlake Boulevard, East, Seattle, Wash. 98112.

FOR FURTHER INFORMATION CONTACT:

Mr. Jim H. Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, telephone 907-274-4563.

SUPPLEMENTARY INFORMATION: All council, SSC, and AP meetings will be open to the public. For imformation on seating arrangements, changes to the agenda, and/or written comments, contact the Executive Director.

PROPOSED AGENDA

OCTOBER 25-26, 1978

The proposed agenda for the SSC will also include a discussion of the FMP's, "High Seas Salmon Fishery Off the Coast of Alaska East of 175° E. longitude," "Halibut Off the Coast of Alaska," and "Bering Sea and Aleutian Islands Groundfish Fishery."

NOVEMBER 3, 1978

(1) The proposed agenda for November 3, joint meeting, will also include a discussion and probable decision on proposed amendments to the tanner crab FMP which primarily deal with a request by the Japanese Tanner Crab Association to be allowed to fish south of 58° N. latitude and west of 171° or 173° W. longitude in the event of severe winter icing and completion of the U.S. fishery in that area. Additionally, the Council will consider all public comments received on the FMP "High Seas Salmon Fishery Off the Coast of Alaska East of 175° E. longitude," and adopt a proposed management regime to be reviewed again on November 30 and December 1, for submission to the Secretary of Commerce.

Dated: October 6, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[3510-22-M]

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting.

SUMMARY: The South Atlantic Fishery Management Council, established by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will meet to discuss: (1) Progress of snapper-grouper FMP; (2) status of swordfish FMP; (3) discussion on billfish FMP; (4) review of foreign fishing permits; (5) review of mackerel, coral, stone crab and other species on target for FMP's; and (6) other management business.

DATES: The meeting will convene on Tuesday, October 31, 1978, at approximately 1 p.m. and adjourn on Thursday, November 2, 1978, at approximately 12 noon. This meeting is open to the public.

ADDRESS: The meeting will take place at Quality Inn, Cordillo Parkway, Hilton Head Island, S.C.

FOR FURTHER INFORMATION CONTACT:

Ernest D. Premetz, Executive Director, South Atlantic Fishery Management Council, 1 Southpark Circle, Suite 306, Charleston, S.C. telephone 803-571-4366.

SUPPLEMENTARY INFORMATION:

For information on seating arrangements, changes to the agenda, and/or written comments, contact the Executive Director.

Dated: October 6, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

FEDERATIVE REPUBLIC OF BRAZIL

Increasing Import Restraint Level for Certain Cotton Apparel Products

OCTOBER 10, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the import restraint level established for women's, girls', and infants' cotton knit shirts and blouses in category 339, exported from Brazil during the year which began on April 1, 1978.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408)).

SUMMARY: Paragraphs 5 and 8 of the Bilateral Cotton Textile Agreement of April 22, 1976, as amended, between the Governments of the United specific ceilings may be increased by designated percentages and that under specified conditions shortfalls in certain category ceilings during one agreement year may be applied to those ceilings in the succeeding agreement year. Pursuant to these provisions of the bilateral agreement, the level of restraint for category 339 is being increased to 250,573 dozen for the 12-month period which began on April 1, 1978 and extends through March 31, 1979.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On July 12, 1978, a letter dated July 7, 1978 was published in the FEDERAL REGISTER (43 FR 29975) from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established the levels of restraint applicable to certain specified categories of cotton textile products under the new textile category system, which have been produced or manufactured in Brazil and exported to the United States during the 12-month period which began on April 1, 1978. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to permit entry of cotton textile products in category 339, produced or manufactured in Brazil, at the increased level of 250,573 dozen during the agreement year which began on April 1, 1978.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

OCTOBER 10, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C.

DEAR MR. COMMISSIONER: On July 7, 1978, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the 12-month period beginning on April 1, 1978 and extending through March 31, 1979 of cotton textiles and cotton textile products in certain specified categories, produced or manufactured in Brazil, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to paragraphs 5 and 8 of the Bilateral Cotton Textile Agreement of April 22, 1976, as amended, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on October 10, 1978, to amend the 12-month level of restraint established for cotton textile products in category 339 to 250,573 dozen.[2]

The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cotton textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

[FR Doc.78-28961 Filed 10-12-78; 8:45 am]

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton Textile Agreement of April 22, 1976 between the Governments of the United States and the Federative Republic of Brazil, as amended, which provides, in part, that: (1) Within the aggregate and applicable group limits, specific levels of restraint may be exceeded by specified percentages; (2) these levels may be increased within the aggregate and applicable group limits upon agreement between the two Governments; (3) consultation levels may be increased within the aggregate and applicable group limits upon agreement between the two Governments; and (4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] The level of restraint has not been adjusted to reflect any entries after March 31, 1978.

[6820-33-M]

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1978

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1978 commodities to be produced by and a service to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 15, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 1009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and the service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and the service to Procurement List 1978, November 14, 1977 (42 FR 59015):

CLASS NONE

Mattress, bed, innerspring (commercial), 38"×75", 53"×75".

V 43/199 OCT 13 78

SIC 7399

Labeling of supplies, Defense Depot Mechanicsburg, Mechanicsburg, Pa.

CLASS NONE

Strap, mail tray, Postal Service Item No. 01067.

C. W. FLETCHER,
Executive Director.

[FR Doc. 78-28959 Filed 10-12-78; 8:45 am]

[6820-33-M]

PROCUREMENT LIST 1978

Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1978 a service to be provided by and a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: October 13, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher 703-557-1145.

SUPPLEMENTARY INFORMATION: On July 14, 1978 and August 11, 1978 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (43 FR 30330 and 43 FR 35744) of proposed additions to Procurement List 1978, November 14, 1977 (42 FR 59015).

After consideration of the relevant matter presented, the Committee has determined that the service and the commodity listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

Accordingly, the following service and commodity are hereby added to Procurement List 1978:

SIC 7349

Janitorial/custodial service at the following U.S. Army Reserve centers in Massachusetts:
1. Belmont and Manley Streets, Brockton.
2. 915 West Chestnut Street, Brockton.
3. John Williams Street, Attleboro.
4. 675 American Legion Highway, Roslindale.
5. 130 Eldridge Street, Taunton.

CLASS 6230

Lantern, electric, head 6230-00-643-3562.

C. W. FLETCHER,
Executive Director.

[6355-01-M]

CONSUMER PRODUCT SAFETY COMMISSION

[Petition No. CP 78-12]

ESCALATORS

Denial of Petition

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of Petition.

SUMMARY: The Commission denies a petition requesting it to develop a mandatory safety standard addressing risks of injury associated with escalators. The Commission denies the petition because the currently available information is insufficient to indicate that escalators as they are presently constructed and designed present an unreasonable risk of injury to consumers.

FOR FURTHER INFORMATION CONTACT:

Irwin L. Greif, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6754.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for issuance of a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reason for denial in the FEDERAL REGISTER.

On April 18, 1978, the Commission received a petition and supporting documents from members of the Ad Hoc Committee for Greater Safety on Escalators, of Cleveland, Ohio. The petition alleged that escalators present an unreasonable risk of injury, particularly to children and the elderly, due to inadequate warning signs and unsafe construction and design. The petition called particular attention to the risk of body parts being pulled into the escalator mechanism.

In analyzing this petition, the Commission considered injury information submitted by the petitioners, its own investigation of injury data, economic and engineering data, and applicable voluntary standards.

Two major hazards patterns emerged from a search of the Commission's National Injury Information Clearinghouse data: Falls, and entrapment of body parts or shoes between moving components of the escalator. Falls appear to be the most common type of accident associated with escalators and usually involve the elderly. Entrapment of shoes, feet, hands, and so forth is the second most common type of accident associated with escalators. This hazard seems to involve primarily children under 12.

The causes of entrapment accidents are generally quite specific—the victim is typically wearing soft soled shoe which becomes caught in the mechanism, or a child is playing on the escalator in such a way as to expose fingers or clothing to moving parts of the escalator. Most reports of falling incidents give only general statements as to cause, such as "lost balance," with no identificable reason for losing balance.

A search of the National Electronics Injury Surveillance System (NEISS) revealed 125 accidents associated with escalators during the period January 1, 1977 through May 31, 1978. The age range of the victims was from five to 65+, with injuries ranging from contusions, to strains and sprains, to lacerations and fractures, with virtually all body parts being affected. A review of 21 in-depth investigation reports dating from 1967-77 disclosed 13 entrapment incidents and eight falls. In addition, 6 deaths involving escalators have been reported to the Commission. It appears that 2 of the 6 deaths may be classified as industrial in nature due to the type of injuries involved. The other 4 victims were injured when they fell down escalators.

Commission investigation reveals that these accidents are occurring in the context of at least 32 billion escalator rides per year, on 18,000 escalator units (a unit is either an up or down escalator).

The Commission notes that many States have statewide elevator and escalator codes. The American National Standards Institute (ANSI) Code for Elevators, Dumbwaiters, Escalators, and Moving Walks (ANSI A17.1), which has been adopted at least as a technical basis for a State code in 22 States, contains many safety features relating to fall, entrapment, and pinching hazards. In addition, Commission staff have been informed that the ANSI Escalator Subcommittee has recently approved and transmitted to the Executive Subcommittee a proposed revision of the escalator standard which would provide for the uniform placement of emergency on-off stop switches and would establish requirements for the size, wording, and location of warning signs for escalators. It is anticipated that this revision will be approved some time before the end of the year.

However, the Commission has noted that the current A 17.1 may be inadequate in two other respects. The injury data involving escalators suggest that the severity of injuries suffered once a foot entrapment occurs may be related to the duration of entrapment and the distance the victim is dragged along the length of the escalator before the escalator stops. A 17.1 presently requires one automatic shutoff device (skirt obstruction device) near the lower combplate. Further investigation is needed to determine whether and to what extent increasing the number of skirt obstruction devices on an escalator will reduce the severity of entrapment injuries. In addition, the maximum ⅜" side clearance (between the step and the balustrade) permitted by the ANSI Code may be too large to prevent many entrapment accident.

The Commission has carefully considered the matters raised in the petition and the injury and technical data submitted by the staff. Based on this information, the Commission concludes that considering that millions of consumers use escalators daily, the injury data are insufficient to indicate that escalators present an unreasonable risk of injury. Accordingly, the Commission has denied the petition. In reaching this decision, the Commission considered the relative priority of the risk of injury associated with escalators in the context of Commission resources available for rulemaking for all hazardous consumer products.

The Commission recognizes, however, that skirt obstruction devices and allowable side clearance may be factors in the number and severity of entrapment injuries. Therefore, the Commission has indicated an interest in the staff encouraging an industry effort to determine whether skirt obstruction devices capable of detecting entrapment along the entire length of an escalator, and whether less side clearance than that currently permitted by A 17.1 would appreciably reduce the number and severity of these injuries. If a determination is made that the presence of more skirt obstruction devices and less side clearance would result in a significant reduction in number and severity of entrapment injuries, Commission staff would then encourage and monitor appropriate amendments of ANSI A 17.1.

Copies of the petition and the staff's briefing package to the Commission on the petition may be obtained from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

Dated: October 10, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Army

DISCHARGE REVIEW BOARDS

Modification of Army, Navy, and Air Force Discharge Review Boards Index

Notice is made that the Army, Navy, and Air Force Discharge Review Boards have modified the index which was published in the FEDERAL REGISTER of February 18, 1977 (42 FR 10028). There is no change in the purpose and publication schedule previously announced.

The basic purpose of this modification is to include in the subject listing of the index, terminology contained in DOD Directive 1332.28 that was published in the FEDERAL REGISTER on March 31, 1978 (43 FR 13564). Modification for this purpose was specifically ordered on August 23, 1978, in the case of *Urban Law Institute of Antioch College, Inc., et al., v. Secretary of Defense*, No. 76-0530 (D.D.C., Aug. 23, 1978). Other modifications were made to publicly explain the use of the index, and to better conform the subject listing in accordance with terminology basic to the discharge process in the military services.

The new indexing procedure will improve the access of applicants, counsel and the public to the decisions of the Discharge Review Boards. The Department of Defense has been ordered by the District Court to use the new terminology in the index scheduled to be published in the last week of November 1978. This will entail indexing several thousand decisions under the new terminology. In order to accomplish this task in an efficient and effective manner, the military departments must begin immediately to use the new index terminology. Therefore, notice and prepublication of the new terminology for public comment is impracticable, unnecessary, and contrary to the public interest.

Effective date: October 6, 1978.

Dated: October 6, 1978.

WILLIAM E. WEBER,
Colonel, IN, President, Army Discharge Review Board.

SUBJECT/CATEGORY LISTING
TO ACCOMPANY THE
ARMED FORCES DISCHARGE REVIEW/CORRECTION BOARDS INDEX

FOREWORD

This listing is provided for use with the Armed Forces Discharge Review/Correction Boards Index. Its purpose is to assign numerical codes to various "Reasons for Discharge" used in the index in connection with discharge cases, and to issues which have been identified as being addressed in both discharge and other types of cases.

This listing reflects a modification of Section I (Discharge Cases) to incorporate the terminology contained in Department of Defense Directive 1332.28, Discharge Review Board (DRB) Procedures and Standards. Discharge review cases listed in the Basic Index and Index Supplements 1, 2, 3, and 4 were indexed using the listing in section 1A. Discharge review cases listed in Supplement 5 (Nov. 78) and all subsequent supplements will be indexed using the listing in section IB. Section II (Nondischarge Cases) is unchanged from the original version.

This document is maintained and published by the DA Military Review Boards Agency as proponent agency for the Department of Defense. (DA Military Review Boards Agency, SFBA, Room 1E520, The Pentagon, Washington, D.C. 20310.)

CONTENTS

Section I—Discharge Case Index Numbers.
A—Index numbers used to index discharge cases listed in Basic Index and Supplements 1-4 (Numerical Codes 001.00-009.99).
B—Index numbers used to index discharge cases listed in Supplement 5 and all subsequent Supplements (Numerical Codes A00.01-A99.99).
Section II—Index numbers used to index nondischarge cases listed in Basic Index and all Supplements (Numerical Codes 100.00-199.99).

SECTION IA

Index numbers used to index discharge cases listed in Basic Index and Supplements 1-4.

(Numerical Codes 001.00-099.99)

OUTLINE TO THE REVISED SUBJECT/CATEGORY LISTING

Propriety Considerations

Part A—*Common Elements to All Discharges* (Index Nos (A01.00-A01.32))
Part B—*Common Elements to Discharges Where SM Has Right to Board Hearing* (Index Nos (A02.00-A02.32))
Part C—*Reasons for Discharge and Specific Elements Pertaining to These Discharges* (Index Nos (A03.00-A84.00))
Part D—*Specifically Retroactive Policy Changes* (Index Nos (A85.00-A89.00))

Equity Considerations

Part E—*Policy Changes Not Specifically Retroactive* (Index Nos (A90.00-A91.06))
Part F—*Quality of Service* (Index Nos (A92.00-A92.32))
Part G—*Capability To Serve* (Index Nos (A93.00-A93.30))
Part H—*Other Equitable Considerations* (Index Nos (A94.00-A98.00))

Other Considerations

Part I—*Administrative Actions Indirectly Related to Discharge* (Index Nos (A99.00-A99.16))
Part J—*Special Programs* (Index Nos (A00.00-A00.58))

SECTION 1

REVISED SUBJECT/CATEGORY LISTING (1978)

Propriety Considerations

Part A—Common Elements Throughout the Discharge Process

(A01.01/02) Separation action *not* properly Initiated

V 4 3 / 1 9 9

0 C 1 3 7 8

(A01.03/04) SM *not* properly notified of Separation Action
(A01.05/06) Improper physical Examination at Separation
(A01.07/08) Discharge Authority *not* proper
(A01.09/10) Characterization based in part on Prior Service
(A01.11/12) Characterization based in part on Pre-Service Record
(A01.13/14) Evidence in Record does *not* Support Reason for Discharge
(A01.15/16) SM *not* Separated within Reasonable Time after Approval
(A01.17/18) JAG (Legal) Review, when required, defective
(A01.19/20) SM's ratings/grades were *not* properly calculated or administered
(A01.21/22) Evidence Obtained in Violation of Article 31, UCMJ, (Self-incrimination) improperly considered
(A01.23/24) Evidence Obtained from Unlawful Search Improperly Considered
(A01.25/26) Hearsay Evidence Improperly Considered
(A01.27/28) Unsworn Testimony or Statements Improperly Considered
(A01.29/30) Exempt Evidence (Alcohol/Drug Rehabilitation Program) Improperly Considered
(A01.31/32) Other Evidence Improperly Considered, Including Defective Records of Disciplinary Offenses

Part B—Elements Common to Discharges Where SM Has Right to Board Hearing

(A02.01/02) Commander's Report improper
(A02.03/04) SM *not* properly notified of Rights to Request Board Hearing
(A02.05/06) SM *not* properly notified of Right to submit Statements
(A02.07/08) Improper Counsel for Consultation
(A02.09/10) Waiver of Board Hearing *not* proper
(A02.11/12) Improper Denial of Request for Board Hearing.
(A02.13/14) Improper Composition of Board
(A02.15/16) Improper Counsel for Representation
(A02.17/18) Ineffective Assistance of Counsel
(A02.19/20) Request for Witness improperly Denied
(A02.21/22) Command Intervention (influence) improper
(A02.23/24) Improper Denial of Request to Personally Appear
(A02.25/26) Recommendation of Board improper
(A02.27/28) Discharge Authority's approval improper in light of Board recommendation
(A02.29/30) Withdrawal of waiver not properly considered
(A02.31/32) Improper Vacation of Suspended Administrative Discharge

Part C—Reasons for Discharge and Specific Elements Pertaining to These Discharges

(A03.00) *Discharge for Expiration of Term of Service/Enlistment (ETS)*
(A03.01/2) SM did meet regulatory criteria for Honorable Discharge
(A03.03/4) Personal Decoration during Current Service *not* considered
(A03.05/6) Characterization based on Isolated Acts of Indiscipline.
(A03.07/8) Characterization based on Mental Status or other Medical Evaluation
(A03.09/10) Characterization improperly changed by Commanding Officer of Transfer Activity, and appropriate entries *not* made in file showing reason
(A04.00) *Discharge For CONVENIENCE OF GOVERNMENT (See Specific Categories A05.-A30. below)*
(A05.00) Reduction in Strength (Service Manpower)
(A06.00) Erroneous Induction or Enlistment
(A07.00) Early Separation Under Directed Programs
(A08.00) Discharge on Basis of Alien Status
(A09.00) Lack of Jurisdiction
(A10.00) Sole Surviving Son/Daughter or Family Member
(A11.00) Concealment of Arrest Record
(A12.00) Secretarial Authority
(A13.00) Discharge for Obesity
(A14.00) Discharge for Motion/Travel Sickness
(A15.00) Inability to Perform Duties Due to Parenthood
(A16.00) Discharge to Accept Commission
(A17.00) Discharge for Enlistment-Reenlistment
(A18.00) Physically Disqualified for Officer Candidate School
(A19.00) SM Erroneously Delivered Punitive Discharge Before Review Final
(A20.00) Discharge for Allergy to Clothing
(A21.00) SM Serving Constructive Enlistment with Defective Contract
(A22.00) Discharge for Pregnancy or Marriage
(A23.00) Discharge for Conscientious Objection
(A24.00) Marginal Performer Discharge (EDP/QMP): Non-Trainee
(A24.01/02) SM *not* properly Counseled by Command
(A24.03/04) SM met required Standards of Performance after award of MOS
(A24.05/06) SM *not* in Unit from which separated required Period of Time
(A24.07/08) SM did *not* consent to Discharge
(A24.09/10) Improper Counsel for Consultation (when required)
(A24.11/12) Statement submitted *not* considered
(A24.13/14) Not separated within specified Period of Time in Service
(A25.00) Marginal Performer Discharge (TDP): Trainee
(A25.01/02) SM *not* discharged within required Period of Time after Enlistment
(A25.03/04) Trainee Discharge *not* properly Characterized as Honorable
(A25.05/06) Trainee *not* properly Counseled by Command before Discharge
(A25.07/08) Statement/Rebuttal submitted *not* considered
(A26.00) Substandard Performance/Behavior (Petty Officer)
(A27.00) Substandard Performance/Behavior (Non-Petty Officer)
(A28.00) Condition/Medical Disability which interferes with Performance of duties, *not* a Physical Disability
(A29.00)
(A30.00)
(A31.00) Discharge for Physical Disability
(A32.00) Discharge (Characterization) as a Result of DRB Action
(A33.00) Discharge (Characterization) as a Result of other Official Board Action (e.g. Clemency & Parole, Correction of Military Records)
(A34.00) Discharge for Minority
(A35.00) Discharge for Dependency or Hardship
(A36.00) Discharge for Security Reasons
(A37.00)
(A38.00)
(A39.00)
(A40.00) *Discharge for UNSUITABILITY (See Specific Categories A41.-A48. below)*
(A40.01/02) Counseling Requirements *not* met or waived
(A40.03/04) Rehabilitative Requirements *not* met or waived
(A40.05/06) Mental status Evaluation (when required) not conducted
(A40.07/08) Requested Psychiatric or Psychological Report *not* conducted
(A41.00) Inaptitude
(A42.00) Personality Disorder (Old Character & Behavior Disorder)
(A42.01/02) Neuropsychiatric (NP) Evaluation *not* proper/present
(A43.00) Apathy
(A44.00) Enuresis
(A45.00) Alcohol Abuse
(A46.00) Homosexual Tendencies
(A46.01/02) No verified record of Homosexual Acts prior to or during Service
(A46.03/04) Did *not* Exhibit, profess or Admit to Homosexual Tendencies
(A46.05/06) Psychiatric/Psychological Evaluation (when required) *not* performed
(A47.00) Financial Irresponsibility
(A48.00) Unsanitary Habits
(A49.00)
(A50.00) *Discharge for UNFITNESS (See Specific Categories A51.-A58. below)*
(A50.01/02) Counseling Requirements *not* met or waived
(A50.03/04) Rehabilitative Requirements *not* met or waived
(A50.05/06) Mental Status Evaluation (when required) *not* conducted
(A50.07/08) Requested Psychiatric or Psychological Report *not* conducted
(A51.00) Frequent Involvement with Civil or Military Authorities
(A52.00) Sexual Perversion
(A53.00) Drug Use, Sale, or Possession
(A54.00) Established Pattern of Shirking
(A55.00) Established Pattern of Failure to Pay Debts
(A56.00) Established Pattern of Failure to Support Dependents
(A57.00) Homosexual Acts
(A57.01/02) No confirmed proposal, solicitation, attempt or performance of Homosexual Acts
(A57.03/04) Isolated Incident stemmed from Immaturity, Curiosity or Intoxication
(A57.05/06) Psychiatric/Psychological Evaluation (when required) not conducted
(A58.00) Unsanitary Habits
(A59.00)
(A60.00) *Discharge for MISCONDUCT (See Specific Categories A61.-A66. below)*
(A61.00) Conviction by Civil Authorities (Foreign or Domestic)
(A61.01/02) No Conviction which met UCMJ Punishment Standards

(A61.03/04) Discharged before Appeal Action completed
(A61.05/06) Discharge *not* in accordance with Policy for Non-U.S. Convictions
(A61.07/08) Mental Status Evaluation (when required) *not* conducted
(A61.09/10) Improper Discharge after Construction Waiver
(A62.00) Fraudulent Enlistment
(A62.01/02) Fraudulent Entry *not* substantiated
(A62.03/04) Mental Status Evaluation (when required) *not* conducted
(A62.05/06) Recruiter Misconduct
(A63.00) Prolonged Unauthorized Absence (Extended AWOL/Desertion)
(A63.01/02) Unauthorized Absence (AWOL/Desertion) *not* continuous 1 year of more
(A63.03/04) Mental Status Evaluation (when required) *not* conducted
(A64.00) Frequent Involvement with Civil or Military Authorities (See Procedural Elements under UNFITNESS A50.01-08)
(A65.00) Homosexual Acts (See Procedural Elements under UNFITNESS A50.01-08; and A57.01-06)
(A66.00) Drug Abuse (See Procedural Elements under UNFITNESS A50.01-08)
(A67.00)
(A68.00) Bad Conduct Discharge (BCD)
(A68.01/02) BCD not affirmed on Appellate Reivew
(A69.00) Discharge for Alcohol/Drug Rehabilitation Failure
(A69.01/02) SM was *not* Rehabilitative Failure
(A69.03/04) SM was discharged prior to Minimal Treatment
(A69.05/06) Discharge *not* properly characterized as Honorable
(A69.07/08) Improper Counsel for Consultation
(A70.00) *Request for Discharge for GOOD OF SERVICE (GOS) for Conduct which rendered SM triable by CM (See Specific Categories A71.-A77. below)*
(A70.01/02) Charges *not* preferred
(A70.03/04) Offense charged, *not* punishable by a "Punitive Discharge"
(A70.05/06) SM did *not* request For GOS Discharge
(A70.07/08) SM not properly counseled by Counsel for Consultation
(A70.09/10) Request for Withdrawal of GOS Discharge *not* processed/considered
(A70.11/12) SM Could *not* Knowingly request GOS Discharge at the time
(A70.13/14) No UCMJ Jurisdiction over the Person
(A70.15/16) No UCMJ Jurisdiction over the Offense
(A71.00) Conduct Triable by CM: AWOL
(A72.00) Conduct Triable by CM: Larceny
(A73.00) Conduct Triable by CM: Assault
(A74.00) Conduct Triable by CM: Drugs
(A75.00) Conduct Triable by CM: DOLO
(A76.00) Conduct Triable by CM: Disrespect
(A77.00) Conduct Triable by CM: Other
(A78.00) Discharge for Inaptitude or Unsuitability (Discharges prior to April 1959)
(A79.00) Discharge for Undesirable Habits or Traits (Discharges prior to April 1959)
(A80.00) *Officer Resignation (Involuntary)*
(A80.01/02) Officer did *not* tender Resignation
(A80.03/04) No Elimination Action initiated, when required
(A80.05/06) Request *not* forward to Military Department by GCM Authorities
(A81.00) Officer Elimination
(A82.00) Officer Expiration of Term of Service
(A83.00) Other (Not Specifically Covered)
(A84.00)

Part D—Policy Changes Made Specifically Retroactive

(A85.00) *Drug Use/Possession (LAIRD Memorandum)*
(A85.01/02) Discharge based solely on Drug related Conduct
(A85.03/04) Discharge based solely on Drug Use/Possession
(A85.05/06) Discharge based on Sale, but mere Conduit Theory applies
(A85.07/08) Service Record Otherwise Satisfactory
(A86.00) *Personality Disorder (Old Character and Behavior Disorder)*
(A86.01/02) No NP Evaluation
(A86.03/04) No NP Evaluation diagnosing a Personality Discharge
(A86.05/06) NP Evaluation *not* conducted by Proper Medical Authority
(A86.07/08) No Clear and Demonstrable Reason for a Less Than Honorable Discharge
(A87.00)
(A88.00)
(A89.00)

EQUITY CONSIDERATIONS (CONTENTIONS, ISSUES OR CONSIDERATIONS)

Part E—Policy Changes Not Specifically Retroactive

(A90.00) *Procedural*
(A90.01/02) Formal Notification of Separation Action
(A90.03/04) Opportunity to Respond (e.g. Submit Statements)
(A90.05/06) Opportunity for a Board Hearing
(A90.07/08) Right to Lawyer for Consultation
(A90.09/10) Right to Lawyer for Representation
(A90.11/12) Opportunity to Examine/Cross-Examine Witness(es)
(A90.13/14) Other
(A90.00) *Policy*
(A91.01/02) Character of Discharge Received by SM is not now Authorized or Required when a SM is Discharged for the Same Reason or Conduct
(A91.03/04) Conduct for which SM was Discharged No Longer Provides an Authorized Basis for Separation
(A91.05/06) Other

Part F—(A92.00) Quality of Service

(A92.01/02) Conduct and Efficiency Ratings
(A92.03/04) Awards and Decorations
(A92.05/06) Letters of Commendation
(A92.07/08) Combat Service
(A92.09/10) Wounds received in Action
(A92.11/12) Record of Promotions
(A92.13/14) Rank/Responsibility Level at which SM served
(A92.15/16) Other Acts of Merit
(A92.17/18) Date and Period of Service which is Subject of DRB Review
(A92.19/20) Prior (Honorable) Military Service
(A92.21/22) Post Service Conduct (Good Citizenship)
(A92.23/24) Record of Non-Judicial Punishment (indicates isolated/minor offenses)
(A92.25/26) Record of Courts-Martial Convictions (indicates isolated/minor offenses)
(A92.27/28) Record of Conviction(s) by Civil Authorities while in Service and part of Service Record (indicates isolated/minor offenses)
(A92.29/30) Record of Unauthorized Absences (indicates isolated/minor offenses)
(A92.31/32) Other

Part G—(A93.00) Capability To Serve (Factors Which Could Impair Ability To Serve)

(A93.01/02) Age and Maturity
(A93.03/04) Aptitude (Scores) and Education
(A93.05/06) Deprived Background
(A93.07/08) Marital/Family Problems
(A93.09/10) Personal Problems
(A93.11/12) Financial Problems
(A93.13/14) Discrimination: Religious
(A93.15/16) Discrimination: Racial
(A93.17/18) Drugs
(A93.19/20) Alcohol
(A93.21/22) Medical/Physical
(A93.23/24) Psychiatric/Psychological Problems (may include Situational Maladjustment)
(A93.25/26) Matters of Conscience
(A93.27/28) Waiver of Moral standards for Enlistment
(A93.29/30) Other

Part H—(A94.00) Other Equitable Considerations

(A94.01/02) Severity of Punishment (Civil or Military): Current Standards
(A94.03/04) Inaptitude ("Would but Couldn't")
(A94.05/06) Too Harsh: At Issuance, Discharge inconsistent with Standards of Discipline
(A94.07/08) Discharge in lieu of Court Martial: Although a Punitive Discharge was authorized, an Other Than Honorable Discharge was *too harsh* under the curcumstances
(A94.09/10) Multiple Minor Offenses (Multiplicity)
(A94.11/12) *Arbitrary and Capricious Command Actions* that Constitute a clear abuse of Authority, and which, although not amounting to Prejudicial or Legal Error, may have contributed to the Decision to Discharge or the Characterization of Service
(A94.13/14) Vietnam War Syndrome
(A94.15/16) Received Clemency Discharge

DEPARTMENT OF ENERGY

Bonneville Power Administration

DRAFT ENVIRONMENTAL STATEMENT

Public Meetings

The Bonneville Power Administration (BPA) hereby gives notice of two public meetings to be held to discuss BPA's fiscal year 1980 draft program environmental statement. The purpose of the meeting is twofold: To present to the public BPA's proposed fiscal year 1980 program (including major new proposed facilities included as part of this program), and to solicit comments from the public with respect to the environmental impact of BPA's proposed program. This fiscal year 1980 proposed program EIS also contains a draft facility planning supplement discussing proposed upgrading of electric service in the Salem-Albany area of northwestern Oregon, for which comments are also being solicited.

The meetings will be held as follows: November 14, 1978, at 7 to 10 p.m. in the Brush College Elementary School, 2623 Doaks Ferry Road NW., Salem, Oreg.; and November 16, 1978, at 7 to 10 p.m. in the Albany Main Public Library, 1390 Southeast Waverly Drive, Albany, Oreg.

For those who cannot attend the meetings, written comments will be accepted until the close of comment date, November 24, 1978. Copies of the environmental statement as well as additional or clarifying information may be obtained by writing or calling the Environmental Manager's Office, Bonneville Power Administration, P.O. Box 3621, Portland, Oreg. 97208, 503-234-3361, extension 5137.

Dated at Washington, D.C., this 6th day of October 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

Economic Regulatory Administration

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Availability of Draft Environmental Impact Statement and Public Hearing

AGENCY: Department of Energy.

ACTION: Notice of Availability of Draft Environmental Impact Statement and Public Hearing.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA), 42 U.S.C. 4332, et seq., and 10 CFR 208.15(a) and 305.9, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces the availability of a draft environmental impact statement prepared concerning the proposed issuance of a Notice of Effectiveness (NOE) to the following powerplant prohibition order recipient:

Docket No.	Owner	Generating station	Powerplant No.	Location
OFU-075, OFU-076	New England Electric System.	Brayton Point	1 and 2	Somerset, Mass.
OFU-077	New England Power Co.	do	3	Do.

Pursuant to a prohibition order issued to these powerplants on June 30, 1977, the DOE has performed an analysis and review of the environmental impact of the proposed issuance of an NOE to these powerplants and has determined that making the prohibition order effective will have a significant impact on the quality of the human environment, within the meaning of NEPA. DOE has prepared a draft environmental impact statement detailing significant impacts and now requests public comments. As a part of the public comment process, DOE will also receive oral statements at a public hearing. After all testimony and comments have been received and analyzed, a final environmental impact statement will be prepared and issued.

DATES: Comments by December 1, 1978, 4:30 p.m.; Requests to speak by November 8, 1978, 4:30 p.m.; Hearing Date: November 21, 1978, 2 to 5 p.m., 7 to 9 p.m., November 22, 1978, 9:30 a.m.

ADDRESSES: Written comments to Office of Public Hearing Management, Department of Energy, Box VU, Room 2313, 2000 M Street NW., Washington, D.C. 20461; requests to speak to DOE, Region I, 150 Causeway Street, Boston, Mass. 02114, telephone

V 4 3 / 1 9 9 0 C 1 3 7 8

number 617-223-5257, Attention: Kathy Healy.

HEARING LOCATION: Somerset Public Library, Meeting Room, 1464 County Street, Somerset Mass. 02726.

FOR FURTHER INFORMATION CONTACT:

Steven A. Frank, Division of Coal Utilization, Department of Energy, Room 7202, 2000 M Street NW., Washington, D.C. 20461, 202-254-6246.

J. Thomas Wolfe, Office of General Counsel, Department of Energy, Room; 8217, 20 Massachusetts Avenue NW., Washington, D.C. 20545, 202-376-4262.

Robert Stern, Division of NEPA Affairs/EV., Department of Energy, Room 7121 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9760.

SUPPLEMENTARY INFORMATION:

I. Background
II. Comment procedures
A. Written Comments
B. Public Hearing

I. Background

The prohibition order issued to the above-named powerplants, if made effective, would prohibit the use of natural gas or petroleum products as their primary energy source.

This order was issued on June 30, 1977 (42 FR 36292, July 14, 1977), under authority of section 29(a) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA) 15 U.S.C. 791 et seq., as amended by Pub. L. 94-163 and Pub. L. 95-70. The prohibition order provided, however, that in accordance with the requirements of 10 CFR 303.10(b), and 305.7, the order would not become effective until DOE had considered the environmental impact of making the order effective pursuant to 10 CFR 208.15(c) and 305.9, and until DOE had served the affected company with an NOE. The ERA, DOE had analyzed the potential environmental impacts that would result from the proposed NOE issuance to these powerplants. DOE has determined that the proposed issuance of an NOE for the prohibition order issued to the above-named powerplants will constitute a "major Federal action significantly affecting the quality of the human environment." Therefore, pursuant to 10 CFR 208.15(a) and 305.9, DOE has concluded that an environmental impact statement is required. Single copies of the draft environmental impact statement are available upon request from Mr. Steven A. Frank and Ms. Kathy Healy at the addresses indicated above. Copies of the draft statement also are available for public review in the DOE Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

II. Comment Procedures

A. Written Comments

Interested parties are invited to submit written comments with respect to this draft environmental impact statement to the Office of Public Hearing Management, Box VU, Department of Energy, Room 2313, 2000 M Street NW., Washington, D.C. 20461. All comments should be received by DOE no later than December 1, 1978, in order to insure consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted (one copy only) in accordance with the procedures set forth at 10 CFR 205.9(f). Any material not filed in accordance with such section will be considered to be nonconfidential. DOE reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

B. Public Hearing

The time and place for the hearing are indicated in the dates section of this notice. If you have an interest in this matter or represent a group or class of persons that has an interest in the matter, you may write to request an opportunity to speak. If selected to speak you will be notified by DOE, Region I, before 4:30 p.m., November 14, 1978, and must bring 7 copies (for the hearing panel's use) of your statement to the hearing site on the day of the hearing.

DOE reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination. Each speaker will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statement will follow the conclusion of each initial statement and will be subject to time limitations.

You may submit questions to be asked of any person making a statement at the hearing to DOE, Region I, at the address indicated in the address section of this notice, before 4:30 p.m., November 20, 1978. If you wish to ask a question at the hearing you may submit the question, in writing, to the presiding officer. The ERA, or, if the question is submitted at the hearing, the presiding officer will determine whether the question is relevant and whether time limitations permit it to be presented for answer.

The presiding officer will announce any further procedural rules needed for the proper conduct of the hearing.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the ERA and made available for inspection at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. You may buy a copy of the transcript from the reporter.

After all testimony and comments have been received and analyzed, a final environmental impact statement will be prepared and issued.

Issued in Washington, D.C., October 10, 1978.

BARTON R. HOUSE,
Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

[3128-01-M]

HANFORD GENERATING PROJECT

Amendment to Order Confirming and Approving Special Contract Rates for Sale of Thermal Power

On September 26, 1978, the Assistant Administrator for Utility Systems, Economic Regulatory Administration (ERA), upon request of the Assistant Secretary for Resource Applications (Assistant Secretary), issued an order confirming and approving special contract rates for the sale of thermal power and energy from the Hanford generating project, ERA Docket No. BPA 78-3. The order was published in the FEDERAL REGISTER on October 3, 1978 (43 FR 45630-1). The rates that were confirmed and approved in ERA's order are contained in contracts between the Bonneville Power Administration and investor-owned utilities (contract No. 14-03-79120) and between the Bonneville Power administration and direct-service industries (contract No. 14-03-79121). The order failed to specify that ERA's confirmation and approval of the rates contained in the direct-service industries contract applies to sales authorized by such contract of withdrawn Hanford project power to third parties as well as to sales of power to the direct-service industries. Therefore, the Acting Assistant Administrator for Utility Systems, Economic Regulatory Administration, hereby amends the order, issued September 26, 1978, confirming and approving the special contract rates to redesignate paragraph No. 3 of the Assistant Administrator's order on page 5 (43 FR 45631) as paragraph No. 4 and to insert the following as new paragraph No. 3:

3. The proposed rates and charges contained in contract No. 14-03-79121 are hereby confirmed and approved for a period ending June 30, 1983, for sales to entities other than the direct-service industries of that portion of Hanford project generation withdrawn by the Bonneville Power Administration pursuant to the provisions of such contract.

Issued in Washington, D.C., this 5th day of October 1978.

JERRY L. PFEFFER,
Acting Assistant Administrator for Utility Systems, Economic Regulatory Administration, Department of Energy.

Federal Energy Regulatory Commission

[Docket No. RP76-10 (PGA78-3)]

ARKANSAS LOUISIANA GAS CO.

Filing of Revised Tariff Sheets Reflecting Purchased Gas Cost Adjustment

OCTOBER 5, 1978.

Take notice that on September 29, 1978, Arkansas Louisiana Gas Co. (Arkla) tendered for filing 16th Revised Sheet No. 185 to its FERC Gas Tariff Original Volume No. 3, Rate Schedule No. X-26, to become effective November 1, 1978.

Arkla states that the purpose of 16th Revised Sheet No. 185 is to track producer and pipeline supplier price changes as of November 1, 1978, and to recover the accumulated deferred purchased gas costs as of July 31, 1978, through unit rate adjustments computed pursuant to provisions of Arkla's purchased gas cost adjustment clause contained in its FERC Rate Schedule No. X-26.

Arkla also states that copies of the revised tariff sheet and supporting data were mailed to Arkla's jurisdictional customer and other interested parties affected by this tariff change.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 19, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CP78-266, CP78-267]

BEAR CREEK STORAGE CO.

Technical Conference

OCTOBER 4, 1978.

In the matter of Bear Creek Storage Co., Southern Natural Gas Co., Tennessee Gas Pipeline Co., Southern Natural Gas Co., Tennessee Gas Pipeline Co. Take notice that a 1 p.m. on Tuesday, October 10, 1978, staff will meet with representatives of the above-captioned companies for the purposes of obtaining clarification of certain data already submitted regarding the calculation of depreciation allowance and other matters of accounting and finance.

The conference will be held in Room 3200 of the Commission's office at 941 North Capitol Street NE., and all parties may at their option attend.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-65 (PGA No. 78-4) (AP No. 78-1)]

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in FERC Gas Tariff

OCTOBER 4, 1978.

Take notice that Columbia Gas Transmission Corp. (Columbia) on September 29, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. Columbia states that this filing amends its filing of September 12, 1978, and proposes an effective date of September 2, 1978. Columbia states that the proposed changes are the result of the reduced rates of Texas Eastern Transmission Corp. at docket No. RP75-73, filed September 22, 1978, to become effective September 1, 1978. As a result of this revision, Columbia's revised rates herein proposed to become effective September 2, 1978, reflect a purchased gas cost adjustment which is $201,774 less than that filed by Columbia on September 12, 1978.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before October 20, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RP78-95]

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in FERC Gas Tariff

OCTOBER 4, 1978.

Take notice that Columbia Gas Transmission Corp. (Columbia) on September 29, 1978, tendered for filing the following revised tariff sheet to its FERC Gas Tariff, Original Volume No. 1, to become effective November 1, 1978: Forty-seventh Revised Sheet No. 16.

Columbia states the Forty-seventh Revised Sheet No. 16 is necessary in order to comply with Commission order issued January 20, 1975, at docket No. RP73-86 which provides for phased removal of its multiple zone system. In compliance with the above-mentioned order the rates contained in this filing reflect a further one-sixth movement to be effective November 1, 1978, toward a system-wide rate structure.

Copies of this filing were served upon the company's jurisdictional customers, interested State commissions, and to each of the parties set forth on the official service list in this proceeding.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commis-

V 43 / 199 0 OCT 13 78

sion's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 23, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

CONSOLIDATED GAS SUPPLY CORP.

Settlement Conference

OCTOBER 4, 1978.

Take notice that an informal settlement conference in the subject proceedings will be convened on October 12, 1978, at 11 a.m. in a conference room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceeding.

KENNETH F. PLUMB,
Secretary.

DISTRIGAS OF MASSACHUSETTS CORP.

Informal Conference

OCTOBER 4, 1978.

Take notice that on October 23, 1978, at 10 a.m., an informal conference of all interested persons will be convened concerning the above-captioned matter. The conference will be held at the offices of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, Room 8402.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance will not be deemed to authorize intervention.

All parties will be expected to appear fully prepared to discuss the use of flash-gas incinerators as directed in the Commission's letter order of September 8, 1978, page 2, condition 2.

[Docket Nos. ER78-417 and EL78-22]

KENTUCKY UTILITIES CO.

Order Accepting for Filing and Suspending Supplemental Service Agreement and Directing Further Compliance

SEPTEMBER 29, 1978.

On July 6, 1978, Kentucky Utilities Co. (KU) tendered for filing in docket No. ER78-417, a proposed rate increase applicable to Jackson Purchase Electric Cooperative Corp. (Jackson Purchase) and other of KU's wholesale for resale customers.[1] The revised rate schedule, identified by KU as rate schedule WPS-78, was intended to govern service to Jackson Purchase at 19 existing delivery points.

By order issued on August 4, 1978, in docket Nos. ER78-417 and EL78-22, the Commission, inter alia, accepted KU's submittal for filing, denied certain motions, granted interventions, suspended the effectiveness of the proposed WPS-78 rate filing, and instituted hearing procedures. In addition, for reasons that were fully developed in the August 4 order, we dismissed an application for an order directing KU to permit an additional physical connection of facilities which was filed on May 12, 1978, by Jackson Purchase and Big Rivers Electric Corp. (Big Rivers), in docket No. EL78-22, pursuant to section 202(b) of the Federal Power Act.

Jackson Purchase and Big Rivers sought the interconnection with KU's facilities so that Jackson Purchase could receive a portion of its power requirements from KU at a new twentieth delivery point (Reidland Substation). Based upon representations made by KU in answer to the section 202(b) application, we determined that it would prove counterproductive to initiate independent section 202(b) proceedings. Instead, the August 4 order directed KU to supplement its WPS-78 rate filing, on or before September 6, 1978, by submitting an appropriate service agreement applicable to the proposed Reidland Substation delivery point.[2] We further directed KU to stand ready to commence service at the Reidland Substation as of the effective date designated for the additional service agreement, in accordance with the rates, terms, and conditions of the WPS-78 filing, subject to such refunds as may be required in docket No. ER78-417.

On September 1, 1978, in response to those directives, KU tendered for filing an unexecuted service agreement for the Reidland delivery point,[3] together with the WPS-78 rate schedule and the pertinent rules, regulations, terms, and conditions. KU's submittal is, in all material respects, identical to its prior filing in docket No. ER78-417 for Jackson Purchase's existing delivery points.

Subsequently, on September 6, 1978, KU filed a response to the Commission's order of August 4, 1978.[4] This response initially relates KU's unsuccessful efforts to secure an executed copy of the subject service agreement from Jackson Purchase. According to KU, Jackson Purchase's refusal to execute the offered service agreement has precluded KU from complying with the Commission's requirement that KU supplement its earlier filing by submitting such a service agreement. KU's observation is somewhat curious in view of the fact that its September 1, 1978 submittal, as indicated above, purported to be in compliance with the Commisson's August 4, 1978 order.

With regard to the second requirement set forth in our prior order, KU states that it does currently stand ready to initiate service at the Reidland Substation in accordance with its earlier representations. However, KU asserts that its consent to the proposed new delivery point has been and continues to be limited by the prerequisite that Jackson Purchase first execute a suitable contract prescribing the applicable rates, terms, and conditions of service. The substance of KU's response is summarized in its concluding statement that KU should not be expected to prejudice its rights by voluntarily commencing service at the new delivery point only under a rate schedule and without a reciprocal contractual commitment by Jackson Purchase.

Jackson Purchase addresses the foregoing contentions in a reply to KU's response which was filed by Jackson Purchase on September 11, 1978. Jackson Purchase notes that our August 4, 1978 order did not require KU to submit an executed agreement for service at the Reidland Substation delivery point, but simply directed KU to tender a service agreement in a format similar to the previously filed for Jackson Purchase's other 19 delivery points.

Jackson Purchase correctly construes our prior order in these dockets, which neither required nor contemplated the submittal of an executed contract governing service at the new location. Each of the service agreements for Jackson Purchase which KU filed in docket No. ER78-417 was, in fact, unexecuted. Moreover, the rates, terms and conditions applicable to the Reidland delivery point would not differ from those embodied in the remaining service agreements; the justness and reasonableness of the WPS-78 rates as well as each of the contractual terms and conditions proposed by KU will be subject to inquiry in the hearing to be convened in docket No. ER78-417. As we indicated in the August 4, 1978 order, that hearing will provide a suitable forum in which to litigate disputed provisions of the proposed service agreements and rate schedule as applied to any of Jackson Purchase's delivery points, including the Reidland Substation. As with any service agreement or rate schedule which is permitted to become effective subject to refund, the terms and conditions of KU's proposed agreement will apply to service at the Reidland Substation, pending such modifications as the Commission may determine to be appropriate and in the public interest. We continue to believe that the procedures established in our order of August 4, 1978, fully accomodate the interests of the public and of the parties to this proceeding.

KU's continued recalcitrance with respect to initiation of service at the Reidland Substation is in derogation of our earlier order and such noncompliance with Commission mandates cannot be countenanced. Accordingly, we will require KU to make service available at the Reidland delivery point immediately.

Despite KU's apparent disclaimer of compliance with the supplemental filing requirement set forth in the August 4, 1978, order, we find that KU's submittal of September 1, 1978, does comport with the Commission's directive. Our August 4 order provided that upon timely filing of the supplemental service agreement, we would grant an effective date for that agreement coincident with the effective date established for the filing submitted in docket No. ER78-417. At that time we anticipated that the Reidland interconnection would be energized on or about September 6, 1978, in compliance with the Commission's order. Such has not been the case and it would be unreasonable to permit KU to invoke certain minimum monthly bill provisions prescribed in the proposed service agreement prior to the actual initiation of service under that agreement. Accordingly, we will accept the additional service agreement and accompanying documents for filing and suspend them, to become effective subject to refund, upon initiation of service at the Reidland Substation as herein ordered.

The Commission orders:

(A) KU is hereby directed, in accordance with the Commission's order of August 4, 1978, in docket Nos. ER78-417 and EL78-22, to immediately stand ready to initiate service to Jackson Purchase at the Reidland Substation delivery point and to make such service available under the rates, terms, and conditions specified in KU's September 1, 1978, submittal, subject to refund and such modifications as the Commission may hereafter direct.

(B) Pending the hearing initiated by the Commission's order of August 4, 1978, and decision thereon, KU's supplemental filing of September 1, 1978, is hereby accepted for filing and suspended, to become effective subject to refund, upon initiation of service at the Reidland delivery point as ordered in paragraph (A) above.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. RP74-100 (PGA78-8)]

NATIONAL FUEL GAS SUPPLY CORP.

Order Accepting for Filing and Suspending Proposed PGA Rate Increase, Initiating Hearing, and Establishing Procedures

SEPTEMBER 29, 1978.

On August 28, 1978, National Fuel Gas Supply Corp. (National Fuel) filed revised tariff sheets [1] to become effective October 1, 1978, reflecting (1) a 0.54-cent-per-Mcf increase in current purchased gas costs of $1,065,680 annually from pipeline and producer suppliers, (2) a 5.11-cent decrease in the surcharge adjustment [2] to recover deferred purchase gas costs of $3,885,439, and (3) the elimination of a 12.18-cent special refund credit surcharge as of September 30, 1978.[3]

National Fuel's proposed PGA rates include the costs of local purchases from small producers within New York. Based on a review of this filing as well as other data in our files concerning the physical location and operation of this pipeline system, the Commission has concluded that these volumes purchased locally cannot flow across the New York border and into Pennsylvania, the other State served by National Fuel. Because this gas is produced, transported, and consumed totally within the State of New York, these sales and the prices paid to the producers are not subject to the Commission's jurisdiction under section 1(b) of the Natural Gas Act.[4] Nonetheless, the Commission has full jurisdiction over National Fuel's collection of these purchased gas costs from its customers. *See, Colorado Interstate Gas Company,* docket No. RP72-122 and RP78-51, order issued September , 1978.

This PGA filing indicates that these local purchases have been made at rates in excess of the nationwide rates. These excess rates apparently result from "favored nations" clauses in the New York producer contracts. There is insufficient evidence for the Commission to find that the prices paid for these purchases were at rates a prudent pipeline would have paid under similar circumstances. Accordingly, the Commission shall suspend National Fuel's PGA filing for 1 day, until October 2, 1978, at which time it may be made effective subject to refund. We will also set for hearing the question of the prudence of these nonjurisdictional purchases.

Public notice of National Fuel's filing was issued on September 7, 1978, with protests and petitions to intervene due on or before September 20, 1978.

The Commission orders: (A) National Fuel's proposed tariff sheets referenced herein are hereby accepted for filing and suspended for 1 day, until October 2, 1978, when they shall become effective subject to refund.

(B) Pursuant to the authority of the Natural Gas Act and the Commission's

---

[1] Old Dominion Power Co., Berea College, city of Nicholasville, Ky. (No. 3 substation), and city of Paris, Ky.

[2] KU's filing in docket No. ER78-417 included nineteen unexecuted service agreements and rate WPS-78 to encompass Jackson Purchase's existing delivery points.

[3] Designated as: *Kentucky Utilities Co.*, rate schedule FERC No. 122 (service agreement), supplement No. 1 (rate WPS-78), supplement No. 2 (rules, etc.).

[4] We note that KU has not properly pursued or exhausted its available remedies before this Commission. No application for rehearing or petition for reconsideration of our order was filed by KU. Rather, KU submitted a document captioned as a "response" to the August 4, 1978 order, which makes no specific prayer for relief. If we were to construe KU's pleading as, in essence, seeking rehearing of the underlying order, that pleading was untimely under Section 313(a) of the Federal Power Act and under section 1.34 of our regulations, both of which require such submittals to be filed within 30 days after the challenged order. Despite KU's waiver of its appropriate administrative remedies, we will address the issues raised in KU's "response" as a matter of discretion in order to alleviate any misconceptions and to direct compliance with our earlier order, thereby expediting initiation of service to Jackson Purchase at the new delivery point.

[1] Twenty-first Revised Sheet No. 4 to FERC Gas Tariff, Original Vol. No. 1.

[2] This would decrease the surcharge adjustment from 8.07 cents to 2.96 cents.

[3] Commission order issued Dec. 15, 1977, in docket No. RP74-100 (PGA78-1 and 78-1A) provided for a special refund surcharge credit to be effective Dec. 1, 1977, through Sept. 30, 1978.

[4] Opinion No. 777, issued Sept. 30, 1976, *Colorado Interstate Gas Company,* docket Nos. CP75-323 and CP75-300.

V 4 3 / 1 9 9

rules and regulations, a public hearing shall be held in this proceeding to determine the prudency of National Fuel's nonjurisdictional New York producer purchases.

(C) National Fuel's case-in-chief in support of the prudence of the above-referenced purchases shall be filed with the Commission no later than October 27, 1978.

(D) Staff's statement of position shall be filed on or before November 30, 1978.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge (18 CFR 3.5(d)) shall convene a settlement conference in this proceeding to be held within 10 days after the service of staff's statement of position in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The presiding administrative law judge is authorized to establish such further procedural dates as may be necessary and to rule on all motions (except motions to sever, consolidate, or dismiss) as provided for in the rules of practice and procedure.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER78-621]

NEW BEDFORD GAS & EDISON LIGHT CO.

Filing of Unit Power Sale Rate Schedule

OCTOBER 4, 1978.

Taken notice that on September 21, 1978, New Bedford Gas & Edison Light Co. (New Bedford) filed a rate schedule governing the sale of New Bedford of a portion of its entitlement to capacity and related energy produced by Canal Electric Co.'s Unit No. 2 (the Unit).

By provisions of the tendered rate schedule, New Bedford indicated that it proposes to sell to the Holden Municipal Light Department 0.1712 percent of the net capability of the Unit (as defined at article III of the tendered rate schedule) plus the energy related thereto for a 12-month period beginning November 1, 1978.

A copy of this filing has been served upon Holden, according to the company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 13, 1978. Protests will be considered by the Commission in determining the appropraite action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28983 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Project No. 2738]

NEW YORK STATE ELECTRIC & GAS CORP.

Application for Major License (Constructed)

OCTOBER 5, 1978.

Take notice that on November 8, 1973, New York State Electric & Gas Corp. (NYSEG) (correspondence to: L. Theodore Everett, Vice President, New York State Electric & Gas Corp., P.O. Box 287, Ithaca, N.Y. 14850, and Huber, Magill, Lawrence & Farrell, 99 Park Avenue, New York N.Y. 10016) filed an application for a major license with the Federal Energy Regulatory Commission for the constructed project No. 2738 located on the Saranac River in Clinton County, N.Y.

The project consists of four developments:

A. High Falls, which is located near Moffittsville, consists of: (1) A reinforced concrete gravity dam, 274 feet wide and 65 feet high; (2) an eastern wingwall 80 feet long and a western one 320 feet long; (3) a reservoir with 550 acre-feet of storage at a normal pool elevation of 1032.0 feet msl; (4) a horseshoe-shaped forebay canal 800 feet long and 250 feet wide; (5) a steel penstock 10 feet in diameter and 1,442 feet long; (6) an 11- by 12-foot concrete-lined tunnel 3,581 feet long; (7) another steel pipe penstock 6 feet in diameter and 487 feet long; (8) a steel surge tank 30 feet in diameter and 67 feet high; (9) a concrete and brick powerhouse 5,200 feet downstream from the dam; (10) two generators rated 4.0 MW each under a design head of 255 feet and one generator rated at 6.1 MW under a head of 230 feet; and (11) appurtenant facilities.

B. Cadyville, which is located 10 miles downstream from the High Falls Development, consists of: (1) A reinforced concrete gravity dam 237 feet wide and 50 feet high with stone masonry and concrete wingwalls; (2) a reservoir with 575 acre-feet of storage at crast elevation of 726.33 feet msl; (3) a concrete intake structure 62 feet long and 20 feet wide leading to a steel penstock 10 feet in diameter and 1,654 feet long; (4) a two-story brick and concrete powerhouse 1,350 feet downstream from the dam; (5) two generating units rated at 1.2 MW each under a design head of 77 feet; and (6) appurtenant facilities.

C. Mill "C" which is approximately 4,000 feet downstream from the Cadyville Development, consists of: (1) A stone masonry gravity dam approximately 350 feet wide and 57 feet high; (2) a reservoir with 20 acre-feet of storage at a crest elevation of 649.2 feet msl; (3) a riveted steel penstock 402 feet long ranging in diameter from 9.5 to 12 feet; (4) a cinder block and stone masonry powerhouse 400 feet downstream from the dam; (5) two generating units, one rated at 1.25 MW and one at 1.0 MW, each under a design head of 66 feet; and (6) appurtenant facilities.

D. Kent Falls, located 1 mile below mill "C" consists of: (1) A reinforced concrete hollow arch dam, 165 feet wide and 58 feet high; (2) a reservoir with 95 acre-feet of storage at a normal pool elevation of 580.27 feet msl; (3) a stone and concrete headworks structure; (4) a steel penstock 11 feet in diameter and 2,668 feet long, bifurcating into two steel penstocks each 6 feet in diameter and 140 feet long; (5) a surge tank 28 feet in diameter and 47 feet high; (6) a concrete and brick powerhouse 2,700 feet downstream from the dam; (7) two generating units each rated at 3.2 MW under a design head of 161 feet; and (7) appurtenant facilities.

The applicant integrates the power developed from the project into its main transmission system for delivery to its customers within New York State.

Existing recreational facilities include a swimming area, picnic tables, and fireplaces on land leased to the town of Plattsburgh, and a small boat launching ramp at the Cadyville site. The applicant states that, in general, steep banks, a steep river slope, and the small water surface areas of the ponds preclude the development of any future recreational facilities other than parking areas for fishermen.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's rules of practice and procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any protest or petition to intervene must be filed on or before December 8, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28984 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Docket No. CP78-546]

NORTHWEST PIPELINE CORP.

Application

OCTOBER 4, 1978.

Take notice that, on September 28, 1978, Northwest Pipeline Corp. (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in docket No. CP78-546 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Southwest Gas Corp. (Southwest), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

As stated in the application, Applicant proposes to transport for Southwest's account up to 6,000 [1] Mcf per day of natural gas. Specifically, Applicant requests authority to transport volumes of natural gas presently developed on an acreage dedicated to Southwest plus the authority to transport such additional volumes of natural gas as may be developed for sale and delivery to Southwest under the acreage set forth in exhibit "A" to that certain agreement dated September 12, 1978, and which would be connected to the facilities of Applicant.

The subject of the instant application is a certain Gas Purchase, Gathering and Transportation Agreement (Agreement), dated September 12, 1978, which provides, inter alia, that Applicant would gather, transport, and redeliver to Southwest up to 6,000 Mcf of natural gas per day which Southwest controls in Grand and Uintah Counties, Utah, and Garfield and Mesa Counties, Colo. The volumes of natural gas proposed for transportation herein would be those volumes developed on the acreage set forth in exhibit "A" to the Agreement which Applicant contemplates connecting to its natural gas transmission system, it is said.

It is stated that pursuant to the terms of the Agreement, Applicant would perform a wellhead gathering service for up to 6,000 Mcf per day for Southwest from present or future wells, located on the acreage set forth on exhibit "A" to the Agreement, which can be connected to Northwest's facilities. It is stated that the acreage dedicated to Southwest is in the general proximity of Applicant's mainline transmission facilities and/or Applicant's Bar-X gathering system in Garfield County, Colo., and Grand County, Utah. Applicant contemplates that it would construct and operate the facilities necessary to connect Southwest's existing wells to Applicant's Bar-X gathering system and/or to Applicant's transmission system. It is stated that the final determination of the precise route of the gathering facilities to connect the existing and future wells dedicated to Southwest would be dependent on the proximity of the individual wells to various of Applicant's facilities and upon the nature of the terrain in the general area. It is further stated that initially, Applicant would connect one existing well to its mainline transmission system.

It is stated that Applicant would transport, by displacement or otherwise, the volumes received at the wellhead for the account of Southwest, less 25 percent of such volumes which Applicant has the right to purchase from Southwest and less applicable fuel and line loss, to either:

(a) An existing point of interconnection between the facilities of Southwest and Applicant on the Idaho-Nevada border in Owyhee County, Idaho. It is said that volumes of natural gas to be transported and delivered at the Idaho-Nevada delivery point would be delivered to Southwest for utilization on Southwest's northern Nevada system; or

(b) A point of interconnection between the facilities of Applicant and El Paso in La Plata County, Colo. It is said that Applicant understands that El Paso would redeliver equivalent volumes to Southwest. It is further said that the volumes of gas delivered to El Paso for Southwest's account would be utilized by Southwest in Arizona or southern Nevada.

The application states that, in consideration for the proposed gathering and transportaion service, Applicant proposes to charge Southwest a gathering charge of 23.05 cents per Mcf plus a transmission charge which would be 20.69 cents per Mcf for those volumes physically transported on Applicant's main transmission system or 50 percent of that amount, i.e., 10.345 cents per Mcf, for those volumes delivered for Southwest's account by displacement. It is said that initially, any volumes delivered at the El Paso delivery point for the account of Southwest, would be by displacement and, therefore, Southwest would be charged the 50-percent rate. It is further said that volumes delivered to Southwest at the Idaho-Nevada border would be physically transported and Applicant would charge Southwest the full transportation rate of 20.69 cents for such deliveries.

It is said that initially, Applicant estimates that approximately 200 Mcf per day would be available for delivery by Southwest to Applicant for gathering and transportation thereunder.

It is also said that pursuant to the Agreement, Applicant would purchase from Southwest up to 25 percent of the volumes delivered for gathering and transportation at a cost equal to Southwest's actual cost of purchasing such volumes.

The application states that Applicant would construct any jurisdictional gathering facilities necessary to effectuate the proposal pursuant to the authorization granted Applicant by the order issued September 30, 1977, at docket No. CP77-507 for budget-type gas purchase facilities.

Any person desiring to be heard or to make any protest with reference to said application should, on or before October 19, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure provided for, unless otherwise advised, it will be un-

[1] Unless otherwise specified, all volumes are stated at 14.73 psia and 60° F.

[6740-02-M]

[Docket No. CP78-547]

NORTHWEST PIPELINE CORP.

Application

OCTOBER 4, 1978.

Take notice that on September 28, 1978, Northwest Pipeline Corp. (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in docket No. CP78-547 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Southwest Gas Corp. (Southwest), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

As stated in the application, Applicant proposes to gather and transport for Southwest's account up to 2,000[1] Mcf per day of natural gas. Specifically, Applicant requests authority to transport volumes of gas presently developed on an acreage dedicated to Southwest plus the authority to transport such additional volumes of natural gas as may be developed for sale and delivery to Southwest under the acreage set forth in exhibit "A" to that certain agreement dated September 12, 1978, and which would be connected by Applicant to the gathering system of RMNG Gathering Co. (RMNG).

The subject of the instant Application is a certian Gas Purchase, Gathering and Transportation Agreement (Agreement), dated September 12, 1978, which provides, inter alia, that Applicant would gather, transport and redeliver to Southwest up to 2,000 Mcf of natural gas per day, which Southwest controls in Grand and Uintah Counties, Utah and Garfield and Mesa Counties, Colo. The volumes of natural gas proposed for transportation herein would be those volumes developed on the acreage set forth in exhibit "A" to the Agreement which Applicant contemplates connecting to RMNG's gathering system.

It is stated that pursuant to the terms of the Agreement, Applicant would perform a wellhead gathering service for up to 2,000 Mcf per day for Southwest from present or future wells, located on the acreage set forth on exhibit "A" to the Agreement, which can be connected to RMNG's gathering system. The acreage dedicated to Southwest is in the general, proximity of RMNG's gathering system in Garfield County, Colo., it is stated. Applicant contemplates that it would construct and operate the facilities necessary to connect Southwest's existing wells to RMNG's gathering system. It is asserted that the final determination of the precise route of the gathering facilities to connect the existing and future wells dedicated to Southwest would be dependent on the proximity of the individual wells to various of RMNG's facilities and upon the nature of the terrain in the general area. Initially, it is stated, Applicant would connect three existing wells to RMNG's gathering system.

It is further stated that pursuant to a Gas Purchase, Transportation and Exchange Agreement between Applicant and RMNG, RMNG would transport all volumes delivered into its gathering system and redeliver equivalent volumes, adjusted for heating value and less any compressor fuel required, at a point of interconnection between the main transmission facilities of Applicant and the gathering facilities of RMNG located in Mesa County, Colo. It is stated that Applicant would transport, by displacement or otherwise, the volumes delivered by RMNG, for the account of Southwest, less 25 percent of such volumes which Applicant has the right ot purchase from Southwest and, less applicable fuel and line loss, to either:

(1) An existing point of interconnection between the facilities of Southwest and Applicant on the Idaho-Nevada border in Owyhee County, Idaho. It is stated that the volumes of natural gas to be transported and delivered at the Idaho-Nevada delivery point would be delivered to Southwest for utilization on Southwest's Northern Nevada System; or

(2) A point of interconnection between the facilities of Applicant and El Paso in La Plata County, Colo. It is stated that Applicant understands that El Paso would redeliver equivalent volumes to Southwest. The volumes of gas delivered to El Paso for Southwest's account would be utilized by Southwest in its Arizona and southern Nevada market areas.

It is said that Applicant and RMNG have agreed to amend further the gas purchase, transportation and exchange agreement, dated February 2, 1977 to add the additional delivery points and acreage necessary to accommodate the delivery to RMNG of the volumnes of gas dedicated to Southwest. It is further stated RMNG would charge Applicant 8 cents per Mcf for the gas transported for Southwest, which amount would be reimbursed by Southwest. RMNG would not have a right to purchase any of the gas delivered by Applicant from wells dedicated to Southwest, it is said.

The application states that in consideration for the gathering and transportation service proposed herein, Applicant proposes to charge Southwest a gathering charge of 23.05 cents per Mcf plus a transmission charge which would be 20.69 cents per Mcf for those volumes physically transported on Applicant's main transmission system or 50 percent of that amount, i.e., 10.345 cents per Mcf for those volumes delivered for Southwest's account by displacement. It is said that initially, any volumes delivered at the El Paso delivery point for the account of Southwest, would be by displacement and, therefore, Southwest would be charged the 50 percent rate. It is further said that volumes delivered to Southwest at the Idaho-Nevada border would be physically transported and Applicant would charge Southwest the full transportation rate of 20.69 cents for such deliveries. As heretofore stated, in addition to the aforementioned gathering and transportation charges, Southwest would reimburse Applicant for the 8 cents per Mcf to be paid RMNG for RMNG's transportation service.

It is said that initially, Applicant estimates that approximately 600 Mcf per day would be available for delivery by Southwest to Applicant for gathering and transportation hereunder.

It is also said that pursuant to the Agreement, Applicant would purchase from Southwest up to 25 per cent of the volumes delivered for gathering and transportation at a cost equal to Southwest's actual cost of purchasing such volumes.

The application states that Applicant would construct any jurisdictional gathering facilities necessary to effectuate the proposal herein pursuant to the authorization granted Applicant by the order issued September 30, 1977 in docket No. CP77-507 for budget-type gas purchase facilities.

Any person desiring to be heard or to make any protest with reference to said application should, on or before October 19, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28986 Filed 10-12-78; 8:45 am]

[1] Unless otherwise specified, all volumes are stated at 14.73 psia.

[Docket No. RP77-120]

STINGRAY PIPELINE CO.

Change in Tariff

OCTOBER 4, 1978.

Take notice that on September 21, 1978, Stingray Pipeline Co. (Stingray) tendered for filing Second Substitute Tenth Revised Sheet No. 4 to its FERC Gas Tariff, Original Volume No. 1.

Stingray submits that this revised tariff sheet reflects the settlement rate as approved by the Commission letter order dated September 11, 1978, in docket No. RP77-120.

Stingray states that copies of its filing have been served on all customers, interested State commissions and parties to the proceeding.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 23, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants praties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28987 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Project No. 2854]

TOWN OF VIDALIA, LA.

Application for Preliminary Permit

OCTOBER 5, 1978.

Take notice that on June 16, 1978, and revised on September 19, 1978, the town of Vidalia, La. (correspondence to: Sidney A. Murray, Jr., Mayor, Town Hall, Vidalia, La. 71373, and J. B. Lancaster, Jr., Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, La. 70896), filed an application for a preliminary permit with the Federal Energy Regulatory Commission for the proposed Old River project No. 2854, to be located in Concordia Parish, La., about 1 mile southwest of the Mississippi-Louisiana border on the Old River control structure outflow channel which regulates flows between the Mississippi and Red-Atchafalaya Rivers.

The proposed project would use waters diverted by the Corps of Engineers between the Mississippi River and Red-Atchafalaya Rivers, navigable waters of the Unitcd States, and would affect lands of the United States under the jurisdiction of the Corps of Engineers.

The Old River project No. 2854 would be operated as a run-of-river project and would consist of: (1) A concrete dam approximately 65 feet high to provide approximately 11 feet of head; (2) a powerplant located approximately 2,000 feet down channel from the existing Corps of Engineers low sill structure; (3) 15 hydroturbine/generators each rated at 8.1 MW capable of total annual generation of 788.4 million kilowatt-hours; (4) 110 miles of 230 kV transmission lines, running both north to the vicinity of the town of Vidalia and south to Big Cajun station near New Roads, La.; and (5) appurtenant facilities.

A preliminary permit does not authorize construction. A permit, if issued, gives the permittee, during the term of the permit, the right of priority of application for license while the permittee undertakes the necessary studies and examinations to determine the engineering and economic feasibility of the proposed project, market for the power, and all other necessary information for inclusion in an application for license.

Applicant proposes to utilize power from this project to meet its present and anticipated load requirements with any surplus capacity or energy being sold to, or exchanged with, electric utilities in the area.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's rules of practice and procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriated action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any protest or petition to intervene must be filed on or before December 8, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28988 filed 10-12-78; 8:45 am]

[Docket No. RI78-94]

ADOBE OIL AND GAS CORP.

Notice of Petition for Special Relief

OCTOBER 5, 1978.

Take notice that on September 14, 1978, Adobe Oil and Gas Corp. (Adobe), 1100 Western United Life Building, Midland, Tex. 79701, filed a petition for special relief in Docket No. RI78-94 pursuant to section 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Adobe states rising operating expenses render production from its Mathis-Davis "A" No. 1 Well, located in the Keyes Area Field, Cimarron County, Okla., uneconomical under the present rate (36 cents). Adobe seeks a rate of 57 cents which it believes will enable it to recover the remaining reserves and to avoid abandonment. Gas produced from this well is sold to Panhandle Eastern Pipe Line Co.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirement of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 27, 1978. All protests filed with the Commission will be considered by it in determining the appropri-

V 43 / 199 0 C 13 78

ate action to be taken but will not serve to made the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No CP78—544]

COLUMBIA GULF TRANSMISSION CO. AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

OCTOBER 5, 1978.

Take notice that on September 28, 1978, Columbia Gulf Transmission Co. (Columbia), 3805 West Alabama, Houston, Tex. 77027, and Transcontinental Gas Pipe Line Corp. (Transco), P.O. Box 1396, Houston, Tex. 77001, (Applicants) filed in Docket No. CP78-544 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas by Columbia and the exchange of natural gas between Applicants, all as more fully set forth in the application on file with the Commission and open to public inspection.

Columbia requests authorization to transport up to 50,000 Mcf of natural gas per day through existing facilities for Transco pursuant to a transportation and exchange agreement dated August 8, 1978, between Applicants, which gas Columbia would receive into its existing facilities at the terminus of a pipeline system owned by Sea Robin Pipeline Co. (Sea Robin), near Erath, La., and transported to Columbia's Rayne, La., Compresssor Station (Exchange Point) at which point, Columbia would retain such gas as exchange gas.

Pursuant to said August 8, 1978, Agreement, Columbia would deliver to Transco at a proposed point of interconnection in Terrebonne Parish, La. the thermal equivalent of the gas received by Columbia at the terminus of the Sea Robin pipeline, adjusted for the removal of liquefiable hydrocarbons and for a pro rata share of the volume of gas unaccounted for and/or used as fuel in the facilities through which the gas is transported to the Exchange Point, it is stated. Columbia also seeks authorization to operate for itself and Transco the facilities at the pont of delivery in Terrebonne Parish.

It is indicated that Columbia would need to construct minor facilities at Transco's expense, at the point of delivery in Terrebonne Parish.

The application states that Transco would pay Columbia for the proposed transportation service a monthly demand charge of 71.0 cents per Mcf (at 14.73 psia) of Contract Demand or such other charge as may be determined by the Commission in an appropriate proceeding.

Applicants assert that the proposed transportation arrangements would connect an estimated 37,300,000 Mcf of gas reserves to Transco's system for initial delivery during the latter part of the 1978-79 winter season which would likely be a period of high demand on its system.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, futher notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F PLUMB,
SECRETARY.

[FR Doc 78-29011 Filed 10-12-78, 8:45 am]

[6740-02-M]

[Docket No. CP78-529]

CONSOLIDATED GAS SUPPLY CORP., ET AL

Notice of Application

OCTOBER 5, 1978.

Take notice that on September 19, 1978, Consolidated Gas Supply Corp. (Consolidated), 455 West Main Street, Clarksburg, W. Va. 26301, Columbia Gas Transmission Corp. (Columbia), 1700 MacCorkle Avenue SE., Charleston, W. Va. 25314, and Texas Gas Transmission Corp. (Texas Gas), 3800 Frederica Street, Owensboro, Ky. 42301, filed in Docket No. CP78-529 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing limited-term transportation and storage service for the West Ohio Gas Co. (West Ohio), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Consolidated proposes to accept from West Ohio and inject into storage, during an injection period commencing on or about October 1, 1978, and ending no later than October 19, 1978, up to 200,000 Mcf 14.73 psia of natural gas at reasonably constant daily rates. Commencing on or about November 1, 1978, and ending on November 29, 1978, Consolidated would withdraw the subject storage gas and deliver the same to West Ohio, also at reasonably constant daily rates, it is said, and the entire transaction would take place in less than 60 consecutive days.

It is indicated as consideration for the described storage service, West Ohio has agreed to pay Consolidated in accordance with the rates contained in Consolidated's GSS rate schedule in its effective FERC Gas Tariff, adjusted to an average rate per dekatherm

equivalent of natural gas stored, which would be 30.0 cents per dt injected for storage.

The storage service proposed herein would be on a best-efforts basis and would be subordinate to Consolidated's other delivery obligations.

The gas to be delivered to Consolidated by West Ohio for storage would be delivered by means of concurrent reductions in daily takes by West Ohio from Columbia, one of West Ohio's suppliers, and by Columbia from one of its suppliers, Texas Gas, at an existing delivery point near Lebanon, Ohio. Contemporaneously, Texas Gas would increase its deliveries to Consolidated by an equivalent quantity at Texas Gas' delivery point to Consolidated also near Lebanon, Ohio, thus completing the interchange of gas from West Ohio to Consolidated, it is stated. It is stated that the return transportation of the stored quantities would be accomplished in reverse sequence, and no new facilities would be required to render the propsed service.

For those storage withdrawal volumes transported to West Ohio during the period November 1, 1978, through November 29, 1978, West Ohio has agreed to pay Columbia a transportation charge reflecting Columbia's average systemwide unit storage and transmission cost, exclusive of company use and unaccounted for gas, this being 23.5 cents per Mcf, it is indicated. Such transportation charge would be applied to the total volume of gas delivered by Texas Gas to Columbia near Lebanon, Ohio, for redelivery to West Ohio, it is said. Columbia shall retain for company use and unaccounted-for gas, 2.51 percent of the total volume of gas delivered by Texas Gas to Columbia near Lebanon, Ohio, for redelivery to West Ohio, during the period November 1, 1978, through November 29, 1978, the application indicates.

It is asserted that Texas Gas' verbal agreement with West Ohio to exchange by displacement the storage injection and withdrawal volumes would involve no rates or charges.

It is stated that West Ohio is in need of the storage service proposed herein in order to assure maintenance of adequate service to its high priority customers' requirements in the event of colder than normal weather during the upcoming heating season.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 30, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Consolidated, Columbia or Texas Gas to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-29012 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Docket No. CI78-1207]

ESTATE OF H. L. HUNT

Petition for Special Relief

OCTOBER 5, 1978.

Take notice that on September 18, 1978, the Estate of H. L. Hunt (Petitioner), 2900 First National Bank Building, Dallas, Tex. 75202, filed a petition for special relief in Docket No. CI78-1207.

Petitioner states that on Juanuary 17, 1956, in Docket No. G-10335 the Federal Power Commission issued a certificate of public convenience and necessity to H. L. Hunt to make sales of gas in interstate commerce to Trunkline Gas Co. from the Clear Creek Field located in Beauregard and Allen Parishes, La.[1] By FPC order issued April 30, 1975, in Docket No. G-4866, et al. The certificate of public convenience and necessity in Docket No. G-10335 was amended by substituting the Estate of H. L. Hunt in lieu of H. L. Hunt as certificate holder.

Petitioner further states that on January 13, 1975, the Estate of H. L. Hunt and Shenandoah Oil Corp. entered into a gas gathering and compression agreement. Under this agreement, Petitioner, in its unit facilities, gathered, dehydrated, and compressed gas produced by Shenandoah for delivery to Trunkline Gas Co. Petitioner believes that Shenandoah Oil Corp. holds a small producer certificate which covers its gas sales to Trunkline.

Petitioner's sales to Trunkline ceased in December of 1976 due to insufficient production. However, Petitioner states that during the calendar year 1977, Shenandoah's gas was flowing through the unit facilities of Petitioner, and that Petitioner inadvertently used 43,492 Mcf of Shenandoah's gas for its own unit operations for the production of oil. Since the unit has been unproductive, Petitioner is without gas with which to compensate either Shenandoah or Trunkline.

Petitioner requests authorization to pay to either Trunkline Gas Co. or Shenandoah Oil Corp. a sum of money as consideration for the gas inadvertently diverted. In the event that Trunkline Gas Co. objects to Petitioner's proposal for payment and insists upon additional remedies, Petitioner requests authorization to purchase 43,492 Mcf of gas which is not dedicated in interstate commerce and to cause that gas to be delivered to Trunkline Gas Co. In the event that such a purchase is necessary Petitioner further requests that the Commission's authorization be structured so as to subject the sellers of said gas to the jurisdiction of the Commission for this limited purpose only.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 27, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to in-

[1] This proceeding was commenced before the FPC. By the joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC. The term "Commission", when used in the context of action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[6740-02-M]

[Docket No. RI78-95]

JOSEPH P. MUELLER

Petition for Special Relief

OCTOBER 5, 1978.

Take notice that on September 15, 1978, Joseph P. Mueller (Petitioner), 1010 Wilson Building, Corpus Christi, Tex. 78476, filed a petition for special relief in Docket No. RI78-95 pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Petitioner requests authorization to charge 101.21¢ per Mcf at 14.65 psia for the sale of gas from its Tomas Saenz No. 1 Well and its Isabelle R. Ferrell "C"-1 Well, Ramirena Field, Live Oak County, Tex., to Valley Gas Transmission Co. Petitioner asserts that due to water influx and lower flowing pressures additional two-stage compression is required in order to continue production. Therefore, petitioner maintains that the above mentioned rate increase is necessary if future production is to be economically feasible.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 27, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. EL78-34]

METROPOLITAN SANITARY DISTRICT OF GREATER CHICAGO

Granting Second Extension of Time

OCTOBER 2, 1978.

On September 22, 1978, Counsel for the Metropolitan Sanitary District of Greater Chicago filed a motion for a second extension of time within which to answer the Commission's Order to Show Cause issued August 14, 1978, in the captioned proceeding. The motion noted that a preliminary draft form has been submitted to the Commission.

Upon consideration, notice is hereby given that a second extension of time is granted to and including October 11, 1978, for the Metropolitan Sanitary District of Greater Chicago to file a complete response to the Show Cause Order in this proceeding.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-29026 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Docket No. CP74-316]

MICHIGAN WISCONSIN PIPE LINE CO.

Notice of Amendment

OCTOBER 5, 1978.

Take notice that on September 21, 1978, Michigan Wisconsin Pipe Line Co. (Applicant), One Woodward Avenue, Detroit, Mich. 48226, filed in Docket No. CP74-316 an amendment to its pending petition to amend filed in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to provide for the construction and operation of two 3,600 horsepower compressor units, in lieu of the 3,000 horsepower units which Applicant previously requested authorization to construct and operate, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of July 7, 1977, in the instant docket Applicant was authorized, among other things, to acquire and develop as an underground storage field the Leonard Field in Oakland County, Mich., and that on May 4, 1978, Applicant filed a petition to amend said order so as to authorize the acquisition and development for underground natural gas storage of the South Chester 15 Field in Otsego County, Mich., including the construction and operation of facilities incident thereto, in lieu of developing the Leonard Field, which facilities included two 3,000 horsepower compressor units.

The amendment states that Applicant solicited and received quotations from engine manufacturers for the 3,000 horsepower compressor units. However, the engine manufacturer submitting the lowest quotation found, in compiling performance curves, that its 3,600 horsepower compressor units had distinct advantages over the smaller units and suggested that consideration be given to their selection, it is said. Applicant states that in response to this suggestion, it requested and has received from the manufacturer a formal quotation of the 3,600 horsepower units, and that after a detailed engineering analysis, it has concluded that the 3,600 horsepower units are preferable for the following reasons:

1. The 3,600 horsepower unit is environmentally superior in that its nitrogen oxide emissions are lower.

2. The larger engines would permit higher rates of injection into storage early in the storage injection cycle.

3. The cost of the proposed 3,600 horsepower units is lower than the cost estimate of the 3,000 horsepower units. The bid price for the two 3,600 horsepower units is $2,092,712, or some $100,000 less than had been estimated, it is said. It indicated that an offsetting factor is the increased installation cost of the larger units. Even after reflecting this increase, the net increase in the total cost of the compressor station is only $173,000, it is stated.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-9502]

MINNESOTA POWER & LIGHT CO.

Granting Extension of Time

OCTOBER 6, 1978.

On September 25, 1978, Counsel for Minnesota Power & Light Co. (M.P. & L.) filed a motion for extension of time within which to comply with ordering paragraph (B) of Commission opinion No. 20 issued August 3, 1978 in the captioned proceeding. The motion notes that M.P. & L. has recently complied with numerous Commission data requests.

Upon consideration, notice is hereby given that an extension of time is granted to and including October 16, 1978, for M.P. & L. to comply with ordering paragraph (B) of Commission opinion No. 20 in this proceeding.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-538]

MOUNTAIN FUEL SUPPLY CO.

Notice of Application

OCTOBER 5, 1978.

Take notice that on September 26, 1978, Mountain Fuel Supply Co. (Mountain Fuel), 180 East First South Street, P.O. Box 11368, Salt Lake City, Utah 84139, filed in docket No. CP78-538 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of up to 1,000 Mcf per day of natural gas with Northwest Pipeline Corp. (Northwest), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The application indicates that Northwest has certain gas reserves committed to it in the Yellow Creek Unit in Uinta County, Wyo., which is remote from Northwest's existing system and that Mountain Fuel has natural gas gathering and transmission facilities in said area and is willing to transport and exchange natural gas with Northwest. It is stated that Mountain Fuel and Northwest have entered into a gas purchase, transportation, and exchange agreement, dated June 22, 1978, providing for the subject proposal.

Mountain Fuel proposes to receive gas delivered by Northwest at a point on Mountain Fuel's gathering facilities in Uinta County, Wyo. Mountain Fuel would, under its proposal, then redeliver by displacement, equivalent volumes, at an existing point of interconnection between the facilities of Mountain Fuel and Northwest in Sweetwater County, Wyo. It is asserted that Mountain Fuel has the right to purchase up to 25 percent of the volumes delivered by Northwest. It is further stated that Mountain Fuel would charge 8 cents per Mcf for transportation of all gas not purchased by Mountain Fuel.

It is asserted that the subject agreement would be for a primary term of 10 years commencing on the first day of the month following the initiation of deliveries, and on a year-to-year basis thereafter.

It is asserted that the facilities necessary to gather Northwest's volumes and to connect these facilities to Mountain Fuel's transmission system are already in place.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. CP78-534]

NATURAL GAS PIPELINE CO. OF AMERICA

Notice of Application

OCTOBER 5, 1978.

Take notice that on September 22, 1978, Natural Gas Pipeline Co. of America (Applicant), 122 South Michigan Avenue, Chicago, Ill. 60603, filed in Docket No. CP78-534 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for South Texas Natural Gas Gathering Co. (South Texas) and the construction and operation of facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that Applicant and South Texas have entered into a Transportation Agreement dated August 18, 1978, whereby Applicant would receive on a best efforts basis up to 3,000 Mcf per day of natural gas from South Texas at a mutually agreeable point on Applicant's 8-inch lateral in Starr County, Tex. Applicant states that it would redeliver to South Texas equivalent volumes on an Mcf-for-Mcf basis at an existing interconnection located in Hidalgo County, Tex.

It is stated that Applicant proposes to construct and operate a 3-inch tap connection on its 8-inch lateral in Starr County, Tex., at a cost estimated by Applicant to be $7,100.

It is stated that under the terms of the abovementioned Agreement, Applicant would charge South Texas for the transportation service one-quarter of 1 cent (¼¢) per Mcf of transportation gas delivered to South Texas at the point of redelivery, or a monthly charge of $250, whichever is greater. The term of the agreement is 3 years from the date of first deliveries thereunder and thereafter until canceled by thirty (30) days notice of one party to the other, it is indicated.

It is further stated that the environmental impact of construction and operation of the proposed facilities would be minimal.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no peti-

V 43 / 199 0 OCT 13 78

tion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP71-125 (PGA No. 78-2)]

NATURAL GAS PIPELINE CO. OF AMERICA

Granting Revised Procedural Schedule

OCTOBER 5, 1978

On September 25, 1978, Counsel for Natural Gas Pipeline Co. of America (Natural) filed a motion to revise the procedural schedule in the captioned proceeding pursuant to the Commission's order of August 31, 1978. The motion stated that staff counsel agrees to the proposed schedule revision.

Upon consideration, notice is hereby given that the following procedural schedule is established for this proceeding:

October 20, 1978—Service of Natural's response to interrogatories

October 31, 1978—Prehearing Conference

November 14, 1978—Service of Natural's case-in-chief

December 14, 1978—Staff's statement of position

[Project No. 2738]

NEW YORK STATE ELECTRIC & GAS Corp.

Application for Major License (Constructed)

OCTOBER 5, 1978.

Take notice that on November 8, 1973, New York State Electric & Gas Corp. (NYSEG) (correspondence to: L. Theodore Everett, Vice President, New York State Electric & Gas Corp., P.O. Box 287, Ithaca, N.Y. 14850, and Huber, Magill, Lawrence & Farrell, 99 Park Avenue, New York, N.Y. 10016) filed an application for a major license with the Federal Energy Regulatory Commission for the constructed Project No. 2738 located on the Saranac River in Clinton County, N.Y.

The project consists of four developments:

A. High Falls, which is located near Moffittsville, consists of: (1) a reinforced concrete gravity dam, 274 feet wide and 65 feet high; (2) an eastern wingwall 80 feet long and a western one 320 feet long; (3) a reservoir with 550 acre-feet of storage at a normal pool elevation of 1032.0 feet msl; (4) a horseshoe shaped forebay canal 800 feet long and 250 feet wide; (5) a steel penstock 10 feet in diameter and 1,442 feet long; (6) an 11 by 12 foot concrete-lined tunnel 3,581 feet long; (7) another steel pipe penstock 6 feet in diameter and 487 feet long; (8) a steel surge tank 30 feet in diameter and 67 feet high; (9) a concrete and brick powerhouse 5,200 feet downstream from the dam; (10) two generators rated 4.0 MW each under a design head of 255 feet and one generator rated at 6.1 MW under a head of 230 feet; and (11) appurtenant facilities.

B. Cadyville, which is located 10 miles downstream from the High Falls Development, consists of: (1) a reinforced concrete gravity dam 237 feet wide and 50 feet high with stone masonry and concrete wingwalls; (2) a reservoir with 575 acre-feet of storage at crest elevation of 726.33 feet msl; (3) a concrete intake structure 62 feet long and 20 feet wide leading to a steel penstock 10 feet in diameter and 1,654 feet long; (4) a two story brick and concrete powerhouse 1,350 feet downstream from the dam; (5) two generating units rated at 1.2 MW each under a design head of 77 feet; and (6) appurtenant facilities.

C. Mill "C" which is approximately 4,000 feet downstream from the Cadyville Development, consists of: (1) a stone masonry gravity dam approximately 350 feet wide and 57 feet high; (2) a reservoir with 20 acre-feet of storage at a crest elevation of 649.2 feet msl; (3) a riveted steel penstock 402 feet long ranging in diameter from 9.5 to 12 feet; (4) a cinder block and stone masonry powerhouse 400 feet downstream from the dam; (5) two generating units, one rated at 1.25 MW and one at 1.0 MW, each under a design head of 66 feet; and (6) appurtenant facilities.

D. Kent Falls, located one mile below Mill "C" consists of: (1) a reinforced concrete hollow arch dam, 165 feet wide and 58 feet high; (2) a reservoir with 95 acre-feet of storage at a normal pool elevation of 580.27 feet msl; (3) a stone and concrete headworks structure; (4) a steel penstock 11 feet in diameter and 2,668 feet long, bifurcating into 2 steel penstocks each 6 feet in diameter and 140 feet long; (5) a surge tank 28 feet in diameter and 47 feet high; (6) a concrete and brick powerhouse 2,700 feet downstream from the dam; (7) two generating units each rated at 3.2 MW under a design head of 161 feet; and (8) appurtenant facilities.

The applicant integrates the power developed from the project into its main transmission system for delivery to its customers within New York State.

Existing recreational facilities include a swimming area, picnic tables, and fireplaces on land leased to the town of Plattsburgh, and a small boat launching ramp at the Cadyville site. The applicant states that, in general, steep banks, a steep river slope, and the small water surface areas of the ponds preclude the development of any future recreational facilities other than parking areas for fishermen.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before December 8, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. ES78-58]

NORTHWESTERN PUBLIC SERVICE CO.

Notice of Application

OCTOBER 5, 1978.

Take notice that on September 25, 1978, Northwestern Public Service Co. filed an application with the Commission pursuant to section 204 of the Act and Part 34 of the Regulations, for authorization to engage in negotiations for the sale of up to $12 million first Mortgage Bonds and up to 400,000 shares of Common Stock, par value $7 per share, pursuant to section 34.1a(a)(4) and 34.2(f)(2) of the Regulations under the Act.

Applicant is incorporated under the laws of the State of Delaware, with its principal business offices at Huron, S. Dak., and is authorized to do business in the States of Iowa, North Dakota, and Nebraska.

Applicant indicates that a portion of the proceeds from the proposed First Mortgage Bond and Common Stock financings will be used to repay outstanding short-term bank loans, which are expected to total $17,000,000 at the anticipated time of closing, with the balance to become treasury funds to be used for the company's 1979 construction program.

Applicant beleves that a negotiated underwritten public offering of the Common Stock would be advantageous because of the relatively small amount of Common Stock involved, because of the successful prior negotiated offerings of Common Stock, and because the underwriter will be required to presell the issue to ensure a satisfactory market.

Applicant states that it believes that a negotiated sale of the First Mortgage Bonds would be advantageous for similar reasons, but indicates that the decision whether to sell the Bonds in a public offering or through a private placement will be made after consideration of data to be developed in negotiations.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests shall be filed on or before October 17, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. CP70-7 (Phase II)]

SOUTHERN NATURAL GAS CO.

Petition To Amend

OCTOBER 5, 1978.

Take notice that on September 20, 1978, Southern Natural Gas Co. (Southern), P.O. Box 2563, Birmingham, Ala. 35202, filed in Docket No. CP70-7 (Phase II) a petition to amend pursuant to sections 7(b) and (c) of the Natural Gas Act the order of the Commission of October 29, 1969[1] (42 FPC 944), as amended, issued in said docket pursuant to section 7(c) of the Natural Gas Act issuing a certificate of public convenience and necessity authorizing the sale and delivery of natural gas. Southern proposes to increase its contract demand sales of natural gas to Atlanta Gas Light Co. (Atlanta) from 739,550 Mcf per day to 740,080 Mcf per day, to deliver such additional gas at the delivery point formerly used to serve the city of Temple, Ga., and to abandon its sales of natural gas to the latter customer. Southern's proposals are more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Southern states that it has been informed by Atlanta that Atlanta purchased from the city of Temple the gas system of the city of Temple and as a part of such purchase Southern's maximum delivery obligation to the city of Temple of 530 Mcf per day was assigned to Atlanta. Southern requests that it be authorized to sell to Atlanta an additional contract demand of 530 Mcf per day, that it be authorized to deliver this gas to Atlanta at the delivery point formerly utilized by the city of Temple, and that it be permitted to abandon sales and deliveries to the city of Temple.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

[6740-02-M]

[Docket No. CP78-227]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Petition To Amend

OCTOBER 5, 1978.

Take notice that on September 27, 1978, Transcontinental Gas Pipe Line Co. (Petitioner), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP78-227 a petition to amend the order of June 22, 1978, issued in the instant docket (57 FPC ——) pursuant to section 7(c) of the Natural Gas Act so as to authorize the continued transportation of natural gas for Trunkline Gas Co. (Trunkline) through December 31, 1979, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Pursuant to the order of June 22, 1978, Petitioner was authorized to

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC.

V 43/199 OCT 13 78

transport on an interruptible basis up to 75,000 Mcf of natural gas per day for Trunkline during a limited period ending December 31, 1978. Petitioner states that Trunkline delivers or causes the subject gas to be delievered into Petitioner's Southwest Louisiana Gathering System in Cameron Parish, La., and that Petitioner delivers a thermally equivalent quantity (less compressor fuel and line loss makeup) to Trunkline at existing interconnections between the two system near Katy, Waller County, Tex., and Ragley, Beauregard Parish, La. It is asserted that the transportation service assists Trunkline by delivering to its system pending the installation of expanded facilities on Trunkline's Lakeside Lateral, substantial volumes of gas available to Trunkline in the High Island Area, offshore Texas and delivered to Petitioner in Cameron Parish through facilities of High Island Offshore System and U-T Offshore System. Pursuant to the Transportation agreement between Petitioner and Trunkline date February 1, 1978, the subject transportation would continue in effect from April 1, 1978, until the date Trunkline has installed and placed in service the expanded facilities on its Lake Side Lateral, presently expected to be in service by November 1, 1978 or until December 31, 1978, whichever first occurs, it is stated.

It is indicated that Trunkline has advised Petitioner that its capacity problem in the South Louisiana area would continue past the present termination date of the February 1, 1978, agreement and requests that Petitioner extend the term of said agreement through December 31, 1979. Consequently, Petitioner and Trunkline have entered into an amendatory agreement dated September 6, 1978, which agreement extends the term of the transportation service through December 31, 1979.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.0) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accorance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RI78-40]

GAS ROCK CORP., ET AL.

Petition for Special Relief

OCTOBER 4, 1978.

Take notice that on March 13, 1978, Gas Rock Corp., P.O. Drawer 1729, Hattiesburg, Miss. 39401 and Wiley Fairchild, P.O. Box 1609, Hattiesburg, Miss. 39401 (Petitioners), filed a joint petition for special relief in Docket No. RI78-40 pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Take further notice that on August 29, 1978, petitioners filed an amended petition in order to request a specific rate as required by § 2.76.

Petitioners seek authorization to charge 79.68 cents per Mcf for gas sold to Southern Natural Gas Co. from the Fairchild-Dock Magee gas well located on a unit described as Section 12, Township 2 North, Range 11 West, Walthall County, Miss. Petitioners state that production from the Dock Magee well would have been curtailed as of July 31, 1977 without the installation of a compressor which was installed on a rental basis in August 1977. Therefore Petitioners seek said relief retroactive to August 1, 1977.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. CI76-253]

CIG EXPLORATION, INC.

Petition to Intervene Out of Time and to Reopen Record

OCTOBER 3, 1978.

Take notice that August 22, 1978, Monsanto Co., et al.[1] (Petitioners), 1300 Post Oak Tower, 5051 Westheimer, Houston, Tex. 77056, filed a petition out of time in Docket No. CI76-253 for leave to intervene and with the request that the record be reopened pursuant to §§ 1.7 and 1.8 of the Commission's Rules of Practice and Procedure (18 CFR 1.7 and 1.8).

Petitioners state that on January 18, 1978, CIG Exploration, Inc. (CIGE) was granted a certificate of public convenience and necessity in Docket No. CI76-253 authorizing the sale of natural gas to Colorado Interstate Gas Co. (CIGC) from the Madden Deep Field, Freemont County, Wyo. On the same day, January 18, 1978, a complaint was filed by petitioners in the District Court for the Ninth Judicial District, County of Freemont, State of Wyoming, in Civil Action No. 18750. As a result of this lttigation it may be determined that CIGE owns no interest in gas produced and sold pursuant to the authorization granted in Docket No. CI76-253. Therefore, Monsanto et al., desire to intervene in this proceeding in order to protect their interests as they may appear and request that the record in this proceeding be reopened for the limited purpose at this time of receiving the complaint in Civil Action No. 18750 as evidence of their potentially adverse interest of ownership in the gas now being delivered to CIGC.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 20, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RP76-135]

CITIES SERVICE GAS CO.

Proposed Changes In FERC Gas Tariff

OCTOBER 2, 1978.

Take notice that Cities Service Gas Co. (Cities Service) on September 22, 1978, tendered for filing Third Revised Sheet No. 6 to its FERC Gas Tariff, Original Volume No. 1. Cities Service states that this filing is in compliance with the Commission's order issued December 21, 1977, in Docket No. RP76-135, approving the September 13, 1977, Stipulation and Agreement (Article V, Section 2).

Cities Service states that copies of its filing were served on all jurisdictional customers, interested State commissions and all parties to the proceedings in Docket Nos. RP72-142, RP74-4, and RP76-135.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 or 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 20, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RP78-37]

LAWRENCEBURG GAS TRANSMISSION CORP.

Certification of Record in Connection With Proposed Settlement Agreement

OCTOBER 4; 1978.

Take notice that on August 15, 1978, Chief Administrative Law Judge Zwerdling certified to the Commission the record compiled in this docket in connection with a settlement agreement which had been filed with the Commission on July 3, 1978.

Any person desiring to be heard or to protest said Settlement Agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before October 30, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28992 Filed 10-12-78; 8:45 am]

[6740-02-M]

[Docket No. RI78-93]

MAPCO Inc.

Petition for Special Relief

OCTOBER 4, 1978.

Take notice that on September 12, 1978, MAPCO Inc., 1800 South Baltimore Avenue, Tulsa, Okla. 74119 (Petitioner), pursuant to the provisions of § 2.76 of the Statements of General Policy and Interpretations of the Federal Energy Regulatory Commission, filed a Petition for Special Relief from the applicable adjusted rate ceiling for residue natural gas to be sold from a proposed new replacement processing plant at Tyrone, Okla. Petitioner requests authority to increase its sales price of residue gas to Northern Natural Gas Co. under its Gas Rate Schedule No. 10 in the amount of 2.4240 cents per Mcf above the applicable adjusted rate. Petitioner asserts that the replacement processing plant will conserve and make available significant volumes of residue gas now consumed as fuel at the existing processing plant, as well as permit the extraction of additional volumes of natural gas liquids. the Department of Energy's Office of Hearings and Appeals has already granted MAPCO Inc.'s Application for Exception, conditionally permitting it to sell the natural gas liquids produced at the new replacement processing plant at a price in excess of that specified in Subpart K of the Department of Energy's Mandatory Petroleum Price Regulations. Under the order, the exception relief granted by DOE is contingent upon Petitioner filing a petition for special relief pursuant to 18 CFR 2.76. The DOE will make appropriate adjustments in the level of exception relief applicable to the natural gas liquids depending on the extent of relief granted by the FERC. Special rate relief is requested from the FERC as a means of equitably distributing the costs generated by the investment between consumers of the additional volumes of residue gas and natural gas liquids to be made available by construction of the new replacement processing plant. The requested special rate relief would apportion to the residue gas a share of the cost of the relief awarded by the Department of Energy's Office of Hearings and Appeals, calculated on the basis of the ratio between the respective Btu contents of the additional volumes of residue gas and natural gas liquids which will result from construction of the replacement gas plant.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-327, etc.]

MID-CONTINENT GAS STORAGE CO., ET AL.

Settlement Proposal

OCTOBER 5, 1978.

In the matter of Mid-Continent Gas Storage Co., Southern Natural Gas Co., docket No. CP78-327; Northern Illinois Gas Co., docket No. G-10632; Tennessee Gas Pipeline Co., a Division of Tenneco, Inc., Midwestern Gas Transmission Co., Southern Natural Gas Co., docket No. CP78-349.

Take notice that on October 2, 1978, the above-captioned parties filed a proposed Stipulation and Agreement and a motion for approval thereof in hopes of securing a settlement in the instant dockets. The substance of the proposal is quoted as follows:

STORAGE SERVICE

Southern has a serious need to increase its permanent storage capacity in order to satisfy its peak day requirements as has been demonstrated during the past two winters. In the 1976-77 winter, southern was required to curtail 100 percent of the gas allocated for industrial uses on its system for the entire period beginning January 11, 1977, and ending February 22, 1977. For 2 days in the middle of Janu-

V 43 / 199 OCT 13 78

ary during this period, Southern had to curtail deliveries partially to priority 1 customers (residential and small commercial requirements) because of extended cold temperatures. similar but less severe curtailments were experienced during the 1977-78 winter. All priority 3 requirements were curtailed from January 22, 1978, through March 18, 1978, as were 40 percent of priority 2 from February 9, 1978, through March 11, 1978. If the proposed storage service had been available to Southern at the time, it would have been able to serve all of its high priority 1 through 3 requirements during the past winter. Testimony submitted in docket No. TC78-25, Southern's omnibus filing, projects that due to an improvement in gas supply all priority 1 through 3 needs can be met during the 1978-79 winter even under colder than normal weather conditions. However, that projection is partly based on the assumption that the instant storage proposal will be operational.

To meet its need on a long term basis, Southern, along with Tennessee & Bear Creek Storage Co. have filed applications with the Commission to develop a natural gas storage field in the Bear Creek field located in Bienville Parish, La. Because the Bear Creek project is not expected to be operational before the winter of 1981-82, Southern contracted with Mid-Continent for a temporary storage service until that time.

The Limited Term Storage Agreement (Agreement) between Mid-Continent and Southern, dated March 23, 1978, provides that Mid-Continent will provide Southern with up to 15 Bcf of storage capacity for each injection period (April 1 through November 30) during the term of the Agreement. Because the Agreement permits Southern to make advance withdrawals of gas, this storage capacity will be available to Southern for use during the up-coming winter heating season.

By providing Southern with immediate storage capacity through the 1980-81 winter, the proposed storage service fulfills Southern's temporary storage needs. for this reason, all parties agree that the proposed storage service is in the public interest and that the present and future public convenience and necessity require certification of the services proposed by Southern and the granting of a limited term certificate with pregranted abandonment to Mid-Continent to docket No. CP78-327.

Since the parties believe the proposed storage service is in the public interest, a settlement price of 82.40 cents per Mcf of storage capacity has been agreed to. The amendment to the Agreement providing for this price (and certain other minor necessary modifications to the Agreement) is attached as exhibit A. An affidivit by William E. Matthews, IV, Senior Vice President of Southern, supporting the reasonableness of this price is attached as exhibit B.

JURISDICTION

In order to provide the proposed storage services to Southern, Mid-Continent has leased an undivided interest in NI-Gas' intrastate storage and related transportation system pursuant to the terms and provisions of a "Limited Term Storage Leasing Agreement" dated March 23, 1978 (the "Lease").[1] The Lease is for an express limited term ending November 30, 1981. This Lease does not involve NI-Gas in any interstate transportation or sale of natural gas.

Under the terms of the Lease, Mid-Continent must accept injection gas from Southern at the already existing interconnection of NI-Gas' intrastate facilities with those of Midwestern Gas Transmission Co. ("Midwestern") or one or more of NI-Gas' other existing pipeline suppliers. The net effect of the Lease upon NI-Gas is that during some months, deliveries from Midwestern will increase but will be decreased by a corresponding equivalent amount during other months. "Withdrawal" of storage gas will be accomplished by NI-Gas backing off its interstate takes and causing such volumes to be made available to Southern via Midwestern and Tennessee. Physically, such an arrangement will not result in any increase of annual deliveries to NI-Gas and all gas received by NI-Gas from Mid-Continent under the terms and provisions of the Lease will be physically received and consumed In Illinois. None of the gas so received by NI-Gas can or will at any time thereafter flow outside the State of Illinois or in interstate commerce.

In the course of the settlement discussions, questions were raised as to the effect of the transactions contemplated under the Lease upon NI-Gas' status under the Natural Gas Act. As a public utility with all of its operations conducted solely within the State of Illinois, NI-Gas is subject to the jurisdiction of the Illinois Commerce Commission (Ill. C.C.) under the Illinois Public Utilities Act and the Lease is subject to Ill. C.C. review and approval. Pursuant to an Order issued July 26, 1956, in Docket No. G-10632. NI-Gas is exempt from the provisions of the Natural Gas Act under Section 1(c) thereof. In Docket No. G-10632, NI-Gas requested the Commission to issue an order declaring that its existing exemption under Section 1(c) will not be affected by the lease arrangement with Mid-Continent.

This Stipulation and Agreement recognizes that (1) Mid-Continent will be a jurisdictional natural gas company subject to Commission jurisdiction and (2) by conditioning the certificated in accordance with this Stipulation and Agreement, the Commission will have exercised plenary jurisdiction over the subject storage transaction. Therefore, since the Lease is conditioned upon the continuation of NI-Gas' nonjurisdictional status under the Natural Gas Act it is agreed that the exemption order requested by NI-Gas in Docket No. G-10632 should be issued.

TRANSPORTATION

In Docket No. CP78-349, Tennessee requested authorization to transport all injection and withdrawal volumes for Southern. For this transportation service, Southern has agreed to pay 21.09 cents per Mcf of gas delivered to Tennessee for Southern's account for injection into storage (see exhibit D for the deriviation of this rate) and to permit Tennessee to retain 4.67 percent of the volumes of gas delivered to Tennessee by Southern for transportation for fuel, company use, and loss and unaccounted for gas incurred by Tennessee in rendering the transportation service. In the event the total amoung paid to Tennessee for transportation services rendered during any injection period (April through November) is less than $2,109,000, then Southern will pay an additional charge equal to the difference between $2,109,000 and the amount actually paid. Southern will receive a credit against such charge to the extent that Tennessee's inability to transport gas results in less than 10 Bcf of gas being transported during any injection period. Tennessee has contracted with Midwestern for the transportation, in part, of Southern's gas and has agreed to pay Midwestern 7.48 cents per Mcf of gas delivered for Southern's account for injection into storage and to permit Midwestern to retain a portion of the 4.67 percent fuel and use volume. Tennessee will also pay a minimum bill based upon the transportation of 10 Bcf during each injection period and will also receive a credit against said minimum bill to the extent Midwestern's inability to transport gas results in less than 10 Bcf being transported during any injection period.

In the same docket, Southern requested authorization to modify the existing facilities at the interconnection of its system and Tennessee's system near Pugh, Miss., and to install certain new facilities at this point of interconnection in order to facilitate the delivery and receipt of the injection and withdrawal volumes. The estimated cost of these modifications is approximately $142,447.

The parties agree that it is in the public interest for Tennessee and Midwestern to render the proposed transportation services at the proposed rates [2] and for Southern to make the proposed modification to the interconnection between its system with Tennessee's system near Pugh, Miss., and that the present and future public convenience and necessity require certification of the activities proposed by Tennessee, Midwestern, and Southern in Docket No. CP78-349.

EFFECTIVENESS

This Stipulation and Agreement shall become effective upon the receipt and acceptance of the Commission's order approving the same without modification or condition, provided however, that if any party shall file a petition for rehearing of said order, the effectiveness of this Stipulation and Agreement shall abate at the option of either Southern or Mid-Continent until said order shall have become final and no longer subject to judicial review.

* * *

Comments to the proposed Stipulation and Agreement may be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before October 16, 1978. Such Comments will be considered by the Commission in determining appropriate action, but will not serve to make commenters parties to the proceeding.

The record in this proceeding, including the Stipulation and Agreement, the motion for approval tariff filing, is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28994 Filed 10-12-78; 8:45 am]

[1] The Lease has been amended by an Amendatory Agreement dated September 11, 1978, to conform to the amendment to the Limited Term Storage Agreement of even date. This Amendatory Agreement is attached as exhibit C.

[2] Actual transportation rates will reflect the outcome of Midwestern's and Tennessee's rate cases pending in Docket Nos. FP78-23 and RP78-62, respectively.

[6740-02-M]

[Docket No. CP78-528]

NORTHWEST PIPELINE CORP.

Application

OCTOBER 4, 1978.

Take notice that on September 19, 1978, Northwest Pipeline Corp. (Applicant), 315 East Second South, Salt Lake City, Utah 84111, filed in Docket No. CP78-528, an application for a certificate of public convenience and necessity, pursuant to section 7(c) of the Natural Gas Act, authorizing the construction and operation of a new point of delivery of natural gas to the Washington Water Power Co. (Water Power), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Water Power has requested Applicant to make a farm tap on its 6-inch Couer D'Alene Lateral in order to provide natural gas service to a worm farm located in Spokane County, Wash. It is stated that the maximum daily deliverability would be 2.4 Mcf of gas and that the annual volumes would be 285 Mcf of gas, with such volumes to be from quantities previously authorized for delivery to Water Power. It is further stated that the proposed service is necessary in order to maintain a temperature of 65° F in the worm shed to assure adequate protection of the product.

Applicant proposes no further changes in its service to Water Power.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission, or its designee, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 2216]

POWER AUTHORITY OF THE STATE OF NEW YORK

Notice Granting Intervention

OCTOBER 2, 1978.

The Power Authority of the State of New York (PASNY) filed a Petition for Declaratory Order on March 6, 1976. PASNY requests the entire amount of replacement power (445,000 kilowatts) Niagara Mohawk Power Corp. (Niagara Mohawk) receives from PASNY under Article 22 of the license for the Niagara Project No. 2216 be allocated by Niagara Mohawk to industries located in the western New York area.

On May 24, 1978, the Municipal Electric Utilities Association of New York State (MEUA) filed a petition to intervene. MEUA is a nonprofit corporation consisting of 46 municipal and rural electric cooperatives in New York State. MEUA states that, as preference customers, they are entitled to at least 50 percent of the power made available for sale from the Niagara Project No. 2216. MEUA further states that they are not currently receiving their 50 percent and request that the 173 MW of power subject to dispute in this case be allocated to and reserved for preferential use by MEUA members.

No responses to MEUA's petition have been filed.

Pursuant to § 3.5(a) of the Commission's Rules of Practice and Procedure, 18 CFR 3.5(a), as promulgated by the FERC Rulemaking RM78-9 (issued August 14, 1978), MEUA is permitted to intervene in this proceeding subject to the Commission's Rules and Regulations under the Federal Power Act, 16 U.S.C. 791(a)-825(r). Participation of the Intervenor shall be limited to matters affecting asserted rights and interests specifically set forth in its petitions to intervene. The admission of the Intervenor shall not be construed as recognition by the Commission that it might be aggrieved by any order entered in this preceeding.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28996 Filed 10-12-78; 8:45 am]

V 43 / 199 0 OCT 13 78

[6740-02-M]

[Docket No. ER78-507]

PUBLIC SERVICE CO. OF COLORADO

Order Accepting Rates for Filing, Suspending Proposed Rate Increase, Allowing Interventions, and Establishing Procedures

OCTOBER 4, 1978.

On July 24, 1978, as completed September 5, 1978,[1] Public Service Co. of Colorado (PSCC) tendered for filing a proposed rate increase to five municipals, two private utilities, and two cooperative customers.[2] The proposed rate increase would result in additional revenues of approximately $2,052,707 (7.8%), based upon a test period consisting of the 12 months ending December 31, 1978.

Public notice of PSCC's filing was issued on July 27, 1978, with responses due on or before August 11, 1978.

On August 11, 1978, Intermountain Rural Electric Association (IREA) and Central Telephone & Utilities Co. (CTU), filed protests to PSCC's application and petitions to intervene. IREA requested a 1-day suspension of PSCC's proposed rates. On August 28, 1978, the town of Lyons, Colo. (Lyons) filed a Motion to Permit Late Filing of Protest and Petition to Intervene. Lyons urges the Commission to institute a hearing and suspend the proposed rates for the full statutory period.

In support of its filing, PSCC states that the rate increase is necessary because of the effect on PSCC's operations of escalating costs and inadequate rate of return on its investment.

We note that PSCC's case-in-chief includes an allocation of a portion of Liquid Metal Fast Breeder Reactor (LMFBR) research contributions and Electric Power Research Institute (EPRI) contributions to the resale cost of service. In *Carolina Power & Light Co.*, Opinion No. 19, we affirmed that part of the Initial Decision in which the Presiding Judge removed LMFBR contributions from the wholesale customers' cost of service.[3]

Contributions to EPRI are voluntary and are made on the basis of retail sales. Moreover, many wholesale customers make contributions to LMFBR and EPRI on the basis of their retail sales. Accordingly, we shall summarily dispose of the allocation to resale cost of service of contributions to LMFBR and EPRI. However, in this case, we shall not require PSCC to refile since the cost of refiling may outweigh the benefits to consumers. In the future, utilities should file cost support in accordance with our determination herein.

In addition, we note that PSCC has functionalized general plant by plant investment ratios. In *Minnesota Power & Light Co.*, Opinion No. 20, issued August 3, 1978, in Docket Nos. E-9499, et al., we held that general plant should be allocated on the basis of labor ratios. Further, we held that labor ratios should be used in allocating general plant in succeeding cases. In two subsequent orders,[4] we indicated that the use of labor ratios in functionalizing general plant was a "general rule" and held that the burden on the applicant was "to show that the labor ratios are unreasonable as applied to the company, not merely that its alternative method might be reasonable." PSCC bears this same burden in the instant case.

not merely that PSCC's alternative method might be reasonable. *Pennsylvania Electric Co.*, Docket No. ER78-494 (Order issued September 27, 1978); *Public Service Co. of Indiana*, Docket No. ER78-513, (Order issued August 25, 1978).

Our review indicates that the rates filed by PSCC have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, or otherwise unlawful. Therefore, we shall accept for filing the submittals in this docket, except for those parts summarily disposed of, supra, and suspend same for 4 months to become effective February 5, 1979, subject to refund.

We find that participation by the petitioners in this proceeding may be in the public interest. Accordingly, the Commission will grant the Petitioners' intervention pursuant to § 1.8(d) of the Commission's Rules of Practice and Procedure.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(A) of the DOE Act and by the Federal Power Act and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of the rates proposed by the Public Service Co. of Colorado in this proceeding.

(B) Pending such hearing and decision thereon, the rates proposed by Public Service Co. of Colorado are hereby accepted for filing and suspended for 4 months, to become effective as of February 5, 1979, subject to refund.

(C) The Federal Energy Regulatory Commission staff shall prepare and serve top sheets on all parties on or before January 27, 1979.

(D) All petitioners are permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission; *Provided, however,* That participation by these intervenors shall be limited to matters set forth in their respective petitions to intervene; and *Provided, further,* That the admission of these intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission in this proceeding.

(E) A presiding administrative law judge to be desingated by the Chief Administrative Law Judge for that purpose shall convene a conference in this proceeding to be held within ten (10) days after the serving of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said law judge is authorized to establish all procedural dates and to rule upon all motions (except motions to consolidate and sever and motions to dismiss), as provided for in the Commission's rules of practice and procedure.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

ATTACHMENT A—PUBLIC SERVICE CO. OF COLORADO RATE SCHEDULE DESIGNATIONS

Filing date: September 5, 1978.
Dated: Undated.
Other parties: wholesale customers, as indicated.

[6740-02-M]

[Docket No. AR61-2, etc.]

SOUTHERN NATURAL GAS

Declaratory Order Requiring Payment of Interest on Refunds

OCTOBER 2, 1978.

Take note that on September 1, 1978, the Alabama Muncipal Distributors Group (MDG) filed with the Commission a petition for Declaratory Order Requiring Payment of Interest on Refunds in the above-referenced dockets. On September 14, 1978, Alabama Gas Corp. joined that petition.

MDG states that Southern Natural Gas Co., Docket Nos. AR61-2, AR67-1 & AR69-1, *et al.*, G-13258, G-18512, G-20509 & RP60-15, RP64-31, RP70-5 & RP70-16, RP70-38, *et al.*, and RP72-91, *et al.*, has had in its posession certain producer refund dollars for varying periods of time and has refunded to its customers only the amounts actually received by Southern (including in some instances principal and interest for certain producer's refunds). MDG further states that Southern has not refunded to its customers any interest for the various periods during which Southern has held the producer refunds. MDG further states that Southern is obligated to include interest for the period of time it held the producer refunds and should be required to make a refund of this interest to its customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or comments should be filed on or before October 23, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI78-1009]

SUN OIL CO.

Application for Certificate Pursuant to Optional Procedure

OCTOBER 3, 1978.

Take notice that on July 17, 1978, Sun Oil Co. (Sun), P.O. Box 20, Dallas, Tex. 75221, filed an application for a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act, and 18 CFR 2.75 (optional procedure).

Sun requests an initial rate of $3.21/Mcf plus 4 percent annual escalations for sales of its natural gas from High Island Blocks A-327 and A-332, offshore Texas to Trunkline Gas Co. (Trunkline). Sun calculates the average requested price for the life of the reserves (adjusted for a 3 month delay in price relief) to equal $3.51/Mcf, inclusive of a 17 percent rate of return. Sun estimates it will sell 23.5 Bcf of reserves to Trunkline over the 12 year life of the subject reserves.

The subject gas sale contracts contain depth limitation clauses and area rate clauses. Sun "conditionally" waives its area rate clause, pursuant to the requirements of 18 CFR 2.75(f). Sun owns 18.5 percent of the working interest in each of the 2 blocks, and Pennzoil Louisiana and Texas Offshore (Plato), Pennzoil Oil and Gas, Inc. (POGI) and Pogo Producing Co. (Pogo) together own 13 percent of the working interests of the blocks. Plato has filed for an optional procedure rate for these two blocks, inter alia, in Docket No. CI78-767 on May 17, 1978.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RP73-114]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Refund Report

OCTOBER 2, 1978.

Take notice that on September 25, 1978, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), filed a plan for disposition of refunds which it received from Sea Robin Pipeline Co. in Docket No. RP77-6.

Tennessee states that upon Commission approval of its refund plan it will flow through to its customers the entire $499,265.83 which is received by means of a credit to its Unrecovered Purchased Gas Cost Account.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance

V 4 3 / 1 9 9

0 C 1 3 7 8

with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 13, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene, provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI78-90]

TIPPERARY OIL & GAS CORP.

Petition for Special Relief

OCTOBER 4, 1978.

Take notice that on September 5, 1978, Tipperary Oil & Gas Corp., 500 West Illinois, P.O. Box 3179, Midland, Tex. 79702 (Petitioner) filed a petition for special relief from the pricing provisions of FPC Opinion No. 770-A, issued November 5, 1976, with regard to the Calf Canyon Unit, Garfield County, Colo. Petitioner requests that $1.50 per Mcf be added to the applicable FERC regulated price and paid to the working interest owner (Petitioner) in order to permit an equitable return on a proposed gathering system that would serve the Calf Canyon Unit. Petitioner states that the applicable wellhead natural gas prices, to which the $1.50 rate would be added, vary from $0.697 to $1.20 per Mcf. The purchaser of the gas is identified as Northwest Pipeline Corp., P.O. Box 15267, Salt Lake City, Utah 84110. Petitioner also states that seven Calf Canyon Unit wells have been drilled to date, with one more planned during 1978.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. CP 78-541]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

OCTOBER 5, 1978.

Take notice that on September 27, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP78-541 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(b) of the Regulations thereunder (8 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the constuction, during the 12-month period commencing October 22, 1978, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers or other similar sellers thereof, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally coextensive with its pipeline system or the system of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that the total estimated cost of the proposed facilities would not exceed $12,000,000, with the cost of no single offshore projects to exceed $2,500,000 and the cost of no single onshore project to exceed $1,500,000. Applicant indicates that the cost of the proposed facilities would be financed initially from temporary bank loans and company funds, with permanent financing to be arranged as part of an overall financing program.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intevene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules and Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unncessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-29028 Filed 10-12-78; 8:45]

[6740-02-M]

[Docket No. CP78-536]

TRUNKLINE GAS CO.

Application

OCTOBER 5, 1978.

Take notice that on September 25, 1978, Trunkline Gas Co. (Applicant), P.O. Box 1642, Houston, Tex. 77001, filed in Docket No. CP78-536 an application pursuant to section 7(c) of the Natural Gas Act and § 157.7(b) of the regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction during the 12-month period commencing upon the date of issuance of the requested certificate, and operation of certain natural gas purchase facilities, to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased or received from producers or other similar sellers, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to take into its certificated mainline pipeline system such natural gas which is or may become available due to expansion, development or production of existing or new sources of supply in the general area of its system or to connect such gas to the system of another natural gas company authorized to transport for or exchange with Applicant such gas.

Applicant states that the total cost of the proposed facilities would not exceed $10 million, with no single onshore project to exceed $1,500,000 and no single offshore project to exceed $2,500,000. Applicant states that the proposed facilities would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing herein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RA78-5]

YOUNG REFINING CORP.

Notice Granting Extension of Time

OCTOBER 2, 1978.

On September 22, 1978, Counsel for the Secretary of Energy filed a motion for extension of time within which to file the administrative record and reply to petition for review in the above captioned proceeding. The motion noted belated service of the petition for review upon the Secretary.

Upon consideration, notice is hereby given that an extension of time is granted to and including October 23, 1978, for the filing of the administrative record and reply to petition for review in this proceeding.

LOIS D. CASHELL,
Acting Secretary.

Office of Hearings and Appeals

NATURAL GAS PLANT OPERATORS

Applications for Exception; Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Departmental Determinations with Respect to Amendments to 10 CFR, Part 212, Subpart K, 43 FR 42984 (Sept. 21, 1978).

SUMMARY: The Office of Hearings and Appeals of the Department of Energy (DOE) hereby gives notice of the procedures which it has adopted and will follow with respect to Applications for Exception from 10 CFR, Part 212, Subpart K. The DOE adopted amendments to those regulations effective November 1, 1978, concerning nonproduct cost passthroughs for natural gas plant operators. 43 FR 42984 (Sept. 21, 1978). The parties affected by this Notice include operators of approximately 350 gas plants whose current exception relief expires after November 1, 1978; 20 firms which have filed initial applications for exception relief; 20 firms to whom Proposed Decisions and Orders have been issued; 9 firms who have objections outstanding to Proposed Decisions and Orders; and approximately 47 firms which have applied for extensions of previous exception relief.

FOR FURTHER INFORMATION CONTACT:

Thomas L. Wieker, Deputy Director, Office of Hearings and Appeals, 2000 M Street NW., Room 8014 Washington, D.C. 20461 202-254-9681.

SUPPLEMENTARY INFORMATION: The Department of Energy has adopted amendments to 10 CFR, Part 212, Subpart K, which govern the prices at which natural gas liquids (NGLs) and natural gas liquid products (NGLPs) may be sold. See 43 FR 42984 (Sept. 21, 1978). These regulatory amendments, which will become effective on November 1, 1978, permit natural gas plant operators to pass through certain of their increased nonproduct costs relating to the processing and marketing of NGL's and NGLP's.

Under the provisions of § 212.165 of Subpart K which existed prior to the September 21 modifications and which will remain in effect until November 1, 1978, natural gas plant operators have been permitted to increase the prices of NGL's and NGLP's to reflect certain increased nonproduct costs, up to $0.005 per gallon for NGLPs and $0.00375 for NGL's. In a preamble to the rulemaking proceeding in which the original Subpart K was promulgated, the Federal Energy Administration recognized that some natural gas plant operators could experience inequities as a result of the regulatory limitations on cost passthroughs. Accordingly, the FEA indicated that:

> Any firms that have increased nonproduct costs of gas processing that would justify a greater price increase than 0.5 cents per gallon may request permission to charge higher prices, on a case-by-case basis through the exceptions process.

39 FR 44407 (Dec. 24, 1974).

On May 28, 1975, the Superior Oil Co. filed an Application for Exception in which it stated that it had incurred increased nonproduct costs since May 15, 1973 at four of its natural gas processing plants. According to Superior, those increases ranged from $0.009 per gallon to $0.032 per gallon. The firm claimed that its inability to increase its selling prices to reflect these increased nonproduct costs constituted a gross inequity. In reviewing that contention, the FEA found that:

> No public purpose will be served by prohibiting natural gas processors which have incurred nonproduct cost increases substantially in excess of $0.005 per gallon from passing through these cost increases.

Superior Oil Co., 2 FEA Par. 83,271 (Aug. 29, 1975).

The FEA noted that exception relief to allow the passthrough of those costs would prevent continued inequitable treatment of natural gas plant operators and could also provide an incentive for those firms to increase their production to alleviate the nationwide shortage of NGL's. Therefore, the FEA granted exception relief to Superior, permitting the firm to increase its selling prices to reflect the increased nonproduct costs which it had incurred. In addition, the FEA stated that it would, as a general rule:

V 43 / 199 OCT 13 78

[G]rant exception relief to any gas processing plant which can demonstrate that its nonproduct costs, since May 1973, have increased substantially in excess of the $0.005 per gallon passthrough permitted under the provisions of § 212.165.

Id. at p. 83,865.

Following the issuance of the *Superior* decision, the FEA Office of Exceptions and Appeals and its successor, the DOE Office of Hearings and Appeals, have received numerous requests for exception relief involving hundreds of natural gas processing plants. The general practice of the Office of Hearings and Appeals with regard to those requests has been to grant exception relief from the provisions of § 212.165 to any natural gas plant operator which can demonstrate that its nonproduct unit cost increase is materially in excess of the passthrough permitted under the regulations.

However, after the November 1, 1978 effective date of the amendments to the Subpart K regulations, natural gas plant operators will be authorized to pass through the allowable nonproduct cost increases specified in § 212.165 without a dollar limitation. In contrast to the existing version of Subpart K, the amendments specify in detail the allowable categories of nonproduct costs. In addition, the new regulations set forth the general accounting procedures to be used and indicate the principles for specific costs such as extraordinary and irregular nonrecurring expense items and processing costs that are deemed to be incurred by a firm. The amended version of § 212.166 describes in detail the method of recovering increased marketing costs. Finally, a news § 212.169 has been added which sets forth provisions regarding the methods for carrying forward unrecovered increased costs and for correcting overrecoveries of such costs (the "banking" provisions).

Since natural gas plant operators will be permitted after November 1, 1978 to pass through certain increased nonproduct costs without a dollar limitation, we believe that the need for those firms to continue to apply for exception relief under the *Superior* precedent on a plant-by-plant basis will be eliminated. In order to facilitate the transition from a case-by-case exception process to a self administered regulatory system, the Office of Hearings and Appeals has taken a number of steps that will affect those firms which have previously been granted exception relief or which have filed applications for exception relief from the former provisions of Subpart K. The remainder of this Notice describes the procedures which the Office of Hearings and Appeals has adopted and expects to follow in processing pending exception applications and providing administrative relief during the transitional period prior to November 1 in those situations in which a firm has been granted exception relief.

Firms With Exception Relief in Effect After November 1

The DOE has granted exception relief with respect to approximately 350 natural gas plants which will expire, under the terms of the respective orders, after the November 1, 1978 effective date of the new Subpart K regulations. In anticipation of the adoption of amendments to Subpart K, each Decision and Order included the following ordering paragraph:

If § 212.165 which specifies the limitation on the passthrough of nonproduct cost increases is amended subsequent to the effective date of this Order or if the applicant alters its operations at any of its plants to produce natural gas liquid products rather than natural gas liquids, then the exception relief granted above shall be reduced by any excess of (i) the average limitation on the passthrough of nonproduct cost increases, which the firm is required under § 212.165 of the DOE regulations to utilize for the plant concerned in calculating its allowable nonproduct cost increase during the period for which the relief provided in this Order is effective, over (ii) the level of increased nonproduct cost passthroughs under § 212.165 for that natural gas processing plant which was utilized to calculate the level of exception relief in this Order.

In those cases in which the level of exception relief on a per unit basis is less than the level of passthrough permitted under the revised regulations, the exception relief will be automatically reduced to zero by the provision quoted above. The firms involved may of course increase their prices to the full extent permitted under the new regulations. However, it is possible that a small number of firms will actually incur a lower level of increased nonproduct costs at certain plants following November 1 than they were authorized to pass through under the terms of exception decisions. Those firms would continue to set prices on the basis of the level of exception relief specified in the Decision and Order issued to them. The amount of exception relief specified would constitute the total amount of nonproduct cost passthrough permitted for the period of relief.

Pending Applications for Exception

Approximately twenty firms have filed initial applications for prospective relief under the *Superior Oil* precedent. The Office of Hearings and Appeals has dismissed the applications without prejudice to a refiling. The rationale for the dismissals was that the full passthrough of nonproduct cost increases will be available under the new regulations following November 1, 1978. Consequently, exception relief will no longer be necessary after that date.

In addition, one firm has filed an application for retroactive exception relief from the former version of Subpart K. See *Estates of Inez and Loyce Phillips*, Case No. DEE-0319 (D.O.E. filed November 25, 1977). This application will be processed in the course of the normal review process administered by the Office of Hearings and Appeals.

Pending Proposed Decisions and Orders

From July 24 through August 22, 1978, the Office of Hearings and Appeals issued twenty Proposed Decisions and Orders, involving 51 natural gas processing plants, concerning requests for exception relief from the existing nonproduct cost passthrough ceilings. With respect to those Proposed Decisions and Orders for which no Notice of Objection has been filed, the Office of Hearings and Appeals has determined that the exception relief specified in those Proposed Decisions will be granted in final form. See e.g., *Allied Chemical Company*, 2 DOE Par. (September 29, 1978). As indicated in that determination, the exception relief will expire on October 31, 1978, instead of continuing in effect throughout the normal 6-month period. This result will provide exception relief to this class of affected firms until the regulatory changes take effect on November 1, 1978. Once the amended regulations are effective, however, nonproduct cost increases will be passed through in accordance with the new regulatory provisions.

Objections to Proposed Decisions and Orders have been received from 9 firms, involving 22 gas plants. Those Objections will be reviewed in accordance with the normal adjudicatory procedures, and determinations will be issued to those applicants in final form.

Pending Applications for Extension of Exception Relief

The Office of Hearings and Appeals has received applications for extension of exception relief from approximately 47 firms, involving 301 gas plants. Each of those firms was previously granted exception relief which expires on or before September 30, 1978. On October 2, 1978, the DOE issued a Proposed Decision and Order granting each firm an extension of exception relief for the period October 1 through October 31, 1978. *Allied Chemical Corporation, et al.*, Cases Nos. DXE-1561, *et al.*, Proposed Decision and Order (D.O.E. October 2, 1978). The passthrough allowed under the Proposed Decision and Order is equal in amount to the exception relief most recently granted for each gas plant by the Office of Hearings and Appeals.

OFFICE OF HEARINGS AND APPEALS

Issuance of Proposed Decisions and Orders; September 18 through September 22, 1978

Notice is hereby given that during the period September 18 through September 22, 1978, the proposed decisions and orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the proposed decision and order in final form may file a written notice of objection within 10 days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a notice of objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the proposed decision and order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In that statement of objections an aggrieved party must specify each issue of fact or law contained in the proposed decision and order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

Dated: October 5, 1978.

Melvin Goldstein,
Director,
Office of Hearings and Appeals.

Proposed Decisions and Orders

Aminoil U.S.A., Inc., Washington, D.C., DEE-1432, crude oil.

Aminoil U.S.A., Inc. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Aminoil to sell the crude oil produced for the benefit of the working interest owners from the lower main zone at upper tier ceiling prices. On September 20, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted.

Charter Oil Co., Jacksonville, Fla., DXE-1398, crude oil.

Charter Oil Co. filed an application for exception from the provisions of 10 CFR 211.67 (the domestic crude oil entitlements program). The exception request, if granted, would relieve Charter of its obligation to purchase entitlements pursuant to the provisions of 10 CFR 211.67. On September 22, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted.

Custer Gas Service, Custer, S. Dak., DEE-1077, propane.

Custer Gas Service filed an application for exception from the provisions of 10 CFR 212.93. The exception request, if granted, would relieve the firm of its obligation to refund revenues which it obtained by charging prices for propane that exceeded maximum permissible prices. On September 22, 1978, the DOE issued a proposed decision and order which determined that the exception request be denied.

DeMenno Resources, Los Angeles, Calif., DEE-0965, crude oil.

DeMenno Resources filed an application for exception from the provisions of 10 CFR 211.67 (the domestic crude oil entitlements program). The exception request, if granted, would relieve DeMenno of its obligation to purchase entitlements pursuant to the provisions of 10 CFR 211.67. On September 18, 1978, the DOE issued a proposed decision and order which determined that the exception request be denied.

Getty Oil Co., Los Angeles, Calif., DEE-1377 through DEE-1381, crude oil.

Getty Oil Co. filed five applications for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception requests, if granted, would permit the firm to sell the crude oil produced from five leases in the Zaca Field located near Santa Maria, Calif., at prices in excess of the levels set forth in 10 CFR, Part 212, Subpart D. On September 22, 1978, the DOE issued a proposed decision and order in which it determined that exception relief should be granted in part for the five leases.

Kewanee Oil Co., Tulsa, Okla., DXE-1288, crude oil.

Kewanee Oil Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted to Kewanee and would permit the firm to sell at upper tier ceiling prices certain quantities of crude oil produced from the South Stanley Lease located in Burbank Field, Osage County, Okla. On September 19, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted in part.

Little America Refining Co., Washington, D.C., DXE-1465, crude oil.

Little America Refining Co. filed an application for exception from the provisions of 10 CFR 211.67 (the domestic crude oil entitlements program). The exception request, if granted, would relieve Little America of its obligation to purchase entitlements pursuant to the provisions of 10 CFR 211.67. On September 22, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted in part.

Newhall Refining Co., Inc., Dallas, Tex., DXE-1322, crude oil.

Newhall Refining Co., Inc. filed an application for exception from the provisions of 10 CFR 211.67 (the domestic crude oil entitlements program). The exception request, if granted, would relieve Newhall of its obligation to purchase entitlements pursuant to the provisions of 10 CFR 211.67. On September 22, 1978, the DOE issued a proposed decision and order which determined that the exception request be denied.

P & M Petroleum Management, Denver, Colo., DXE-1606, crude oil.

P & M Petroleum Management filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted to P & M and would permit the firm to sell at upper tier ceiling prices certain quantities of crude oil produced from the track lease located in the Tule Creek South Field in Roosevelt County, Mont. On September 22, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted in part.

Pierremont Petroleum Corp., Scott County, Miss., DEE-1429, crude oil.

On July 20, 1978, the Pierremont Petroleum Corp. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to sell crude oil produced from the C. G. Henderson 17-8 No. 1 well at upper tier ceiling prices. On September 20, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted in part.

V 43 / 199
0 C 13
7 8

Sidney E. Pinkston, Jr., Natchez, Miss., DEE-1409, crude oil.

Sidney E. Pinkston, Jr. filed an Application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to sell the crude oil produced from the U.S.A. No. 1, U.S.A. No. 5 and U.S.A. No. 7 wells located on lease BLM-A-011586-C in the Beaver Branch Field of Adams County, Miss. at upper tier ceiling price levels. On September 20, 1978 the DOE issued a proposed decision and order which determined that the exception request be granted.

S & W Engine Supply Co., Oklahoma City, Okla., DXE-1472, crude oil.

The S & W Engine Supply Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted and would permit S & W to continue to sell certain quantities of the crude oil which it produces from the Baker Townsend Lease at upper tier ceiling prices. On September 18, 1978, the Department of Energy issued a proposed decision and order which determined that the exception request be granted.

Tenneco Oil Co., Houston, Tex., DEE-1557, crude oil.

Tenneco Oil Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to continue to sell certain quantities of the crude oil produced from the south coast unit, located in St. Mary Parish, La., at upper tier ceiling prices. On September 20, 1978, the DOE issued a proposed decision and order which determined that the Tenneco exception request be granted.

OFFICE OF HEARINGS AND APPEALS

Case Filed Week of September 22 through September 29, 1978

Notice is hereby given that during the week of September 22 through September 29, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, part 205, any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

OCTOBER 5, 1978.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*

[Week of Sept. 22 through Sept. 29, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Sept. 22, 1978	Kenr, Houston, Tex	DFA-0221	Appeal of an information request denial. If granted: The Aug. 18, 1978 information request denial would be rescinded and KENR would receive access to certain DOE data concerning Tauber Oil Co.
Do	Sun Co., Inc., Dallas, Tex	DXE-1869	Extension of the relief granted in *Sun Company, Inc.*, case No. FXE-4784 (decided June 5, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Pledger plant.
Do	do	DEE-1881 through DEE-1885.	Price exception (sec. 212.165). If granted: Sun Co., Inc. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Dragon Trail, Levelland, Okeene, Star Lacey, and Womack plants.
Sept. 26, 1978	Coastal States Gas Corp., Houston, Tex	DXE-1893	Extension of the relief granted in *Coastal States Gas Corp.*, case No. DXE-0458 (decided July 6, 1978) (unreported decision). If granted: Coastal States Gas Corp. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Lakin plant.
Do	Continental Oil Co., Houston, Tex	DEE-1889	Price exception (sec. 212.83). If granted: Continental Oil Co. would be permitted to adjust its May 1973 marketing cost base to reflect its subsequent divestiture of motor gasoline marketing facilities.
Do	Craft Petroleum Co., Inc., Jackson, Miss	DEE-1886	Price exception (sec. 212.73). If granted: Craft Petroleum Co., Inc. would be permitted to sell the crude oil produced from the Rosenblatt No. 1 well located in Wilkinson County, Miss., at upper tier ceiling prices.
Do	Econ-O-Gas, Inc., Temple, Tex	DSG-0031	Request for special redress. If granted: The Office of Hearings and Appeals would review the Nov. 22, 1978 assignment order, the three-party agreement submitted for Econ-O-Gas, Inc., Atlantic Richfield Co., and Foremost Petroleum Corp., and the Dec. 22, 1978 termination order to assess their compliance with the requirements of due process.
Do	Gulf Oil Corp., Tulsa, Okla	DEE-1894 through DEE-1902.	Price exception (sec. 212.165). If granted Gulf Oil Corp. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Diamond "M", Gulf Venice, McLean, Okeene, Selling, Slaughter, Thompson, Wright, and Yowlumne plants.
Do	McAfee, Taft, Mark, Bond, Rucks & Woodruff, Oklahoma City, Okla.	DFA-0222	Appeal of information request denial. If granted: The information request denial of Sept. 6, 1978, would be rescinded and McAfee, Taft would be granted access to copies of transcripts of interviews regarding a notice of probable violation issued to Unit Operations, Inc.
Do	Natrogas, Inc., Minneapolis, Minn	DEE-1887	Exception to change suppliers. If granted: Natrogas, Inc. would be assigned a new, lower-priced supplier of propane to replace its base period suppliers, Shell Oil Co., Mobil Oil Corp., and Warren Petroleum.
Do	New England Power Co., Houston, Tex	DRD-0113	Motion for discovery. If granted: Discovery would be granted to New England Power Co. with respect to its statement of objections to a proposed remedial order issued by the Office of Special Counsel for Compliance to Coastal States Gas Corp. on Sept. 6, 1978.
Do	Phillips Petroleum Co., Bartlesville, Okla	DEE-1888	Price exception (sec. 212.73). If granted: Phillips Petroleum Co. would be permitted to sell the crude oil produced from the Evelyn "A" lease located in Converse County, Wyo., at upper tier ceiling prices.
Do	Robert B. Sutton, Tulsa, Okla	DSG-0032 and DES-0104.	Request for special redress. Request for stay. If granted: The Office of Hearings and Appeals would review the Aug. 31, 1978 denial of the application to quash a subpena submitted by Rober B. Sutton and compliance with the subpena would be stayed pending a determination of his request for special redress.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Sept. 22 through Sept. 29, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Texas City Refining, Inc., Washington, D.C.	DSG-0033	Request for special redress. If granted: Texas City Refining, Inc. would receive a stay of its entitlement purchase obligations for the period September through November 1978.
Sept. 27, 1978	Dunaway, McCarthy & Dye, Washington, D.C.	DFA-0223	Appeal of an information request denial. If granted: The information request denials of Aug. 21 and Aug. 30, 1978, would be rescinded and Dunaway, McCarthy & Dye would be granted access to certain DOE material relating to the applicability of the mandatory petroleum allocation and price regulations (10 CFR pts. 221 and 212) to the sale of covered products under future contracts.
Do	Edgington Oil Co., Inc., Washington, D.C	DXE-1890	Extension of the relief granted in *Edgington Oil Co., Inc.*, 2 DOE par. — (Aug. 16, 1978). If granted: Edgington Oil Co., Inc. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations.
Do	Northland Oil & Refining Co., Tulsa, Okla.	DEE-1892	Exception to the entitlements program. If granted: Northland Oil & Refining Co. would receive an exception from the provisions of 10 CFR 211.67 with respect to the firm's entitlement purchase obligation for the period July through December 1978.
Do	Warrior Asphalt Co. of Alabama, Washington, D.C.	DXE-1891	Extension of the relief granted in *Warrior Oil Co. of Alabama*, 2 DOE par. — (July 20, 1978). If granted: Warrior Asphalt Co. of Alabama would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations.
Sept. 28, 1978	Advanced Sales Corp., St. Petersburg, Fla	DFA-0224	Appeal of an information request denial. If granted: The Sept. 1, 1978 information request denial would be rescinded and Advanced Sales Corp. would receive access to certain DOE data regarding orders issued by DOE region IV on Apr. 5 and July 12, 1974.
Sept. 29, 1978	Baltimore Gas & Electric Co., Baltimore, Md.	DEA-0225	Appeal of an ERA order. If granted: The Aug. 24, 1978 decision and order would be rescinded and Baltimore Gas & Electric Co. would be assigned a base period volume and use authorization of propaned for possible Btu enrichment.
Do	Mobil Oil Corp., New York, N.Y	DRH-0105 and DRD-0105.	Request for evidentiary hearing and motion for discovery. If granted: An evidentiary hearing would be conveyed in connection with Mobil Oil Corp.'s statement of objections regarding a proposed remedial order issued to it on Aug. 23, 1978. In addition, Mobil would be authorized to take depositions of Mr. August P. Rossi, Jr. and Mr. Douglas J. Siemer.

Director,
Office of Hearings and Appeals.

SEPTEMBER 28, 1978.

V 43 / 199 OCT 13 78

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*

[Week of Sept. 15, 1978 through Sept. 22, 1978]

Date	Name and location of applicant	Case No.	Type of Submission
Sept. 15, 1978	Graham-Michaelis Drilling Co., Wichita, Kans.	DEE-1837	Price exception (sec. 212.165). If granted: Graham-Michaelis Drilling Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Mooreland plant.
Do	Meason Operating Co., Natchez, Miss	DXE-1836	Extension of relief granted in *Meason Operating Company*, 1 DOE par. 81,038 (Dec. 14, 1977). If granted: Meason Operating Co. would be permitted to sell crude oil produced from the Arnold Perry unit No. 1, East Keilly field located in Wilkinson County, Miss., at upper tier ceiling prices.
Do	Quincy Oil, Inc., Boston, Mass	DED-0447	Motion for discovery. If granted: Quincy Oil, Inc. would be granted discovery with respect to a DOE audit regarding the firm's sales of No. 6 fuel oil and with respect to various DOE administrative proceedings involving the firm.
Do	Tenneco Oil Co., Houston, Tex	DXE-1838 through DXE-1850.	Extension of relief granted in *Tenneco Oil Company*, case Nos. DXE-0874 through DXE-0885 (decided Apr. 20, 1978) and case No. FXE-4738 (decided Nov. 4, 1977) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Chesterville, La Porte, Leabo, Pearce, Stephens, Ward, Dover Hennessey, Lake Bouef, Mayfield, Mermentau, Normanna, Prentice, and South Fullerton plants.
Do	do	DEE-1851 through DEE-1855.	Price exception (sec. 212.165). If granted: Tenneco Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Pashing field, Hollywood, Mooreland, Nueces River, and Sea Robin plants.
Sept. 18, 1978	Jimmie Austin d.b.a. Austin Drilling Co., Seminole, Okla.	DRX-0108	Supplemental order. If granted: The appeal procedure specified in the remedial order issued to Austin Drilling Co. on Sept. 14, 1978, would be altered to provide that any party aggrieved by the determination may seek judicial review.
Do	Charter Oil Co., Jacksonville, Fla	DEX-0109	Supplemental order. If granted: Charter Oil Co. would receive a stay of its entitlement purchase obligations.
Do	Energy Consumers & Producers Association, Seminole, Okla.	DEE-1856	Price exception (sec. 212.73). If granted: The Energy Consumers & Producers Association would be permitted to sell the crude oil produced from the Austin Chalk-Buda Trend of South Texas at upper tier ceiling prices.
Do	Gulf Oil Corp., Houston, Tex	DEX-0107	Supplemental order in *Gulf Oil Corp.*, 1 DOE par. 80,227 (Mar. 21, 1978). If granted: The DOE's decision and order in case No. FRA-1423, issued on Mar. 21, 1978, would be rescinded.
Do	Little America Refining Co., Englewood, Colo.	DEX-0110	Supplemental order. If granted: Little America Refining Co. would receive a stay of its entitlement purchase obligations.
Do	Charles Schwartz, Berkeley, Calif	DFA-0214	Appeal of an information request denial. If granted: The DOE's June 23, 1978 information request denial would be rescinded and Charles Schwartz would receive access to certain DOE data relating to the selection of the directors of the Los Alamos Scientific Laboratory and Lawrence Livermore Scientific Laboratory, as well as correspondence regarding enhanced radiation weapons.
Do	True Oil Purchasing Co., Casper, Wyo	DFA-0215	Appeal of an information request denial. If granted: The DOE's information request denial of Aug. 14, 1978, would be rescinded and True Oil Purchasing Co. would be granted access to certain DOE materials relating to the promulgation of 10 CFR, pt. 212, subpt. L (reseller regulations).
Sept. 20, 1978	American Petrofina, Inc., Dallas, Tex	DPI-0020	Appeal of an oil imports order. If granted: The Sept. 15, 1978 order issued by the Office of Oil Imports would be rescinded and American Petrofina would be permitted to import crude oil on a fee-exempt basis during the period May 1, 1978 through Apr. 30, 1979.
Do	City of Long Beach, Calif	DXE-1870	Extension of relief granted in *City of Long Beach, California*, 1 DOE par. 81,105 (Apr. 11, 1978). If granted: The city of Long Beach would be permitted to sell the crude oil produced from the block III unit located in Los Angeles County, Calif., at upper tier ceiling prices.
Do	Coastal States Gas Co., Houston, Tex	DEE-1863	Price exception (sec. 212.165). If granted: Coastal States Gas Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Bluebell plant.
Do	Crown Central Petroleum Corp., Bellaire, Tex.	DEE-1872	Price exception (sec. 212.73). If granted: Crown Central Petroleum Corp. would be permitted to sell the crude oil produced from the Santa Ana and Fresno land lease located in Fresno County, Calif., at upper tier ceiling prices.
Do	Exxon Co., U.S.A., Houston, Tex	DFA-0216	Appeal of an information request denial. If granted: The DOE's Aug. 14, 1978 and June 8, 1978 information request denials would be rescinded and Exxon Co., U.S.A. would receive access to certain DOE data regarding the regulation of natural gas liquids and natural gas liquid products.
Do	Geronimo Oil Co., Corpus Christi, Tex	DEE-1873	Price exception (sec. 212.73). If granted: Geronimo Oil Co. would be permitted to sell the crude oil produced from the Lillian S. Morris, et al. lease in San Patricio County, Tex., at upper tier ceiling prices.
Do	Getty Oil Co., Los Angeles, Calif	DRH-0092 and DRD-0092.	Motion for evidentiary hearing; motion for discovery. If granted: An evidentiary hearing would be convened in connection with a statement of objections submitted by Getty Oil Co. to a proposed remedial order issued to the firm by the Office of the Special Counsel on July 20, 1978. In addition, Getty Oil Co. would be granted discovery with respect to the objections it has raised.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Sept. 15, 1978 through Sept. 22, 1978]

Date	Name and location of applicant	Case No.	Type of Submission
Do	Great Western Drilling Co., Midland, Tex	DEE-1875 and DEE-1876.	Extension of relief granted in *Great Western Drilling Company*, case Nos. FXE-4793 and FXE-4794 (decided Nov. 4, 1978) (unreported decision). If granted: Great Western Drilling Co. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Prentice and West Seminole plants.
Do	Gulf Oil Corp., Tulsa, Okla	DXE-1859	Extension of relief granted in *Gulf Oil Corp.*, 1 DOE par. —— (June 6, 1978). If granted: Gulf Oil Corp. would be permitted to sell the crude oil produced from the Kiefer unit located in Creek County, Okla., at upper tier ceiling prices.
Do	do	DMR-0032	Request for modification in *Gulf Oil Corp.*, 1 DOE par. —— (June 6, 1978). If granted: The DOE's decision and order in case No. DEE-0612, issued June 6, 1978, would be modified to correct a Gulf error made with respect to the percentage of the working interest reported for its Kiefer unit.
Do	Herlocker Fuel Co., Albermarle, N.C	DEE-1862	Exception to change suppliers. If granted: Herlocker Fuel Co. would be assigned a new, lower priced supplier of fuel oil, kerosene, diesel fuel and gasoline to replace its base period supplier, Mainliner Oil Co.
Do	Hunt Petroleum Corp., Dallas, Tex	DXE-1864	Extension of the relief granted in *Hunt Petroleum Corp.*, case No. DXE-0940 (decided July 7, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Kinder plant.
Do	San Joaquin Refining Co., Newport Beach, Calif.	DES-1049	Stay request. If granted: San Joaquin Refining Co. would be granted a stay of the entitlements purchase obligations which it incurred during July 1978 pending a final determination on its application for exception (case No. DXE-1049).
Do	Sierra Anchor Refining Co., San Marino, Calif.	DEA-0218	Appeal of the entitlements notice for June 1978. If granted: The DOE would increase the inventory adjustments to the entitlements position of the Sierra Anchor Refining co. which were made by the Domestic Crude Oil Allocation Office as reflected in the June 1978 entitlement notice (43 FR 38072 (Aug. 25, 1978)) to account for the firm's startup inventories of crude oil.
Do	Skelton Oil Co., Hobbs, N. Mex	DEE-1861	Price exception (sec. 212.73). If granted: Skelton Oil Co. would be permitted to sell the crude oil produced from the Lowe well No. 1 located in Lea County, N. Mex., at upper tier ceiling prices.
Do	Smith & Boyd, Inc., Philadelphia, Pa	DRA-0217	Appeal of revised remedial order. If granted: The Sept. 5, 1978 revised remedial order issued by DOE region III would be rescinded and Smith & Boyd, Inc. would not be required to refund overcharges made in its sales of No. 2 fuel oil to Philadelphia Electric Co.
Do	Marathon Oil Co., Washington, D.C	DSG-0030, DEH-0030, DED-0030, and DES-0103.	Request for special redress; motion for evidentiary hearing; motion for discovery; stay request. If granted: The Office of Hearings and Appeals would remand the Marathon Oil Co.'s application for review of the deputy special counsel's denial of application to quash subpena to an appropriate DOE official under the provisions of 10 CFR 205.8(h). Marathon would be granted a stay of its application for review pending a determination of its request for special redress. An evidentiary hearing would be convened in connection with the application for review and the firm would also be granted discovery with regard to material facts not previously disclosed to the firm.
Do	Pacific Resources, Inc., Honolulu, Hawaii	DEE-1874	Exception to the entitlements program. If granted: Pacific Resources, Inc. would receive additional entitlements to compensate the firm for the cost of shipping fuel oil from its Hawaii refinery to the east coast.
Do	Placid Refining Co., Washington, D.C	DEE-1857	Exception to the entitlements program. If granted: Placid Refining Co. would receive an exception which would result in the calculation of the entitlements program small refiner bias on a separate firm basis.
Do	Sun Co., Inc., Dallas, Tex	DXE-1865 through DXE-1868.	Extension of relief granted in *Sun Company, Inc.*, case Nos. DXE-0915, DXE-0941, DXE-0918, DXE-0942 (decided Apr. 28, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Canales, Peoria, Spivey, and Sun plants.
Do	Texaco, Inc., White Plains, N.Y	DEE-1858	Price exception (sec. 212.83). If granted: Texaco, Inc. would receive an exception from the provisions of 10 CFR 212.83 with respect to the calculation of its F_t factor.
Do	Texaco, Inc., New Orleans, La	DXE-1871	Extension of the relief granted in *Texaco, Inc.*, 1 DOE par. 81,129 (May 17, 1978). If granted: Texaco, Inc. would be permitted to sell the crude oil produced from the BF Reno RA Sand unit located in Pointe Coupee Parish, La., at upper tier ceiling prices.
Do	Texas Pacific Oil Co., Inc., Dallas, Tex	DXE-1878 through DXE-1880.	Extension of the relief granted in *Texas Pacific Oil Co.*, case Nos. DXE-0911 through DXE-0913 (decided July 7, 1978) (unreported decision). If granted: Texas Pacific Oil Co., Inc., would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Adena, Hamlin and South Fullerton plants.
Do	Allen K. Trobaugh, Midland, Tex	DXE-1860	Extension of the relief granted in *Allen K. Trobaugh*, 1 DOE par. 81,116 (Apr. 19, 1978). If granted: Allen K. Trobaugh would be permitted to sell the crude oil produced from the Bailey No. 1 well located in Hockley County, Tex., at upper tier ceiling prices.
Sept. 21, 1978	Southern Union Refining Co., Hobbs, N. Mex.	DEZ-1406	Interlocutory order. If granted: The Office of Hearings and Appeals would issue an interlocutory order clarifying and narrowing the issues which will be considered in an exception proceeding initiated by Southern Union Refining Co. (case No. DEE-1406).
Do	Taylor Oil Co., Sioux Falls, S. Dak	DFA-0219	Appeal of an information request denial. If granted: The DOE's Aug. 16, 1978 information request denial would be rescinded and Taylor Oil Co. would receive access to certain DOE data regarding a DOE audit of its transactions in covered products.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 986-2]

1981 AUTOMOBILE CARBON MONOXIDE EMISSION STANDARDS

Guidelines for Applications for Waiver of the 981 Carbon Monoxide Emission Standard

I. INTRODUCTION AND GENERAL INSTRUCTIONS

Under section 202(b)(5)(A) of the Clean Air Act, as amended (hereinafter the "Act"), 42 U.S.C. 7521(b)(5)(A) (1977), at any time after August 31, 1978, any manufacturer may apply for a waiver of the 1981 carbon monoxide (CO) standard of 3.4 grams per vehicle mile for any model of light-duty motor vehicles manufactured during the 1981 and 1982 model years. As stated in section 202(b)(5)(B), the maximum CO level for which a waiver may be granted is 7.0 grams per mile. Based on the Administrator's determination of what level of CO emissions is attainable by the applicant, the waiver may be granted for a more stringent standard than that requested. In order for a waiver to be granted, each of the criteria specified in section 202(b)(5)(C) must be satisfied. Under these criteria, a waiver can only be granted if the Administrator finds that protection of the public health does not require attainment of the standard of 3.4 grams per mile for those model years and those vehicle for which a waiver is sought. In addition, section 202(b)(5)(C) of the Act provides that a

waiver may only be granted if the Administrator determines that:

(i) Such waiver is essential to the public interest or the public health and welfare of the United States;

(ii) All good faith efforts have been made to meet the standards established by this subsection;

(iii) The applicant has established that effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideratrion costs, driveability, and fuel economy; and

(iv) Studies and investigations of the National Academy of Science conducted pursuant to subsection (c) and other information available to him has not indicated that technology, processes, or other alternatives are available (within the meaning of clause (iii)) to meet such standards.

The decision of the Administrator is required to be made within 60 days after receipt of the application, and after a public hearing (sections 202(b)(5) (A) and (C)). If the Administrator determines that a waiver should be granted, the CO emission standard for those vehicles and those model years to which the waiver is applicable will be prescribed by regulation issued simultaneously with the waiver decision (section 202(b)(5)(A)).

The purpose of this notice is to establish guidelines concerning the information which should be provided in any application for a waiver of the CO standards. In seeking a waiver under section 202(b)(5) of the Act, an affirmative burden is placed on the manufacturer to provide sufficient information to demonstrate that a waiver should be granted. The information contained in the application must be sufficient to satisfy each of the waiver criteria specified above.

The application should contain separate responses to each item specified in section III of these guidelines. The applicant may add to or expand upon any item to the extent he deems necessary or helpful to support the request for a waiver. The application may include any reports, records, or information pertinent to the request. The Administrator may request additional information on any item from the applicant if such information is deemed necessary or useful to the waiver determination. Furthermore, the Administrator need not base his decision solely on the application, and may consider any additional information as well.

The determinations in these proceedings will be based on a public record, and EPA intends to make all information available for public review. Accordingly, an applicant should make every effort to only provide information which can be included in the pulic record. Information claimed to be confidential should only be submitted where the failure to submit such information would seriously jeopardize the success of his application, or where the information has been submitted pursuant to a subpena, and where the release of such confidential information would cause the applicant significant harm. Information for which a claim of confidentiality has been made will be treated according to the following procedures.

In order to claim confidentiality, the manufacturer must submit the confidential information in a separate package identified by a label such as "trade secrets," "company confidential," or other appropriate label. Failure to assert a confidentiality claim in this manner will automatically result in the placing of the information in the public record without further notice. The information will then be reviewed pursuant to the procedures set forth in 40 CFR 2, Subpart B to determine to what, if any, extent the information claimed to be confidential is confidential. If the information is found to be confidential, EPA may, in any case, disclose it pursuant to 40 CFR § 2.301(g). That regulation provides for the disclosure of confidential information upon a determination that it is relevant to the proceeding and that making the information available to the public would serve the public interest. In no instance does section 307(a)(1) of the Act permit a claim of confidentiality with regard to emission data, as defined in 40 CFR § 2.301(a) (1977).

Under section 307(a)(1) of the Act, the Administrator is authorized to "issue subpenas for the attendance of witnesses and the production of relevant papers, books, and documents" in section 205(b)(5) proceeding. Because the Administrator must consider the activities of other vehicle manufacturers in assessing availability of effective technology and the air quality and public health impacts of granting the requested waiver, he may issue such subpenas to other light-duty vehicle manufacturers. Other manufacturers may be required to testify and submit information relevant to the applicant's waiver request, including data that potentially may be used in the manufacturers' waiver applications.

As provided in section 202(b)(5)(C), the waiver decision is to be made after a public hearing. In order to assure meaningful satisfaction of this requirement, interested persons must be given adequate and timely access to the application. Therefore, a minimum of ten (10) (if possible) copies of the application should be submitted to the Director, Mobile Source Enforcement Division (EN-340), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. For purposes of initiating the sixty (60) day period specified in the Act, an application will be considered filed on the day it is received by the Director, Mobile Source Enforcement Division. Any question regarding the guidelines published today may be addressed to Matthew A. Low, Mobile Source Enforcement Division, at the above address.

II. DISCUSSION AND LEGISLATIVE HISTORY

The CO waiver of section 202(b)(5) was added to the Act as part of the Clean Air Act Amendments of 1977, Pub. L. 95-95, 91 Stat. 685 (hereinafter "1977 Amendments"). The provision was put into the 1977 Amendments by the conference committee, after agreement was reached on the statutory light-duty emission standards. See H.R. Rept. 95-564, 95th Cong., 1st sess. 166 (1977) (hereinafter "Conference Report").

The CO waiver provision is intended to be narrow in scope, and a waiver will only be granted if each of the criterion enumerated in section 202(b)(5) of the Act is satisfied. 123 Cong. Rec. S13702-03 (daily ed. August 4, 1977) (remarks of Senator Muskie). As stated by Senator Muskie during Senate consideration of the Conference Report, "the waiver in this bill is tightly constrained to apply only to the minimum extent necessary." Id. at S13703. As further explained by Senator Muskie:

> This waiver is not a general waiver for all manufacturers, nor is it a general waiver for all models of vehicles produced by a single manufacturer. The waiver is intended to assist in the deployment of new technology. It is not to be considered a step in the direction of relaxation of the statutory carbon monoxide standard.

Id.

According to the language of section 202(b)(5)(A), any manufacturer may request a waiver. Under section 216(1) of the Act, 42 U.S.C. 7550(1) (1977), a manufacturer is defined as:

> Any person engaged in the manufacturing or assembling of new motor vehicles or new motor vehicle engines, or importing such vehicles or engines for resale, or who acts for and is under the control of any such person in connection with the distribution of new motor vehicles or new motor vehicle engines, but shall not include any dealer with respect to new motor vehicles or new motor vehicle engines received by him in commerce.

A manufacturer may request a waiver for any model of light-duty vehicles or engines. "Light-duty vehicle" is defined in 40 CFR § 86.077-2 (1977) as "a passenger car or passenger car derivative seating 12 passengers or less." As used in section 202(b)(5)(A), "engines" will mean engines which are to be incorporated into light-duty vehicles. For purposes of section 202(b)(5),

V 43 / 199 / OCT 13 1978

"model" will be considered synonymous with "engine family" as that phrase is defined in 40 CFR § 86.077-2 (1977), and as further defined in 40 CFR § 86.078-24 (a)(2) through (a)(4) (1977). Any separation of "model" based upon 40 CFR § 86.078-24(a)(4) should be fully justified in the application. A separate application should be submitted for each model for which a waiver is sought. In order to avoid a multiplicity of hearings, however, the manufacturer is requested to submit simultaneously applications for all models for which CO waivers will be sought. The manufacturer may cross-reference his other CO waiver applications where appropriate, provided that the precise nature and extent of the cross-reference is noted.

Under section 202(b)(5)(C), a waiver may only be granted if the Administrator finds that protection of the public health does not require attainment of the statutory CO standard of 3.4 grams per mile for those model years for which a waiver is sought, with respect to the vehicles covered by the application. The manufacturer should provide any available information on the public health effects associated with the difference between meeting a CO standard of 3.4 grams per mile and the standard sought in the application, for those vehicles and model years covered by the application. The manufacturer should provide sufficient information in the application to permit the Administrator to determine the effect the waiver would have on each State's ability to meet the primary ambient air quality standard for CO in each air quality control region, for those model years for which the waiver is sought.

In order to grant a waiver under section 202(b)(5) of the Act, the Administrator must be able to make each of the determinations enumerated in section 202(b)((5)(C)(i)-(iv), which are similar to the criteria that applied to requests for suspension under section 202(b)(5)(C) of the Act prior to the 1977 Amendments. As stated in section 202(b)(5)(C)(I) of the current Act, the granting of a waiver requires a determination that "such waiver is essential to the public interest or the public health and welfare of the United States." The manufacturer has the burden of providing sufficient information in the application to demonstrate that this criterion is satisfied. The question of whether the waiver is essential to the public health and welfare involves inquiry into all the health and welfare consequences of denying the waiver, including and examination of fuel economy and unregulated pollutant emission levels. As an example, the waiver could be considered essential to public health if, assuming the waiver were not granted, the use of available technology would result in emissions of some unregulated pollutant which would constitute a health risk. See 40 FR 11900, 11902 (1975) (suspension of 1977 standards due to expected increase in sulfuric acid emissions). This criterion also involves a comparison of the consequences of granting the waiver and denying the waiver. That is, even if denying the waiver would pose a health risk, the applicant must also demonstrate that granting the waiver would eliminate or substantially reduce this risk. With regard to whether the waiver is essential to the public interest, this issue will include consideration of whether the basic demand for automobiles can be met if the waiver is not granted. As explained by Senator Muskie:

> The determination of whether a carbon monoxide waiver is essential to the public interest or the public health or welfare of the United States will, of course, be affected by the performance of the industry as a whole. If only a small percentage of cars appear unable to meet the statutory standard of 3.4 grams, the denial of such a waiver would not make it impossible for the industry to meet the basic demand for automobiles. In addition, the inability of only a small number of cars to meet the statutory carbon monoxide question [sic] may call into question the good faith effort of the manufacturer.

123 Cong. Rec. S13702 (daily ed. August 4, 1977) (remarks of Senator Muskie).

Under section 202(b)(5)(B), the maximum CO level for which a waiver can be granted is 7.0 grams per mile. However, if a manufacturer can meet a more stringent standard during the period for which the waiver is sought, then a waiver will only be granted for this attainable level. Similarly, although a waiver may be sought for the 1981 and 1982 model years, the waiver will be granted only for the 1981 model year if the manufacturer can meet the 3.4 grams per mile standard in the 1982 model year.

III. Application

The waiver application should be prepared in five major sections, and should correspond to the following format.

Section 1. This section should not include any confidential information and should:

a. Identify the applicant as a manufacturer, and identify any other person engaged in the manufacturing, distribution, and sale of vehicles manufactured, distributed, or sold by the applicant.

b. Contain a summary of the applicant's position and supporting arguments with respect to each of the criteria set forth in the above Introduction and Discussion.

c. Describe the model of light-duty vehicles for which the waiver is sought.

d. Set forth the model years for which the waiver is sought.

e. Set forth the interim CO standard for each model year which the applicant believes should be established in lieu of the standard which would otherwise be applicable.

f. Identify to the extent possible those other models and model years for which additional CO waivers will be sought.

Section 2. This section should contain sufficient information to demonstrate that protection of the public health does not require attainment of the 3.4 grams per mile CO standard for those model years for which a waiver is sought, with respect to those vehicles covered by the application. In this section, for the subject vehicles the manufacturer should provide in detail any information which is either currently available or in the process of being generated, concerning the public health effects associated with the difference between meeting a CO standard of 3.4 grams per mile and the standard sought in the application. This information should be sufficient to permit the Administrator to determine the effect the waiver would have on each State's ability to meet the primary ambient air quality standard for CO in each air quality control region, for those model years for which the waiver is sought. To the extent possible, the information provided in this section should take into account all models for which the manufacturer will be requesting CO waivers.

Section 3. This section should provide sufficient information to demonstrate that the waiver being sought is essential to the public interest or the public health and welfare of the United States. To the extent possible, the information provided in this section should take into account all models for which the manufacturer will be requesting CO waivers. If the manufacturer claims that the waiver is essential to the public interest, this section of the application should specify the particular aspect of the public interest which would be served by the waiver, and should describe in detail the consequences of denying the waiver request. As an example, one aspect of the public interest would be the ability to meet basic market demand for automobiles. Similarly, if the manufacturer claims that the waiver is essential to the public health and welfare, this section of the application should specify the particular aspect of the public health and welfare which would be served by the waiver, and should examine in detail the health and welfare consequences of denying the waiver. For example, the waiver could be considered essential to the public health if denying the waiver would result in the emission of some unregulated pollutant in such levels as would pose a risk to public health.

Regardless of whether the manufacturer claims that the waiver is essential to the public health and welfare, this section of the application should also examine the public health consequence of granting the waiver, in order to insure that the waiver will not endanger public health. This involves inquiry into the emission levels and associated health effects of all unregulated pollutants. As part of the demonstration of the necessity for this waiver to benefit the public interest or health and welfare, the manufacturer should fully explain why other models, not requiring such a waiver, could not be substituted into the manufacturer's product line to satisfy the needs of the marketplace.

Section 4. This section of the application should provide all the information necessary to demonstrate that the manufacturer has made all good faith efforts to meet the CO standard of 3.4 grams per mile. this section should include a statement which fully explains the total effort made by the manufacturer, or expected to be made in the future, to achieve compliance with a standard of 3.4 grams per mile, and a detailed account of the manufacturer's financial commitment to this aspect of light-duty vehicle emission control. Section 4 should contain the following subsections:

a. This subsection should present the applicant's statement concerning the level of effort expended in research, development, testing, and engineering programs in the area of light-duty emissions control. This should include all efforts aimed at control of CO, and all other programs dealing with light-duty emission control development which might affect the applicant's CO control program. The statement should include;

1. The overall organizational chart for light-duty emission control activity with an indication of the decisionmaking process in major areas, for example, selection of the first choice 1981 model year system.

2. The composition of the program(s), presented in sufficient detail to include the number and qualifications of professional personnel assigned to CO or related emission control activity, and the academic or functional disciplines involved, the type(s) and quality of major items of laboratory equipment used (e.g., visible, ultraviolet, and infrared spectrophotometers), and the laboratory and testing facilities used. When equipment, projects, and personnel are only partially dedicated to CO or related emission control activities, applicant should indicate the percentage portion of such equipment, projects, and personnel so dedicated.

3. The purpose of each program, including the specific technical problem or area toward which the program is directed, the reasons for the program, the date the program was started and its projected or actual end date.

4. The progress of each program toward achieving the goals set out for it, including information as to: (i) Whether the program is ahead or behind schedule, (ii) important milestones that have been met/not met, (iii) the number of times the program's progress has been reviewed (date and specifics) and the personnel responsible for the review, (iv) the outcome of the program reviews, and (v) any changes there have been in the rate of progress for the program as a result of review and redirection.

5. A narrative discussion of the results. Quantitative data should be included here to the extent it is not presented in other sections of the application.

6. Where an individual project within a program is of significant importance or has been fully discussed in the program description, a narrative description providing at least the following: Time of project start/end, level of effort (man-hours), reason for starting and stopping the project, results obtained, and how the results of the project were used in the overall approach to the emission control program being investigated.

7. That portion of the program(s) carried out under contracts or agreements with other firms or ad hoc organizations.

8. The accomplishments of the research, development, testing, and engineering program(s) in terms of determination of feasible and nonfeasible approaches to emission control, patents obtained or pending, and publications in technological journals, including knowledge and account of any pertinent independent research conducted by facilities not associated with the applicant.

b. This subsection should contain a detailed expression of the applicant's financial commitment to CO or related emission control research, development, testing, and engineering activities for light-duty vehicles.

1. A project narrative should be completed for each project or particular phase of a project in research, development, testing, and engineering for the years 1969 through 1982 (as applicable). The project narrative should include the following:

A. Project title, number, or designation and date started or planned to start.

B. Project description, including objectives, scope, approach, phase, and status. Phase refers to research, development, engineering, testing, or other areas of the CO or related emission control program. Project status should indicate the percentage completion of the project and which phases of the program have been completed for the project and which phases are pending.

C. Description of the project's relationship to the total effort to meet the CO or related emission standards for the 1981 model year and relationship to or dependency upon other projects. The descriptions should include whether the project was originated because of the 1977 Amendments to the Clean Air Act, the original objectives of the project if they have changed since inception, the percent of direct cost attributed to the present project objectives, and the basis of the percentage attribution.

2. Direct research, development, testing, and engineering costs should be summarized. These costs should be presented as shown below, by the type of expense and year of expenditure, including projections for 1979-82, for each project described in section 4(b)(1) of the application, as discussed above. Financial data presented in this subsection must be consistent with the project narratives in 4(b)(1), and should conform to the applicant's normal accounting year (with designation of the fiscal year end).

The outline below is suggested as the format for reporting the direct costs for each project identified in 4(b)(1).

Project title: ————.
Actual cost: 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978.
Projected costs: 1979, 1980, 1981, 1982.

Direct project costs

A. Salaries and wages:
(1) Professionals.
(2) Laboratory technicians.
(3) Other technical and clerical personnel.
B. Chemical and gases.
C. Laboratory supplies.
D. Outside services (identify).
E. Rental expenses.
F. Equipment purchases expense.
G. Depreciation expense.[1]
H. Other direct costs (identify).
I. Total direct project costs.

Other information

J. Number of personnel directly assigned to project at end of each year:
(1) Professionals.
Full time.
Part time.
(2) Laboratory technicians.
(3) Other technical and clerical personnel.

If the expanse classifications listed above are expanded or contracted, such modifications should be done in a consistent manner. Changes in these classifications should be specifically indicated and explained.

[1] Submit separate schedule indicating costs of buildings and-or equipment purchased and the respective asset life used to calculate depreciation.

V 4 3 / 1 9 9 0 C 1 3 7 8

3. Applicant should indicate in this subsection all other costs that may be allocated to the emission control projects reported in 4(b)(1). Such costs are to be listed by year of expenditure, including projections through 1982. This subsection should also include a statement of the manufacturer's total annual light-duty research and development costs (actual or projected) for the years 1969 through 1982, and total domestic (U.S.) annual light-duty vehicle sales (actual or projected) for the years 1969 through 1982.

Section 5. In this section the manufacturer should provide all the information regarding the availability of effective control technology, processes, operating methods, or other alternatives taking into consideration costs, driveability, and fuel economy. This information should establish, with respect to the model(s) covered by the application, that the technology necessary to comply with a 3.4-gram-per-mile CO standard (1) is not presently available, (2) cannot be developed and implemented in the time between the submission of the application and the start of 1981 or 1982 model year production, and (3) will not become available during the 1981 or 1982 model year. All the information and data requested in this section should include and emphasize data regarding that configuration of the model, for which a waiver is requested, having the greatest likelihood of meeting the 3.4-gram-per-mile CO standard. The information requested in this section, if provided with sufficient support material and in sufficient detail, will be considered by the Administrator to be the minimum required of the applicant to establish his inability to comply with the standards. An applicant is, however, encouraged to submit additional data and information which is necessary to support the request.

The section should be divided into two parts. The first part should present a general discussion of the applicant's argument as it relates to the topics listed below. The second part should give a detailed presentation, in the format shown below, of the technical information required to make a meaningful assessment of the applicant's argument.

a. General information: 1. What emission control results have been achieved to date for the first choise system and all alternative system considered for compliance in 1981 and 1982 model years.

2. Engineering goals for the emission levels to be achieved by low-mileage engineering prototypes in order to achieve compliance with the emission standards, including assumptions made to arrive at those goals, factors assumed to allow for production variations, prototype-to-production slippages, and deterioration; and change in production variations assumed to occur by 1981 model year production.

3. Major problems associated with the most promising system investigated, including fuel consumption, emissions of currently unregulated pollutants, reduced driveability, other performance penalties, and any safety, maintenance, servicing, warranty, development (emission performance, durability, and producibility), production tooling, and vendor problems.

4. Plans for resolving the problems identified in 3, including use of technology developed outside the company or outside the automobile industry, timetable for developing solutions, critical milestones for meeting this timetable, confidence palced in the schedule, areas of greatest uncertainty, probable or possible breakthrough(s) that would result in a significant reduction in leadtime.

5. Detailed leadtime schedule for model years 1981 and 1982 production, including crucial milestones, commitment and signoff dates, leadtime requirements of vendors, and specific leadtime schedules for those emission control system components which are most critical. Discussion of how much less leadtime would be required to produce a reduced number of models or nameplates that will comply.

6. The efforts that have been made to identify useful technology developed by other companies.

7. The interim standards which could be met in each of the model years 1981-82 (not to exceed 0.41 HC, 7.0 CO, 1.0 NOx) including the assumptions used to arrive at these attainable levels, emission control system to be used, the extra cost to the car buyer for such a system, and the associated increased annual operating cost. Such interim standards should reflect the greatest degree of emission control achievable by application of available technology.

b. Technical information. Information should be submitted on each and every program, project, or working area that impacts on the overall emission control system development relevant to the waiver application. This should include all programs/projects that are directed toward the development of systems or subsystems to be used in 1981 and 1982 model year emission control systems as well as those programs/projects aimed at the development of systems or subsystems not how actively under consideration for incorporation into 1981 and 1982 model year systems but which at one time were under consideration. Information on all system or subsystem development relevant to the waiver application is necessary even if the program/project was started before the passage of the Clean Air Act Amendments of 1977.

The Administrator will review all data from each of the programs discussed to determine the likelihood that the applicant's systems will be capable of meeting the 3.4 CO standard. A Monte Carlo simulation will be used as part of the analysis methodology applied to these data for that determination. To assure that this technique may be employed, the applicant should supply all data for both emission data prototypes as well as duriability vehicle prototypes. In order that the methodology be properly applied, for each model for which the manufacturer seeks a waiver, variability data must be submitted. The data shall include test-to-test variability data, car-to-car variability data, and DF variability data. All the data, the distributions inherent to the data, and the appropriate standard deviations for the data shall be supplied. The manufacturer's waiver application shall also contain recommendations for the test-to-test, car-to-car, and DF standard deviations to be used in EPA's methodology, along with analyses and rationale that support the recommendations. The treatment of this information in determining the ability of the applicant to meet the 3.4 CO standard will be similar to that described in similar analyses performed in past waiver and suspension considerations (for example, see—In re: Application for Suspension of 1975 Model Year Motor Vehicle Exhaust Emission Standards, *Decision of the Administrator on Remand from the United States Court of Appeals for the District of Columbia Circuit*, April 1973, Appendix B).

1. Test procedures and emission data format. For maximum usefulness all emission data reported should be taken by the 1975 Federal Test Procedure. If this is not possible, data should be reported in its original form, specifying the appropriate test procedure. The data should then be converted into a 1975 test procedure equivalent (if possible) by the applicant. The basis for such a conversion process should include tests with the same type of emission control systems on similar vehicles using both the non-1975 test procedure and the 1975 test procedure. The explanation of each conversion should include a statistical justification of the conversion factors chosen.

2. Vehicle and test description. The vehicles on which the emission data is presented should be fully identified with respect to the following 20 items:

A. Vehicle Description: Vehicle identification No., marketing name and model, body type, tire size, tire manufacturer, tire type, weight (full fuel tank), and intertia weight.

B. Purpose of Test: Durability, experimental system evaluation, etc.

C. Mileage Accumulation Procedure: A.M.A. driving cycle, company durability cycle (specify cycle and maintenance performed), etc.

D. Emissions Test Procedure: 1975 test procedure. Modal emission data are also considered important and should also be supplied, if available.

E. Testing Frequency: Planned/actual mileage accumulation between tests.

F. Engine: Displacement, configuration, bore, stroke, combustion chamber type, and compression ratio.

G. Fuel Metering:

(1) Fuel injection—Type of injection, manufacturer's model number, air/fuel ratio curve, altitude compensation, cold start calibration, and feed back control characteristics.

(2) Carburetion—Type, manufacturer's name and model number, air/fuel ratio curve, altitude compensation, cold start calibration, and feed back control characteristics.

H. Aspiration: Naturally aspirated, supercharged, turbocharged, maximum system air flow rate (cfm).

I. Air Cleaner: Intake air treatment, heat source, modulation procedure, set point temperature, etc.

J. Powertrain: Type—automatic, manual 3 speed, 4 speed, etc.

K. Torque Converter: Size and manufacturer, model No., stall speed, torque muliplication, etc. Indicate if torque converter lockup is used and on which gears.

L. Clutch: Type.

M. Transmission: Type, manufacturer, model No., stall speed, torque multiplication, gear ratios, etc. For automatic transmissions indicate if the shift actuations are controlled conventionally or electronically.

N. N/V: Engine speed with transmission in revolutions per minute divided by vehicle speed expressed in miles per hour.

O. Exhaust Gas Recirculation: Type of control. Flow rate as a function of engine load and speed. Admission flow characteristics, method of modulation, EGR-AECD's.

P. Exhaust Gas Aftertreatment Devices: Thermal reactor—type (lean/rich), configuration, materials, internal flow geometry.

(1) Catalysts—type (reducing, oxidizing, three-way), active material (general) class, loading by noble metal and total weight, per type of metal and of each catalyst material, and the total in troy ounces per vehicle, substrate structure type (monolith/pellet), number of substrate cells per square inch, substrate composition, washcoat composition, total surface area of the washcoat, surface area per displacement of the washcoat, catalyst location, shape and size, geometry, manufacturer and manufacturer's identification number, nominal space velocity, and space velocity range.

(2) Trap Oxidizer—type, configuration, materials, flow geometry.

Q. Electronic controls: Electronic control unit type (analog, digital), parameters sensed (coolant temperature, engine speed, exhaust oxygen content, throttle position, manifold vacuum, humidity, etc.), parameters controlled (air/fuel ratio, ignition timing, EGR rate, choke position, secondary air modulation, etc.), size and amount of program primary storage, relationship between sensed and controlled parameters (equations, graphical representations, etc.), method of programing controller, transducers and actuators used, schematic of electronic control system, effect of power supply voltage variations on control signals, default control logic during failure of any combination of sensors, transducers, and/or actuators.

R. Special System Feature: Any components not shown above which affect the control of emissions.

S. Fuel: Type (gasoline or diesel), all other information required in the application for certification format, as applicable.

T. Engine Lubricant: Brand name, SAE viscosity range, content of sulfur, phosphorous, lead, calcium, etc. Discussion of special additives studied.

U. The date of the test, the driver's full name, the responsible engineer's full name and the project under which this test was performed.

3. Durability testing. Durability testing results are considered important. Durability test data submitted should include at least the following information:

A. A description of the type of durability schedule. The EPA-AMA certification durability schedule is one example. Since this is the schedule from which vehicle deterioration factors are derived for certification purposes, it is considered the most important. It is realized, however, that other durability procedures are considered important to manufacturers. Any available data from so-called "customers service durability" or other schedules, may also be useful. This type of schedule should be clearly identified and described in detail. The reasons for the existence of the test and the way in which the results are used should be identified. If the emissions on these tests (tests other than EPA durability) differ from the emissions on the EPA schedule, the reasons for the differences should be explained.

B. Data taken on EPA durability tests should be reported at the same mileage increments (approximately 5,000 miles) as on regular certification tests. Any variation from the nominal 5,000 mile increment should be explained.

C. More than one data point at each mileage point is preferred. The deterioration factor should be explained fully as to frequency of testing and number of tests at each mileage interval. The explanation should include reasons for conducting the emission testing program, so that the rationale for any characteristic of the test program, such as a single test instead of back to back tests, etc., is apparent.

D. If a test is reported to have been terminated, the reasons for the termination should be explained fully for each case in which durability testing was stopped. The precise reason for the termination of the test, one that is logically consistent with the overall program rationale, should be provided. A discussion of what was learned from terminated tests, for example, a description of the analysis made of failed components, should be included for each test that was stopped. How the results of unsuccessful (or successful) tests feed back to the direction and emphasis of the program is considered important.

E. The number of vehicles used, their relationship to the current and planned product mix, and the number of duplicate vehicles for each engine/transmission family undergoing durability testing should be explained fully. The explanation should indicate (i) the estimated confidence level in the results from the number of test vehicles, and (ii) a comparison between the number of vehicles claimed adequate for emission control systems durability testing and the number of vehicles usually tested for durability in proving out other systems.

4. Test results. All relevant data resulting from developmental programs and projects should be reported. This includes data from durability, performance, component/subsystem checkout, calibration and optimization testing.

A. Emission Test Results. This information should be presented as indicated in section 5(b)(1) of these guidelines and include in chronological order a record of all system changes, maintenance (including reasons for performing maintenance), and a detailed explanation of reasons for test termination when it occurs. Emission data for the system without its catalyst(s) should also be presented, if available, or if determined by modal test performed both upstream and downstream of the catalyst.

B. Costs:

(1) The additional cost of meeting the statutory 3.4 grams per mile CO standard versus those costs which would result from meeting the applicant's suggested waiver standard will be considered in the Administrator's

V 4 3 / 1 9 9

determination. Therefore, the applicant should fully describe those cost differences outlined in the following paragraphs.

(2) First Cost:

(a) The cost breakdown should be by major components such as catalysts, EGR valves, air pumps, ECU's, sensors and/or transducers, and include as separate items such additional hardware as vacuum lines, wiring harnesses, brackets, belts, pulleys, insulation, shields, and requisite engine and/or vehicle modifications.

(b) The production volume assumed, number of suppliers or vendors, and each supplier's approximate market share should be clearly stated.

(c) The method(s) used to estimate the cost to the applicant and the resulting retail price equivalent or "sticker price" such as the expected vendor price times a markup factor should also be described. If such a markup factor is used, the factor should be explicitly stated and a discussion of what influences the level of this factor such as the number of suppliers, component complexity, consumer target market, etc. should also be presented. If the cost to the applicant varies between different suppliers, discuss the extent of such variation relative to the size of the purchasers.

(d) All cost data shall be presented for two cases: Case I: meeting the 3.4 CO standard; Case II: meeting the applicant's recommended interim standard. The incremental cost difference shall also be determined, both as it affects the applicant and as it affects the initial cost to the consumer or the sticker price.

(e) All costs attributable to meeting Federal fuel economy requirements.

(3) Operating Costs:

This should include expected extra costs to the vehicle owner(s) over the vehicle lifetime (assume 100,000 miles) due to:

(a) Fuel and lubricant cost, specifying the miles per gallon fuel economy assumed for each engine emission control system and a comparison to similar earlier model year vehicles.

(b) Maintenance cost, identifying parts and labor cost separately, providing the estimated parts costs and ratio of estimated parts cost for replacement vs. OEM parts for required maintenance on each major emission control component which results in such costs. Labor costs shall be described using labor hours and hourly rate.

C. Driveability. The Administrator will Consider the effect on driveability which may result by meeting either the statutory 3.4 grams per mile CO standard or applicant's suggested waiver standard. In this regard, the applicant should present all available data which indicates that adverse driveability resulting from meeting the statutory 3.4 grams per mile CO standard would lead to increased CO emissions from in-use vehicles due to tampering, maladjustment or similar actions.

To allow a meaningful evaluation of this criterion, the applicant should present all available driveability rating information associated with each engine, control system, transmission, N/V ratio, and vehicle body style combination under consideration for a waiver. The test procedures used by the applicable driveability rating should be fully disclosed, including the applicant's criteria used to determine if the vehicle provides acceptable driveability for sale to consumers.

Since the driveability of vehicles may vary depending upon whether they are prototype developmental vehicles, certification vehicles, running change vehicles, and/or actual production vehicles, the applicant should supply detailed information concerning the driveability of vehicles from previous model year which compares the driveability of prototype developmental certification vehicles, running change vehicles and, finally, production vehicles in consumer use. The information required is as follows: The applicant should supply driveability data on all models, beginning with model year 1967 (and, if the applicant desires, earlier model years) through data from model year 1978 and data available to date on model year 1979 prototype vehicles. For each model year and for each model, driveability and other data should be provided for the engineering sign off vehicle (assumed to be a prototype), the durability vehicle, the emission data vehicle(s) and all running change vehicles of the same model type. The CO standard (1975 FTP basis or emission level for 1967 vehicles) for which each model was designed to meet shall also be provided. In addition for the emission data, durability and running change vehicles, the actual CO data shall be provided.

In addition, for each model and model year the applicant should provide all driveability data from production vehicles. This data can be from vehicles produced and audited for driveability by the manufacturer before sale or subsequent use by the manufacturer, and/or vehicles used in driveability evaluations (e.g., the yearly CRC programs), and/or vehicles that were obtained from owners and tested for driveability by the manufacturers, and/or from warranty and in-use complaint data. With respect to warranty and in-use complaint data, the applicant should provide a summary of all driveability-related warranty and in-use complaint data for each and every model and model year. This summary should specifically identify each and every driveability malperformance area, and the percentage of models affected by each and every driveability problem. Also, the corrective action that was taken and-or recommended by the applicant for each driveability problem should be provided. This comparison will be used as a guide for the Administrator to make projection (as and if necessary) of the driveability performance of vehicles in hands of the public, if data from prototype vehicles are all that are available.

Manufacturers employ a variety of procedures to rate the driveability of their vehicles. It will be of benefit in determining the relative driveability characteristics of the vehicles, therefore, if the manufacturer also supplies parallel sets of driveability ratings performed on the subject vehicles following a commonly accepted procedure such as the CRC rating procedure.

D. Fuel Economy. The Administrator will also consider the effects on fuel economy of requiring that the applicant attain the 3.4 grams per mile CO standard. Therefore, the applicant should present, along with relevant emission data, a comparison of the fuel economy which is estimated to result from the imposition of a 3.4 gram per mile CO standard and the fuel economy which is estimated to result from the imposition of the CO waiver standard for which the applicant is applying. The comparison data should be developed from vehicles whose caracteristics that affect fuel economy are as nearly identical as possible, aside from differences required to meet different CO levels. All vehicle specifications should be fully disclosed as outlined in section 5(b)(2). The data should be developed from the EPA recognized FTP and HWFET procedures.

In addition to actual fuel economy values, the applicant should fully discuss the effect that programs aimed at vehicle weight reduction, vehicle power-to-weight reduction, drivetrain improvement, and engine efficiency improvements will have on fuel economy when considered in conjunction with both the 3.4 gram per mile CO standard and the waiver standard recommended by the applicant.

5. Other pollutants—

A. General. All programs, tests or analyses conducted by or for the applicant, or known by the applicant to have been conducted by component suppliers or others, to identify, quantify, or control the effect of candidate emission control systems on emissions of substances, other than HC, CO, and NOx, should be described. Such descriptions should, at a minimum, identify the organization conducting the study, the types of systems studied, the procedures employed and the types and/or levels or emissions those procedures were expected to identify, quantify, or control and a general description of the results obtained. Detailed discussions of the results of studies in which effects of systems on such emission were found should be provided in subparagraphs B through D below.

B. Particulates. All relevant data on organic and inorganic particulate emissions should be presented. The test procedure by which the particulate emissions were determined should be specified in detail, including the type of instruments, their calibration, and correlation with other methods or instruments.

C. Gaseous emissions. All relevant data and information concerning the amount and nature of gaseous emissions (other than HC, CO, NOx, or sulfur oxides) produced by any developmental control system should be presented. The test procedures by which the emissions were determined should be specified in detail, including the type of instruments, their calibration, and correlation with other methods or instruments.

D. Sulfates. All relevant data and information concerning the amount and nature of sulfate or sulfur oxides emissions should be presented including details on the test conditions, instrumentation, and sampling and analytical methods used. Information regarding the applicant's current activity and results concerning the control of sulfate emissions are especially important and should be provided as follows:

(1) A description of each sulfate emission control device or sulfate emission control method explored by the applicant. Describe the device or method in detail, with an explanation of the principle of operation.

(2) A listing of all tests performed by the applicant with sulfate control devices or methods. Describe the vehicle and the control device/method fully, indicate what the test procedure and analysis method were, and give the baseline results and the modified results for sulfate emissions.

(3) Assessment of the practicability of controlling sulfate emissions on the vehicle. The practicability of control should be based on the applicant's own test and/or knowledge of vehicular sulfate emissions control.

(4) A full description of the level of effort now underway in the area of sulfate emissions control. Note that this includes not only sulfate emissions characterization, i.e., determining how much sulfate emissions are emitted and what factors influence the emission levels, but also the level of effort directly targeted toward developing control of sulfate emissions. Indicate how many engineers and technicians, in man-years of equivalent effort, are now assigned to this area, how much testing and support is being given to this project (for example how many test cells and how much prototype hardware fabrication support is assigned), and what the current plans are for this area (explanation, same level of effort, or lower level of effort).

(5) A full description of any CO/sulfate relationship that may exist or is claimed to exist for the vehicles for which the applicant desires a waiver. A description of programs undertaken to modify the CO/sulfate relationship to enable acceptable performance for both CO and sulfate to be attained. The Administrator is aware that CO/sulfate "tradeoffs" may be postulated. However, that there is a relationship between CO and sulfate for some systems (e.g., oxidation catalysts with uncontrolled air injection systems) has been known for some time, and it is expected that the existence of, and the effort devoted to improved CO and sulfate control will be evaluated from both the technological feasibility point of view and with respect to the determination under section 202(b)(5)(c)(ii).

Dated: October 4, 1978

MARVIN B. DURNING,
Assistant Administrator for Enforcement.

SCIENCE ADVISORY BOARD EXECUTIVE COMMITTEE

Open Meeting

As required by Pub. L. 92-463 notice is hereby given that a meeting of the Executive Committee of the Science Advisory Board will be held beginning at 9 a.m., October 30 and 31, 1978, in the Administrator's Conference Room (Room 1101, West Tower), EPA Headquarters, 401 M Street SW., Washington, D.C.

The agenda includes a briefing on the implementation status of the Toxic Substances Control Act; a discussion of alternatives for promoting a greater cooperation of research activities between universities and the Environmental Protection Agency; plans for reviewing the water quality criteria documents for 65 water pollutants; and a discussion of hazardous disposal issues. The meeting is open to the public.

Any member of the public wishing to attend, participate, or obtain information should contact Dr. Richard M. Dowd, Staff Director, Science Advisory Board, 202-755-0263, by close of business October 25, 1978.

Dated: October 6, 1978.

RICHARD M. DOWD,
Staff Director, Science Advisory Board.

NEBRASKA

Implementation of a Federal Plan for Certification of Pesticide Applicators

On December 7, 1977, the U.S. Environmental Protection Agency (EPA) published in the FEDERAL REGISTER proposed regulations (42 FR 61873) specifying the requirements which would apply to applicators of restricted use pesticides under a Federal certification program. A 30-day public comment period ending on January 6, 1978, was provided.

On June 8, 1978, EPA published in the FEDERAL REGISTER (43 FR 24834) final regulations governing "Federal Certification of Pesticide Applicators in States or on Indian Reservations Where There Is No Approved State or Tribal Certification Plan in Effect." These regulations amended 40 CFR Part 171 by adding a new § 171.11, and became effective on June 8, 1978. All Federal certification plans implemented by EPA must be consistent with these regulations.

On March 15, 1978, EPA Region VII published a notice of its "Intent to Implement a Federal plan for the Certification of Pesticide Applicators" in Nebraska (Notice of Intent) in the FEDERAL REGISTER (43 FR 10727). This notice summarized the planned certification program and provided a 30-day public comment period ending April 15, 1978. Comments were received from seven individuals and organizations. Certain changes in the Federal plan have been made in response to these comments and in agreement with 40 CFR 171.11. Significant comments and modifications to the March 15, 1978, proposed plan are discussed below.

Four commenters questioned the need for a Federal certification program, contending that the Nebraska State plan submitted on June 28, 1977, was adequate and should be approved. The Nebraska State plan was disapproved by the Regional Administrator, EPA Region VII, on November 14, 1977, after a long and careful review, which included a public hearing in the State. A FEDERAL REGISTER notice was published on November 25, 1977 (42 FR 60223), discussing the deficiencies in the State plan. Reasons for rejecting the Nebraska State plan were also briefly summarized in the preamble to the March 15, 1977, Notice of Intent. Nothing has since occurred to change

OCT 13 1978

V 4 3 / 1 9 9 0 C 1 3 7 8

this decision and the Agency's position on this matter remains the same.

Several commenters suggested that the 2-year certification period for commercial applicators under the Federal plan be extended. Some of the commenters argued that the period should be lengthened to 4 years, which would be equal to the average certification period for commercial applicators under approved State plans. One commenter requested that a 3-year period be adopted in order to be consistent with the length of certification for private applicators under this plan. Two commenters also suggested that the 3-year private applicator certification period established by this plan be extended to 4 years to be consistent with the average period under approved State plans. Similar comments were made to the proposed Federal certification regulations, referenced earlier in this notice, and were rejected. The reasons for rejecting these requests were fully discussed in the preambles to the proposed Federal certification rule (42 FR 61873) and the final rule (43 FR 24834-34835), also referenced earlier. The same reasons justify rejection of the comments to this plan. In addition, the certification periods established in this plan must be, and are, consistent with those established by the Federal certification rule at 40 CFR 171.11(c)(4) and 171.11(d)(2).

Several commenters objected to the provision in the proposed plan requiring commercial applicators to renew their certification by passing a written examination. These commenters suggested that completion of an approved training course be allowed as an alternative method of renewal. Similar requests were made in regard to the proposed Federal certification rule and were acted upon by EPA. Accordingly, 40 CFR 171.11(c)(6) now recognizes completion of approved training as a method of renewing commercial applicator certification, and the Federal plan for Nebraska has been amended to reflect this change. However, as stated in the preamble to the Federal certification rule, EPA is not now in a position to provide the training required for renewal of certification. The availability of training will, therefore, be dependent upon the willingness and capability of public or private organizations to develop recertification training programs which can be approved by EPA. Region VII will, on its part, work closely with the Nebraska Cooperative Extension Service (CES), as well as with other training experts, in developing criteria for approving recertification training programs. A memorandum of understanding was finalized on August 14, 1978, between EPA, Region VII, and the University of Nebraska Cooperative Extension Service (CES), assigning the responsiblity for administering the Nebraska pesticide applicator training program for initial certification and for recertification to the CES.

In addition to the previously described changes in commercial applicator recertification methods, the final Federal plan for Nebraska is modified by adding provisions which require certified commercial and private applicators to complete recertification procedures during the 12-month period preceding the certification expiration date. The purpose of this addition is to insure that recertification procedures are not completed so far in advance of certification expiration as to be nonindicative of the applicator's competency at the time his or her certification is renewed. This addition is also required by the final Federal certification rule (40 CFR 171.11(c)(6) and 171.11(d)(3)).

Four commenters criticized the discussion of EPA's inspection and investigation procedures in the Notice of Intent. The commenters were apparently confused by the brief summary contained in the FEDERAL REGISTER notice. They seemed to fear that EPA will engage in unauthorized and unreasonable warrantless searches of commercial and private premises, without seeking the consent of the property owner. They also seemed to believe that EPA's inspectors are not sufficiently guided and regulated in the exercise of their duties. Such fears are groundless. The Federal plan itself described in some detail the procedures inspectors will follow and the limits placed on their authority. This includes a commitment by EPA to seek a warrant or consent before inspecting private premises where pesticides are being applied. Proposed amendments to FIFRA, recently approved by a congressional conference committee, do expressly confirm EPA's interpretation that it has authority to conduct warrantless inspections of the books, records, and business establishments of commercial applicators applying pesticides for hire in States, such as Nebraska, where EPA has primary responsibility for enforcing pesticide use laws. However, such warrantless inspections, and all other inspections in Nebraska, will be conducted consistently with procedures and methods carefully specified in EPA's Pesticides Inspection Manual. These restraints and guidelines insure that EPA inspectors will continue to act within the bounds of their authority, and will respect the rights of all individuals.

Five commenters suggested that region VII accept as sufficient for Federal certification purposes, commercial applicator examinations administered by the Nebraska Department of Agriculture after December 31, 1977, as it has agreed to do for examinations administered during 1977. This was reviewed in the March 15, 1978, Notice of Intent. During 1977, EPA Region VII provided the State department of agriculture with a grant requiring the State to administer a certification program which would meet Federal standards. This grant has expired and has not been renewed. Without such a grant or a formal agreement between EPA Region VII and the Nebraska Department of Agriculture, the State is under no obligation to administer a certification program that meets the Federal standards. Without such assurances, EPA would need to continually evaluate each State examination to determine whether it meets the minimum Federal standard. Since this agreement was unattainable, State examinations will not be accepted after December 31, 1977. Therefore, region VII rejects this proposal.

Four commenters expressed their opinion that training and examination of commercial applicators should be offered more often and in more locations than are currently planned. Their desire is apparently to make certification more convenient for commercial applicators. EPA has already arranged the most reasonable and convenient examination and training schedules possible within the Agency's budget. Examinations will be arranged daily, on request, to EPA's office in Lincoln, Nebr. Examinations will also be offered on a regularly scheduled basis at other locations in the State. Also, the Nebraska CES will offer training semiannually to commercial applicators seeking such training. No revisions are contemplated at this time.

Four commenters asked for clarification as to how a Nebraska reciprocal certification would relate to a State with a longer time period before expiration. As stated in the Notice of Intent, a Nebraska reciprocal certification will expire 2 years from the date of issuance or upon termination of the certification issued by the other State, whichever occurs first. This procedure is designed to facilitate administrative efficiency. Therefore, EPA Region VII believes the Federal plan is adequate as written and does not need further revision.

Five commenters objected to the proposed recordkeeping requirements for commercial applicators on the grounds that the required record contents would exceed those established by regulation as the minimum required under an approvable State plan (40 CFR 171.7(b)(1)(iii)(E)). EPA Region VII believes that the recordkeeping requirements are consistent with those established at 40 CFR 171.11(c)(7). Similar comments were made to the proposed Federal certification rule, and were generally rejected for reasons stated in the preamble to the final Federal certification rule.

On commenter suggested that recordkeeping requirements for dealers of restricted use pesticides be discussed in the Federal plan for Nebraska. EPA currently does not require dealers who are not producers of pesticides to keep any records. However, proposed amendments to FIFRA, expected to be enacted in the near future, expressly authorize EPA to require dealers to keep records specified by the Administrator. EPA expects that such recordkeeping requirements will be imposed soon after the amendments to FIFRA become law. In the interim, EPA Region VII will exercise it authority under section 8(b) of FIFRA to inspect the records which dealers keep in the ordinary course of their business, as described in section VI.A of the Federal plan for Nebraska.

One commenter asked if a person certified in the subcategory food processing and grain handling also needs to be certified in the category industrial, institutional, structural and health related pest control. A person need not be certified in the category to work in the subcategory because the two are separate and independent.

Finally, certain minor technical corrections have been made in the Federal plan for Nebraska. Neither these changes, nor the ones made in response to comments or to changes in the Federal certification rule, substantially change the basic design or operation of the Federal plan. Therefore, further public comment on this plan is not necessary.

Accordingly, the Regional Administrator, Region VII, hereby gives notice that the Federal plan for the State of Nebraska, as amended, is effective upon signature of this notice.

Dated: September 21, 1978.

KATHLEEN O. CAMIN,
Regional Administrator,
Region VII.

[FRL 986-3; OPP-180239]

OKLAHOMA DEPARTMENT OF AGRICULTURE

Issuance of Specific Exemption To Use Botran 75W To Control Sclerotinia Blight on Peanuts

The Environmental Protection Agency (EPA) has granted a specific exemption to the Oklahoma Department of Agriculture (hereafter referred to as the "Applicant") to use Botran 75W for the control of *Sclerotinia* Blight on 15,000 acres of peanuts in 10 counties in Oklahoma. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., room E-315, Washington, D.C. 20460.

According to the Applicant, the *Sclerotinia* Blight which is caused by the plant pathogen *Sclerotinia sclerotiorum* (syn. *S. minor*) is a relatively new disease on peanuts in the United States, being first reported in 1971. *S. sclerotiorum* invades the tap root, lateral branches, and pegs at the soil line and eventually causes rotting of the peanut pods. Cool, wet conditions are optimum for its development. Because of the overhead irrigation system used to grow peanuts in Oklahoma, these conditions exist and 30,000 acres of peanuts in the counties of Bryan, Caddo, Carter, Grady, Hughes, Johnson, Lincoln, Love, Marshall, and Stephens are infected with this pathogen. Since the peanut growing season is close to completion, the Applicant stated that only 15,000 acres could be treated this year.

There are no EPA-registered fungicides for the control of *S. sclerotiorum* on peanuts. Several fungicides have been tested and shown to be effective for the control of *Sclerotinia* Blight on peanuts. Pentachloronitrobenzene (PCNB) when used at maximal label rates did control *S. sclerotiorum* in some instances, but not in others. Multiple applications of Benomyl also provided adequate control. Neither of these fungicides is registered although PCNB has a registration for peanut pod rot complex. Botran 75W has been shown to be efficacious for control of *S. sclerotiorum.* In addition, Botran 75W is registered for the control of *Sclerotinia* on several vegetable crops (beans, celery, cucumbers, lettuce, onions, and potatoes).

The Applicant will use Botran 75W, manufactured by the Upjohn Company, containing the active ingredient 2,6-dichloro-4-nitroaniline, in a single application at a dosage rate of 4 pounds of product (3 pounds active ingredient) per acre. Applications of Botran will be made through overhead irrigation sprinkler systems by peanut growers. The diagnosis of this plant pathogen must be made before Botran 75W is applied.

The Applicant estimates that yield losses of about 714 pounds of peanuts per acre, representing a monetary loss of $2,142,000, could occur without a suitable control program.

This use of Botran 75W will not pose a threat to the public health, since the residue expected to occur on peanut meat and hulls (less than 0.1 part per million (ppm)) is insignificant. Treated peanut vines or hay may not be used as livestock feed items.

After reviewing the applications and other available information, EPA has determined that (a) a pest outbreak of *Sclerotinia* Blight has occurred; (b) there is no pesticide presently registered and available for use to control this pest in Oklahoma; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until October 7, 1978, to the extent and in the manner set forth in the applications. This specific exemption is also subject to the following conditions:

1. The Upjohn product, Botran 75W, which contains the active ingredient dichloran (2,6-dichloro-4-nitroaniline), is authorized at a dosage rate of 4 pounds product (3 pounds active ingredient) per acre applied via overhead irrigation systems. Up to 15,000 acres of peanuts located in the 10 counties named above may be treated;

2. A single application per acre per season is authorized;

3. Botran 75W is to be used only after the presence of *Scleortinia* Blight is diagnosed in a given area by State Extension personnel;

4. All tail water must be contained when Botran 75W is used in irrigation systems;

5. Growers may apply this pesticide provided pesticide dealers disseminate copies of the proper procedures to be followed in applying Botran 75W under this specific exemption. Agricultural Extension agents, plant pathologists, and peanut specialists shall be available to assist growers;

6. All label precautions, directions, and restrictions must be adhered to;

7. Botran 75W-treated peanut fields must not be grazed nor shall the treated vines be used as a feed item;

8. A pre-harvest interval of 30 days shall be observed;

9. A residue level of 2,6-dichloro-4-nitroaniline in or on peanut meat and hulls not exceeding 0.1 ppm has been deemed adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

10. The EPA shall be immediately informed of any adverse effects resulting from the use of Botran 75W in

V 43 / 199 OCT 13 78

connection with this specific exemption; and

11. A final report, which summarizes the results of this program, must be submitted to the EPA by May 31, 1979. This report shall include, but is not limited to, the following information: (a) what residues of dichloran occurred in peanuts treated with Botran 75W via irrigation systems; and (b) the degree of control of *Sclerotinia* Blight achieved by this method of applying Botran 75W.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).)

Dated: October 5, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

FM BROADCAST APPLICATION READY AND AVAILABLE FOR PROCESSING

Adopted: October 6, 1978.

Released: October 10, 1978.

Cutoff Date: November 15, 1978.

Notice is hereby given that the FM broadcast application listed below will be considered as ready and available for processing on November 16, 1978. Since the listed application is timely filed and mutually exclusive with the earlier-filed and cutoff application of Poet's Seat Broadcasting, Inc. (File No. BPH-10440), no other applications which involve conflict with these applications may be filed. Rather, the purpose of this Notice is to establish a date by which the parties to the forthcoming comparative hearing may compute the deadlines for filing amendments as a matter of right under § 1.522(a)(2) of the rules and pleadings to specify issues pursuant to § 1.584.

[BC Docket No. 78-326; File No. BRCT-746; FCC 78-674]

FAITH CENTER, INC.

Order and Notice of Apparent Liability; Designating Applications for Hearing on Stated Issues

Adopted: October 2, 1978.

Released: October 11, 1978.

1. The Commission has before it for consideration the captioned application and its inquiries into the operation of Station KHOF-TV, San Bernardino, Calif., licensed to Faith Center, Inc.

2. Information before the Commission raises serious questions as to whether the captioned applicant possesses the qualifications to be or remain the licensee of the captioned station. In view of these questions, the Commission is unable to find that a grant of the Station KHOF-TV license renewal application would serve the public interest, convenience and necessity, and must, therefore, designate the application for hearing.

3. *Accordingly, it is ordered,* That the captioned application is designated for hearing pursuant to section 309(e) of the Communications Act of 1934, as amended, at a time and place to be specified in a subsequent Order, upon the following issues:

(a) To determine all the facts and circumstances surrounding Faith Center, Inc.'s, failure to permit Commission access to certain licensee books, records, and employees.

(b) To determine whether Faith Center, Inc., failed to submit information requested by the Commission in the Commission's letter dated June 15, 1978.

(c) To determine whether in its over-the-air fund-raising broadcasts, Faith Center, Inc., violated, or is in violation of, Title 18, United States Code Section 1343.

(d) To determine, in light of the evidence adduced under the preceding issues, whether the applicant possesses the requisite qualifications to be or to remain a licensee of the Commission, and whether a grant of the captioned application would serve the public interest, convenience and necessity.

4. *It is further ordered,* That the Chief, Broadcast Bureau, is directed to serve upon the captioned applicant within thirty (30) days of the release of this Order, a Bill of Particulars with respect to Issues (a), (b) and (c).

5. *It is further ordered,* That if it is determined that the hearing record does not warrant an Order denying the captioned application for renewal of license for Station KHOF-TV, it shall also be determined whether the applicant has violated Title 18 U.S.C. 1343. If so, it shall also be determined whether an Order of Forfeiture pursuant to section 503(b) of the Communications Act of 1934, as amended, in the amount of $20,000 or some lesser amount, should be issued for any such violations.

6. *It is further ordered,* That this document constitutes a Notice of Apparent Liability for forfeiture for violation of Title 18 U.S.C. 1343. The Commission has determined that, in every case designated for hearing involving revocation or denial of renewal of license for alleged violations which also come within the purview of section 503(b) of the Act, it shall, as a matter of course, include this forfeiture notice so as to maintain the fullest possible flexibility of action. Since the procedure is thus a routine or standard one, we *stress* that the inclusion of this notice is not to be taken as in any way indicating what the initial or final disposition of the case should be; that judgment is, of course, to be made on the facts of each case.

7. *It is further ordered,* That the Broadcast Bureau proceed with the initial presentation of the evidence with respect to issues (a), (b), and (c) and the applicant then proceed with its evidence and have the burden of establishing that it possesses the requisite qualifications to be a licensee of the Commission and that a grant of its application would serve the public interest, convenience, and necessity.

8. *It is further ordered,* That to avail itself of the opportunity to be heard, the applicant herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall file with the Commission, within twenty (20) days of the mailing of this Order, a written appearance in triplicate, stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

9. *It is further ordered,* That the applicant herein, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, shall give notice of the hearing within the time and in the manner prescribed in such rule and shall advise the Commission thereof as required by § 1.594(g) of the rules.

10. *It is further ordered,* That the Secretary of the Commission send a copy of this Order by Certified Mail, Return Receipt Requested to Faith Center, Inc., licensee of Station KHOF-TV, San Bernardino, Calif.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[6712-01-M]

[SS Docket Nos. 78-318, 78-319; File Nos. 176-A-L-58, 221-A-L-68]

TRANS REGIONAL AIR AND CITY OF BIG SPRING

Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: September 29, 1978.

Released: October 5, 1978.

In re applications of Trans Regional Air Big Spring, Tex., SS Docket No. 78-318, File No. 176-A-L-58; city of Big Spring, Big Spring, Tex., SS Docket No. 78-319, File No 221-A-L-68; for an aeronautical advisory station to serve the Big Spring Municipal Airport, Big Spring, Tex.

1. The City of Big Spring, Tex. (hereinafter called The City) and Trans Regional Air (hereinafter called Trans Regional) have both filed applications to operate an aeronautical advisory station at Big Spring Municipal Airport, Big Spring, Tex. In that § 87.251(a) of the Commission's rules provides that only one aeronautical advisory station may be authorized at a landing area, the above applications are mutually exclusive. Accordingly, it is necessary to designate these applications for comparative hearing in order to determine which, if any, should be granted.

2. On July 17, 1978, the Commission issued a license to Trans Regional Airlines to operate Aeronautical Advisory Station WQT 4 at the Big Spring Municipal Airport. The City of Big Spring, Tex., in a letter dated July 20, 1978, stated that they never received written notice that Trans Regional Air was intent on filing an application for the Aeronautical Advisory Station at Big Spring Municipal Airport. Since § 87.251(b) of our rules requires that each applicant give written notice of their intent to file an application for an Aeronautical Advisory station to the owner of the landing area and all aviation service organizations on the landing area the authorization to operate Station WQT 4 from July 17, 1978, to July 17, 1983, was set aside on July 28, 1978, pursuant to § 1.113 of our rules.[1]

3. The City filed its application for an aeronautical advisory station on July 28, 1978. This application became mutually with Trans Regional's application assuming that notice was not, in fact, given to the City by Trans Regional. In this connection Trans Regional maintains that notice was given and the City's position is that it never received notice. If it is determined in this proceeding that Trans Regional did, in fact, give the City notice then the City would not be entitled to file a competing application under the "cut-off" rules (§ 1.227) and the station authorization (WQT 4) previously granted to Trans Regional and set aside by the Commission should be reinstated nunc pro tunc. On the other hand, if it is determined that Notice was not given as alleged by the City then the applications are mutually exclusive and subject to a comparative hearing. Appropriate issues follow to resolve this matter.

4. In view of the foregoing: *It is ordered,* That pursuant to the provisions of section 309(e) of the Communications Act of 1934, as amended, and § 0.331 of the Commission's rules, the above-captioned applications are hereby designated for hearing in a consolidated proceeding at a time and place to be specified in a subsequent Order on the following issues:

a. To determine if Trans Regional Air gave the City of Big Spring written notice of their intent to file an application for an Acronautical Advisory station at Big Spring Municipal Airport as required by § 87.251(b) of our rules, and if not

b. To determine which applicant would provide the public with better aeronautical advisory service based on the following considerations;

(1) Location of the fixed-base operation and proposed radio station in relation to the landing area and traffic patterns;

(2) Hours of operation;

(3) Personnel available to provide advisory service;

(4) Experience of applicant and employees in aviation and aviation communications, including but not limited to operation of stations in the Aviation Services (Part 87) that may be or have been authorized to the applicant;

(5) Ability to provide information pertaining to primary and secondary communications as specified in § 87.257 of the Commission's rules;

(6) Proposed radio system including control and dispatch points; and

(7) The availability of the radio facilities to other fixed-base operators; and,

c. To determine if Trans Regional's failure to give notice was willful and if so the effect of such conduct on its ability to be a licensee of a Unicom station at Big Spring Municipal Airport;

d. To determine in light of the evidence adduced on the foregoing issues which of the applications should be granted.

4. *It is further ordered,* That the burden of proof and the burden of proceeding with the introduction of evidence is on each applicant with respect to its application except issues (a) and (c) where the burdens are on Trans Regional and issue (d) which is conclusory.

5. *It is further ordered,* That to avail themselves of an opprotunity to be heard, Trans Regional and The City, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall within 20 days of the mailing of this order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date set for hearing and present evidence on the issues specified in this order. Failure to file a written appearance within the time specified may result in dismissal of the application with prejudice.

CARLOS V. ROBERTS,
Chief, Safety and Special Radio Services Bureau.

FEDERAL HOME LOAN BANK BOARD

FEDERAL SAVINGS AND LOAN ADVISORY COUNCIL

Notice of Meeting

OCTOBER, 3,1978.

Pursuant to section 10(a) of Pub. L. 92-463, entitled the Federal Advisory Committee Act, notice is hereby given of the meeting of the Federal Savings and Loan Advisory Council on Monday, November 13; Tuesday, November 14; and Wednesday, November 15, 1978. The meeting will commence at 9 a.m. on November 13, 14, and 15 at the Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. in the sixth floor Board Room.

MONDAY, NOVEMBER 13

9 a.m.—General Discussion.
9:20 a.m.—Bank Board Goals.
10:30 a.m.—Dividend Equalization Program.
Inclusion of FHA and VA in Scheduled Items.
Reserve Earmarking Requirements.
Review of Federal Reserve Rule Allowing Automatic Transfers.
1 p.m.—Acceptable Collateral for Treasury Tax and Loan Accounts
Appraisal Distribution Regulation and Alternatives Thereto.
90 percent loans to Owner-Occupied 3-4 Family Units.
Mortgage Revenue Bond Issues.
Implementation of the Community Investment Fund.
Money Market Certificates.
Underwriting Guidelines.
Review of Examination Procedures.
Deferred Fees and Acquisition Credits.
Commercial Bank Ownership in the Federal Home Loan Mortgage Corporation.
Retirement Savings Accounts.
Associations With Similar Names.

TUESDAY, NOVEMBER 14

9 a.m.—Continued discussion of Monday afternoon topics.
1 p.m.—General discussion.

WEDNESDAY, NOVEMBER 15

9 a.m.—General discussion.

V 43 / 199 0 OCT 13 78

The meeting of the Federal Savings and Loan Advisory Council is open to the public.

ROBERT H. MCKINNEY,
Chairman.

FEDERAL MARITIME COMMISSION

COLLECTIVE BARGAINING AGREEMENTS

Notice of Temporary Exemption

Notice is hereby given that on October 3, 1978, the Commission determined the following collective bargaining agreements to be temporarily exempt from the filing and approval requirements of section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814), pending FEDERAL REGISTER notice, opportunity for comment, and subsequent determination by the Commission that the agreements (or any specific provision thereof) should be permanently exempt from the filing and approval requirements of section 15 of the Shipping act, 1916, or should be approved, disapproved or modified under that section. This action was taken in accordance with our interim policy statement—collective bargaining agreements, served June 12, 1978. This temporary exemption is effective until January 11, 1979.

Interested parties may inspect the agreements at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., room 10218; or at the field offices located at New York, NY., New Orleans, La., San Francisco, Calif., Chicago, Ill., and San Juan, P.R. Comments on the agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Comments should include facts and arguments concerning the exemption, approval, modification or disapproval of the proposed agreements. Comments shall discuss with particularity allegations that the agreements are unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operate to the detriment of the commerce of the United States, or are contrary to the public interest, or are in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: LM-23, as amended and supplemented, between the International Longshoremen's & Warehousemen's Union and the Pacific Maritime Association.

Filing party: R. Frederic Fisher, Esquire, Lillick, McHose & Charles, Two Embarcadero Center, San Francisco, Calif. 94111.

Summary: The following agreements constitute the 1978-1981 collective bargaining agreement between the International Longshoremen's & Warehousemen's Union (ILWU) and the Pacific Maritime Association (PMA) concerning ILWU watchmen in San Francisco, Los Angeles and Long Beach, Calif.:

LM-23: Agreement dated September 5, 1973;
LM-23-1: Memorandum of understanding dated August 18, 1975;
LM-23-2: Memorandum of understanding dated August 15, 1978;
LM-23-3: August 15, 1978, letter agreement confirming certain understandings reached during the 1978 ILWU-PMA watchmen's negotiations;
LM-23-A: ILWU-PMA watchmen pension plan agreement; and
LM-23-B: First amended ILWU-PMA watchmen pension fund-declaration of trust.

By order of the Federal Maritime Commission.

Dated: October 10, 1978.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 76P-0163]

IDENTITY AND QUALITY STANDARD FOR CANNED PINEAPPLE JUICE

Amended Notice of Interim Standards

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document modifies the advice given in the partial confirmation notice, previously published, that pineapple juice from concentrate should contain an amount of soluble solids equivalent to that of the single strength pineapple juice from which the concentrate was prepared. This document advises that pineapple juice from concentrate may be marketed at 12.5° Brix or more pineapple juice soluble solids. This advice on the appropriate soluble solids level is an interim measure pending a decision as to whether a hearing will be necessary to resolve issues raised by objections to the 132.5° Brix minimum pineapple juice soluble solids which would have been required by the final regulation.

FOR FURTHER INFORMATION CONTACT:

F. Leo Kauffman, Bureau of Foods (HFF-414), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1164.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of March 14, 1978 (43 FR 10552), the Commissioner of Food and Drugs issued a notice of partial confirmation of effective date and stay of one provision of the final regulation amending the standards of identity (21 CFR 146.185(a)) and quality (21 CFR 146.185(b)) for canned pineapple juice. Based upon an objection and request for a hearing, the effective date of the 13.5° Brix minimum pineapple juice soluble solids requirement for pineapple juice from concentrate in the standard of quality published in the FEDERAL REGISTER of May 28, 1976 (41 FR 21768) was stayed pending a determination of whether a public hearing is necessary to resolve the issue raised by the objection. The Commissioner advised that, pending final resolution of the issue, he would consider pineapple juice from concentrate to be misbranded if the level of pineapple juice soluble solids is not equivalent to that in the single strength pineapple juice from which the concentrate was prepared.

In regard to this advice on the interim requirement, the Pineapple Growers Assn. of Hawaii (PGAH) submitted a comment stating that the soluble solids of pineapple juice is at a constantly changing Brix as it is being processed into concentrated pineapple juice in a "continuous system." Consequently, PGAH asserted it is not practical to reconstitute pineapple juice from concentrate to a soluble solids level equivalent to that of the juice from which the concentrate was prepared. PGAH stated that the juice is fed continuously into the evaporator at approximately 100 gallons per minute and, therefore, the Brix of the juice being concentrated is constantly fluctuating. PGAH requested that, in view of the impracticality of the interim requirement, the March 14, 1978 notice be amended by deleting the requirement and establishing in its place a 12.5° Brix minimum soluble solids requirement for "pineapple juice from concentrate" pending the resolution of the issue resulting from the objection. Juice Bowl Products, Inc., the objector to the original 13.5° Brix minimum soluble solids requirement, has advised the Food and Drug Administration that it does not object to the PGAH request.

The Commissioner has considered the request submitted by PGAH regarding the interim soluble solids level for pineapple juice from concentrate. He believes that pineapple juice from concentrate will be misbranded if it is not reconstituted to a reasonable approximation of the Brix level of the pineapple juice from which it is made. He is persuaded that 12.5° Brix minimum pineapple soluble solids level can be considered a reasonable approximation of the Brix level as an interim matter pending a decision on whether a hearing is necessary. Therefore, he modifies the advice provided in the partial confirmation of effective date by advising that pineapple juice from concentrate will not be regarded as misbranded if it has a minimum Brix level of 12.5°. The food should also be labeled in accordance with 21 CFR 146.185(b)(3).

Dated: October 4, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner 04for Regulatory Affairs.

Health Resources Administration

EXPANDED FUNCTION DENTAL AUXILIARY TRAINING GRANTS

Application Announcement

The Bureau of Health Manpower, Health Resources Administration, announces that applications for fiscal year 1979 Grants for Expanded Function Dental Auxiliary (EFDA) training are now being accepted under authority of section 783 of the Public Health Service Act, Title VII.

Section 783 authorizes the Secretary to make grants to public and nonprofit private schools of dentistry, or other public or non-profit private entities, which have programs for the training of dental hygienists or dental assistants, to meet the cost of projects to: plan, develop and operate or maintain programs for the educational preparation of dental hygienists and dental assistants to be efficient members of the dental health care team, who can perform legally delegated expanded functions under supervision of the dentist.

These educational entities shall offer ongoing educational programs which extend for at least one academic year and consist of supervised clinical practice and at least four (4) months (in the aggregate) of classroom instruction and plan to enroll not less than eight (8) students for expanded functions training.

All public and non-profit private schools of dentistry or other public or non-profit private entities, which have programs for the training of dental hygienists or dental assistants and which are accreddited by the Commission on Accreditation for Dental and Dental Auxillary Educational Programs, within the United States, its territories and possessions are eligible to apply.

Based on the proposed appropriation for the EFDA program and projected requirements for continuation grants, and estimated $300,000 will be available for competitive grant awards in Fiscal Year 1979.

Requests for application materials and questions regarding grants policy should be directed to:

Grants Management Officer,
Bureau of Health Manpower,
Health Resources Administration,
Center Building, Room 4-27,
3700 East-West Highway,
Hyattsville, Maryland 20782,
Phone: 301-436-6564.

To be considered for fiscal year 1979 funding, completed applications must be postmarked no later than November 30, 1978, and sent to the Grants Management Officer at the above address.

Should additional program information be required, please contact:

Education Development Branch,
Division of Dentistry,
Bureau of Health Manpower,
Health Resources Administration,
Center Building, Room 3-30,
3700 East-West Highway,
Hyattsville, Maryland 20782,
Phone: 301-436-6514

Dated: October 3, 1978.

Public Health Service

NATICNAL INSTITUTES OF HEALTH

Statement of Organization, Functions, and Delegations of Authority

Part H, chapter HN (National Institutes of Health) of the statement of organization, functions, and delegations of authority for the Department of Health, Education, and Welfare (40 FR 22859, May 27, 1975, as amended most recently at 43 FR 4114, January 31, 1978) is amended to reflect the establishment of the Office for Medical Applications of Research (HNA9) within the Office of the Director, National Institutes of Health (NIH). This Office will play an important role in increasing the timely and effective transfer of research knowledge into health practice.

Sec. HN-B, Organization and Functions, is amended as follows:

(1) Under the heading Office of the Director (HNA), insert the following statement after the statement for the Division of Scientific Reports (HNA83):

Office for Medical Applications of Research (HNA9): (1) Advises the Director, NIH, and his senior staff, and provides guidance to the bureaus, institutes, and divisions on medical applications of research; (2) coordinates, reviews, and facilitates the systematic identification and evaluation of clinically relevant NIH research program information; (3) promotes the effective transfer of this information to the health care community and through the PHS Office of Health Technology (OHT) to those agencies requiring such information; (4) provides a link between technology assessment activities of the bureaus, institutes, and divisions of the NIH and the OHT; and (5) monitors the effectiveness and progress of the assessment and transfer activities of the NIH.

Dated: October 4, 1978.

LEONARD D. SCHAEFFER,
Assistant Secretary for Management and Budget.

ANIMAL RESOURCES ADVISORY COMMITTEE AND PRIMATE RESEARCH CENTERS ADVISORY COMMITTEE

Renewals

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the National Institutes of Health announces the merger on September 2, 1978, by the Secretary, HEW, with the concurrence of the Committee Management Secretariat, of the Animal Resources Advisory Committee and the Primate Research Centers Advisory Committee, and the renewal of these committees as one under the new title of the Animal Resources Review Committee.

Authority for the above committee will expire on March 2, 1979, unless the Secretary formally determines that continuance is in the public interest.

Dated: September 26, 1978.

BOARD OF SCIENTIFIC COUNSELORS, NEI

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, December 18 and 19, 1978, Building 31, room 6A-35, National Institutes of Health, Bethesda, Md.

This meeting will be open to the public on December 18 from 8:30 a.m. until 2:30 p.m. for general remarks by the Institute Director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on December 18 from 2:30 p.m. until adjournment and the entire day on December 19 for review, discussion, and evaluation of individual projects conducted by the Laboratory of Vision Research, NEI. This evaluation and discussion could reveal personal information concerning individuals associated with the projects. Consequently, this meeting is concerned with matters exempt from mandatory disclosure.

Mr. Julian Morris, Chief, Office of Program Planning and Scientific Reporting, National Eye Institute, Building 31, room 6A-25, telephone 301-496-5248 will furnish summaries of the meeting and rosters of committee members.

Substantive program information may also be obtained from Dr. Carl Kupfer, Director, National Eye Institute, Building 31, room 6A-03, telephone 301-496-2234, National Institutes of Health, Bethesda, Md. 20014.

Dated: October 5, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS, NICHD

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Child Health and Human Development, November 13, 1978, in Building 31, room 2A-52. This meeting will open to the public from 9 a.m. to 3 p.m. on November 13 for the review of the NICHD Intramural Research Programs. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 3 p.m. to adjournment on November 13 for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, NICHD, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.
